DGR GLOBAL CREATES RESOURCE COMPANIES

DGR Global's business is the creation of resource exploration, development, and mining companies. The business uses the skills of a core team of talented exploration staff to identify resource projects capable of yielding world class discoveries of commodities with enduring strong fundamentals. This is achieved through the identification of commodities with a favourable 20-year demand, growth, and price outlook. DGR searches for geological terranes with:

- A demonstrated strong endowment for that commodity in an historically under-explored region.
- Opportunity for the application of newly developed exploration and metallurgical techniques to assist in the definition of economic resources.
- Jurisdictions with improving socio-economic and regulatory frameworks.
- Extensive available tenures.
- Existing data sets which provide the basis for innovative reinterpretation.

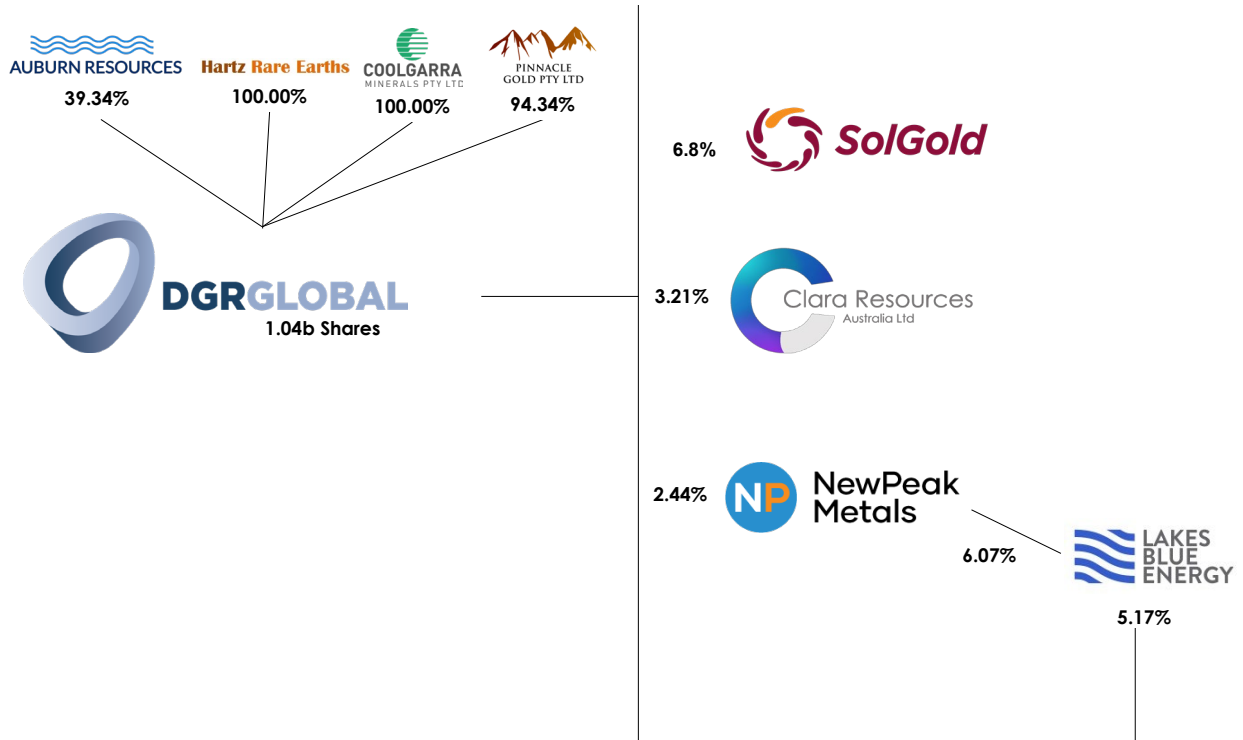

DGR Global provides initial seed funding and management support to secure these assets in subsidiaries and develop these assets to more advanced funding stages. The Company has a pipeline of projects in daughter companies at various stages of emergence, and in 2015 crystallised a significant return through the sale of its 15% holding in Orbis Gold for \$26Million. Further return from its holdings in LSE listed SolGold plc and ASX listed Clara Resources Australia Ltd, New Peak Metals Ltd, Lakes Blue Energy NL, and unlisted Auburn Resources Ltd is expected over the coming years.

The previous resource exploration and funding activities of DGR's key personnel underscore the opportunities provided by the DGR business model. DGR Global does not generally purchase its exploration projects. DGR's in house generative capabilities give the Company a strong competitive edge. DGR's focus on provincial tenement positions covering entire sedimentary basins or structural blocks where possible, delivers capital, government, and major resource corporate attention.

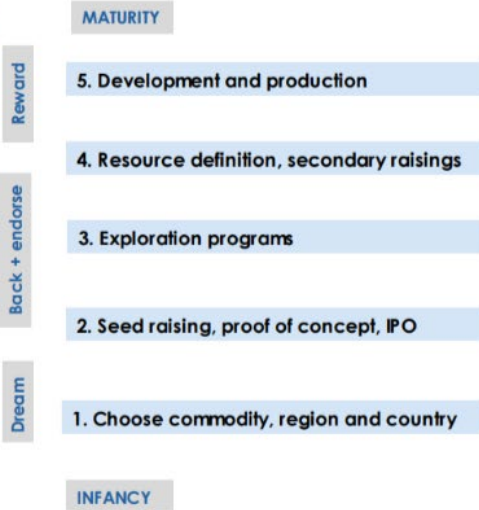

DGR Global holds key equity positions in its subsidiary companies after listing. As shown in the DGR Global Group Corporate Structure as of 30 September 2025, DGR Global holds:

- 6.8% of SolGold Plc (LSE: SOLG),
- 3.21% of Clara Resources Australia Ltd (ASX : C7A),
- 2.44% of New Peak Metals Ltd (ASX : NPM),
- 5.17% of Lakes Blue Energy NL (ASX : LKO).

SolGold PLC (SolGold) – as advised by SolGold on 17/09/25² and more recently 13/10/25³ on London Stock Exchange (LSE: SOLG), SolGold has been engaged in drilling programs with 4 core drilling rigs on its Tandayama copper gold deposit 3km north of its world class 100% owned Alpala deposit on the Cascabel licence in northern Ecuador.

The Cascabel project is a world class copper gold porphyry deposit located on the relatively poorly explored Ecuadorean sector of the Andean Copper belt, host to some 50% of the world's copper resources and production. SolGold also holds extensive exploration tenure under review on 89 other tenements covering 18 prospective copper gold and gold targets throughout the

country. The Tandayama drilling program is designed to outline open pit resources to provide for lower capital development upfront and earlier cashflows, the surplus of which could provide significant benefits to the overall project development at Cascabel. SolGold's drilling program is currently progressing with a view to defining an updated resource at Tandayama in the near future intersecting significant lengths and grades of targeted copper and gold mineralization. As announced by SolGold on 19/08/25⁴. SolGold has recently engaged Cannacord Genuity as its Corporate Broker. DGR holds 204m shares or approximately 6.8% beneficially in SolGold. DGR's CEO Nicholas Mather is a founder and non-executive director of SolGold and holds a beneficial interest in a further 2.8% of SolGold.

Lakes Blue Energy (Lakes) was quoted on the ASX (ASX:LKO) on 04/07/25⁵. Two capital raisings managed by Morgans Corporate secured \$6.5 million, at \$0.75/share on 17/06/25⁶ and a further \$5.8 million on 12/09/25 at \$1.15/share⁷.

As announced by Lakes on 13/10/25⁸, Lakes completed the drilling of Wombat 5 ST 2 in PRL 2 located in the onshore section of the Gippsland Basin Victoria with flow testing of high gas shows in the well planned for mid-November targeting a 20pj per annum development plan.

- HSEC (Health, Safety, Environment and Community) for the group entities for which DGR acts as Operator, maintains a rolling 12-month TRIFR of 0.00 and recorded zero environmental incidents for the corresponding period, demonstrating DGR's continuous commitment to sustainable and safe operations.

- Announcement was made of the engagement of Cannacord Genuity as SolGold's Corporate Broker.
- DGR continues to note that considerable upside exists to be refined during the DFS permitting and financing phases through opportunities for:
 - benefits of increased copper prices US\$4.20/lb and copper US\$2300/oz currently representing a notional increase in revenues of 9% for copper and 31% for gold before all expenses and tax (approximately 15% blended).

- increases in metallurgical recoveries, especially gold.
- expediting production by bringing the Tandayama resource to reserves status and production up to 2 years sooner.
- further resource definition on the Cascabel tenement.
