ASX Announcement

\$5.2m European military contract

- A follow-on contract for a European military end-customer of \$5.2m as part of a broader roll-out.
- In anticipation of this order, DroneShield has all hardware on-the-shelf to deliver this order and will receive cash payment in 4Q25.

DroneShield Limited (ASX:DRO) (DroneShield or the Company) is pleased to announce it has received a follow-on contract for \$5.2 million from an in-country European reseller, that is contractually required to distribute the products to a European military customer. The contract is for handheld counterdrone systems and associated accessories. DroneShield has all stock on-the-shelf to deliver this order and will receive cash payment in 4Q25. No additional material conditions need to be satisfied.

The reseller is a vetted counterparty that DroneShield has worked with for three years. Over this period, and excluding the contract announced today, DroneShield has received 12 contracts from this reseller totalling over \$70 million.

DroneShield confirms that:

- it does not consider the identity of the counterparty/customer to be information that a reasonable person would expect to have a material effect on the price or value of the DroneShield's securities; and
- the announcement contains all material information relevant to assessing the impact of the contract on the price or value of the DroneShield's securities, and is not misleading by omission.

As previously announced to the market, the announcement threshold for received orders in 2026 will increase from the current \$5 million (which was based on the \$57 million of revenue in 2024) to \$20 million, unless there is a further rationale to announce a received smaller order.

This announcement has been approved for release to the ASX by the Board.
