Executive Chairman's Comments

Mr Noel Newell, Executive Chairman of 3D Energi, said "I am very pleased to see the strong support for this capital raise. These funds will be applied towards Essington well testing and drilling activities associated with the second well in the VIC/P79 (Charlemont-1) exploration campaign in the Otway Basin with our JV Partners ConocoPhillips and KNOC as well as providing funds for general work capital purposes, including costs of the Placement. The drilling campaign is the culmination of 12 years of technical work in derisking and advancing a large portfolio of gas prospects. As announced on 11 December 2025, drilling has commenced at the Charlemont-1 well and is expected to take approximately 32.9 days to drill to a total depth (TD) of 2830m True Vertical Depth Sub-Sea (TBDSS), subject to operational conditions, including wireline logging activities. We look forward to keeping shareholders updated as we progress through these milestone activities".
