

\$1.8m Prefabricated Modular Cable Landing Station contract win

DXN Limited (“DXN” or “the Company”), a prefabricated modular data centre specialist, is pleased to announce the signing of a \$1.8 million contract to deliver a prefabricated modular Cable Landing Station (CLS) for an international digital infrastructure project.

Key Highlights

- **AUD\$1.8 million contract signed with APTelecom for the design, build, and delivery of a prefabricated CLS module**
- **CLS module to be prefabricated and fully integrated at DXN’s Perth facility prior to deployment and on-site commissioning**
- **DXN selected for its proven design and execution capabilities, with robust security and quality standards**
- **Expanding opportunities in the CLS market as emerging markets increase investment in high-capacity digital infrastructure**

DXN has signed its first contract with APTelecom, a U.S.-based telecommunications and fibre consultancy specialising in developing connectivity and digital infrastructure projects globally. Under the contract, DXN will design, build, and deploy a prefabricated modular CLS. The design and build phases will be undertaken at the Company’s Perth facility, construction will commence in November 2025, and shipment is currently scheduled for February 2026. On-site commissioning is expected to be completed by May 2026.

DXN was selected for its expertise in delivering secure, prefabricated data infrastructure solutions. The Company sees significant growth potential in the CLS market, particularly as underserved regions expand connectivity networks to improve access to high-capacity, cost-efficient digital services. Cable Landing Stations play a critical role in connecting international subsea cables to terrestrial networks, facilitating digital transformation and economic growth across diverse markets.

Shalini Lagrutta, Managing Director of DXN, said:

“DXN is delighted to be partnering with APTelecom on this important project delivering critical infrastructure to support next-generation connectivity. We continue to innovate and strengthen our position in the modular data infrastructure market, and we’re proud to be selected for this project.

“We are confident of delivering revenue growth in FY26; however, this will be weighted towards the second half of the financial year.”

Ends-

This announcement was authorised for release by the Board of Directors.

About DXN Limited

DXN Limited is a vertically integrated manufacturer and operator of modular data centres across Asia Pacific. The Company designs, engineers, manufactures, and operates high-quality, prefabricated facilities for government and blue-chip enterprise customers.

DXN operates through three core divisions:

1. **Modular Division** – Delivers prefabricated, scalable EDGE data centres and critical infrastructure, tailored to diverse industries including telecom, mining, defence, and subsea cable operators.
2. **Data Centre Operations** – Owns and manages data centres in Darwin and Hobart, providing colocation, monitoring, and managed hosting services.
3. **Data Centre as a Service (DCaaS)** – A capital-light “facility as a service” model, offering bespoke data centre and satellite ground station solutions with end-to-end management, maintenance, and 24/7 monitoring.
