

Quarterly Activities Report 31 December 2025

Highlights

- Received initial results of inaugural diamond drilling at the Bull Run Gold Project, Oregon testing two of five high-priority targets along the Lady May and Whited vein systems, returning¹:
 - 10.3m @ 0.55g/t Au from 155.6m, incl. 1m @ 2.42g/t Au (BRD001)
 - 1m @ 1.23g/t Au from 306m and 0.5m @ 1.35g/t Au from 357.4m (BRD002)
 - 2m @ 2.04g/t Au from 230m and 4m @ 1.52g/t Au from 305m (BRD003)
- The Company is reviewing gold observations from all drill holes, similar to those seen at the historic Record Mine, to determine next steps
- Executed a Binding Heads of Agreement with Moho Resources (ASX:MOH) for the sale of the Middle Creek Project in Western Australia for 15m MOH shares
- Progressed interpretation at Jasper Wedge Project in Canada, utilising historical datasets and 2024 geophysics to refine targets for exploration
- Continued to assess and progress value-accretive growth opportunities aligned with Codrus' exploration and development strategy.

Codrus Minerals Limited (ASX:CDR, "Codrus" or "the Company") is pleased to provide an update on activities for the period ended 31 December 2025 ("December Quarter" or "Quarter") across its diversified exploration portfolio, which includes gold, copper, rare earth and uranium assets located in the United States, Australia and Canada.

Bull Run Gold Project – Oregon, USA

Following completion of the 2025 reconnaissance drilling program at Bull Run, key outcomes include:

- **Drilling Completed:** Despite a prolonged drill rig breakdown, three (3) diamond core holes were completed for 1,050m, testing two (2) of five (5) high-priority gold targets defined by prior geochemistry, geophysics and geological modelling.
- **Targeting Focus:** All holes were collared in ultramafic rocks and designed to test the **Lady May** and **Whited** vein systems at depth and along strike of historic workings.
- **Geological Results:** Results of drilling were received in October 2025, confirming the interpreted geometry of the vein systems and intersected strong alteration and sulphide development consistent with a prospective hydrothermal system:
 - **BRD001 and BRD002:** Intersected narrow andesitic dykes near the ultramafic margin before entering the Bull Run Granodiorite, with quartz-pyrite vein stockworks, disseminated pyrite, and zones of silica, albite and sericite bleaching down dip of historic workings.
 - **BRD003:** Intersected intensely bleached and pyritic felsic dyke swarms (up to 80m) interleaved with pyrrhotite- and pyrite-bearing mafic alteration zones (up to 60m), with sulphide veining and breccia zones considered highly prospective for gold mineralisation.

¹ Refer to Codrus' ASX Announcement dated 14 October 2025.

Exploration Implications and Next Steps

- Reconnaissance drilling supports the Company's geological model at Bull Run and confirms continuity of the Lady May and Whited vein systems.
- Future work is expected to focus on adjacent high-priority geochemical and geophysical (IP and magnetic) targets that remain untested.
- Gold observations across all holes were consistent with mineralisation at the historic Record Mine and will be reviewed to guide the Company's next exploration steps.

Project Background and Geological Setting

The Bull Run Gold Project (see **Figure 1**) is located in Baker County, eastern Oregon, approximately 5 miles south of Unity. The Project comprises 102 claims, with the Company holding a 100% legal and beneficial interest in 91 claims and being party to the Record Mine Option Agreement over a further 11 claims.

The Project has a history of intermittent vein gold production dating back to ~1929 and is situated within the Ironside Mountain Inlier. The local geology comprises ultramafic-mafic and sedimentary rocks intruded by the Grouse Creek and Bull Run granodiorites, and multiple andesitic to dacite dyke swarms, with widespread porphyry-style alteration and mineralisation recognised in the broader district.

Figure 1. Location of the Bull Run Project in Oregon USA.

Jasper Wedge Uranium Project – Saskatchewan, Canada

No exploration was undertaken at the Jasper Wedge Uranium Project during the December 2025 quarter. Following the 2024 field program, key findings included:

- **Target Selection:** Targets were identified based on a combination of structural features from historical airborne magnetics and AeroTEM data, gas anomalies detected via Sentinel-2 hyperspectral imaging, and anomalies from a recent UAV magnetics survey.
- **Sampling Overview:** A total of 305 samples were collected across targets JW6A, JW7, and JW10, comprising:
 - 143 soil samples
 - 160 Soil Gas Hydrocarbon (SGH) samples
 - 2 rock chip samples
- **Additional Work:** Geological mapping and reconnaissance were also carried out across other target areas to support ongoing exploration planning.

Jasper Wedge Soil Geochemistry Findings:

- **Uranium Levels:** Soil assays returned uranium values ranging from 1.0 to 2.7ppm U, broadly consistent with, or slightly above, typical Athabasca Basin background levels (~1–2ppm U).²
- **Masking Elements:** Elevated thorium and vanadium were identified in several samples, which may suppress or obscure uranium anomalism in conventional geochemical interpretation.
- **Anomaly Detection:** Element ratio analysis (including U²/Th) was applied to reduce masking effects, highlighting uranium anomalism and supporting the prospectivity of targets JW6A, JW7 and JW10.

Jasper Wedge Rock Chip Results and Exploration Implications:

- Strongly anomalous uranium rock chips were returned from targets **JW6A** and **JW10**, with results of **5.3ppm U** and **4.6ppm U**, respectively.² Samples were collected from radioactive quartz pebble conglomerates and sandstone boulders.
- These results are considered highly encouraging and are consistent with exploration models in the **Eastern Athabasca Basin**, where major deposits such as **Rabbit Lake** and **Key Lake** were historically advanced by tracing radioactive glacial boulder trains.
- The Company will provide further updates as exploration at Jasper Wedge progresses.

Project Background and Geological Setting

The 100% owned Jasper Wedge Uranium Project (see **Figure 2**), MC0016116, covers an area of 2,099 hectares and is located within the world-class Athabasca Basin uranium province in northern Saskatchewan, Canada, approximately 45km south-east of the high-grade Cigar Lake uranium mine, operated by Cameco³.

Along with the Company's **Nanuk Uranium Project** in Quebec, Canada (see **Figure 2**), the Jasper Wedge Uranium Project provides the Company with an exciting opportunity for growth and diversification into the global uranium sector, with these two projects situated in two of Canada's highly prospective, uranium-rich mineral provinces. No exploration was undertaken at the Nanuk Uranium Project during the December 2025 quarter.

² Refer to Codrus' ASX Announcement dated 29 January 2025.

³ <https://www.cameco.com/businesses/uranium-operations/canada/cigar-lake>

Figure 2. Location of Jasper Wedge Uranium Project and Nanuk Uranium Project, Canada.

Western Australian Projects

No exploration was undertaken by Codrus on its projects in Western Australia during the December 2025 quarter.

The **Red Gate Gold Project** (see **Figure 3**) is located 140km north of Kalgoorlie in Western Australia. The Company continues to evaluate the potential at the Red Gate Gold Project for either follow-up drilling, informed by soil sampling completed across previously under-explored areas of the tenement, or potentially monetising the asset in this current gold market.

Figure 3. Location of Codrus' WA Gold Projects.

Project Portfolio & Strategy Update

Throughout the December 2025 Quarter, Codrus continued to evaluate its portfolio to ensure capital is deployed towards assets with the highest potential to create shareholder value.

The key outcome of this review was the execution of a Binding Heads of Agreement with Moho Resources Limited (ASX:MOH) for the sale and surrender on the **Middle Creek Project** prospecting licences (see **Figure 3**) which were due to expire. In accordance with the terms of the Agreement, Codrus received 15M MOH fully paid ordinary shares.

The Company remains open to strategic opportunities that could complement the Bull Run Project or create shareholder value and continues to review its broader project generation pipeline.

Corporate Update

As at the end of the Quarter, the Company held A\$340,000 in cash and 15M MOH shares (escrowed until March 2026).

Compliance

For the purpose of Listing Rule 5.3.1, details of the Company's group exploration activities for the Quarter, including any material developments or material changes in those activities, and a summary of the expenditure of \$149,000 incurred on those activities is detailed above and below.

For the purpose of Listing Rule 5.3.2, the Company confirms that there were no mining production and development activities during the Quarter by the Company.

Pursuant to Listing Rule 5.3.5, \$87,000 of payments were made to related parties or their associates (refer to Item 6.1 of Appendix 5B) consisting of Directors' fees, salaries and superannuation of \$87,000.

Codrus Minerals Tenements

Refer to Appendix One for the status of CDR's tenements.

This announcement was authorised for release by the Board of Codrus Minerals.

Compliance Statements

This announcement contains references to Exploration Results, all of which have previously been included in previous market announcements made by the Company. The Company confirms that it is not aware of any new information or data that materially affects the information in the said announcement. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

The information in this announcement that relates to previous exploration results for the Projects is extracted from the following ASX announcements:

- *Middle Creek Project Update, 15 December 2025*
- *Drilling Completed at Bull Run Gold Project, USA - 14 October 2025*
- *Drilling Commences at Bull Run Gold Project, USA - 3 June 2025*
- *Codrus Secures Funding to Advance Bull Run Gold Project, USA - 19 May 2025*
- *Large IP Targets Enhance the Bull Run Gold Project, USA - 13 May 2025*
- *Drill Permit Received, High Grade Bull Run Gold Project, USA - 2 May 2025*
- *Exploration Update: Targets Identified at Jasper Wedge Uranium Project 16 September 2024*
- *Exploration Commences at Jasper Wedge Uranium Project - 24 July 2024*
- *Codrus Acquires Two Uranium Projects in Canada -5 April 2024*

Forward Looking Statements

Various statements in this announcement constitute statements relating to intentions, future acts and events. Such statements are generally classified as "forward looking statements" and involve known and unknown risks, uncertainties and other important factors that could cause those future acts, events and circumstances to differ materially from what is presented or implicitly portrayed herein. Although the forward-looking statements contained in this release reflect management's current beliefs based upon information currently available to it and based upon what management believes to be reasonable assumptions, such forward looking statements are estimates for discussion purposes only and should not be relied upon. Codrus' performance may be influenced by a number of factors which are outside the control of the Company, its directors, staff or contractors. The Company does not make any representations and provides no warranties concerning the accuracy of the projections, and disclaims any obligation to update or revise any forward-looking statements based on new information, future events or otherwise, except to the extent required by applicable laws..

If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(318)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(318)
8.4	Cash and cash equivalents at quarter end (item 4.6)	340
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	340
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	1.07
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: The Company will re-align its exploration expenditure with cash position over the next quarter. The quarter included costs relating to the completed Bull Run Drill Program in Oregon which will not occur in the following quarter.	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: The Company manages its cash flow through ongoing budgeting, forecasting and financial budgeting processes, using that information to make decisions about the Company's activities and to determine the form and timing of securing funds when required. The Company is confident that it will be continuing to do so based on previous experiences and track record.	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?
	Answer: Yes – the Company expects to continue its operations and to meet its business objectives as it is confident that it will be able to raise sufficient funds as and when required and will align its exploration programs with budget over the next quarter. This expectation is based on previous track record of securing funds as and when required. The Company retains approx. \$135k of MOH shares escrowed until March 2026.
	<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
