

# Swedish Government adopts Detailed Plan for Vittangi Project Graphite Mine

Battery materials and technology company Talga Group Ltd (“**Talga**” or “**the Company**”) is pleased to announce that the Swedish Government has formally adopted the detailed plan (zoning) for Talga’s Nunasvaara South Graphite Mine, part of the Vittangi Anode Project.

This approval paves the way for the Company to proceed with detailed design and securing building permits before project development.

The detailed plan, which is now legally in force, regulates how the land can be used and developed in compliance with Sweden’s land-use and environmental regulations.

It designates zones on site for infrastructure, buildings, and mining activities.

Key permits for the Nunasvaara South Graphite Mine are already in force, namely the Environmental Permit and Exploitation Concession (ASX:TLG 6/4/2023 and 12/6/2025).

The graphite deposit at Vittangi is designated as a mineral deposit of national interest (ASX:TLG 18/06/2020), while the Vittangi Anode Project encompassing the Luleå Anode Refinery is a designated EU Strategic Project under the Critical Raw Materials Act and the Net-Zero Industry Act (ASX:TLG 26/3/2025 and 16/04/2025).

---

**Talga Group CEO, Martin Phillips, commented:** *“The Company is very pleased with the Swedish Government’s decision to adopt the detailed plan. This concludes a lengthy and thorough process that has been the subject of rigorous review and stakeholder engagement. I thank the members of the Talga team for their dedication to this matter. This decision significantly derisks the Vittangi Anode Project as we progress further along the financing path. It also unlocks certainty on planning as we move closer to commercial production.”*

**Sweden’s Minister for Infrastructure and Housing Andreas Carlson commented:** *“Nunasvaara in Kiruna municipality has Europe’s largest and richest graphite deposit. The graphite deposit is very important for both Sweden’s and the EU’s supply of natural graphite. Graphite fulfills an important function in battery manufacturing and for the green transition. This is the first time that the Government has used this opportunity.”*

**Sweden’s Minister for Energy and Enterprise Ebba Busch commented:** *“Sweden has unique conditions for giving ourselves and Europe a more independent supply of critical raw materials. Graphite is important not least for our production of steel, batteries and cars, and the Swedish mining industry is the most sustainable globally.”*

## About Talga

Talga Group Ltd (ASX:TLG / OTCQX:TLGRF) is a global leader in producing high-power, sustainable battery anode and advanced graphitic materials. Our capabilities include proprietary graphite purification, shaping and coating technologies, ensuring secure and low-emission Li-ion battery anode supply chains and new-energy materials. Talga's products and technologies solve battery manufacturing challenges such as supply vulnerabilities, performance limitations and recyclability, thereby accelerating the shift to more secure critical mineral product manufacturing.

## Forward-Looking Statements & Disclaimer

Statements in this document regarding the Company's business or proposed business, which are not historical facts, are forward-looking statements that involve risks and uncertainties, such as estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Those risks and uncertainties include factors and risks specific to the industries in which the Company operates and proposes to operate as well as general economic conditions, prevailing exchange rates and interest rates and conditions in the financial markets, among other things. Since forward-looking statements address future events and conditions, by their very nature, they involve inherent risks and uncertainties. Actual results in each case could differ materially from those currently anticipated in such statements. Investors are cautioned not to place undue reliance on forward-looking statements.

No forward-looking statement is a guarantee or representation as to future performance or any other future matters, which will be influenced by a number of factors and subject to various uncertainties and contingencies, many of which will be outside the Company's control. There can be no assurance that the plans of the directors and management of Talga will proceed as currently expected or will ultimately be successful.

The Company does not undertake any obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated events. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions or conclusions contained in this announcement. To the maximum extent permitted by law, none of the Company's

directors, employees, advisors, or agents, nor any other person, accepts any liability for any loss arising from the use of the information contained in this announcement.

This announcement may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their own jurisdiction. A failure to do so may result in a violation of securities laws in such jurisdiction. This document does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this representation are not intended to represent recommendations of particular investments to particular persons.
