

STRONG PRODUCTION RAMP UP COMPLETE AT CROWN PRINCE

New Murchison Gold Limited (**ASX:NMG**) (“**NMG**” or the “**Company**”) is pleased to provide an update on production at the Crown Prince Gold Mine (**Crown Prince**).

The operation has had a strong second month of mining and crushing and is now fully ramped up with **60,877** dry tonnes of ore at an agreed grade of **3.95g/t Au** (adjusted for recovery) trucked to Westgold Resources Limited’s (**ASX:WGX**, “**Westgold**”) Bluebird gold processing facility 36km by road south of Crown Prince.

Mining is well established with the operation performing strongly. NMG’s operations team and contractors are collectively working together on site underpinning the stability of the operation.

In accordance with the Ore Purchase Agreement between NMG and WGX the agreed monthly recoverable gold ounces in ore trucked to Bluebird was **7,285 oz** with the related ore sales payment due at the end of November 2025.

The unreconciled production inventory on site at the end of October is approximately **37,900t** (wet tonnes) of Crown Prince ore on the ROM awaiting crushing and approximately **11,200t** (wet tonnes) of crushed high-grade product, which provides a solid foundation for continuing strong production in November.

Alex Passmore NMG's CEO commented: "Our second month has completed the ramp up of the mine and with a concerted effort from our operations team with the support of Ozland Mining and MLG Crushing has exceeded expectations for our second month. We have a strong foundation for production in November. We are very pleased with the successful delivery of our first mine and while retaining focus on ongoing operations the Company is now able to refocus our exploration effort to support future opportunities"

ABOUT NEW MURCHISON GOLD

New Murchison Gold Ltd (ASX:NMG) is a mineral exploration and gold mining company which holds a substantial package of tenements in the prolific Murchison goldfield near Meekatharra, Western Australia.

The Company is focused on the Garden Gully Gold Project which comprises a 677km² tenure package covering the Abbotts Greenstone Belt and other key regional structures. The project has multiple gold deposits along the belt with the most advanced being the Crown Prince Gold Mine.

Gold mineralisation in the belt is controlled by major north trending structures and contact zones between felsic and mafic metamorphosed rocks.

NMG updated its Mineral Resource Estimate in November 2024 and reported a maiden Ore Reserve and Feasibility Study for the Crown Prince Deposit in February 2025. As announced 25 June 2025 the Company made a decision to develop the Crown Prince Gold Mine and completed its first blast on 30 June 2025. NMG commenced production in September 2025.
