Enterprise Metals Limited (ASX: ENT) ('ENT' or the 'Company') is pleased to provide the following Summary Report on its activities during the September 2025 Quarter.

### Doolgunna Project, WA: ENT 100% - Gold – Copper – ( 80km <sup>2</sup> )

The Yugunga-Nya People (NYP) undertook a Heritage Survey on 22 July 2025, thereby allowing drill pads and sumps for the Reverse Circulation drilling program over the Vulcan gold prospect and planned Air Core drilling program on the Goodins Fault gold prospect.

On 14 October 2024, DEMIRS advised that Enterprise had been awarded a grant of up to \$90,000 for RC drilling under the WA Government's Exploration Incentive Scheme. (EIS). This grant will cover just under 50% of Enterprise's planned RC/AC budget for the Vulcan/Goodins areas.

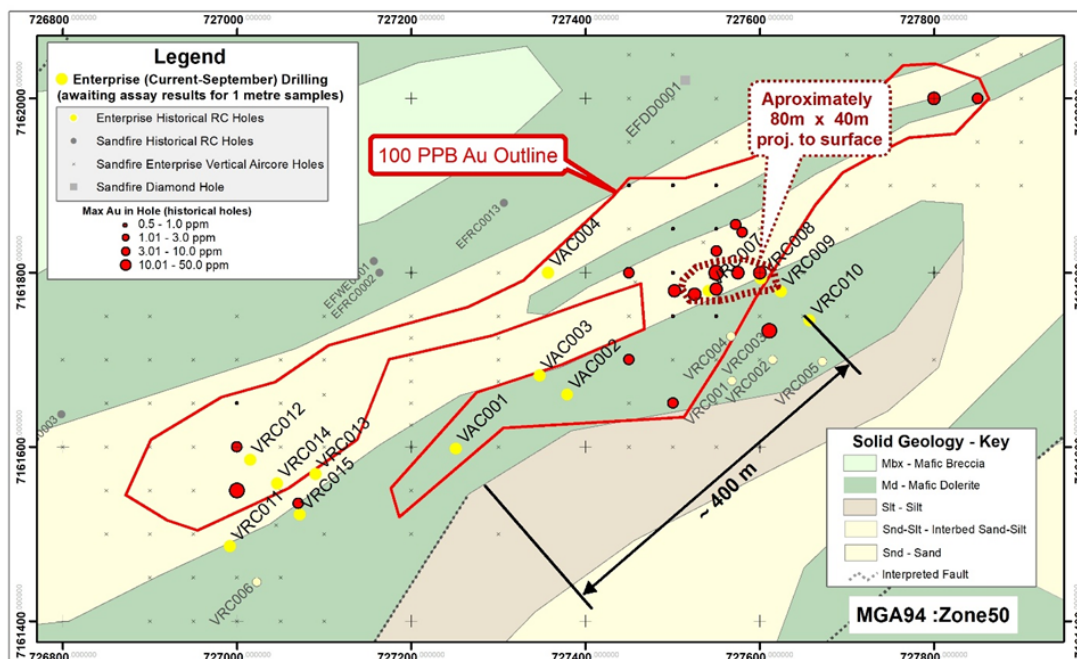

Challenge Drilling was selected for the drilling program, which was aimed to gain an understanding of the structural controls on the previously intersected primary gold mineralisation. Enterprise drilled 9 RC holes (1,334m) and 4 AC holes (224m). Four metre composite samples were dispatched to Aurum Laboratories at the end of the field program, and gold analytical results were recently received. Base metals analytical results are still awaited.

Highlights from the 4m Composite samples Included:

- VAC001 which intersected 16m @ 1.25g/t Au from 40m depth;
- VRC007 & VRC-008 confirmed coherent near-surface mineralisation in Central Vulcan.
- VRC007 intersected 16m @ 0.78g/t Au from 20m depth and
- VCR008 intersected two intervals, the first 4m @ 0.7g/t Au from 40m depth and the second 4m @ 0.64g/t Au from 52m depth.
- VCR009 also intersected two intervals: 4m @ 0.55g/t Au from 80m depth, and 4m @ 0.63g/t Au from 120m depth

Further work is required to understand the orientation of primary gold mineralisation beneath the extensive supergene zone. Original 1 metre samples (from the 4m zones displaying significant gold) will be recovered this week, and will be reported in due course.

**Murchison Project, WA: ENT 100% - Rare Earths & Zinc, Copper, Gold (144km<sup>2</sup>)**

Enterprise has planned 23 Air Core drillholes on E20/944, which is immediately adjacent to Victory Metals Ltd's (ASX: VTM) North Stanmore REE resource of 247.5Mt. A Program of Work (PoW) has been approved by the DEMIRS and a Heritage Agreement has been signed with the Wajarri Yamaji Native Title holder.

Subject to weather and a final agreement to drill by the Wajarri Yamaji, two lines of Air Core will be drilled alongside graded tracks along east-west fences. The two AC lines are planned to intersect clay zones which have been identified by Enterprise's earlier helicopter borne (AEM) Electromagnetic Survey.

**Mandilla Project, WA: ENT 100% - Gold – ( 8.1km<sup>2</sup>)**

During the September Quarter, Enterprise undertook further multi-element Ultrafine (UFF) soil sampling (93 samples) to define proposed Air Core drill sites on E15/1437.

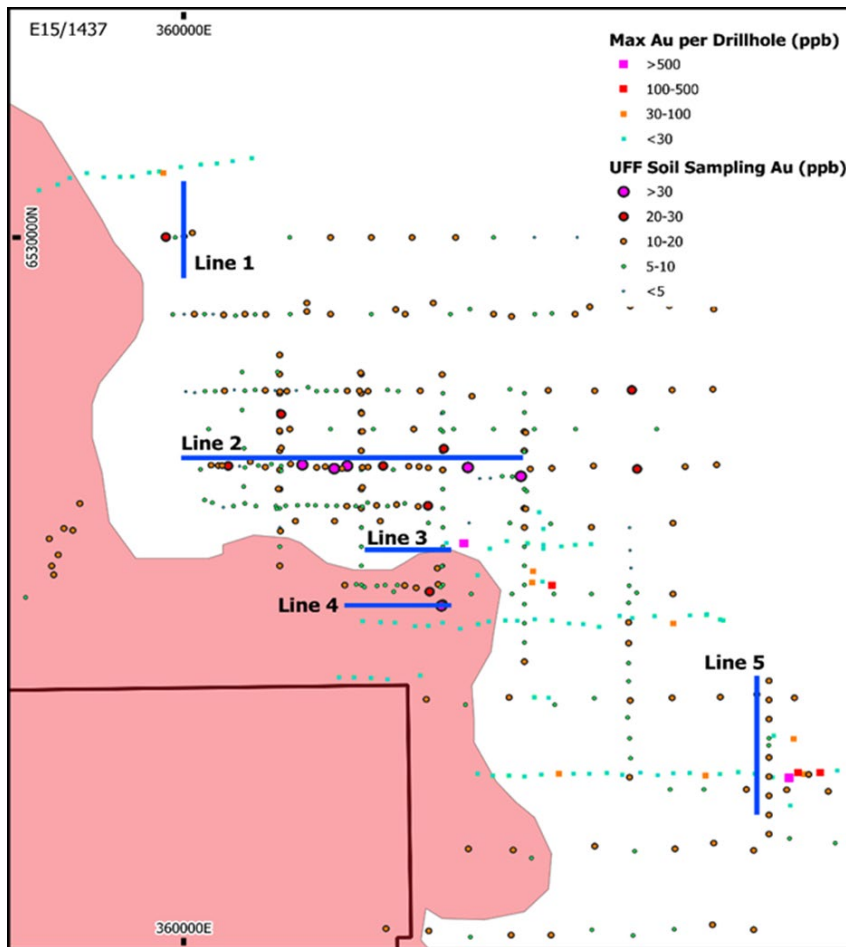

A total 365 UFF samples have now been analysed, and this has allowed five Air Core drill traverses to be planned.

**Line 1:** Designed to test anomalous gold results identified in both earlier drilling and recent soil sampling, located adjacent to the syenite margin.

**Line 2:** Focused on the central anomalous gold cluster, where multiple high-grade gold results have been recorded.

**Line 3:** Targeting an interesting section of the syenite boundary, surrounded by elevated soil results and nearby drillholes that returned anomalous gold values.

**Line 4:** Following up on anomalous soil results within the syenite in an area where previous Enterprise drilling was too shallow to adequately test the mineralisation potential.

**Line 5:** Following up on drillhole MEAC081, which intersected 4m @ 1.8g/t Au on a contact boundary which has not yet been adequately tested.

### Eneabba East Project, WA. - ENT Option - HMins -Titanium - Base Metals -623km<sup>2</sup>

Enterprise Metals Limited signed an Option Agreement with Perth based explorer Century Minerals Pty Ltd (ACN 601 316 278) whereby Enterprise has the right to explore for all minerals including heavy minerals (HM) such as zircon, monazite, rutile, ilmenite, Rare Earths and base metals including titanium.

The Eneabba East Project is located approximately 300 km north of Perth, in the North Perth Basin, east and southeast of Iluka Resources Ltd's Eneabba HM minesites. Iluka's Eneabba operations are located adjacent to the Gingin Scarp and have produced zircon, rutile and ilmenite from shallow heavy mineral sands since the early 1970's.

Iluka is currently working to recover monazite in tailings dams containing Rare Earths for treatment in its planned Eneabba Rare Earth Refinery.

The **Eneabba East Project** consists of two granted exploration licences:

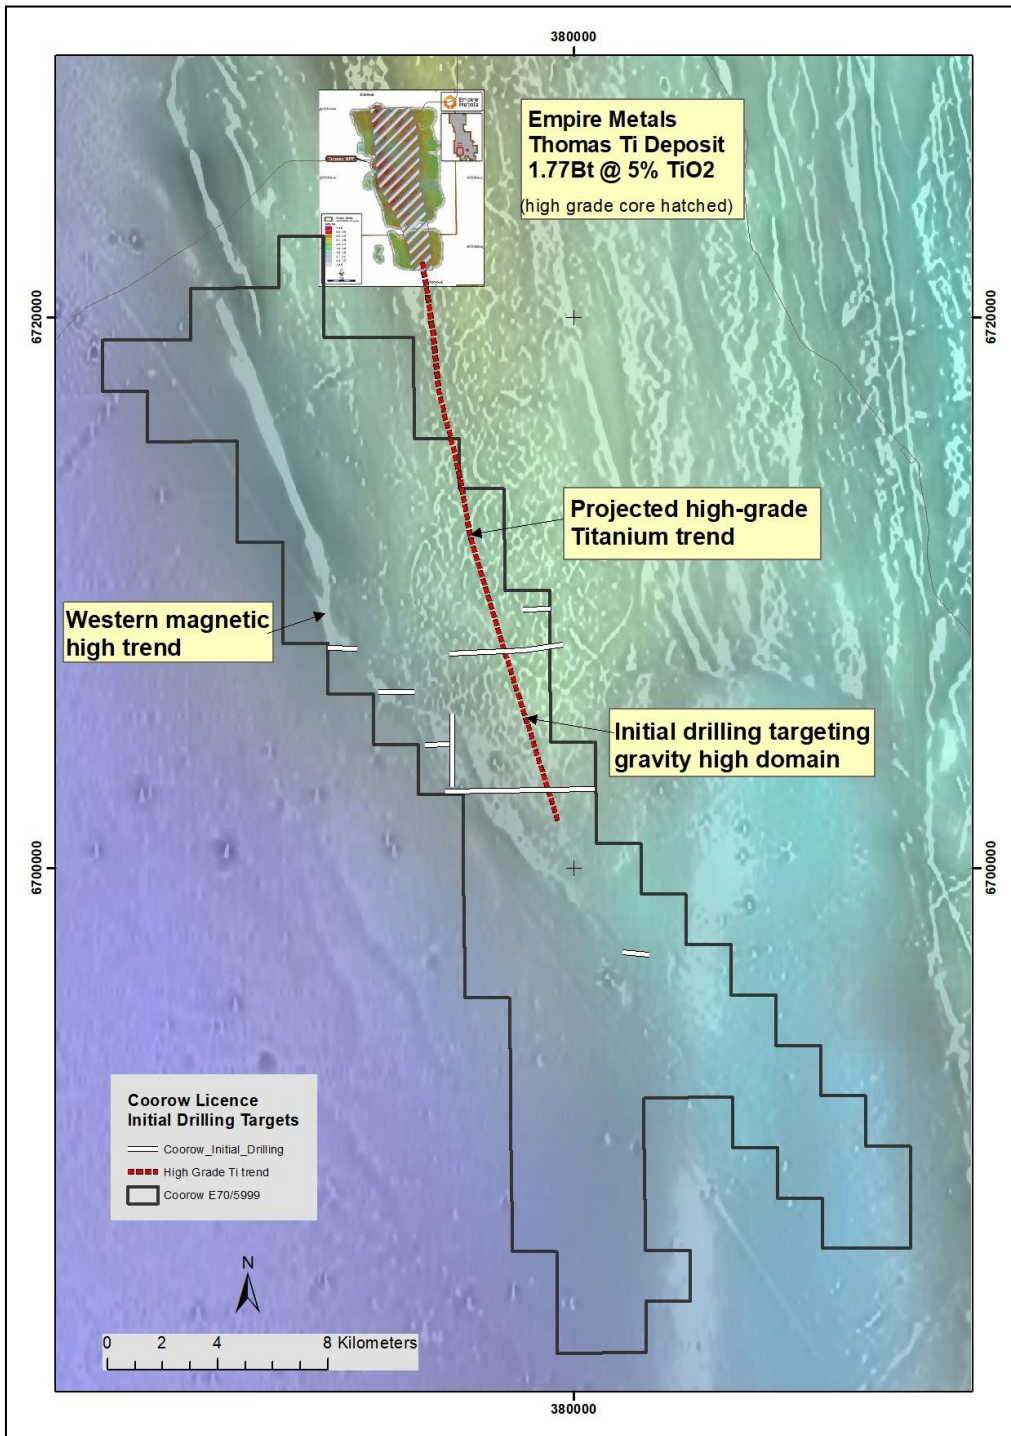

- E70/5999 - **Coorow** which lies immediately south of Empire Metals Plc (AIM) Pitfield Titanite Project, and has potential for near surface heavy minerals, titanite and base metals under cover, and
- E70/5884 – **Badgingarra** which lies adjacent to the Dandaragan Scarp, southeast of and sub-parallel to the Gin Gin Scarp,

#### E70/5999 - Coorow

The Coorow licence lies further east of Eneabba and covers the contact between the Tertiary Parmelia Group sediments and the Proterozoic Yandanooka Basin. This licence lies immediately south of Empire Metals Ltd (AIM.EEE.L) Pitfield Project and has potential for HM at or near surface, and base metals and titanite below shallow cover.

Permission for Air Core drilling to test the potential southern continuation of Empire Metals Plc titanite deposit is still awaited from the Carnamah Shire.

**E70/5884 – Badgingarra**

At the Badgingarra licence, situated adjacent to the Dandaragan Scarp, Enterprise is progressing with land access arrangements to enable drill testing of this promising mineral sands and rare earths target.

Century Minerals has recognised the sensitivities involved and has agreed to extend the Option Agreement with Enterprise, to allow for sufficient time for appropriate site access and exploration activities.
