

AEERIS LTD

29 December 2025

RECEIPT OF RESEARCH & DEVELOPMENT TAX INCENTIVE

Aeeris Ltd (“**Aeeris**” or “the **Company**”) confirms the receipt of its FY25 Refundable Research & Development (**R&D**) Tax offset in the sum of \$506,992.50, supporting ongoing investment in the Company’s proprietary technology platforms.

This incentive supports Aeeris’ continued investment in developing advanced proprietary technology, particularly the Company’s new Australian Weather And Risk Environment (AWARE) system and enhanced forecasting capabilities.

EWN AWARE™ represents a significant leap forward for the Company, forming the core of its next-generation weather intelligence platform. R&D activities throughout FY25 focused on building high-performance cloud architecture, developing data-processing pipelines, and integrating new modelling techniques to improve event detection, speed, and precision. These innovations strengthen Aeeris’ ability to deliver accurate, real-time hazard insights to enterprise, government, and insurance clients.

The R&D program also progressed new forecasting methodologies, including AI-assisted systems and proprietary hail and severe storm prediction tools. These advancements increase operational independence, reduce reliance on legacy systems, and expand the Company’s IP base, supporting higher long-term margins and scalability.

The R&D Tax Incentive continues to be an important contributor to Aeeris’ technology roadmap, backing the Company’s strategy to deliver cutting-edge environmental intelligence and drive future product innovation.

This announcement has been approved and authorised for release by the Board of Aeeris Ltd.
