

G11 acquires new tenements

- G11 has entered into a binding tenement sale agreement to acquire two new tenements in Tasmania's Mt Read volcanic belt;

G11 Resources Ltd ('G11' or 'the Company') wishes to advise it has entered into a binding tenement sale agreement to acquire EL6/2024 and EL33/2022 (see Figure 1 below) from Iltani Resources Limited for \$150,000 AUD. The agreement is subject to standard conditions such as ministerial approval. This adds 119km² of tenure to the Company's position within the Mt Read Volcanics.

G11 Resources technical team is currently working towards the commencement of drilling at its Zig Zag CSAMT anomaly located immediately along trend to the north from the Mt Lyell copper/gold mine on its existing Sedgwick EL11/2025 that sits to the north of Mt Lyell along the Great Lyell fault. Sedgwick remains the company's priority focus in 2026.

Further updates will be provided over coming weeks on progress at Sedgwick.

ABOUT TASMANIA AND THE MT READ VOLCANIC BELT

Tasmania's Mt Read Volcanic belt is home to a world class mineral endowment and has mines such as Mt Lyell (Cu, Au), Henty (Au), Roseberry (Zn, Pb, Cu, Ag, Au), Hellyer (Zn, Pb, Cu, Ag, Au), and Renison Bell (Sn). The Mt Read Volcanic belt still remains largely underexplored predominantly due to access. Mining is the largest contributor to Tasmania's GDP and western Tasmania's economy is highly reliant on mining and mineral exploration. The state government is highly supportive of the mining and exploration industry. Significantly Tasmania is powered 100% by renewable energy.

This announcement has been approved for release by the Board of Directors of G11 Resources Ltd.
