LETTER FROM THE FORRESTANIA CHAIRMAN

Chairman's Letter

24 November 2025

Dear Kula Shareholder,

A Transformational Opportunity for Kula Shareholders

On behalf of the Board of Forrestania Resources Limited (**Forrestania**), I am pleased to present to you an important opportunity for your consideration – an all-scrip Offer to merge Kula Gold Limited (**Kula**) with Forrestania. This transaction will allow you to become a shareholder in a larger, better-funded, and more strategically positioned gold exploration company, with access to enhanced growth and development potential.

Under the Offer, you will receive:

1 new Forrestania share for every 5.6 Kula shares you own.

Based on an illustrative Forrestania share price of \$0.286 (being the 10-day VWAP of Forrestania's shares prior to 10 October 2025 prior to announcement of the bid), this equates to an implied value of approximately \$0.051 per Kula share, valuing Kula at roughly \$58.73 million in total. Based on the 10-day VWAP of Forrestania's shares prior to the date of this Bidder's Statement being \$0.208, this equates to an implied value of Kula of approximately \$42.7 million (or \$0.037 per Kula Share). Kula's 10-day VWAP over the same period is \$0.037. This Offer is made directly to you and is subject to a number of conditions, including a minimum acceptance level of 50% of Kula's shares on a fully diluted basis.

As of the date of this letter, Forrestania already has a relevant interest in approximately 13.01% of Kula's issued shares. Importantly, Kula's Board of Directors has unanimously recommended that Kula Shareholders accept this Offer, in the absence of a superior proposal.

This transaction represents a compelling opportunity for Kula Shareholders, delivering growth, scale, and near-term development. Forrestania and Kula operate adjacent and complementary assets across some of Western Australia's most prospective gold belts. In the context of current exploration activity, funding conditions, and the maturity of key assets, especially Kula's Mt Palmer Gold Project, we believe now is the right time to combine forces.

What You Gain by Accepting the Offer:

By accepting the Offer, you will become a shareholder in a larger and more diversified gold exploration company. The merged entity will benefit from:

- **Regional scale:** A consolidated portfolio spanning the Southern Cross, Forrestania, and Eastern Goldfields belts.
- **Accelerated development:** Bringing forward potential value from Kula's 80%-owned Mt Palmer Gold Project, backed by Forrestania's infrastructure and project experience.
- **Access to processing:** Subject to completion of the acquisition by Forrestania, where ongoing exploration at the Mt Palmer Gold Project ultimately identifies economically relevant gold bearing ore, that gold bearing ore will be able to be processed at the Lake Johnston mill, recently announced by Forrestania as being acquired from Poseidon Nickel Pty Limited, a wholly owned subsidiary of Horizon Minerals Limited.¹
- **Stronger funding capacity:** Improved access to capital and a stronger balance sheet to support exploration and development across multiple projects.
- **Corporate synergies:** Elimination of duplicate overheads, coordinated exploration, and shared technical capabilities.
- **Continued upside:** Ongoing exposure to the value creation potential of your assets through Forrestania shares.
- **Operational synergies:** By consolidating operations, the combined group can eliminate duplicated costs and achieve efficiencies in exploration activities and project.

Additional Reasons to Accept:

- The Offer price represents an attractive premium to Kula's recent trading prices, including its 3-month, 6-month, and 12-month VWAPs. The Offer Price represents a 41% premium to the 10-day

¹ Refer to the announcement by Forrestania on 18 November 2025 'Acquisition of Lake Johnston & \$34m Placement'.

VWAP of KGD shares on 10 October 2025, being the day immediately prior to the date that this transaction was announced.

- Offers Kula shareholders the opportunity to become shareholders in Forrestania, a company that has undergone a strategic transformation in 2025, including Board changes and a strong share price performance.
- Subject to meeting certain conditions, CGT script for script roll-over relief may be available to Kula shareholders.
- No superior proposal has emerged as at this date.
- No brokerage fee in accepting the Offer.

We believe this all-scrip Offer provides an attractive outcome for Kula shareholders by allowing you to continue to participate in the upside of the combined company. You will become a shareholder in Forrestania and share in the future growth and any success of the merged group.

Next Steps

Details of our Offer, including all terms and conditions, are set out in the enclosed Bidder's Statement. I encourage you to read the Bidder's Statement in full and consider the Offer carefully.

The Offer is scheduled to close at 4:00pm (AWST) on 8 January 2026, unless extended or withdrawn, so I urge you to accept the Offer as soon as possible to take advantage of the benefits it provides.

To accept, simply follow the instructions on the acceptance form or as described in the Bidder's Statement.

If you have any questions about the Offer, or require further information, please contact the Forrestania on (08) 6555 2950.

Thank you for your consideration of our Offer. We are excited about the prospects of the merged group and look forward to your support. This is a transformative step for both companies, and we are confident it will deliver significant value to all shareholders.

Yours sincerely,

David Geraghty
Chairman
Forrestania Resources Limited

2. WHY YOU SHOULD ACCEPT THE OFFER

2.1 Reasons Why You Should ACCEPT the Offer

Forrestania believes you should **ACCEPT** the Offer for the following reasons:

1.	The Offer has received unanimous recommendation from the Kula Directors, in the absence of a Superior Proposal. ⁴
2.	Kula's and Forrestania's businesses are complementary and provide substantial economies of scale which should lead to enhanced development opportunities. The proposed combination of Forrestania and Kula is expected to create a regionally consolidated gold explorer with a diversified portfolio spanning the Southern Cross, Forrestania, and Eastern Goldfields belts, delivering significant synergies in exploration, development, and capital efficiency.
3.	You will be provided with the opportunity to realise benefit from Kula's 80% owned Mt Palmer Gold Project sooner than if Kula sought to develop the Mt Palmer Gold Project itself, given the scale of Forrestania's operations and the resources available to Forrestania in comparison to Kula.
4.	Forrestania has recently announced that it has entered into a conditional agreement to acquire the Lake Johnston Project from Poseidon Nickel Pty Limited, a wholly owned subsidiary of Horizon Minerals Limited, including the 1.5Mtpa processing plant, buildings and other infrastructure. Subject to completion of this acquisition, this will provide Forrestania with processing capabilities for its gold resources, including any that eventuate from the Mt Palmer Gold Project.
5.	Forrestania is a well capitalised company with stated ambitions to become a stand-alone gold producer and is led by a management team with substantial project development expertise. You will become a securityholder in Forrestania, and have the opportunity to benefit from strategic benefits, diversity and operational synergies in the Combined Group if the Offer is successful.
6.	The Offer reduce risks associated with remaining a Kula Shareholder.
7.	If you do not accept the Offer, you may be subject to the risks and uncertainties of potentially being a minority shareholder in Kula.
8.	You may have potential access to CGT scrip for scrip rollover relief.
9.	You may not incur brokerage and will not incur any stamp duty in accepting the Offer.

The above is only a headline summary of some of the reasons why you should accept the Offer. Each of these reasons is explained in more detail below.

If you wish to accept the Offer, you must submit your acceptance online or return the signed Acceptance Form in accordance with the directions on the Acceptance Form by **4:00pm (AWST) on 8 January 2026**, unless extended in accordance with the Corporations Act.

Assuming 100% acceptance, Kula Shareholders who accept the Offer will become part of a larger West Australian exploration and development company, with its portfolio spanning the Southern Cross, Forrestania, and Eastern Goldfields belts.

2.2 Detailed Reasons Why You Should ACCEPT The Offer

(a) **The Offer has received unanimous recommendation from the Kula Directors, in the absence of a Superior Proposal.**

The Kula Directors have unanimously recommended that Kula Shareholders accept the Offer in the absence of a Superior Proposal. Furthermore, the Kula Directors intend to accept the Offer for their Kula Shares in the absence of a Superior Proposal.

As at the date of this Bidder's Statement, Forrestania is not aware of any Superior Proposal having been received by Kula and Kula has not made Forrestania aware of any party having an intention to make such a proposal.

Refer to Section 6.7 of this Bidder's Statement for disclosure of the interests of each of the Kula Directors in Kula.

⁴ Refer to Section 6.7 of this Bidder's Statement for disclosure of the interests of each of the Kula Directors.

- (b) **Kula's and Forrestania's businesses are complementary. The proposed combination of Forrestania and Kula is expected to create a regionally consolidated gold explorer with a diversified portfolio spanning the Southern Cross, Forrestania, and Eastern Goldfields belts, delivering significant synergies in exploration, development, and capital efficiency.**

The proposed combination of Forrestania and Kula follows a period of increasing strategic alignment between the two companies. Forrestania's recent cornerstone investment in Kula through a \$1.87 million placement, together with its recent acquisition of the Westonia Project from Kula, highlights the complementary nature of their respective operations and regional focus.

The merger represents a logical next step in consolidating their interests across the Southern Cross, Forrestania, and Eastern Goldfields belts, creating a regionally integrated gold explorer with a strong and diversified project portfolio. The combined group is expected to benefit from greater exploration scale, operational efficiencies, and capital synergies, positioning it to accelerate discovery and development while delivering enhanced value to shareholders.

- (c) **Forrestania has developed a corporate strategy to grow gold resources (including JORC Resources) across several projects via M&A and aggressive exploration to rapidly advance the Combined Group to become a significant stand-alone West Australian gold production business. The acquisition of Kula represents a major advancement to the delivery of this strategy.**

Forrestania management have a clearly articulated strategy to grow a substantial gold business via consolidation and exploration which has resulted in several recent significant project acquisitions. These projects include the British Hill, North Iron Cap and Burracoppin Projects which have seen Forrestania's gold Resources grow from 24k oz Au to 296k oz Au in just 14 weeks from July 2025.

In addition, Forrestania presently holds an option to acquire 100% of Hyden Resources Pty Ltd (ACN 675 890 641) (**HRPL**) from Lantech Developments Pty Ltd (ACN 007 034 684) (**Lantech**). HRPL is the parent of Hyden Project Holdings Pty Ltd (ACN 141 995 217) (**HPH**) which is the registered holder of additional tenements within the Forrestania region. Forrestania's announcements on 11 August 2025 and 3 November 2025 include further details on the Hyden assets, the option agreement and the disclosures around HRPL and HPH.

- (d) **Forrestania will have the capability of processing gold bearing ore from Mt Palmer**

On 18 November 2025, Forrestania announced that it had entered into a conditional agreement to acquire the Lake Johnston Project from Poseidon Nickel Pty Limited, a subsidiary of Horizon Minerals Limited. The Lake Johnston Project includes a 1.5Mtpa processing plant previously used for processing nickel, but capable of being adapted to process gold bearing ore. This acquisition, subject to satisfaction of the outstanding conditions precedent and completion occurring, will provide Forrestania with processing capacity for its gold resources, including any gold resources that are discovered in economic quantities from the Mt Palmer Gold Project. Currently, Kula does have a solution to processing any gold bearing ore from the Mt Palmer Gold Project should ongoing exploration work justify a mining operation on that Project.

The acquisition of the Lake Johnston Project is subject to the satisfaction of the following outstanding conditions precedent as at the date of this Bidder's Statement:

- (i) both parties have received all necessary regulatory approvals or waivers (including Forrestania obtaining written confirmation from ASX that Listing Rule 11.1.3 will not apply);
 - (ii) both parties entering into all necessary deeds of assignment for the transfer of the Lake Johnston assets; and
 - (iii) the parties obtaining all relevant third party approvals and consents.
- (e) **Forrestania is strongly supported by key shareholders with the capacity to continue to provide the funding necessary to support the Combined Group's M&A and exploration ambitions.**

As at 30 September 2025, Forrestania held \$4.97m in cash and nil debt.

Forrestania's directors have demonstrated a capacity to raise equity capital at a premium to market prices. Forrestania's directors own approximately 17.98% of Forrestania's issued capital (on an undiluted basis) and have proven track records in project development and the delivery of profitable growth.

In addition, Forrestania recently received \$6,766,957 in cash as a result of various Forrestania Option exercises.

- (f) **You will be provided with the opportunity to realise benefit from Kula's 80% owned Mt Palmer Gold Project sooner than if Kula sought to develop the Mt Palmer Gold Project itself, given the scale of Forrestania's operations and the resources available to Forrestania in comparison to Kula.**

Forrestania's larger operational scale, established infrastructure, and greater access to technical and financial resources are expected to significantly accelerate exploration and development activities at Mt Palmer. By leveraging Forrestania's capabilities, the combined entity can fast-track project advancement, optimise capital deployment, and enhance the potential for near-term value creation from this strategically located gold asset.

- (g) **You will gain full exposure to the Forrestania Board and management team that has a depth of technical experience and operational track record.**

Forrestania's existing Board and technical teams bring a proven track record for advancing exploration tenure, delivering on project milestones and the provision of excellent technical, commercial, managerial and administrative expertise.

Refer to Section 4.8 of this Bidder's Statement for further information.

- (h) **There is a risk that you will be part of the minority if you do not accept the Offer.**

As set out in Sections 12.9 and 12.12, the completion of the Offer is subject to a limited number of Conditions.

Given the limited conditionality of the Offer there is a strong possibility that Forrestania will succeed in reaching the Minimum Acceptance Condition, by acquiring a Relevant Interest in at least 50% of the issued share capital of Kula.

If Forrestania does not acquire a Relevant Interest in at least 50% of the Kula Shares it may choose to waive the condition at its discretion.

If Forrestania acquires more than 50.1% but less than 90% of the Kula Shares, Forrestania will hold a controlling interest in Kula. The remaining Kula Shareholders will be in a minority position in a company with a large controlling shareholder whose objectives for the company may differ from their own.

Kula will likely require additional funding in the immediate term to fund future exploration activities as well as ongoing corporate costs. If some or all of this funding requirement is sought in the form of an equity raising and Kula Shareholders do not accept the Offer, Kula Shareholders would likely need to contribute to this equity raise (commensurate with their existing shareholding) to avoid dilution of their respective shareholdings.

Accordingly, Kula Shareholders could encounter a lower level of liquidity in Kula Shares than exists today, which may impact the ability of Kula Shareholders to sell their Kula Shares without having an adverse impact on the share price received in the sale of those Kula Shares in future.

- (i) **Potential access to CGT scrip for scrip rollover relief (in respect of the Offer only).**

Kula Shareholders holding their Kula Shares on capital account may have access to scrip for scrip rollover relief, in which case they are entitled to disregard any capital gain as a result of accepting the Offer.

Should the Offer be successful and result in Forrestania becoming the holder of 80% or more of the voting shares in Kula as at the close of the Offer Period, Kula Shareholders who would otherwise make a capital gain from the disposal of their Kula Shares pursuant to the Offer may be able to choose to obtain full scrip for scrip rollover relief.

If scrip for scrip rollover relief is available and is chosen by Kula Shareholders, who would otherwise have made a capital gain on the disposal of their Kula Shares and/or options under the Offer, all of the capital gain from the disposal may be disregarded.

However, Kula Shareholders may be subject to capital gains tax as a result of a later taxable event (such as a disposal) happening to the Forrestania Shares received as consideration under the Offer.

Refer to Section 9 of this Bidder's Statement for further information.

(j) **You may not incur brokerage or stamp duty in accepting the Offer.**

If you accept the Offer, you will not incur brokerage on the transfer of your Kula Shares to Forrestania pursuant to the Offer.

If you sell your Kula Shares rather than disposing of them via the Offer, you may incur brokerage charges (and, potentially, GST on those charges). You will not be required to pay any stamp duty on the disposal of your Kula Shares under the Offer or on the acquisition of Forrestania Shares under the Offer.

Full details on how to accept the Offer is set out in Section 12.4.

4. PROFILE OF FORRESTANIA

4.1 Overview of Forresteria

Overview of Forresteria and Its Principal Activities

Forresteria Resources Limited (ASX: FRS) is a rapidly growing gold exploration and development company focused on building a portfolio of high-quality projects across Western Australia's premier gold mining districts.

Led by a refreshed and experienced board, Forresteria is expanding its footprint across the Southern Cross/Westonia, Forresteria and Eastern Goldfields regions through disciplined exploration, selective acquisitions, and a commitment to unlocking the broader potential of these highly prospective belts.

The Company's strategy is supported by a clear 'Three-Tier Growth Charter':

- (a) 'Reposition Forresteria' – consolidate, refocus and strengthen its portfolio;
- (b) 'Disciplined Growth Strategy' – pursue accretive acquisitions and leverage record gold prices; and
- (c) 'From Exploration to Execution' – transition toward near-term development and production.

Forresteria holds rights to JORC-compliant Resources totalling approximately 296,210 ounces of gold, with approximately 67% of these Resources located on granted mining leases, providing a strong platform for future growth. The Company remains debt-free and maintains a cash balance of A\$4.97 million as at 30 September 2025, underpinning its exploration and acquisition programs.

4.2 Forresteria's key objectives

Over the recent months, Forresteria has undertaken a targeted and strategic expansion program within its established exploration corridor in Western Australia. Forresteria has executed a series of acquisitions comprising prospecting licences, exploration licences, and mining leases, secured either through tenement acquisitions or share purchase agreements with unrelated third-party vendors, as well as option agreements that have yet to be exercised.

The acquisitions are of tenure all located within Forresteria's historical areas of operation and are prospective for gold, consistent with the company's longstanding focus on gold exploration. The objective of this program is to strengthen Forresteria's Resource base by securing additional gold ounces, whether classified as existing JORC-compliant resources or as exploration targets with potential to be upgraded to JORC standard through further exploration success.

Since April 2025, Forresteria has completed the following material acquisitions:

- (a) **Expansion to flagship Forresteria project:** As announced on 17 September 2025, Forresteria acquired exploration licence E77/3046 near existing Forresteria holdings, expanding its ground south of Southern Cross in a geologically prospective zone.
- (b) **Ada Ann Tenement Expansion:** As announced on 6 August 2025, Forresteria acquired three new tenement applications near Coolgardie, expanding its Ada Ann gold footprint in a highly prospective zone. As at the date of this Bidder's Statement, the applications are not yet granted.
- (c) **North Iron Cap acquisition:** As announced 4 November 2025, Forresteria sign has acquired 100% of North Iron Cap Pty Ltd, which holds the gold rights over M77/544, the North Iron Cap deposit in the Forresteria Greenbelt, south of Southern Cross.
- (d) **British Hill acquisition:** As announced on 18 September 2025, Forresteria completed the acquisition of 100% of IMD Gold Pty Ltd, owner of the British Hill Gold Project (M77/1256 and E77/1965), which holds a JORC (2012) compliant Mineral Resource Estimate of 1.17 Mt @ 1.5 g/t Au for 55,888 oz.
- (e) **First Western Gold acquisition:** As announced on 17 October 2025, Forresteria completed the acquisition of First Western Gold Pty Ltd from Askari Metals (ASX: AS2). The project includes a JORC (2012) compliant Mineral Resource of 82.7koz Au at 1.5g/t cut off grade and strengthens Forresteria's Western Australian gold portfolio.

In addition, Forresteria presently holds an option to acquire 100% of Hyden Resources Pty Ltd (ACN 675 890 641) (**HRPL**) from Lantech Developments Pty Ltd (ACN 007 034 684) (**Lantech**). HRPL is the holder of 100% of the shares in Hyden Project Holdings Pty Ltd (ACN 141 995 217)

(HPH) which is the registered holder of a suite of tenements within the Forrestania region (comprising M77/1310, E77/2207, E77/2219, E77/2220, E77/2239, E77/2460, E77/2711 and P77/4534). Forrestania's announcements on 11 August 2025 and 3 November 2025 include further details on the Hyden assets, the option agreement and the disclosures around HRPL and HPH. HRPL is presently the respondent to proceedings in the Supreme Court of Western Australia (CIV 1381/2025) commenced by Classic Minerals Limited (**Classic**) relating to the ownership of the tenements outlined above. Classic Minerals Limited also claims an 80% beneficial interest in the gold rights on those tenements. Classic Minerals Limited has stated in public announcements that, pursuant to its legal advice, it is seeking enforcement of the agreement to acquire the tenements from HRPL. The Company's due diligence on HRPL, including these matters, is ongoing.

4.3 Access to capital

In addition, Forrestania recently received \$6,766,957 in cash as a result of various Forrestania Option exercises.

The Company has a demonstrated capacity to raise capital, having raised \$8.610 million under a placement in September 2025 and having recently announced the proposed Placement and SPP (refer to Section 4.4 below). Where required, the Directors reasonably believe that the Company is capable of raising additional funds to meet its stated objectives through the issue of new capital in the Company.

These capital management measures are expected to provide sufficient working capital to progress drilling and metallurgical testwork at the Bonnie Vale, Lady Lila, and British Hill projects, as well as to fund transaction and development costs associated with recent and future acquisitions.

4.4 November Capital Raising

As announced on 18 November 2025, the Company has received firm commitments to raise approximately \$32 million (before costs) via the issue of 182,857,144 Shares at \$0.175 per share under a placement to professional and sophisticated investors (**Placement**). The Placement options will be issued subject to Shareholder approval, to be obtained at a general meeting to be convened by the Company in due course.

All Shares issued under the Placement and shares issued upon the exercise of the Placement options will rank equally with Forrestania's existing shares on issue.

As part of the capital raising, the Company will also undertake a Share Purchase Plan to raise up to an additional \$2,000,000 (**SPP**). The SPP will be offered to existing eligible Shareholders, being Shareholders of the Company with a registered address in Australia and New Zealand.

Pursuant to the SPP, the participants will have the opportunity to apply (without incurring brokerage fees) for up to \$30,000 worth of new Shares at a price of \$0.175 per share. The offer under the SPP is expected to open early December 2025 and will close in mid-January 2026.

As at the date of this Bidder's Statement, Forresteria is engaged in other various early-stage negotiations with third-party vendors with respect to certain transactions. Forresteria will continue to announce any material agreements or funding initiatives in accordance with its continuous disclosure obligations under the ASX Listing Rules.

Forresteria will continue to assess additional equity or partnership funding opportunities to ensure operational flexibility while advancing its gold portfolio in Western Australia.

4.6 Forresteria's Projects

Forresteria is a rapidly growing ASX listed gold exploration and development company with assets in Western Australia's premier goldfields districts.

Specifically, Forresteria has a substantial project footprint in the Forresteria region, the Westonia/Southern Cross region, the Bonnie Vale region near Coolgardie and in the Eastern Goldfields region near Menzies.

Through active exploration and project acquisition, Forresteria has delivered a JORC Compliant Mineral Resource Estimate (MRE) of 296,210 oz @ 1.35g/t Au across this project portfolio.

A summary of Forresteria's projects, their location and the Company's global MRE is given in figure 1 below.

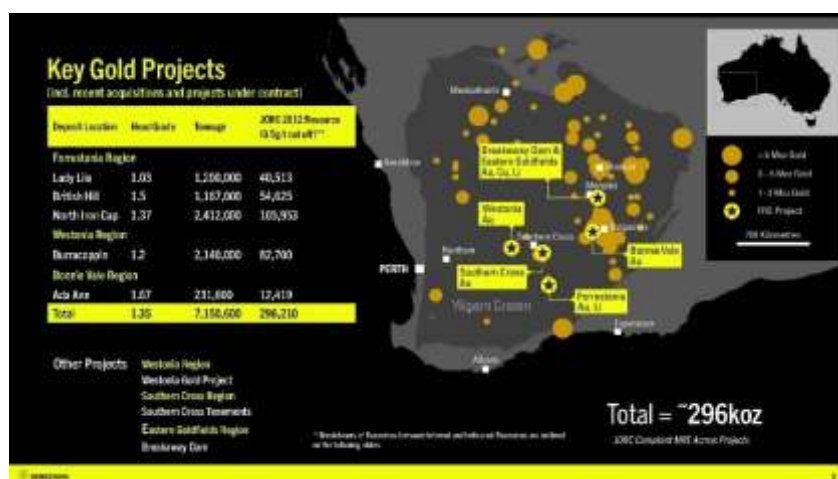

Figure 1. A description of Forresteria's projects and global Mineral Resource Estimates

4.6.1 Forresteria Project Hub

The Company's projects in the Forresteria region of Western Australia include an option to acquire Hyden Project Holdings (HPH) - which hosts a MRE of 297k oz @ 1.3g/t Au at the Lady Ada and Lady Magdalene deposits, Lady Lila - hosting a MRE of 40,513 oz @ 1.03g/t Au, British Hill - hosting a MRE of 54,625oz @ 1.5g/t Au and the North Iron Cap deposit - hosting 105,953oz @ 1.37g/t Au.

FRS's technical team has identified substantial potential for resource growth via dedicated exploration across the Forresteria hub and has several programs of work and drilling campaigns planned over the short to medium term.

FRS's projects in the Forresteria region all lie proximate to the Bounty Gold mine which features historical production of ~1M oz Au.

The Forresteria region has seen substantial historical and existing nickel and lithium production. FRS believes that several prospects within the Forresteria hub are prospective for these metals.

4.6.2 Southern Cross/Westonia Project Hub

Forresteria's Westonia Gold Project hosts the Burracoppin Gold Deposit (MRE 82,700oz Au @ 1.2g/t Au).

Separate to Forresteria's Burracoppin deposit, the Company is exploring 5 tenements in the Southern Cross region which span across 200km of the prolific Southern Cross greenstone belt. Much of Forresteria's tenure in this region is adjacent or proximate to Kula Gold's tenements and

much of FRS's land package also abuts tenements controlled by Golden Horse Minerals Ltd (ASX: GHM).

The Forrestania board considers that the Southern Cross/Westonia region could become Western Australia's next district-scale gold camp and the consolidation of the region provides exciting potential to build a bankable, long-life gold producing project.

4.6.3 Eastern Goldfields and Bonnie Vale Hubs

Forrestania's Bonnie Vale Project hosts the Ada Ann Gold Deposit which is located immediately north of the town of Coolgardie (MRE 12,419oz @ 1.67g/t Au). This project covers some 90km² and hosts several historical mines including Ada Ann and the Christmas Gift mine.

Evolution Mining's (ASX: EVN) operating Mungari Mine lies just 5km to the east of the Bonnie Vale Project, offering a potential processing option for any gold resources defined across the project.

Forrestania is excited about the exploration upside at the Bonnie Vale Project and is currently planning extensive exploration programs.

At the Breakaway Dam, located 17km east of Menzies, Forrestania is exploring over a 20km greenstone belt which is highly prospective for copper mineralisation as demonstrated by previous drilling and anomalous rock chips.

(c) **Management Commentary on Historical Results**

(i) **Assets**

Exploration tenements are carried at cost, less accumulated impairment losses and at 30 June 2025 stand at \$6,373,934 (30 June 2024: \$5,670,200 and 30 June 2023: \$7,795,606).

Exploration and evaluation expenditure incurred is accumulated in respect of each identifiable area of interest. These costs are only carried forward to the extent that they are expected to be recouped through the successful development and/or sale of the area or where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves.

Accumulated costs in relation to an abandoned area are written off in full against profit or loss in the year in which the decision to abandon the area is made.

A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest.

(ii) **Liabilities**

The Company has not carried any long-term liabilities, including borrowings or finance leases, during the past three financial years.

(iii) **Results**

The consolidated entity's loss after tax attributable to shareholders of Forrester Resources Limited for the financial year ending 30 June 2025 was \$1,419,856 (30 June 2024 loss: \$5,931,979 and 30 June 2023 loss: \$1,652,406). No dividends have been paid or declared by Forrester Resources Limited during the period ended 30 June 2025, 30 June 2024 and 30 June 2023.

The net assets of the consolidated entity at 30 June 2025 were \$7,019,765 (30 June 2024: \$6,110,585 and 30 June 2023: \$9,350,362) of which \$920,386 (30 June 2024: \$459,039 and 30 June 2023: \$2,117,054) represents cash and cash equivalents.

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for the Share, but in respect of partly paid Shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) **Dividend rights**

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid or credited as paid is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

No dividend shall carry interest as against Forresteria. The Directors may set aside out of the profits of Forresteria any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of Forresteria may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, Forresteria may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit. Under this dividend reinvestment plan, the whole or any part of any dividend or interest due to members or holders of any convertible securities in the capital of Forresteria who participate in the plan on their shares or any class of shares or any convertible securities, or any other amount payable to shareholders, may be applied in subscribing for or purchasing securities of Forresteria.

(d) **Winding-up**

If Forresteria is wound up, the liquidator may, with the authority of a special resolution of Forresteria, divide among the shareholders in kind the whole or any part of the property of Forresteria, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution of Forresteria, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares under the Bidder's Statement are fully paid ordinary shares, they are not subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of Shares**

Generally, Shares are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act or the ASX Listing Rules.

The Directors may decline to register, or prevent the registration of, a transfer of shares or apply a holding lock to prevent a transfer in accordance with the Corporations Act. This can occur in circumstances where the transfer is not in registrable form, Forresteria has a lien over any of the shares held, the registration is in breach of Australian law or any ASX Listing Rules, the transfer is not permitted under the terms of an employee share plan or Forresteria is otherwise permitted or required to do so under the ASX Listing Rules.

(g) **Variation of rights**

Pursuant to section 246B of the Corporations Act, Forrestania may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of Shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not Forrestania is being wound up, may be varied or abrogated with the consent in writing of the holders of three-quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(h) **Alteration of Constitution**

The Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

5.6 Dividend History

The Directors do not currently recommend the payment of a dividend and no amount has been paid or declared by way of a dividend to the date of this Bidder's Statement.

5.7 Corporate Governance

The Forrestania Board seeks, where appropriate, to provide accountability levels that meet or exceed the ASX Corporate Governance Council's Principles and Recommendations.

Details of Forrestania's corporate governance procedures, policies and practices can be obtained from Forrestania's website (forrestaniaresources.com.au/corporate-profile#governance).

6. PROFILE OF KULA

6.1 Disclaimer

This overview of Kula and all financial information concerning Kula contained in this Bidder's Statement has been prepared by Forrestania using publicly available information and documents provided by Kula.

The information in this Bidder's Statement concerning Kula has not been independently verified by Forrestania. Accordingly, Forrestania does not, subject to any applicable laws, to the extent appropriate make any representation or warranty, express or implied, as to the accuracy or completeness of this information. The information on Kula set out in this Bidder's Statement is a summary only and not considered to be comprehensive.

6.2 Overview of Kula

Kula Gold Limited holds a diversified portfolio of gold, kaolin, lithium, and niobium projects across Australia and Africa. Its key asset is the Mt Palmer Gold Mine near Marvel Loch (WA), in which it has an 80% interest. The Kirup Project (70% Kula) and Brunswick Project (100%) target lithium and gold in Western Australia, while the Wozi Niobium Project in Malawi (75% Kula) marks Kula's entry into critical minerals.

6.3 Kula Projects

6.3.1 Mt Palmer Gold Mine – 80%

Kula has continued to advance exploration at the Mt Palmer Gold Project, which was acquired by Kula during its previous financial year, and which Kula holds in joint venture with Aurumin Limited (ASX: AUN) (**Aurumin**). Kula has conducted multiple drilling programs conducted and a maiden Mineral Resource Estimate completed in the recent 30 September 2025 quarter.

RC Drilling, Phase 1 & Phase 2 Programs

Kula completed a track-mounted RC drill program targeting shallow extensions across multiple lodes. The program comprised 17 holes for a total of 701m, with drilling completed over Epis, Main Lode, Palmerston, Bryant, J2, El Dorado and East Lode.

Following the end of the most recent quarter, a larger RC rig commenced drilling to complete the Phase 1 program, testing deeper extensions and targets. Phase 2 drilling is scheduled to commence in November 2025.

Assay results from RC drilling at the Mt Palmer Gold Project were released to ASX on 3 November 2025 and returned positive results of 15m @ 9.4g/t Au (from 87m) including 6m @ 20.3g/t Au (from 90m) and 3m @ 5.8g/t Au (from 99m) at hole 25MPCRC0059. A second batch of assays from this

programme of 8 larger diameter RC drillholes is pending. Such results will be reported by Kula to the ASX in due course.

Diamond Drilling – Structural Analysis and Reef Intercepts

Kula reported that a diamond core HQ3 drill program had commenced, targeting shallow gold prospects and providing data for detailed structural analysis. The program aims to define plunge extensions and mineralisation directions.

The diamond core drilling has been logged by Model Earth structural consultants and sent for assay. Such results will be reported by Kula to the ASX in due course.

Mineral Resource Estimate – Tailings

On 28 July 2025, Kula announced to the ASX that it had completed a maiden JORC 2012-compliant Mineral Resource Estimate for the Mt Palmer Gold Mine Tailings.

The JORC 2012 compliant resource estimate reports an inferred resource of 98,534 tonnes at 0.63g/t Au and is located on a granted mining lease owned by the joint venture.

For further details, refer to Kula's ASX Announcement dated 28 July 2025 and titled "Maiden JORC Resource – Mt Palmer Gold Mine Tailings."

Joint Venture Update

On 11 September 2025 Kula's joint venture partner, Aurumin elected to retain its 20% equity interest in the Mt Palmer Gold Project by continuing to contribute to exploration expenditure on a pro-rata basis. On 23 September 2025, Kula was later advised that Aurumin had sold its equity interest in the Mt Palmer JV (Aurumin Mt Palmer Pty Ltd) to new owner Newcam Minerals Pty Ltd.

6.3.2 Wozi Niobium Project - 75%

As noted by Kula in its most recent 30 September 2025 quarterly report, Kula received formal approval for the grant of the Wozi Niobium Project tenement from the Director General of Malawi Government's Mining and Minerals Regulatory Authority.

Kula has undertaken a field exploration program to validate historic trenching results for niobium and tantalum and to expand the sampling footprint across the tenement. The program included systematic field mapping, rock-chip sampling and soil sampling to outline the scale potential of the Wozi Niobium Project. The soil sampling program consisted of 238 samples collected on east-west orientated lines at 200m line spacing and 50m sample intervals. Results confirmed robust +0.4% Nb₂O₅ soil anomaly along the contact zone of the nepheline syenite stock, with a strike width of approximately 200m and a peak value of 1.08% Nb₂O₅. A maiden drilling program is planned by Kula for November 2025 to test the scale and continuity of the anomaly.

On 10 October 2025, Kula announced that, subject to drilling results adding to the exploration results to date, it intends to spin off the Wozi Niobium Project into a newly formed entity, Niobium International Ltd. Subject to board and regulatory (including shareholder) approvals and minimum holding requirements. This transaction has not yet commenced as at the date of this Bidder's Statement.

6.3.3 Kirup Project – 70%

Kula continues to progress lithium and gold exploration at the Mustang Prospect, supported by co-funding from the Western Australian Government's Exploration Incentive Scheme. Kula was allocated up to \$180,000 in EIS funding, with approximately \$140,000 remaining available through to the end of November 2025.

Kula is actively marketing this project.

6.3.4 Marvel Loch Project – 100%

Kula has continued discussions to advance development of the large Boomerang Kaolin Deposit of 93.3 million tonnes (indicated resource of 15.2Mt & inferred resource of 78.1Mt), near excellent infrastructure in Southern Cross Western Australia.

Engineering studies continued for downstream processing on site to produce metakaolin products for the Green Construction Industry. Mineralogical/metallurgical test work by Sedgman has been

completed confirming the suitability of the raw material for green cement as well as many uses such as paint, rubber and pesticide production.

Kula has had discussions with potential acquirers and developers of the project continue with a view to monetising this asset.

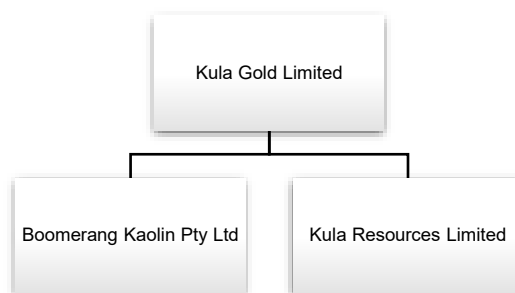

6.3.5 Brunswick Project – 100%

The Brunswick Project is in the Western Gneiss Terrain within Australia's Southwest and is prospective for lithium, Archean gold and copper, epithermal gold (Donnybrook Gold Mine Prospect). Kula believes this is an overlooked area, given the prospective geology, for example, the most recent material drilling programme in the project area was BHP in 1985 for gold under a ~\$5m JV farm-in. Positive results from soil sampling and rock chip sampling at the Donnybrook Gold Mine Prospect (which hosts the historical Donnybrook Gold Mine) revealed a strong, continuous gold-in-soil anomaly of over 250m wide and extending over 650m along strike (open in both directions) that require ongoing investigation.

Kula has recognised two new gold prospect areas, Jarvis and Camilleri, where historical gold records for the Camilleri (Donnybrook) Mine had production of 236.7 ounces of gold from 51.3 tonnes of material extracted (146g/t gold). Geologically speaking, the Jarvis Prospect has numerous shafts, 4 ex-Metana Minerals NL percussion holes that drilled wet sample in that area including one hole that entered into one of the old shafts. This prospect also has a historical 500ppm soil sample from the same company.

6.4 Corporate Structure

The corporate structure of Kula is shown in the diagram below:

Each of the subsidiaries shown above are wholly owned by Kula.

6.5 Kula Board of Directors

According to documents provided by Kula and searches of statutory registers, at the date of this Bidder's Statement, the directors of Kula are:

6.8 Treatment of Kula Options

Forrestania will extend the Offer to optionholders who exercise their Kula Options into Kula Shares during the Offer period.

Within 14 days of the issue of the Consideration under the Offer, Forrestania must offer Kula option holders the option to cancel their Kula Options in exchange for Forrestania Shares (or cash if shareholder approval is not received) as described below.

The number of Forrestania Shares issued is determined by first calculating the value of each unexercised Kula Option using the Black-Scholes model, based on specified inputs such as Kula's share price of \$0.0440, a risk-free rate of 3.60%, and a volatility of 200.13%. Once the fair value per option is established, that amount is divided by \$0.286 (the fixed valuation per Forrestania Share) to determine how many Forrestania Shares are to be issued in exchange for each Kula Option. Any fractional results are rounded up to the nearest whole share, and the total number of Forrestania Shares issued equals the aggregate value of the cancelled Kula Options divided by \$0.286.

Any Forrestania Shares issued under this arrangement will be subject to Forrestania obtaining shareholder approval and such shares will be offered under a prospectus (unless an applicable exception under section 708 of the Corporations Act applies). Forrestania will, in the event shareholder approval is not obtained, pay the holder of the Kula Options the cash value of the Kula Options.

6.9 Substantial Shareholders of Kula

As at the date of this Bidder's Statement, so far as is known to Forrestania, the following persons are substantial shareholders of Kula Shares:

7. RATIONALE FOR THE OFFER AND INTENTIONS OF FORRESTANIA

7.1 Forrestania's relationship with Kula

Forrestania and Kula have recently entered into a series of strategically aligned transactions over the previous months designed to strengthen Forrestania's position in the Southern Cross region of Western Australia and establish a cooperative relationship between the two companies. These transactions included both a direct project acquisition and an equity placement, reflecting Forrestania's broader strategy of consolidating high-quality gold assets in established mineral districts.

On 9 October 2025, Forrestania completed settlement of its acquisition of the Westonia Gold Project from Kula. The transaction transferred ownership of four granted exploration licences (E77/2756, E77/2766, E77/3234, and E77/3237) located immediately adjacent to the Edna May Gold Mine in Western Australia's Southern Cross region.

The acquisition represents a key component of Forrestania's regional consolidation strategy, expanding its footprint within one of Western Australia's most productive greenstone belts and positioning the company for future resource growth and development synergies.

In conjunction with the acquisition, Forrestania entered into a share subscription agreement with Kula to participate in a strategic placement. Under this agreement announced on 23 September 2025, Forrestania subscribed for \$1,868,434 in Kula shares at an issue price of 2.2 cents per share, securing an initial 7.37% equity interest in Kula.

This investment provided Forrestania with direct exposure to Kula's Mt Palmer Gold Project a high-potential exploration opportunity located in the same geological corridor as Forrestania's existing projects, and established the foundations for an aligned exploration and development strategy across the region.

These transactions created both a commercial and operational alignment between the companies, with Forrestania becoming a substantial shareholder in Kula and each company holding adjoining and complementary tenements.

The Offer represents a natural progression of that relationship. The proposed combination of Forrestania and Kula is expected to create a regionally consolidated gold explorer with a diversified portfolio spanning the Southern Cross, Forrestania, and Eastern Goldfields belts, delivering significant synergies in exploration, development, and capital efficiency.

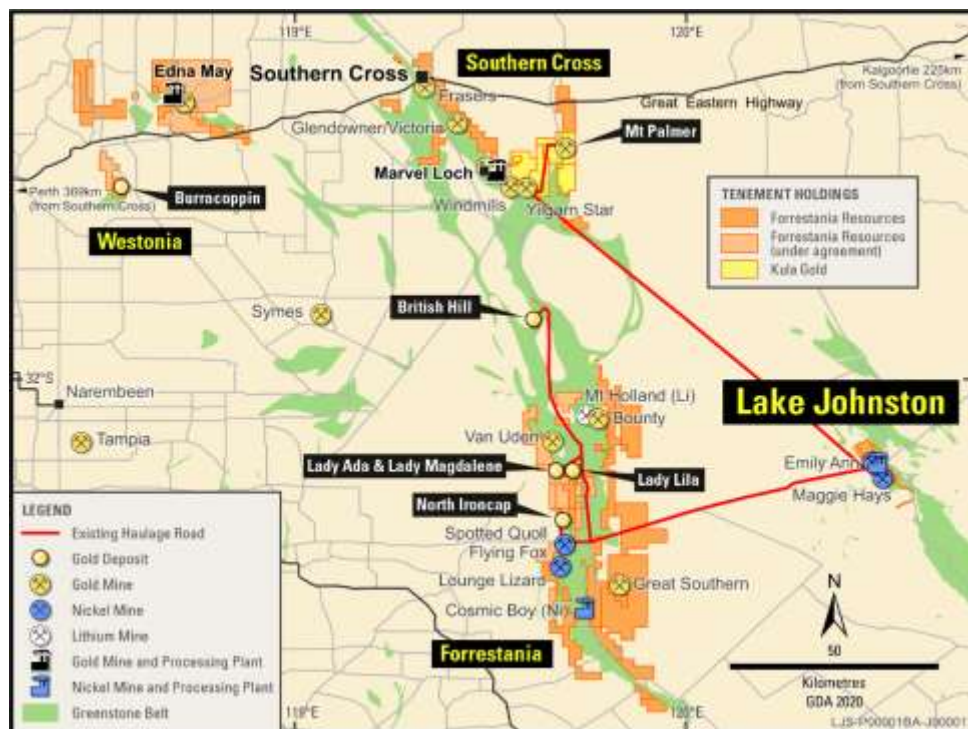

Figure 2. A description of Forrestania's tenure as it relates to Kula's tenure.

7.2 Intentions on conclusion of the Offer

The intentions of Forrestania in relation to Kula are set out in this Section of the Bidder's Statement. Those intentions have been formed on the basis of facts and information concerning Kula, and the general business environment, which are known at the time of preparing this Bidder's Statement. Final decisions will only be reached by Forrestania in light of material information and circumstances at the relevant time. Accordingly, the statements set out in this section are statements of current intention only and may vary as new information becomes available or circumstances change.

7.3 Disclaimer Regarding Forward-Looking Statements

This Bidder's Statement includes forward-looking statements that have been based on Forrestania's current expectations and predictions about future events including Forrestania's intentions (which include those set out in this Section 7). These forward-looking statements are, however, subject to inherent risks, uncertainties and assumptions that could cause actual results, performance or achievements of Forrestania, Kula and the Combined Group to differ materially from the expectations and predictions, express or implied, in such forward-looking statements. These factors include, among other things, those risks identified in this Bidder's Statement (including those set out in Section 10).

None of Forrestania, its officers, the persons named in this Bidder's Statement with their consent or the persons involved in the preparation of this Bidder's Statement makes any representation or warranty (express or implied) as to the accuracy or likelihood of any forward-looking statements. You are cautioned not to place reliance on these statements in the event that the outcome is not achieved. These statements reflect views and reasonable opinions as at the date of this Bidder's Statement.

7.4 Rationale for the Offer

Forrestania believes that there are a number of key strategic and financial benefits that will arise from the successful acquisition of Kula by Forrestania. These include:

- (a) the rationalisation of future decision-making processes in relation to the Combined Group and its prospective assets;
- (b) the benefits of economies of scale associated with the combination of complementary regional gold exploration and development assets;
- (c) the potential to substantially expediate future mining activities through the consolidation of gold resources required to underwrite capital investment associated with project development;
- (d) the potential to utilise Forrestania's demonstrated capacity to access equity market funding to advance the development of the consolidated group's assets;
- (e) Kula's technical resources will supplement and enhance Forrestania technical and operational capabilities;
- (f) the alignment of the interests of the two shareholder groups into a like-minded, single group of securityholders;
- (g) the reduction of corporate overheads and duplicated roles; and
- (h) the ability to consolidate human, technical and financial resources.

7.5 Forrestania's intentions regarding Kula as a wholly controlled entity

This Section 7.5 describes Forrestania's intentions if Forrestania acquires a Relevant Interest in 90% or more of the Kula Shares so as to become entitled to proceed to compulsory acquisition of the outstanding Kula Shares in accordance with Part 6A.1 of the Corporations Act. Forrestania intends (based on the information currently available to it) to implement its strategy for the Combined Group as set out below.

(a) Strategic review

Subject to what is disclosed elsewhere in this Section 7, Forrestania intends to undertake a detailed review of Kula's activities, assets and liabilities to evaluate their prospects, strategic relevance, funding requirements, financial performance and potential synergies and benefits between Forrestania and Kula. This may lead to modification of some of Kula's existing projects and activities. This strategic review will provide the main platform for Forrestania to identify and assess the specific areas that may provide benefits to Forrestania and the expected costs and time frames.

(b) **Corporate matters**

Forrestania intends to:

- (i) if entitled to do so, proceed with the compulsory acquisition of any Kula Shares not acquired under the Offer which it is entitled to compulsorily acquire in accordance with Part 6A.1 of the Corporations Act; and
- (ii) amend Kula's constitution to reflect Kula's status as a wholly owned subsidiary of Forrestania and seek to convert Kula from a public company to a proprietary company.

(c) **Composition of the Kula Board**

Forrestania intends to replace some or all of the members of the board of directors of Kula with a board structure and directors appropriate for a wholly owned subsidiary.

In accordance with the Bid Implementation Agreement, as soon as practicable after Forrestania has a Relevant Interest in more than 50% of the Kula Shares and the Offer becomes or is declared unconditional, Kula must take all actions necessary to ensure the resignation and appointment of directors of Kula such that a majority of the directors of Kula are directors nominated by Forrestania in writing, but provided that a minimum of two of the existing Kula Board remain, a proper board is constituted at all times and that Forrestania procures that its appointees to the Kula Board do not participate in decisions of Forrestania in relation to the Takeover Bid until after the date of termination of the Bid Implementation Agreement in accordance with its terms and the end of the Offer Period, (or such later date as Forrestania and Kula agree) and a quorum remains for that purpose.

The Forrestania's nominees of the Kula Board will be Mr David Geraghty and Mr Adam Turnbull. Forrestania may elect other nominees to join the Kula Board at the relevant time.

In addition, it is Forrestania's current intention, in the event that the Offer is successful, to seek to reflect in the organisation structure of the Combined Group, Kula personnel whose skills are highly regarded and who have extensive knowledge of Kula's assets.

(d) **Corporate office and employees**

Subject to the strategic review, Forrestania intends to continue to conduct Kula's business operations. Forrestania will, however, consider centralising the corporate head office of Kula by incorporating those functions performed by it into the administrative structure of Forrestania. It is proposed that functions such as company secretarial, financial management and accounting will be centralised. It is intended that the centralised corporate office will be in Perth, Western Australia.

As a result of the implementation of Forrestania's intentions, some of Kula's employees may undertake functions that will be centralised in the Combined Group. Some job losses may occur as a result, however, the incident, extent and timing of such job losses cannot be predicted in advance. Forrestania intends to discuss employment arrangements with the existing personnel of Kula.

(e) **Accounting policy**

Forrestania intends to conduct a review of Kula's accounting policies. It is expected that this review will result in the adoption of Forrestania accounting policies.

7.6 Forrestania's Intentions Regarding Kula as a Part Owned Entity

Forrestania reserves the right to declare the Offer free from the 50% Minimum Acceptance Condition (or any other Condition). However, Forrestania has not decided whether it will free the Offer from any of the Conditions.

This Section 7.6 describes Forrestania's intentions if, on completion of the Offer, Forrestania holds a sufficient number of Kula Shares to exercise control over the management and operations of Kula, but is not entitled to compulsorily acquire all outstanding Kula Shares.

Forrestania may continue acquiring Kula Shares in reliance on the '3% creep' exception in item 9 of section 611 of the Corporations Act following completion of the Offer.

Kula Shareholders should be aware that, in this circumstance, the liquidity of Kula Shares may be materially decreased.

It is possible that, even if Forrestania is not entitled to proceed to compulsory acquisition of outstanding Kula Shares under Part 6A.1 of the Corporations Act, it may subsequently become entitled to exercise rights of general compulsory acquisition under Part 6A.2 of the Corporations Act. If so, it intends to exercise those rights.

(a) **General**

Forrestania will implement the intentions described in Section 7.6 above to the extent that it is economically feasible and subject to the requirements of the Corporations Act and any other applicable laws or regulations. These intentions specifically include those in respect of strategic review, corporate matters, corporate office and employees and general business integration.

(b) **Composition of the Kula Board**

Upon completion of Forrestania's proposed acquisition of Kula, it is proposed that:

- (i) no less than two of the existing Kula Directors will remain appointed to the Kula Board; and
- (ii) Mr Mark Stowell will join the Forrestania Board as a Kula nominee.

(c) **Elimination of duplication**

To the extent that activities and functions, including management, presently carried out by Forrestania and Kula will be duplicated, such duplication will be eliminated where it is economically efficient to do so.

(d) **Remaining Kula Shareholders**

If Forrestania acquires less than 90% but more than 50.1% of the Kula Shares on issue, then Kula Shareholders should be aware that if they do not accept the Offer they may become a "locked-in" minority after the end of the Offer Period (i.e. if Forrestania holds a majority of Kula Shares but is not entitled to compulsorily acquire the remaining Kula Shares).

(e) **Dividends and Funding**

Kula does not currently pay dividends. The payment of dividends by Kula is at the discretion of the Kula Board, the majority of which will comprise Forrestania's nominees. Forrestania has not formed an intention about retaining or varying the current dividend policy of Kula (through its nominees on the board of Kula) and will do so when the strategic review in Section 7.5(a) is completed.

(f) **Limitations in Giving Effect to Intentions**

There may be limitations to Forrestania's intentions as outlined in this Section 7.6 due to the legal obligations of the Kula Directors to have regard to the best interests of Kula and its shareholders, the requirements of the Corporations Act, the ASX Listing Rules relating to transactions between related parties and all other applicable laws. Forrestania may require legal and/or financial advice before deciding what action to take in connection with the intentions outlined in this Section 7.6.

7.7 Other Intentions

Other than as set out in this Section 7, it is the present intention of Forrestania:

- (a) to continue to hold the key assets of Kula and not to redeploy its fixed assets;
- (b) substantially continue to conduct the businesses of Kula in its current manner, including but not limited to:
 - (i) undertaking exploration at the Mt Palmer Gold Project;
 - (ii) marketing the Mustang Project to attract interested parties; and
 - (iii) assessing the potential of a spin-off of the Wozi Niobium Project into a newly formed entity.
- (c) subject to the strategic review, not make any major changes to the business or assets of Kula and not to redeploy any of the fixed assets of Kula; and
- (d) continue the employment of retained employees of Kula.

8. EFFECT OF THE OFFER ON FORRESTANIA AND PROFILE OF THE COMBINED GROUP

8.1 Approach

This Section 8 provides an overview of Forrestania and its subsidiaries following the acquisition by Forrestania of all, or a portion of the Kula Shares on issue, in various scenarios following the Offer, and the effect of the Offer on Forrestania and Kula if the Offer is successful.

If Forrestania does not acquire at least 90% of the Kula Shares during the Offer Period, and therefore does not become entitled to compulsorily acquire the remainder of the Kula Shares, some of the benefits that would otherwise accrue to Forrestania if Kula were to become a wholly-owned subsidiary of Forrestania may not be fully realised.

8.2 Disclaimer Regarding Kula and the Combined Group Information

In preparing the information relating to Kula and the Combined Group contained in this Bidder's Statement, Forrestania has relied on publicly available information relating to Kula which has not been independently verified by Forrestania or its Directors. Risks may exist in relation to Kula (which may affect the Combined Group) of which Forrestania is unaware. If any material risks are known to the directors of Kula, they must be disclosed in the Target's Statement to be issued by Kula.

Accordingly, subject to any applicable laws, Forrestania makes no representations or warranties (express or implied) as to the accuracy and completeness of such information.

8.3 Profile of the Combined Group

If the Offer is successful, Kula Shareholders will receive Forrestania Shares in exchange for their Kula Shares. If Forrestania is successful in obtaining effective control of Kula, all of the Kula Shareholders (including Kula Shareholders who have received Forrestania Shares pursuant to the Offer) will become shareholders in the Combined Group.

Forrestania believes that there are a number of key strategic and financial benefits that will arise from the successful acquisition of Kula by Forrestania. These include:

- (a) rationalisation of future decision-making processes in relation to the Combined Group and its prospective assets;
- (b) the potential improvement of the efficiency and timeliness in the development of the assets of the Combined Group to maximise shareholder value by accelerating exploration and development;
- (c) Kula's technical resources will supplement and enhance Forrestania technical and operational capabilities;
- (d) the alignment of the interests of the two shareholder groups into a like-minded, single group of securityholders; and
- (e) the reduction of corporate overheads and duplicated roles.

8.4 Effect of Completion of the Offer on Forrestania's Capital Structure

There are a range of factors that may impact the number of Forrestania Shares that will be on issue following completion of the Offer, including the number of acceptances of the Offer, the number of unlisted securities exercised during the Offer Period (if any), and the number of Forrestania Shares and Forrestania Options otherwise issued by Forrestania during the Offer Period (if any).

Assuming that:

- (a) the Offer is accepted in respect of all Kula Shares on issue as that the date of this Bidder's Statement; and
- (b) no Forrestania Shares are issued prior to the Consideration being provided to all Kula Shareholders who have accepted the Offer,

approximately 178,875,471 new Forrestania Shares will be issued to Kula Shareholders, resulting in the number of Forrestania Shares on issue increasing to approximately 696,410,200 on an undiluted basis and 802,982,428 on a fully diluted basis.

On completion of the Offer, Kula Shareholders will hold approximately 25.69% of the total issued capital in Forrestania on an undiluted basis and approximately 22.28% on a fully diluted basis.

A summary of the capital structure of the Combined Group on completion of the Offer based on the assumptions set out above, is set out in the table below.

TOTAL FORRESTANIA SECURITIES	NUMBER
Forrestania Shares	517,534,729
Forrestania Listed Options ¹	27,997,228
Forrestania Unlisted Options ¹	33,125,000
Forrestania Performance Rights ¹	45,450,000
Forrestania Consideration Shares ²	178,875,471
Total undiluted	696,410,200
Total diluted	802,982,428

Notes:

1. Refer to Section 5.1 for further information.
2. Excluding 149,864,470 Kula Shares that are held by Forrestania as at the date of this Bidder's Statement and assuming that Forrestania acquires 100% of the Kula Shares on issue that it does not already own.

The Offer extends to any person who becomes registered as a holder of Kula Shares during the period from the Register Date until the end of the Offer Period, due to the conversion of Kula Options that are on issue at the Register Date.

8.5 Corporate Structure of the Combined Group

If the Offer is successful and Forrestania acquires 100% of the Kula Shares on issue, the corporate structure of the Combined Group will be as shown in the diagram.

8.6 Basis for Preparation of the Pro Forma Financial Information

The pro forma balance sheet as at 30 June 2025 set out below (**Pro Forma Balance Sheet**) has been prepared for illustrative purposes only and on the assumption that the acquisition of the ownership interest in Kula occurred on one day, that is, there are no staged acquisitions.

The Pro Forma Balance Sheet has been prepared assuming two scenarios, being that Forrestania acquires 100% of Kula and that Forrestania acquires 50.1% of Kula.

The Pro Forma Balance Sheet has been prepared in accordance with the measurement and recognition principles of International Financial Reporting Standards.

The Pro Forma Balance Sheet has not been audited and may be subject to changes arising from an audit process if an audit was performed on them. The audit reviewed balance sheet of Kula as at 30 June 2025 and audited consolidated balance sheet of Forrestania as at 30 June 2025 are also presented below.

The Pro Forma Balance Sheet is indicative only. Forrestania has drawn its own conclusions based on the known facts and other publicly available information.

This Section should be read in conjunction with the underlying financial information from which it was extracted, and the accounting policies of Forrestania and Kula as disclosed in their most recent financial reports.

No assessment of impairment of goodwill has been undertaken at the date of this Bidder's Statement, and the amounts shown are subject to further review and allocation as part of the formal post-acquisition accounting process. No transaction costs (including but not limited to advisory, legal, duties) have been included in the pro-forma.

Final measurement of non-controlling interest will be determined upon completion of acquisition accounting in accordance with AASB

8.7 Outlook for the Combined Group

This Bidder's Statement does not include any financial forecasts or projections for revenue or profit in relation to Forrestania, Kula or the Combined Group.

Forrestania has given careful consideration as to whether there is a reasonable basis to produce reliable and meaningful forecast financial information for the Combined Group. The Forrestania Directors have concluded that as at the date of this Bidder's Statement, it would be misleading to provide forecast financial information for the Combined Group.

9. AUSTRALIAN TAX CONSIDERATIONS

9.1 Overview

The following is a general summary of the Australian income tax, GST and duty considerations for Kula Shareholders who accept the Offer. The Australian taxation consequences for Kula Shareholders will depend on their individual circumstances. Shareholders should make their own enquiries and seek independent professional advice on their individual circumstances.

This summary is based upon the provisions of the *Income Tax Assessment Act 1936 (Cth)*, the *Income Tax Assessment Act 1997 (Cth)* (ITAA 1997) and the *Taxation Administration Act 1953 (Cth)* (TAA), and other applicable tax laws and practice in effect as at the date of this Bidder's Statement. It is not intended to be an authoritative or complete statement or analysis of the tax laws applicable to the particular circumstances of every Kula Shareholder. It is recommended Kula Shareholders should seek independent professional advice regarding the taxation consequences of disposing of their Kula Shares in the light of their own particular circumstances.

This summary is not applicable to all Kula Shareholders. It is relevant to Kula Shareholders who are individuals, companies (other than life insurance companies), trusts and complying superannuation funds that hold their Kula Shares on capital account for Australian tax purposes. This summary does not apply to Kula Shareholders who:

- (a) hold their Kula Shares on revenue account (such as share trading entities or entities who acquired their Kula Shares for the purposes of resale at a profit) or as trading stock;
- (b) hold their Kula Shares under an employee share scheme offered by Kula where those Kula Shares remain subject to deferred taxation under Division 83A of the ITAA 1997;
- (c) may be subject to special tax rules, such as partnerships, tax exempt organisations, entities subject to the investment manager regime under subdivision 842-1 of the ITAA 1997 in relation to their Kula Shares, insurance companies, dealers in securities or shareholders who change their tax residency while holding their Kula Shares;
- (d) have a functional currency for Australian tax purposes other than an Australian functional currency; or
- (e) are subject to the taxation of financial arrangements rules in Division 230 of the ITAA 1997 in relation to gains and losses on their Kula Shares.

Shareholders who are not resident in Australia for tax purposes should also take into account the tax consequences under the laws of their country of residence, as well as under Australian law, of the disposal of Kula Shares under the Offer.

9.2 Australian Tax Resident Shareholders

This Section 9 applies to Kula Shareholders who accept the Offer and are residents of Australia for Australian income tax purposes that hold their Kula Shares on capital account.

(a) Capital Gains Tax Event

By accepting the Offer, Kula Shareholders will dispose of their Kula Shares to Forrestania in exchange for the Consideration Shares, comprising Forrestania Shares. The disposal of the Kula Shares to Forrestania will give rise to a CGT event A1. The time of the CGT event should be the date the Kula Shares are disposed of, which will be the date that Kula Shareholders enter into a contract with Forrestania.

If a Kula Shareholder does not accept the Offer and their Kula Shares are compulsorily acquired in accordance with Part 9A.1 of the Corporations Act, the date of disposal for CGT purposes will be the date when Forrestania becomes the owner of the Kula Shares.

The cost base of a Kula Share will generally be equal to the cost of acquiring the Kula Share, plus any incidental costs of acquisition and disposal (such as brokerage fees and legal costs). The reduced cost base of a Kula Share is determined in a manner similar to the cost base although some differences in the calculation of the reduced cost base may exist depending on the Kula Shareholder's particular individual circumstances. The cost base and reduced cost base of each Kula Share will depend on the individual circumstances of each Kula Shareholder.

In the absence of CGT roll-over relief, the following tax consequences are expected to arise for Kula Shareholders accepting the Offer:

- (i) a capital gain will be made to the extent the capital proceeds received by Kula Shareholders from the disposal of their Kula Shares (being the market value of the Forrestania Shares) exceed the cost base of those Kula Shares; or
- (ii) a capital loss will be made to the extent the capital proceeds received by Kula Shareholders from the disposal of their Kula Shares are less than the reduced cost base of those shares.

(b) **CGT Scrip for Scrip Roll-over Relief**

Kula Shareholders who make a capital gain from the disposal of their Kula Shares may be eligible to choose CGT scrip for scrip roll-over relief (provided certain conditions are met). CGT scrip for scrip roll-over relief enables Kula Shareholders to disregard the capital gain they make from the disposal of their Kula Shares under the Offer.

Broadly, for roll-over relief to be available, Forrestania must become the owner of 80% or more of the Kula Shares under the Offer and Kula Shareholders must make a capital gain on the disposal of their Kula Shares. If a capital loss arises, no CGT scrip for scrip roll-over relief is available.

Kula Shareholders do not need to inform the ATO, or document their choice to claim CGT scrip for scrip roll-over relief in any particular way, other than to complete their income tax return in a manner consistent with their choice.

(c) **Consequences of Choosing CGT Scrip for Scrip Roll-over Relief**

If a Kula Shareholder chooses to obtain CGT scrip for scrip roll-over relief, the capital gain arising on the disposal of their Kula Shares under the Offer should be disregarded.

Further, the first element of the cost base for the Forrestania Shares received is determined by attributing to the Forrestania Shares, on a reasonable basis, the existing cost base of the Kula Shares exchanged under the Offer. The first element of the reduced cost base is determined similarly.

Finally, for the purposes of determining future eligibility for the CGT Discount, the acquisition date of the Forrestania Shares is taken to be the date on which the Kula Shareholder originally acquired their Kula Shares.

(d) **Consequences if CGT Scrip for Scrip Roll-over Relief is not available or is not chosen**

If a Kula Shareholder does not qualify for CGT scrip for scrip roll-over relief or does not choose to obtain CGT scrip for scrip roll-over relief, the general CGT treatment outlined above at Section 9.2(a) will apply.

(e) **Capital Proceeds**

The capital proceeds on the disposal of the Kula Shares should be equal to the market value of the Consideration Shares received by Kula Shareholders, at the time of the disposal (or change of ownership where there is no disposal contract).

(f) **CGT Discount**

The CGT Discount may apply to Kula Shareholders that are individuals, complying superannuation funds or trusts, who have held, or are taken to have held, their Kula Shares for at least 12 months (not including the date of acquisition or the date of disposal) at the time of the disposal of their Kula Shares. Where the relevant conditions are satisfied, the CGT Discount is:

- (i) one-half if the Kula Shareholder is an individual or trustee; meaning only 50% of the capital gain will be included in assessable income; and
- (ii) one-third if the Kula Shareholder is a trustee of a complying superannuation entity; meaning only two-thirds of the capital gain will be included in assessable income.

The CGT Discount is not available to Kula Shareholders that are companies.

If a Kula Shareholder makes a discount capital gain, any carried forward capital losses will be applied to reduce the undiscounted capital gain before either the one-half or one-

third discount is applied. The resulting amount is then included in the Kula Shareholder's net capital gain for the income year and included in assessable income.

The CGT Discount rules relating to trusts are complex. Accordingly, it is recommended trustees seek their own independent advice on how the CGT Discount applies to them and the trust's beneficiaries.

9.3 Non-Australian resident Shareholders

A Kula Shareholder who is not a resident of Australia for taxation purposes (a Foreign Resident Shareholder), or who is the trustee of a foreign trust for CGT purposes, and who has not used their Kula Shares at any time in carrying on a business through a permanent establishment in Australia, should generally not make a taxable capital gain on the disposal of Kula Shares under the Offer unless the Kula Shares are 'indirect Australian real property interests'. In broad terms, the Kula Shares will be indirect Australian real property interests if:

- (a) the Kula Shareholder, together with its associates, held an interest of 10% or more in Kula at the time of disposal or for a 12 month period within the 24 months preceding the disposal (a 'non-portfolio interest test'); and
- (b) more than 50% of the market value of Kula's assets is attributable to direct or indirect interests in 'taxable Australian real property' (as defined in the tax law) (the 'principal asset test').

A Foreign Resident Shareholder who has previously been an Australian tax resident and chose to disregard a capital gain or loss in respect of their Shares from CGT event I1 on ceasing to be an Australian tax resident may be subject to Australian CGT consequences on disposal of their Shares.

Foreign Resident Shareholders should seek their own independent tax advice as to the tax implications of the Offer, including tax implications in their country of residence.

9.4 Foreign resident capital gains withholding ('FRCGW')

The FRCGW provisions place obligations on the purchaser of inter alia, non-portfolio (10% or greater) shareholdings in a company whose principal assets are taxable Australian property (which includes Australian mining assets) but only where the market value of that shareholding is \$750,000 or more. Whilst referred to as applying to acquisitions from 'foreign residents' the obligations need to be considered for both resident and foreign resident shareholders in Kula.

The obligation to withhold 12.5% of the purchase price and remit that amount to the ATO is obviated where the shareholder provides either a Clearance Certificate from the Commissioner of Taxation (which attests to their Australian tax residency) or a Vendor Declaration (which declares that their Kula Shares are not an 'indirect Australian real property interest').

Where Forresteria considers it may have obligations under the FRCGW regime it will contact the Kula shareholder to provide them with an opportunity to seek a Clearance Certificate or make a Vendor Declaration if they are entitled to do so.

9.5 GST

No GST should be payable by Kula Shareholders on the acquisition of their Kula Shares by Forresteria under the Offer, or on the receipt of Forresteria Shares as consideration for acceptance of the Offer. Kula Shareholders who are registered for GST may not be entitled to input taxed credits (or only entitled to reduced input taxed credits) for any GST incurred on costs associated with the disposal of their Kula Shares.

9.6 Duty

No Australian duty should be payable by Kula Shareholders on the acquisition of their Kula Shares by Forresteria under the Offer, or on the receipt of Forresteria Shares as consideration for acceptance of the Offer.

10. RISK FACTORS

10.1 Overview

The business activities of Forrestania are subject to various risks that may impact the future performance of Forrestania. Some of these risks can be mitigated using safeguards and appropriate systems and controls, but some are outside the control of Forrestania and cannot be mitigated.

If the Offer becomes unconditional, Kula Shareholders who accept the Offer will become Forrestania Shareholders. In those circumstances, Kula Shareholders will:

- (a) continue to be exposed to the risks associated to the investment in Kula as a result of their indirect interest in Kula through Forrestania;
- (b) be exposed to the risks which are specific to an investment in Forrestania; and
- (c) be exposed to additional risks relating to the Offer and the Combined Group.

The principal risk factors are explained below. These risks are not intended to be an exhaustive list of the risk factors to which Forrestania are exposed.

Kula Shareholders should read the Bidder's Statement carefully and consult their professional advisers before deciding whether to accept the Offer. This Section 10 has been prepared without taking into account the individual financial objectives, financial situation and particular needs of Kula Shareholders.

An investment in Forrestania carries no guarantee with respect to the payment of dividends, return of capital or price at which shares will trade and should be considered speculative.

10.2 Risks Relating to the Offer

RISK CATEGORY	RISK
Conditions of the Offer	<p>As described in Section 12.9, the Offer is subject to a number of Conditions. Subject to any statutory withdrawal rights that may be available, Kula Shareholders who accept the Offer whilst it remains conditional will no longer be able to sell any of their Shares in Kula or withdraw their acceptance of the Offer.</p> <p>For those Kula Shareholders who accept the Offer, and the Conditions remain unsatisfied at the end of the Offer Period and are not otherwise waived by Forrestania, there is no obligation on Forrestania to issue Forrestania Shares to you as consideration for your Kula Shares. In those circumstances, any acceptances of the Offer will be void and you would then be free to deal with your Kula Shares as you wish.</p>
Dilution Risk	<p>Forrestania currently has 517,534,729 Shares on issue. Pursuant to the Offer, Forrestania proposes to issue approximately up to 178,875,471 Consideration Shares to Kula Shareholders.</p> <p>Following the issue of the abovementioned Forrestania Shares (and assuming Forrestania acquires 100% of the issued capital of Kula under the Offer), existing Forrestania Shareholders will be diluted by approximately 25.69% (on an undiluted basis) and 22.28% (on a diluted basis).</p>
Transaction Completion risk	<p>Forrestania seeks to acquire 100% of the issued capital of Kula by way of the Offer. The Offer is subject to Conditions, including a Minimum Acceptance Condition, which may be waived at Forrestania's discretion. If any of the Conditions are not satisfied or waived, or any of the counterparties do not comply with their obligations, Completion may be deferred or not occur.</p>
Transaction Due Diligence Risk	<p>Forrestania and its advisers have performed certain pre-acquisition due diligence on Kula. While Forrestania has obtained certain warranties from Kula under the Bid Implementation Agreement with respect to information provided by Kula, there is a risk that the due diligence conducted has not identified issues that would have been material to the decision by Forrestania to fully acquire Kula. A material adverse issue which was not identified prior to Forrestania's acquisition of Kula could have an adverse impact on the financial performance or operations of the relevant businesses and may have a material adverse effect on Forrestania.</p>

RISK CATEGORY	RISK
<p>Limited withdrawal rights</p>	<p>As described in Section 12.7 and 12.14, Kula Shareholders may only withdraw their acceptance of the Offer in limited circumstances. Otherwise, Kula Shareholders will be unable to withdraw their acceptances, even if the value of the Forrestania Shares to be issued to Kula Shareholders as consideration varies from the date of their acceptance.</p>
<p>Issue of Forrestania Shares as consideration</p>	<p>Kula Shareholders are being offered Forrestania Shares as consideration under the Offer. As a result, the value of the consideration will fluctuate depending upon the market value of Forrestania Shares at any given time. Accordingly, the market value of the Forrestania Shares at the time you receive them may vary significantly from their market value on the date of your acceptance of the Offer.</p> <p>In addition, the Sale Nominee (and/or a nominee of the Sale Nominee) will be issued Forrestania Shares attributable to certain Ineligible Foreign Securityholders and will sell them on market. It is possible that such sales may exert downward pressure on the Combined Group's share price during the applicable period. In any event, there is no guarantee regarding the prices that will be realised by the Sale Nominee or the future market price of the Forrestania Shares. Future market prices may be either above or below current or historical market prices.</p>
<p>Sale of Forrestania Shares</p>	<p>Under the Offer, Forrestania will issue a significant number of new Forrestania Shares. Some holders of Forrestania Shares may not intend to continue to hold their Forrestania Shares and may wish to sell them. There is a risk that this may adversely impact the price of, and demand for, Forrestania Shares.</p>
<p>Acquisition of Less than 90% of Kula Shares</p>	<p>There are some risks associated with the Offer for Kula Shareholders who do not accept the Offer and remain Kula Shareholders. If, in connection with or following the Offer, Forrestania acquires between 90% and 100% of the Kula Shares, Forrestania may be entitled to compulsorily acquire the remaining Kula Shares.</p> <p>If Forrestania does not acquire a Relevant Interest of at least 50% of the Kula Shares, it may choose to waive the 50% condition of the Offer.</p> <p>If Forrestania acquires more than 50.1% but less than 90% of the Kula Shares, Forrestania will hold a controlling interest in Kula. The remaining Kula Shareholders will be in a minority position in a company with a large controlling shareholder whose objectives for Forrestania may differ from their own. They could also encounter a lower level of liquidity in Kula Shares than exists today, which could result in a lower price for those Kula Shares should they wish to sell them in future.</p>
<p>Merger Integration</p>	<p>The integration of Forrestania and Kula may take longer than expected and the anticipated efficiencies and cost savings may be less than estimated.</p>
<p>Rollover Relief</p>	<p>Broadly, for capital gains tax rollover relief to be available, Forrestania must become the owner of 80% or more of the Kula Share under the Offer and Kula Shareholders must make a capital gain on the disposal of their Kula Share. If a capital loss arises, no CGT scrip for scrip roll-over relief is available. If Forrestania achieves a Relevant Interest in more than 90% of all Kula Shares, they can proceed to compulsorily acquire any minority holdings of Kula Shares.</p> <p>If Forrestania acquires a Relevant Interest in at least 90% of Kula Shares, then the 80% voting threshold will be met. In this regard, Forrestania will not do anything which may have the effect of denying CGT relief for Kula Shareholders who accept the Offer made to them.</p> <p>In circumstances where Forrestania and Kula still want the Offer to proceed and Forrestania does not have a Relevant Interest in at least 80% of Kula, then it is not certain whether scrip for scrip CGT rollover relief will be available to Kula Shareholders as it will depend upon the ultimate Relevant Interest that Forrestania acquires in Kula under the Offer.</p> <p>Kula Shareholders should refer to Section 9 for further details regarding the availability of scrip for scrip CGT rollover relief.</p>

RISK CATEGORY	RISK
Change in risk and investment profile	If the Offer is completed, Kula Shareholders will be exposed to risk factors relating to Forrestania and to certain other risks relating to the Combined Group and the integration of Forrestania and Kula. While the operations of Forrestania and Kula are similar in a number of ways, there may be further risks relating to the operation of a broader suite of assets both in nature, geographic scope, environmental risks, human resources and native title risks.

10.3 Specific Risks Relating to Forrestania (and the Combined Group)

RISK CATEGORY	RISK
Mining and Exploration	<p>The mineral exploration licences comprising the Existing Projects and Kula Projects (together, the Combined Group's Projects) are at various stages of exploration, and potential investors should understand that mineral exploration, development and production are high-risk undertakings.</p> <p>There can be no assurance that future exploration of these licences, or any other mineral licences that may be acquired in the future, will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited.</p> <p>The future exploration activities of the Combined Group may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process, changing government regulations and many other factors beyond the control of the Combined Group.</p> <p>The success of the Combined Group will also depend, inter alia, upon its ability to maintain title to the mineral exploration licences comprising the Combined Group's Projects, obtaining all required approvals for their contemplated activities, successful exploration and/or acquisition of reserves, successful design, construction, commissioning and operating of mining and processing facilities, successful development and production in accordance with forecasts and successful management of the operations.</p> <p>In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the Combined Group's Projects, a reduction in the cash reserves of the Combined Group and possible relinquishment of one or more of the mineral exploration licences.</p> <p>The Combined Group's exploration activities to date are not advanced to a stage where reliable reserve or resource estimates can be made. Reserve and resource estimates, if made in the future, are judgments based on drilling results, past experience with mining properties, knowledge, experience, industry practice and many other factors. Estimates which are valid when made may change substantially when new information becomes available. Ore estimation is an interpretive process based on available data and interpretations and, thus, estimations may prove inaccurate.</p> <p>The actual quality and characteristics of ore deposits cannot be known until mining takes place and will almost always differ from the assumptions used to develop reserves. Further, reserves are valued based on future costs and future prices and, consequently, the actual reserves and resources may differ from those estimated, which may result in either a positive or negative effect.</p> <p>No assurance can be given that commercial tonnages, grades or recovery will be achieved or realised. Commodity price fluctuations, increased production costs, or reduced recovery rates, may render possible reserves containing relatively lower grades uneconomic and may result in a restatement of such reserves. Moreover, short-term operating factors relating to possible reserves, such as sequential development of ore bodies and processing of new or different ore types or grades, may cause mining operations to be unprofitable in any particular accounting period.</p> <p>There is a risk that unforeseen geological and geotechnical difficulties may be encountered if and when developing and mining reserves. In this event, a loss of revenue may be caused due to the lower than expected production</p>

	and/or higher than anticipated operation and maintenance costs and/or on-going unplanned capital expenditure in order to meet production targets.
Hyden Option	<p>As outlined in this Bidder's Statement, on 11 August 2025, the Company announced that it had entered into an option agreement to acquire 100% of the shares in Hyden Project Holdings Pty Ltd (HPH). Subsequently, on 3 November 2025, the Company announced that the option agreement had been extended and novated such that the Company would acquire 100% of the shares in Hyden Resources Pty Ltd (HRPL) upon exercise of the option. HRPL holds 100% of the shares in HPH. HPH is the registered holder of M77/1310, E77/2207, E77/2219, E77/2220, E77/2239, E77/2460, E77/2711 and P77/4534 (Hyden Tenements). Refer to the announcement of 11 August 2025 for detailed information on the assets of HRPL and HPH.</p> <p>It is publicly available information that Classic Minerals Limited has commenced proceedings in the Supreme Court of Western Australia asserting a right to ownership of the Hyden Tenements. Based on publicly available information, those proceedings are still before the Supreme Court of Western Australia. Classic Minerals Limited has also asserted, separately, rights to 80% of the gold rights on those Hyden Tenements under a Memorandum of Understanding. HRPL asserts that the Memorandum of Understanding has simply expired in accordance with its terms. If Classic Minerals Limited is successful in both of its claims, and Forrestania exercises its option, then there could be risks to the tenure and interest in gold on the Hyden Tenements. Assessment of the Court proceedings, and the information available to the Company will form part of any decision to exercise the option to acquire HRPL.</p>
Completion of the acquisition of the Lake Johnston Project	<p>Forrestania has announced a "transformational" acquisition of the Lake Johnston Project from Poseidon Nickel Pty Limited, a wholly owned subsidiary of Horizon Minerals Limited, on 18 November 2025. As at the date of this Bidder's Statement, that acquisition remains subject to the satisfaction of certain conditions precedent and has not yet completed. There remains a risk therefore that completion may not occur. Where completion of the acquisition of the Lake Johnston Project does not occur, any benefit referred to in this Bidder's Statement as arising from Forrestania owning a processing facility will not be realised. The acquisition of the Lake Johnston Project is subject to the satisfaction of the following outstanding conditions precedent as at the date of this Bidder's Statement:</p> <ul style="list-style-type: none"> (a) both parties have received all necessary regulatory approvals or waivers (including Forrestania obtaining written confirmation from ASX that Listing Rule 11.1.3 will not apply); (b) both parties entering into all necessary deeds of assignment for the transfer of the Lake Johnston assets; and (c) the parties obtaining all relevant third party approvals and consents.
Incomplete acquisitions	<p>Set out in Section 4.5 of this Bidder's Statement is an outline of acquisition agreements that Forrestania has entered into which have not yet completed as at the date of this Bidder's Statement. There remains a risk, pursuant to the terms of those outstanding agreements, that some or all of those agreements will not complete. Where an agreement does not complete, and subject to the circumstances that cause completion not to occur, Forrestania would not have access to the assets the subject of that agreement and could potentially be liable for a failure of completion. As at the date of this Bidder's Statement, Forrestania is not aware of any specific reason as to why any of those agreements listed in Section 4.5 would not complete and will continue to comply with its continuous disclosure obligations in relation to those transactions.</p>
Dependence on licences, permits and approvals	<p>The Combined Group's projects require governmental licences, permits, authorisations, concessions and other approvals in connection with their activities in Western Australia, including in relation to laws and regulations governing prospecting, development, mining, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, surface rights, environmental protection, safety and other matters (Operating Authorisations).</p> <p>Obtaining and complying with the necessary Operating Authorisations or governmental regulations can be complex, costly and time-consuming and is not assured. The duration, cost and success of applications for Operating</p>

	<p>Authorisations are contingent on many factors, including those outside the control of the Combined Group. Delay in obtaining or renewing, or failure to obtain or renew, a material and necessary permit could mean that the Combined Group may be delayed or, in a worst case scenario, unable to proceed with the development or continued operation of a mine or project.</p> <p>The Operating Authorisations that the Combined Group need may not be issued, maintained or renewed either in a timely fashion or at all, which may constrain the ability of the Combined Group to conduct its mining operations, which in turn may impact the Combined Group's operations, financial performance and financial position.</p> <p>No assurance can be given that new laws or regulations will not be enacted or that existing laws and regulations will not be applied in a manner which could limit or curtail the Combined Group's activities and ultimate development or operation of the Combined Group's assets. Any inability to conduct the Combined Group's mining operations pursuant to the applicable Operating Authorisations would materially reduce the Combined Group's production and cash flow.</p>
<p>Operating risk</p>	<p>The Combined Group's business operations are subject to risks and hazards inherent in the mineral exploration and development industry. The exploration for and the development of Mineral Resources involves significant risks, including failure to locate or identify commercially viable mineral deposits, environmental and safety hazards, operational and technical difficulties encountered in drilling and exploration, industrial accidents, equipment failure, import/customs delays, shortage or delays in installing and commissioning plant and equipment, unanticipated metallurgical problems which may affect eventual extraction costs, seismic activity, unusual or unexpected rock formations, flooding, fires, or other natural disasters, outbreaks, continuations or escalations of disease (including pandemics), interruption to, or the increase in costs of, services (such as water, fuel or transport), sabotage, labour shortages, community, government or other interference and interruption due to inclement or hazardous weather conditions. These risks could result in damage to, or destruction of, mineral properties, production and power facilities, dams, or other properties, and could cause personal injury or death, environmental damage, pollution, delays in mining, increased production costs, monetary losses and possible legal liability. In particular, mining operations involve the use of heavy machinery, which involves inherent risks that cannot be completely eliminated through preventative efforts.</p> <p>These risks and hazards could also result in damage to or destruction of property, plant and equipment, personal injury, environmental damage, business interruption, monetary losses and possible legal liability. Forrestania may become subject to liability for accidents, pollution or other hazards against which it cannot insure or against which it may elect not to insure because of premium costs or for other reasons, or in amounts which exceed policy limits.</p> <p>No assurances can be given that Forrestania will achieve commercial viability through exploration success and exploitation of its projects and, until Forrestania is able to realise value from its projects, it is likely to incur ongoing operational losses.</p> <p>Costs of production may be affected by a variety of factors, including changing waste-to-ore ratios, adverse weather conditions, geotechnical issues, unforeseen difficulties associated with power supply, water supply and infrastructure, ore grade, metallurgy, labour costs, changes to applicable laws and regulations, general inflationary pressures and currency exchange rates. If faced by the Combined Group, these circumstances could result in the Combined Group not realising its operational or development plans, or in such plans costing more than expected, or taking longer to realise than expected.</p> <p>Any of these outcomes could have an adverse effect on the Combined Group's financial and operational performance.</p>
<p>Additional requirements for Capital</p>	<p>The Combined Group's operations and expansion plans may also result in increases in expected capital expenditure commitments. The Combined Group may require additional funding to continue or expand its business and may require additional capital in the future to, among other things, develop its projects or build additional processing capacity, and no assurance can be given that such external capital will be available at all or available on terms acceptable to the Combined Group.</p>

	<p>In addition, should the Combined Group consider that its exploration results justify commencement of production on any of the Combined Group's Projects, additional funding will be required to implement the Combined Group's development plans, the quantum of which remain unknown at the date of this Bidder's Statement. These costs could reasonably include refurbishment of the Lake Johnston mill, mining costs and other costs associated with a transition from exploration activities to mining activities.</p> <p>Following completion of the Offer, the Combined Group may seek to raise further funds through equity or debt financing, joint ventures, licensing arrangements, or other means. In the event that the Combined Group is unable or not permitted to obtain adequate external financing on acceptable terms, or at all, to satisfy its operating, development and expansion plans, the Combined Group's business and results of operations may be materially and adversely affected. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing may not be favourable to the Combined Group and might involve substantial dilution to Forrester Shareholders.</p> <p>If additional funds are raised through the issue of equity securities, the capital raising may be dilutive to shareholders (if the Combined Group determines that a pro rata entitlement offer is not the most appropriate method of equity fundraising or shareholders elect not to participate in such entitlement offers). While the Combined Group will be subject to the constraints of the ASX Listing Rules regarding the percentage of capital that it is able to issue within a 12-month period (other than where exceptions under the Listing Rules apply), the Combined Group's Shareholders at the time may be diluted as a result of such capital raisings.</p>
Results of Studies	<p>Subject to the results of future exploration and testing programs, the Combined Group may progressively undertake a number of studies in respect to the Combined Group's current or new projects. These studies may include scoping, pre-feasibility and bankable feasibility studies.</p> <p>These studies will be completed within certain parameters designed to determine the economic feasibility of the Combined Group's current or new projects within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Combined Group's current or new projects or the results of other studies undertaken by the Combined Group (e.g. the results of a feasibility study may materially differ to the results of a scoping study).</p> <p>Further, even if a study determines the economics of the Combined Group's current or new projects, there can be no guarantee that the current or new projects will be successfully brought into production as assumed or within the estimated parameters in the feasibility study once production commences including but not limited to operation costs, mineral recoveries and commodity prices. In addition, the ability of the Combined Group to complete a study may be dependent on the Combined Group's ability to raise further funds to complete the study if required.</p>

10.4 Industry specific risks relating to the Combined Group

RISK CATEGORY	RISK
Native Title and Aboriginal Heritage	<p>In relation to tenements which the Combined Group has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Combined Group to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.</p> <p>There is a substantial level of regulation and restriction on the ability of exploration and mining companies to have access to land in Australia. Negotiations with both native title holders and landowners / occupiers are generally required before gaining access to land for exploration and mining activities. Inability or delays in gaining such access may adversely impact the Combined Group's ability to undertake its proposed activities. The Combined Group may need to enter into compensation and access agreements before gaining access to land.</p> <p>It is also possible that, in relation to tenements which the Combined Group has an interest in or will in the future acquire such an interest,</p>

RISK CATEGORY	RISK
	<p>there may be areas over which legitimate rights of traditional owners or surface rights holders exist. In this case, the ability of the Combined Group to gain access to tenements (through obtaining consent of any relevant traditional owner, body or landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected. The Combined Group's mineral titles may also be subject to access by third parties including, but not limited to, the areas traditional owners. This access could potentially impact the Combined Group's activities and may involve payment of compensation to parties whose existing access to the land may be affected by the Combined Group's activities.</p> <p>There may be areas or objects of Aboriginal heritage within the areas covered by those access agreements. If Aboriginal heritage sites or objects exist, Forrestania may need to enter into further agreements with the traditional owners of the sites. The ability of Forrestania to implement its work programme may be adversely affected in both time and cost.</p> <p>The Directors of the Combined Group will closely monitor the potential effect of native title claims or Aboriginal heritage matters involving tenements in which the Combined Group has or may have an interest.</p>
Exploration Costs	<p>The exploration costs of the Combined Group are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainty, and accordingly, the actual costs may materially differ from the estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely impact the Combined Group's viability.</p>
Mine Development	<p>The ability of the Combined Group to achieve exploration and production targets, or meet operating and capital expenditure estimates, on a timely and accurate basis cannot be assured.</p> <p>Possible future development of mining operations at the Combined Group's is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.</p> <p>If the Combined Group commences production on one of its current or new projects, its operations may be disrupted by a variety of risks and hazards which are beyond the control of the Combined Group. No assurance can be given that Combined Group will achieve commercial viability through the development of its projects.</p> <p>The risks associated with the development of a mine will be considered in full should the Combined Group's Projects reach that stage and will be managed with ongoing consideration of stakeholder interests.</p>
Environmental	<p>The operations and proposed activities of the Combined Group are subject to Australian regulations concerning the environment. As with most exploration projects and mining operations, the Combined Group's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The Combined Group intends to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.</p> <p>Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Combined Group's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Combined Group for</p>

RISK CATEGORY	RISK
	<p>damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations.</p> <p>The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Combined Group's operations more expensive.</p> <p>Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programmes or mining activities.</p>
Climate Risk	<p>There are a number of climate-related factors that may affect the operations and proposed activities of the Combined Group. The climate change risks particularly attributable to Combined Group include:</p> <p>the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. Combined Group may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Combined Group and its profitability. While the Combined Group will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Combined Group will not be impacted by these occurrences; and</p> <p>climate change may cause certain physical and environmental risks that cannot be predicted by the Combined Group, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Combined Group operates.</p>
Regulatory Compliance	<p>The Combined Group's operating activities are subject to extensive laws and regulations relating to numerous matters including resource licence consent, environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. As set out in Section 10.3 above, the Combined Group requires permits from regulatory authorities to authorise Forrestania's operations. These permits relate to exploration, development, production and rehabilitation activities.</p> <p>While Forrestania believes that it is in substantial compliance with all material current laws and regulations, agreements or changes in their enforcement or regulatory interpretation could result in changes in legal requirements or in the terms of existing permits and agreements applicable to Forrestania or its properties, which could have a material adverse impact on Forrestania's current operations or planned development projects.</p> <p>Obtaining necessary permits can be a time-consuming process and there is a risk that the Combined Group will not obtain these permits on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Combined Group from proceeding with the development of a project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Combined Group's activities or forfeiture of one or more of the Combined Group's Projects.</p>
Metallurgy	<p>Metal or mineral recoveries are dependent upon the metallurgical process, and by its nature processing contains elements of significant risk such as:</p> <p>(a) identifying a metallurgical process through test work to produce a saleable metal or concentrate;</p>

RISK CATEGORY	RISK
	<p>(b) developing an economic process route to produce a metal or concentrate; and</p> <p>(c) changes in mineralogy in the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the project.</p> <p>No assurance can be given that any particular level of recovery from mineral resources or reserves will in fact be realised or that a mineral resource will ever qualify as commercially viable which can be legally and economically exploited.</p>

10.5 General Risks Relating to the Combined Group

RISK CATEGORY	RISK
Reliance on Key Personnel	Forrestania currently has a small executive team, The Combined Group will be dependent on the experience, skills and knowledge of its key personnel in Australia to successfully manage its business. The loss of any of the Combined Group's key personnel, the inability to recruit necessary staff as needed or the increased cost to recruit or retain the necessary staff, may cause a disruption to the Combined Group and adversely impact the Combined Group's operations, financial performance and financial position.
Economic	General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Combined Group, as well as on its ability to fund its operations. If activities cannot be funded, there is a risk that the tenements comprising the Combined Group's Projects may have to be surrendered or not renewed. General economic conditions may also affect the value of the Combined Group and its valuation regardless of its actual performance.
Competition Risk	The industry in which the Combined Group will be involved is subject to domestic and global competition. Although the Combined Group will undertake all reasonable due diligence in its business decisions and operations, the Combined Group will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Combined Group's projects and business.
Market Conditions	<p>Share market conditions may affect the value of the Combined Group's Shares regardless of the Combined Group's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. <p>The market price of Shares can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Combined Group nor the Directors warrant the future performance of the Combined Group or any return on an investment in the Combined Group.</p>
Commodity Price Volatility and Exchange Rate Risks	The Combined Group's operating results, economic and financial prospects and other factors will affect the trading price of the Shares. In addition, the price of Shares is subject to varied and often unpredictable influences on the market for equities, including, but not limited to, general economic conditions including the performance of

RISK CATEGORY	RISK
	<p>the Australian dollar on world markets, inflation rates, foreign exchange rates and interest rates, variations in the general market for listed stocks in general, changes to government policy, legislation or regulation, industrial disputes, general operational and business risks and hedging or arbitrage trading activity that may develop involving the Shares.</p> <p>In particular, the share prices for many companies have been and may in the future be highly volatile, which in many cases may reflect a diverse range of non-company specific influences such as global hostilities and tensions relating to certain unstable regions of the world, acts of terrorism and the general state of the global economy.
