

DRILLING COMMENCED AT T55 CU-AU PORPHYRY DRILL TARGET, NSW

HIGHLIGHTS

- **Drilling has commenced to test the T55 Cu-Au Porphyry Target in the Company interpreted NW extension of the Macquarie Arc, NSW**
- **\$80,000 NSW Government drilling grant was awarded under the Critical Minerals and High-Tech Metals Exploration Program which will contribute 40% of the cost for the 500m deep rotary mud and diamond core tail drill hole**
- **Drilling is expected to take two weeks, assays expected in early Q1, 2026**
- **This program is fully funded with a recent successful \$2.5m* placement to advance exploration activities**

“The co-funding drilling grant awarded is recognition by the NSW Geological Survey of the targeting work completed by project partner Nimrod Resources and the Altitude technical team and is very encouraging for our concept of a large-scale Cu-Au porphyry mineral system on the project at the T55 Target, 60km east of the main Byrock Project area.

This will be the 3rd drilling program in four months and is in line with Altitude’s pipeline strategy of unlocking shareholder value through testing for high-quality discoveries.”

- Duncan Chessell, Managing Director

Neighbours, operating mines, geochronology dates (magmatic U/Pb) of mineralisation events of significant regional deposits - background image solid geology. The Company's interpretation is the Macquarie Arc extends under cover to the northwest of the conventional north-south corridor across to the Byrock Project.

Altitude Minerals Ltd (**Altitude** or **Company**) (**ASX: ATT**) is very pleased to announce that drilling has commenced at Cu-Au Porphyry T55 target. This target is part of Altitude's Byrock Project in the interpreted Northern Macquarie Arc, where the Company recently completed drill testing the high-priority "Pipe" targets. On 11 February 2025, Altitude announced the Company had entered into an Option to Earn-in agreement with project owner Nimrod Resources, granting Altitude the rights to earn up to a 75% interest in the Project.
