25 November 2025

Enlitic Announces Global Partnership with Philips for AI-Enabled DICOM Data Migration

Enlitic, Inc. (“Enlitic” or “the Company”) has expanded the previously announced partnership with Royal Philips (NYSE: PHG, AEX: PHIA) (“Philips”) to provide AI-enabled DICOM data-migration and workflow solutions for Philips’ enterprise imaging customers.

Effective immediately, Enlitic is authorised by Philips as one of two approved migration vendors, enabling Philips customers to access Enlitic’s AI-powered migration technology and ENDEX™ data-standardisation capabilities. This solution is designed to accelerate DICOM migrations while ensuring consistent, high-quality imaging data to support clinical review and workflow efficiency.

Future enhancements to the partnership are also anticipated, including potential integration of Enlitic’s ENABLE™ module, which provides advanced search, analytics and cohort development capabilities.

With analyst estimates placing the global radiology market between US$35–75 billion today and pointing to strong long-term growth, Enlitic is positioned to increase market share with a continued focus on the substantial opportunity for efficient image-data migration and workflow optimisation for our market leading OEM partners.

Authorising Enlitic as one of two approved migration vendors, the Philips agreement is expected to provide an additional sources of revenue, as the Company engages, over time, with Philip’s enterprise imaging customers.

Chief Executive Officer Michael Sistenich said:

“Enlitic is proud to have had our latest AI-powered workflow and data migration solutions authorised by Phillips to enable their customers to use Enlitic products and services to enhance their PACS offerings. These enhancements should significantly accelerate DICOM migrations, enhance data quality, and streamline radiologist workflows—empowering Phillips’ customers to optimize workflow efficiency and data access.”

“We look forward to meeting with current and prospective customers and partners at the annual RSNA (Radiology Society of North America) Conference in Chicago, Illinois between November 30-December 4, 2025 to further announcements with our customers and the industry. Enlitic, will be at RNSA North Hall on Booth 7730.

Philips is a global leader in diagnostic imaging, ultrasound, image-guided therapy, patient monitoring and enterprise informatics, with operations in more than 100 countries and 2023 revenue of EUR 18.2 billion.

– ENDS –

About Enlitic

Enlitic is a software company that uses artificial intelligence to develop software products that manage medical imaging data in radiology (such as MRI, CT scans, X-ray and ultrasound images) and licences such products to healthcare providers. Enlitic's products (including its current product offering and product suite under development) seek to standardise, protect, integrate, and analyse data to create the foundation of a real-world evidence platform that can improve clinical workflows, increase efficiencies, and expand capacity.
