QUARTERLY ACTIVITIES REPORT

for the period ended 31 December 2025

Highlights

- **Definitive Feasibility Study (DFS)** progressing on schedule following the completion of the Scoping Study in September 2025 for the 2.93 Moz¹ Kokoseb Gold Project (Kokoseb) in Namibia. DFS completion targeted for H2 CY2026.
- **High-grade drilling intercepts** at Kokoseb confirm continuity of mineralisation and potential for future underground development.
- **Six rigs active on site**, focused on resource conversion and expansion.
- **Mining Licence Application** submitted to the Ministry of Industry, Mines & Energy (MIME) on 10 October 2025.
- **Divestment of non-core Côte d'Ivoire assets** in November 2025 to ASX listed Santa Fe Minerals Limited (ASX: SFM), with Namibia as Wia's sole strategic focus.
- **Henk Diederichs appointed as Managing Director & Chief Executive Officer**, effective 01 February 2026.

Wia Gold Limited (ASX: WIA) (**Wia** or the **Company**), a Namibian focussed gold development and exploration company, is pleased to provide its Quarterly Activities Report for the period ended 31 December 2025. The Company's primary focus during the quarter was advancing the Kokoseb DFS and exploration activities to define a potential future underground development.

DEFINITIVE FEASIBILITY STUDY

The Kokoseb DFS remains on track for completion in H2 CY2026. Key progress during the quarter included:

Mine Geotechnical: The geotechnical drilling program is well advanced with drilling completion expected in February 2026. Samples to be selected and dispatched for laboratory testing in South Africa.

Mining: Expressions of Interest for contract mining budget pricing issued and strong industry response received.

Metallurgy: Metallurgical testwork program substantially complete, with results undergoing validation.

Process Plant: Senet (DRA subsidiary) appointed for the process plant design and cost estimation. Site geotechnical investigations have been completed.

Non-Process Infrastructure: Basis of design for buildings and earthworks finalised.

Water Supply: Exploratory drilling and pump testing completed at the Okombahe Water Supply Scheme, hydrogeology modelling scheduled to commence imminently. Drilling at the Ozondati Water Supply Scheme expected to start towards end January 2026. Mobilisation of Natural Source Audio Magneto Telluric equipment underway for OmAP geophysics survey.

¹ Refer ASX announcement dated 30 September 2025.

Power Supply: NamPower internal power supply studies completed; Results of which will be provided to Wia in Q1 CY2026.

KOKOSEB EXPLORATION

The focus of Wia's current exploration campaign is to confirm continuity of previously identified high-grade plunging shoots and demonstrate mineralisation remains open at depth, supporting potential future underground development.

Significant high-grade intercepts announced during the quarter reinforce Kokoseb's outstanding potential for an underground operation include:²

- 22.0m @ 14.87 g/t Au from 265.4m in KDD115
- 6.8m @ 5.12 g/t Au from 344.3m in KDD111
- 9.9m @ 5.51 g/t Au from 298.1m in KDD107
- 23.7m @ 1.91 g/t Au from 287.0m, incl. 5.0m @ 5.96 g/t Au in KDD105
- 19.3m @ 2.31 g/t Au from 246.7m, incl. 3.0m @ 7.92 g/t Au in KDD104
- 23.7m @ 6.59 g/t Au from 519.6m in KDD109
- 11.0m @ 4.46 g/t Au from 604.0m in KDD106

With six rigs currently on site, the Company is systematically advancing resource conversion and expansion while further de-risking the project ahead of the DFS completion.

REGIONAL EXPLORATION

The Company continued its regional reconnaissance program over various exploration licences. These programs include stream sediment sampling, reconnaissance mapping and rock chipping, aiming to fast track a decision on pursuing systematic exploration programs complementary to the work being done at Kokoseb.

PERMITTING

Preparation of permitting applications for the Project is well advanced with the Mining Licence Application lodged with the MIME on 10 October 2025.

The Environmental & Social Impact Assessment is nearing completion; final stakeholder review scheduled for early 2026 and lodgement with the MIME and the Ministry of Environment, Forestry and Tourism anticipated in Q1 CY2026 for regulatory approval and issuance of the Environmental Clearance Certificate.

DIVESTMENT OF NON-CORE CÔTE D'IVOIRE ASSETS

In November 2025 the Company entered into a binding Share Sale Agreement (**Agreement**) with ASX listed Santa Fe Minerals Limited (ASX: SFM) (**Santa Fe**) to divest its interest in all of its non-core gold exploration permits in Côte d'Ivoire.

In accordance with the Agreement, Wia will sell its 80% interest in the Dialakoro, Issia and Mankono Ouest permits and various permits under application with the consideration received being 20,000,000 ordinary fully paid shares in Santa Fe and 8,000,000 performance rights that convert to ordinary fully paid shares upon achievement of certain milestones.

The material terms of the Agreement are detailed in the ASX Announcement dated 26 November 2025. It is expected that the conditions precedent will be satisfied during the March 2026 quarter and that completion of the transaction will occur thereafter.

² Refer ASX Announcement dated 8 December 2025

The divestment of the Côte d'Ivoire is a strategic step that allows Wia to focus on the rapid exploration and development of the Kokoseb gold project in Namibia while retaining exposure to future upside in Côte d'Ivoire through an ongoing shareholding in Santa Fe.

As a result of the divestment, a non-cash impairment of the carrying value of the Côte d'Ivoire exploration and evaluation assets will be recognised in the December 2025 half year accounts.

SCOPING STUDY RECAP

The Kokoseb Scoping Study (completed on 30 September 2025) confirmed Kokoseb as an outstanding gold project, with an initial 11.3 year Life of Mine (**LOM**), forecast production from an open pit mine of ~180 koz of gold (**Au**) per annum for the first five years, with all-in sustaining cost (**AISC**) of US\$1,265/oz. LOM production averages approximately 146 koz annually at an AISC of US\$1,448/oz.

The Project is underpinned by a Mineral Resource of 2.93 Moz³, including 1.81 Moz in the indicated category at a 0.5 g/t cut-off, which converts to a production target of 58.9 Mt at 0.97 g/t Au containing 1.83 Moz Au.

The Project comprise an open cut mine, CIL processing facility with a capacity of 5.25 Mtpa, water supply from known water supply schemes in the area, low-cost power from the Namibian grid, tailings storage facility and related infrastructure.

The project demonstrates strong financial metrics based on the consensus gold price at the time of US\$2,600/oz, delivering a post-tax NPV_{5%} of US\$646m, an IRR of 38%, and a payback period of 1.8 years. At the prevailing spot gold price of US\$3,450/oz at the time, the economics show substantial upside, with a post-tax NPV_{5%} of US\$1,269m, an IRR of 60%, and a shortened payback period of 1.2 years. The current spot gold price continues to significantly enhance the overall project economics.

Further detail on the Scoping Study, including all the material assumptions on which the production targets and forecast financial information are based, is included in the Announcement released to the ASX on 30 September 2025. The Company confirms that the material assumptions underpinning the production targets and forecast financial information derived from the production targets in that Announcement continue to apply and have not materially changed.

About Wia Gold

Wia Gold has consolidated a significant landholding on Namibia's Damara belt (the **Damaran Project**). The Damaran Project, which hosts the 2.93Moz Kokoseb Deposit, covers a total area of over 2,000km² and is held under joint venture with the state-owned mining company, Epangelo. The Company is rapidly advancing Kokoseb towards development as Namibia's next major gold mine.
