28 January 2026

**Quarterly Activities Report for the period ended 31 December 2025****Highlights**

- **Total Receipts: \$1,548,963**
- **Receipts from Customers: \$1,035,267**
- **Total Revenue (unadjusted): \$1,538,398**, up 61% year-on-year
- **ARR: Increased 16.5% year-on-year to \$3,997,261**
- **Profitable Quarter: Net profit of \$62,827 (unaudited)**
- **ISO27001: Successfully passed Year 1 Surveillance Audit**

Aeeris Ltd (**Aeeris** or the **Company**) delivered a pivotal second quarter in FY26, achieving profitability, accelerating recurring revenue growth, and demonstrating clear operational leverage as prior investments translate to stronger margins.

The quarter highlighted Aeeris' ability to scale efficiently, while supporting customers through high-impact weather events and expanding into new industry verticals. The successful execution of AWARE is improving economics, scalability and competitive defensibility.

**Financial Overview**

During the quarter, Aeeris received an R&D Tax Incentive rebate of \$506,993. After adjusting for \$374,427 in unearned revenue, the Company recorded an underlying unaudited profit of \$62,827 for the quarter. On an unadjusted basis, unaudited profit totalled \$437,254.

Total unadjusted revenue for the period was \$1,538,398 (including the R&D incentive).

Annual recurring revenue (**ARR**) has grown to \$3,997,261, representing a 16.5% increase year on year and 12.9% growth on the previous quarter. Notably, 58% of the new contracted revenue was secured from existing customers, reinforcing the value of the

proprietary product suite, long-term customer relationships, and strategic partnerships. New ARR growth was driven by wins in the transport logistics and insurance sectors.

Gross margin expanded significantly due to the structural benefits of bringing forecasting and hail services in-house via AWARE, reducing third-party data costs. Combined with disciplined overhead costs control, the Company is strengthening its path to sustainable profitability.

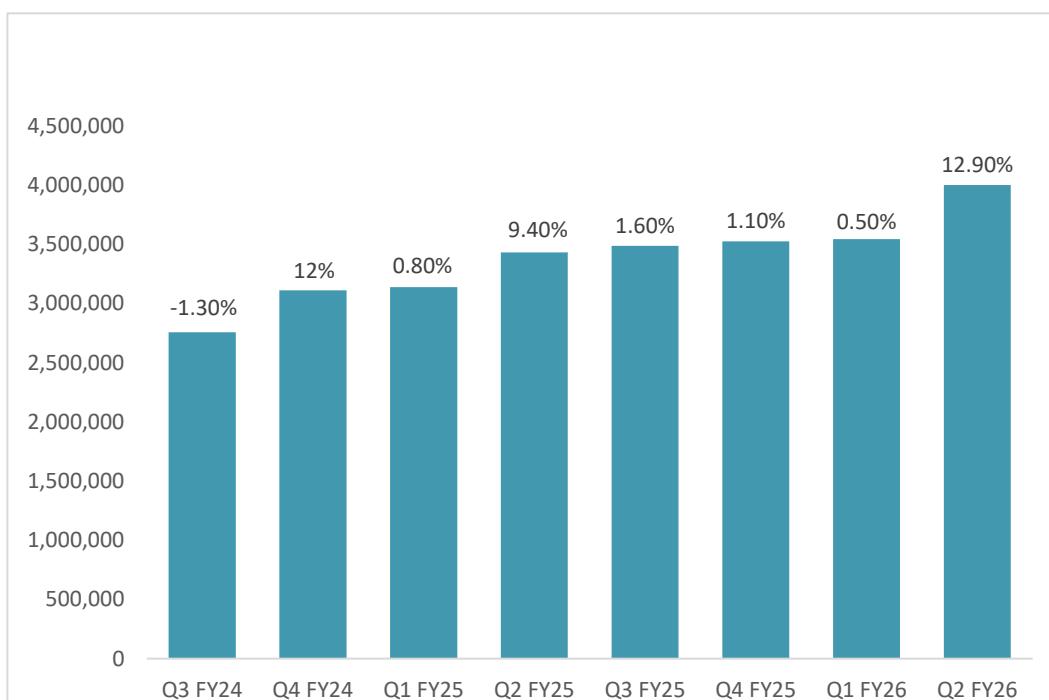

Cash receipts for the quarter were \$1,548,963, with \$1,035,267 received from customers. Cashflow was positive due to receipt of the R&D rebate, increasing Aeeris' cash position to \$1,395,680 at the half year end.

## Operational Review

### Customers and Partnerships

Aeiris delivered full lifecycle Tropical Cyclone intelligence during the quarter, including the creation of new Tropical Cyclone data outputs for the Australian Reinsurance Pool Corporation, ahead of one of the earliest cyclones of the season. This capability demonstrates the commercial readiness and differentiation of the Company's proprietary systems and supports further expansion in the insurance and reinsurance market.

Focus remained on deepening relationships with long-standing enterprise customers, with 58% of new ARR originating from existing clients, a strong validation of Aeiris' multi-module platform-led growth strategy. Uptake continued across forecasting, hail, cyclone, and flood intelligence modules.

Aeiris also secured Nearmap as a customer during the quarter. The Company's Tropical Cyclone mapping and damaging wind polygon intelligence are now integrated into Nearmap's ImpactResponse System. This represents a significant validation of Aeiris' geospatial and forecasting capabilities and demonstrates its role as a high-value data infrastructure partner to enterprise platforms.

The Company further advanced its expansion into the solar industry with two of the largest solar tracker providers. Additional wins included UGL and Yarra Trams through the Tomorrow.io partnership, further strengthening Aeiris' presence in transport and critical infrastructure.

Progress continued on the development of new proprietary intelligence capabilities, strengthening the depth and flexibility of the Company's offerings. This work included the commencement of a local government trial, providing more advanced, locally relevant intelligence solutions to support decision-making and risk management.

## Governance

During the quarter, Aeiris successfully passed its ISO27001 Year 1 Surveillance Audit, reinforcing its position as a security-accredited, enterprise-grade technology provider. ISO27001 certification remains a key differentiator for securing contracts in the insurance, infrastructure and government sector where information security, data governance and operational resilience are mandatory.

## Business Activities and Expenditures

During the quarter, Aeiris incurred higher SMS communication costs driven by weather activities including the October heatwaves, November bushfires in NSW and severe December thunderstorms and record-breaking rainfall in Queensland. The quarter also saw a higher proportion of compliance-related expenses including costs associated with the interim audit review, tax and R&D consultant fees, and fees associated with the Company's AGM.

Payments made to related parties during the quarter were limited to directors' fees and consultancy expenses, consistent with prior quarters.
