

## Quarterly Report for the Period Ended 30 September 2025

**Kingsrose Mining Limited (ASX: KRM) (“Kingsrose” or the “Company”) is pleased to provide an update on its activities for the September 2025 quarter.**

### HIGHLIGHTS

- At the Finnmark project a series of 14 clusters of magnetic anomalies have been detected by the recently completed aeromagnetic survey coinciding with previously discovered geochemical anomalies. Follow-up fieldwork on these targets, as well as the wider BHP Alliance exploration program, is in progress including regional scale mapping, geochemical sampling and age dating.
- At the Penikat project in Finland, the Area 1 appeal remains with the Administrative Court. Kingsrose continues to be in regular contact with the Administrative Court.
- Area 2-5 Natura 2000 report is under review by the local Environmental Regulatory Body (ELY) and Metsähallitus with a statement expected in November 2025.
- In Finnmark, relationships continue to strengthen with rightsholders and stakeholders. Winter and summer aerial geophysics were completed in collaboration with reindeer herders.
- In June 2025, highly experienced mining executive Terry Holohan was appointed as Acting Chief Executive Officer upon the resignation of the Managing Director, Fabian Baker. Terry’s key focus is on advancing the M&A program embarked upon over the past 12 months as well as the ongoing exploration projects.
- Cash balance of A\$24.397m as at 30 September 2025 (30 June 2025: A\$27.287m).

### EXPLORATION & OPERATIONS

#### Company Updates

Kingsrose is exploring a large Fennoscandian portfolio of nickel, copper and PGE projects (Figure 1), including one of the largest scale generative exploration programs in Europe under an Alliance funded by BHP. The Company is also advancing permitting for drilling at the Penikat Project, Finland which is 100% owned by Kingsrose.

Costs for the current quarter associated with the Råna (mainly amortised permit fees) and Penikat projects were A\$232k. Total costs associated with the BHP Alliance was A\$1.437m, however, this was fully offset by funding from BHP.

#### Råna Project, Norway

No exploration activity was conducted at Råna during the reporting period, whilst current nickel market conditions have prompted a reduction in planned exploration for 2025. The Company considers the project to remain highly prospective for nickel-copper-cobalt discovery and is evaluating the optimal path forward for the Råna Project.

#### Kingsrose-BHP Finnmark Exploration

To date, US\$932,279 of the US\$3.5m committed expenditure for Year 2 of the ‘Project Generation Phase’ of the Finnmark Alliance has been spent on exploration activities to 30 September 2025.

The Management Committee of the Finnmark Alliance has approved a work program and budget of US\$3.5 million for FY2026 (see ASX announcement dated 27 May 2025). The second year of the Finnmark Alliance aims to complete a 'play scale' prospectivity assessment across the Finnmark Area of Interest with a view to the development of camps of intrusions deemed prospective for accumulations of Cu-Ni-PGE massive sulphides. To achieve this, Kingsrose has commenced an ambitious programme of airborne gravity gradiometry surveys covering the remainder of its unflown tenure. This is expected to be followed up with regional scale airborne helicopter EM surveys. When combined, these datasets will aid in identifying conductive bodies spatially associated with intrusions, which field teams will ground truth through field mapping and prospecting during the coming European summer.

During the quarter, Kingsrose announced further results from the airborne electromagnetic survey (HeliTEM) in Karasjok North area, continuing from the previously announced results over the Virdnechokka area within the Finnmark Alliance (see ASX announcements dated 8 July 2025 and 21 August 2025). The Karasjok North AEM survey was designed to test for the presence of large-scale conductive anomalies associated with mafic-ultramafic intrusions and in areas of anomalous copper in historical rock chip geochemistry.

The AEM survey identified several areas for follow up exploration over a 10km x 10km area:

- A multi-line, 800m strike conductive anomaly coincident with a patchy magnetic high and mapped amphibolite, on the northern flank of a broader gravity high at the Lavttevárri prospect:
  - Historical rock chip sampling has delineated a >700m long zone of intermittent, en echelon, high grade copper quartz-bornite-chalcopyrite veins hosted in amphibolite and schist, which is coincident with the AEM anomaly
- Highest grade historical rock chip samples returned 17% Cu (Figure 3) (see ASX announcement dated 10 November 2021)
- Seven clusters of discrete conductive anomalies:
  - Cluster 1: A multi-line anomaly over an 800m strike length on the southern flank of a linear high magnetic intensity zone, hosted by garnet-mica schist with interlayered amphibolite. Semi-massive sulphide (pyrrhotite-chalcopyrite) in outcrop is observed with a single historical rock-chip samples returning 0.3% Cu (see ASX announcement dated 10 November 2021)
  - Cluster 2: A 400m strike length conductor located >200m northeast of a roughly circular high magnetic intensity anomaly with central gravity high. Hosted in schist
  - Cluster 3: A 600m strike length conductor inferred to lie close to surface and <200m north of the Lavttevárri prospect, hosted by mica schist and amphibolite
  - Cluster 4: A 400m strike length conductive anomaly, inferred to lie close to surface. Hosted by quartz-feldspar schist and quartzite
  - Cluster 5: An 800m strike length, linear conductive anomaly, hosted by amphibolite and coincident with a linear patchy magnetic anomaly, on the southern flank of a roughly circular gravity anomaly
  - Cluster 6: A weak, single line conductive anomaly, unexplained by the geology and requiring ground truthing. Hosted by amphibolite, mica schist and conglomerate
  - Cluster 7: A subtle and weak single line conductive anomaly yet to be explained by the geology and located proximal to a small, circular high magnetic intensity anomaly on the eastern flank of a linear gravity anomaly. Hosted in schist

- A conductive AEM anomaly at Karenhaugen correlates well with the ground EM previously completed (see ASX announcement dated 12 October 2022) and gives a strong validation for the effectiveness of the AEM to resolve near surface conductors. It also appears that the ground EM could be extended in the future to cover a larger AEM anomaly.
- As with the Virdenchokka survey (see ASX announcement dated 8 July 2025), a total of six stratigraphic conductors were identified across large parts of the survey area caused by graphitic and pyrrhotite bearing metasediments. Where these are observed close to intrusive margins the conductive response of deeper mineralised sulphide bodies may be masked or more discrete in the data. These locations form important follow up areas for exploration.

Data from the AEM and airborne gravity gradiometry surveys, as well as field work currently in progress including regional scale mapping, geochemical sampling and age dating, will be collated to generate, rank and prioritise camp scale areas, leading to planning of next year's exploration program to follow up on the project areas which the BHP Alliance considers holding the greatest exploration potential.

#### Penikat Project, Finland

No exploration work was conducted at the Penikat project during the quarter, whilst permitting for drilling is being advanced.

## SUSTAINABILITY & PERMITTING

### Råna Project, Norway

Kingsrose continues to foster relationships with nearby residents and the wider community while exploration on the project is paused.

### Penikat Project, Finland

As a significant portion of the Penikat project area lies within the Martimoaapa – Lumiaapa – Penikat Natura 2000 site, the exploration licence applications must be supplemented with a Natura Assessment Report. The Company submitted a Natura 2000 Assessment Report for the Ala-Penikka area (Area 1) (Figure 5) to ELY in September 2023.

Details of the permitting process and associated timeframes have previously been reported in detail and are summarised in the permitting roadmap provided in Figure 6 with the appeals process provided as Figure 7.

The Area 1 appeal remains with the Administrative Court. Kingsrose continues to be in regular contact with the Administrative Court.

### BHP Alliance Finnmark, Norway

Relationships continue to strengthen with rightsholders and stakeholders. Winter and summer aerial geophysics were completed in collaboration with reindeer herders. Key to this success has been the employment of a Sámi Community Manager who commenced in September 2024.

**Figure 6: Simplified Permitting Roadmap, Penikat Project, Finland.**

**Explanatory Notes:**

- <sup>1</sup> Kingsrose received a positive Statement from ELY in January 2024.
- <sup>2</sup> Kingsrose received the Permit from the Ministry of Environment in June 2024.
- <sup>3</sup> No appeals were lodged against the Derogation Permit.
- <sup>4</sup> Tukes awarded the Exploration Permit on 27 June 2024.
- <sup>5</sup> Appeals were lodged to the Administrative Court against the granting of the Exploration Permit.
- <sup>6</sup> The Administrative Court Decision is expected to take approximately 12 months.
- <sup>7</sup> An appeal to the Supreme Administrative Court is subject to leave to appeal.

## CORPORATE

### Cash and Term Deposits

- As of 30 September 2025, Kingsrose had cash balances of A\$24.397m (30 June 2025: A\$27.287m). This represents a quarter-on-quarter decrease of A\$2.89m detailed as follows.

### Cashflow and Expenditure Review

- Net cash outflow from operating activities for the quarter was A\$2.8m (June 25 quarter: net inflow \$2.8m).
- Exploration expenditure during the current quarter was A\$1.97m consisting mainly of A\$1.44m on projects under the BHP Alliance, and A\$253k on the Penikat and Rana projects.
- Expenditure during the quarter relating to administrative and corporate costs, investor relations and business development activities was A\$1.14m. This includes a termination payment to the previous managing director of A\$400k. Receipts from bank interest and management fees for the BHP Alliance were A\$291k.
- Net cash used in financing activities was A\$19k for the quarter and represents payments for leased right of use assets.
- Movement of exchange rates on cash held in foreign currency represented a decrease in cash of \$50k, due to a slight strengthening of the Australian dollar.

### Related Party Payments

Payments of A\$69k reported in Item 6.1 of the attached Appendix 5B relate to fees paid to Non-Executive Directors (including superannuation).

### Capital Structure

The following provides a summary of all securities on issue as at 30 September 2025:

*About Kingsrose Mining Limited*

Kingsrose Mining Limited is a leading sustainability-conscious and technically proficient mineral exploration Company listed on the ASX. The Company has a discovery-focused strategy, targeting the acquisition and exploration of critical mineral deposits. This has resulted in the acquisition of, or joint venture into, the Råna nickel-copper-cobalt and Penikat PGE-Base Metal projects in Norway and Finland. Additionally, Kingsrose was selected for the first cohort of the BHP Xplor exploration accelerator program which operated from January to June 2023 and was extended into two exploration Alliances. The Finnmark exploration alliance is still active.

Kingsrose is also actively looking for M&A projects with near term developmental potential.

### *Forward-looking statements*

This report includes forward-looking statements, including forward-looking statements relating to the future operations of the Company. These forward-looking statements are based on the Company's expectations and beliefs concerning future events. Forward-looking statements are necessarily subject to risks, uncertainties, and other factors, many of which are outside the control of the Company, which could cause actual results to differ materially from such statements. The Company makes no undertaking to subsequently update or revise the forward-looking statements made in this announcement to reflect the circumstances or events after the date of this announcement.

### *Competent Persons Statement*

The information in this report that relates to the Alliances and Exploration Results at the Finnmark and Central Finland projects was first reported by the Company in compliance with the 2012 edition of the JORC Code in ASX announcements dated 10 November 2021, 12 October 2022, 4 September 2023, 12 February 2025, 27 May 2025, 8 July 2025 and 21 August 2025.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the ASX releases referred to above and it further confirms that all material assumptions and technical parameters underpinning the exploration results and exploration target continue to apply and have not materially changed.
