

ASX Announcement

28 November 2025

ISO 27001 Certification Received

Energy One Limited (“EOL”) is pleased to announce that the Group’s management system has now been registered as conforming to the standard of **ISO/IEC 27001: Information security, cybersecurity and privacy protection**, and a certificate has been issued to that effect.

This announcement is a follow up to that of 27 October 2025, where EOL advised that registration was expected to occur following completion of some final wrap activities. These have now been completed successfully.

ISO 27001 is an industry recognised gold standard of information security and reflects EOL’s ongoing commitment and investment in protecting customer, supplier and employee data. Certification is the result of an investment program undertaken by EOL over the last three years to substantially upgrade internal systems and processes as well as in information security capability itself. It is noted that the security environment is rapidly involving and ISO also reflects EOL’s commitment to continuous improvement in this area.

Shaun Ankers (CEO) commented; “We are very happy to receive ISO27001 certification. Information security is a key consideration for both existing and new customers and we are confident that ISO acts as a key differentiator in winning business. We have previously published an ambition to grow revenues at 15-20% and ISO will be a key enabler of that goal”.

Authorised for release by the EOL Board Chairman.
