### Extraordinary General Meeting

On 13 October 2025, an Extraordinary General Meeting of shareholders approved all resolutions, including the acquisition of two high grade gold project acquisitions and the extinguishing of \$4.7 million in legacy debt.

## Viking Gold Project

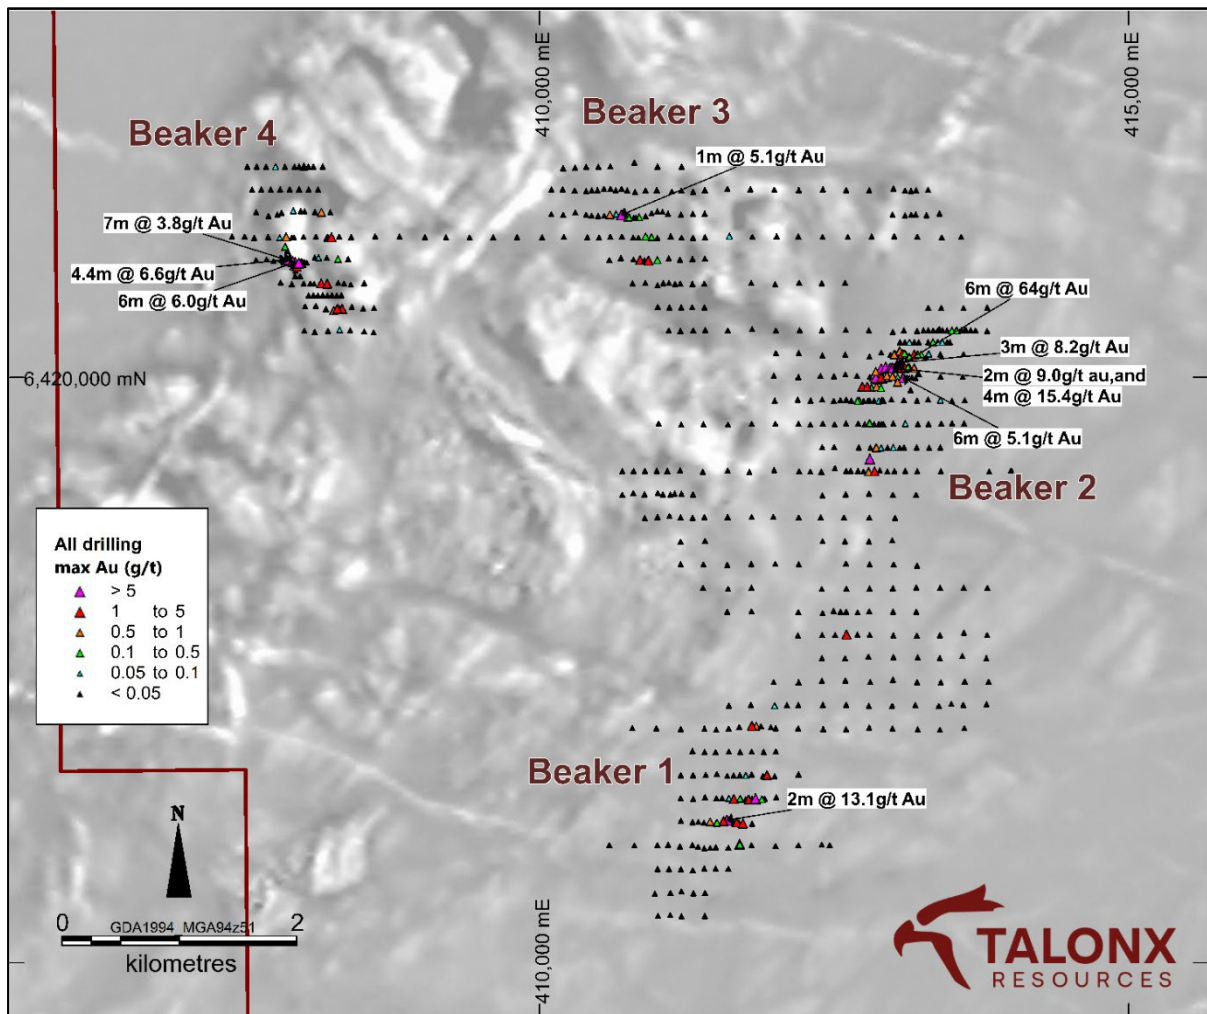

The Viking Gold Project comprises 66km<sup>2</sup> of granted tenure situated within the Albany–Fraser Province, a high-grade metamorphic terrane dominated by gneisses and reworked granitoids. Primary gold mineralisation intersected at Viking is associated with moderately east dipping quartz veins within discrete shear zones in a granite host. The Beaker 2 prospect is the highest priority target and hosts a significant high-grade supergene zone which the Company has targeted with its maiden RC drilling program.

**Figure 1. Viking Gold Project**

Significant gold mineralisation intersected by previous drilling at the Beaker 2 prospect includes:

- **16VKAC044** 6m @ 64.0g/t Au from 50m
- **17VKAC075** 2m @ 9.0g/t Au from 29m, and  
4m @ 15.4g/t Au from 40m
- **14VKRC017** 3m @ 8.2g/t from 40m
- **14VKRC015** 3m @ 15.3g/t Au from 28m
- **BJA225** 11m @ 3.1g/t Au from 14m
- **VKB2RC004** 6m @ 5.1g/t Au from 141m

The 10-hole (867m) drilling campaign at Beaker 2 was completed in December 2025 and was designed primarily to evaluate the resource potential of the high-grade, shallow oxide gold zone at the prospect. Assay results are expected in late-January 2026.

## Blair North Project

The Blair North Project is located 25km east of Kalgoorlie, surrounded by established operations and gold deposits. The project has been explored recently by Metal Hawk Limited who successfully identified nickel sulphide and primary gold mineralisation at the Commodore and Commodore North prospects. The project offers drill-ready targets along strike and at depth at the Commodore prospects, in addition to numerous other untested targets currently being reviewed.

During the quarter planning commenced for RC drilling at Blair North. Programme of Works (PoW) approval was granted from the Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) for drilling at the Commodore and Snake Hill gold prospects.

**Figure 4.** Blair North project map showing key gold prospects

## Kihabe Project – Botswana

The project assessment previously reported has been undertaken. This included a review of the current geological understanding, resource status, processing options, principal risks, and outlook.

It has been concluded that there are clear opportunities to advance the zinc, lead silver opportunity through a structured work programme creating clear value catalysts.

The potential for regional copper mineralisation and a lack of previous work has been highlighted. The project includes several untested copper anomalies over large target areas. Planning of the next steps is currently underway.

The Company is currently in discussions with a number of interested potential project partners.

## OTHER

During the quarter ended 31 December 2025:

- The Company made cash payments of \$9,953 to related parties and their associates. This was the aggregate amount paid to the Directors including salary, directors' fees, and superannuation.
- The Company spent approximately \$45,000 on project and exploration activities primarily relating to RC drilling at the Viking project, reported above.
