**ASX RELEASE****VECTION EXPANDS ITS AI KIOSK PORTFOLIO WITH FOLLOW-ON ORDER FROM KIOSK EMBEDDED SYSTEMS**

Vection Technologies Ltd (ASX:VR1, OTC:VCTNY, FRA:S1X), ("Vection" or the "Company"), a leading provider of INTEGRATEDXR® and AI-powered digital transformation solutions, is pleased to announce it has received a follow-on purchase order valued at approximately \$0.5m from long-term partner KIOSK Embedded Systems ("KISE").

The order builds on the AI kiosk portfolio expansion announced on 20 November 2024 and reflects the continued scaling of activities, services and supplies that commenced in 2021, with agreements extended annually across multiple fiscal years.

**HIGHLIGHTS:**

- \$0.5m follow-on order from KISE, demonstrating execution and expansion of previously announced agreements.
- Approximately 60% of the order value represents annual recurring revenue ("ARR") derived from prior deployments.
- Reorder of 50 third-generation Wallmount KIOSK units ("wall-I"), with delivery requested by 31 December 2026.
- Expected revenue recognition of \$200k in FY26 and \$300k in 1H27, aligned with delivery schedules.
- Confirms increasing market penetration in Central Europe, particularly within the hospitality sector.

**OVERVIEW**

The latest order from KISE showcases Vection's capacity to turn previously secured enterprise wins into steady, growing revenue streams, underscoring the strength and resilience of the Company's order book.

Since starting engagement in 2021, and more recently with the AI kiosk portfolio expansion announced in November 2024, Vection's partnership with KISE has expanded in both revenue and operational scope over multiple fiscal periods. The reordering of third-generation Wallmount KIOSKs indicates ongoing demand for Vection's IntegratedXR platform, which blends physical infrastructure with extended reality ("XR") software and AI-powered features to create immersive, data-driven enterprise environments.

Notably, 60% of the order's value stems from ARR generated by previous deployments, underscoring the loyalty of Vection's solutions and its ability to foster deeper customer relationships. The continued deployment in hospitality settings further enhances Vection's presence in Central Europe and affirms its role as a reliable enterprise technology provider offering integrated XR and AI solutions.

Revenue from this order is projected to be recognised throughout FY26 and the first half of FY27, aligned with delivery and implementation milestones.

Gianmarco Biagi, Managing Director of Vection Technologies, said: *"This follow-on order from KIOSK Embedded Systems demonstrates the successful execution of agreements announced in prior periods and reinforces the recurring nature of Vection's INTEGRATEDXR® and AI-enabled solutions. The expansion of this long-standing partnership highlights our ability to scale enterprise deployments across fiscal years while delivering sustainable, recurring revenue."*
