ASX ANNOUNCEMENT

SIMPEC awarded construction contract by Fortescue

Highlights

- SIMPEC has been awarded a construction package at Fortescue's Solomon Power Station located in the Pilbara of Western Australia.
- The work relates to modifications to the Solomon Power Station in connection with Fortescue's Pilbara Generation Project (Project).

Fortescue – Solomon Power Station

WestStar Industrial Limited (Company or WestStar) (ASX: WSI), an Australian industrial services company, operating in the energy, resources, utility and infrastructure sectors, is pleased to announce the award of a new contract, valued at approximately \$4.5 million, to its wholly owned subsidiary SIMPEC for modification works at Fortescue Ltd.'s (Fortescue) Solomon Power Station.

The project will commence immediately and is scheduled to be completed in Q1 CY2026.

Fortescue is modifying an existing thermal power station at Solomon Mine as part of its Pilbara Generation Project. These works support the short term energy requirements of the decarbonised electric fleet as they transition across to renewable energy.

SIMPEC's Scope of Work includes the construction, commissioning and testing of a single gas reciprocating engine (11 MW unit) tying into an existing power station and the installation and testing of all balance of plant required to support the gas reciprocating engine infrastructure.

SIMPEC Managing Director Mark Dimasi noted:

“We are proud to partner with Fortescue. This contract represents another milestone in SIMPEC’s growth.

Our team is excited to apply our multidisciplinary expertise to support the modification of the Solomon Power Station and deliver the infrastructure needed to support Fortescue. We are committed to executing this work safely, efficiently and with the high-quality outcomes expected.

On behalf of SIMPEC, I extend my sincere thanks to Fortescue for entrusting us with this Project.”

Ends
