Executive Update

Quarterly Highlights

- Lake Resources (“Lake” or the “Company”) continued to advance the approval of the Exploitation Environmental Impact Assessment (“Exploitation EIA”) for its Kachi Lithium Brine Project (“Kachi”) from the Catamarca Ministries of Environment and Mining.¹
- During the quarter, the Ramsar site zonification was received,² marking another key milestone as Lake continues to move towards delivering Kachi as a “shovel-ready” project.
- Argentina’s October 2025 election outcome was a strong endorsement of President Milei’s reform agenda and provided momentum for continued foreign direct investment in Argentina.
- Prioritized developing an attractive power solution to further de-risk and reduce Kachi’s operating costs, advancing Kachi’s position as a tier-one asset with first quartile operating costs.
- During the quarter, Lilac Solutions (“Lilac”), Kachi’s 20% owner and technology partner released its fifth-generation ion exchange technology (“Gen 5 Lilac IX”) and white paper; Gen 5 Lilac IX is expected to have a positive direct impact on Kachi’s capital and operating costs.³
- Lilac and Lake welcomed the Hon. Alexander Downer AC to Lilac’s Oakland facility to review Lilac’s advancements in direct lithium extraction (“DLE”) technology; Lake’s partnership with Lilac positions Kachi to be an environmental leader in lithium extraction.⁴
- Materially reduced calendar year 2025 cash outgoings by ~45% as compared to calendar year 2024. Lake will continue to evaluate and execute on opportunities to further right-size the business in calendar year 2026.
- Lake ended the quarter with strong liquidity of \$15.3 million including the benefit of ~\$2.5 million received during the quarter associated with the August 2025 capital raise.⁵

Exploitation Environmental Impact Assessment

- In December 2025, the Ramsar site zonification was formally approved, with the Carachi Pampa lagoon designated as Zone 3 (Z3), allowing for regulated productive use within the applicable environmental framework.¹
- During the quarter, Lake continued to materially advance the Exploitation EIA approval process through close and ongoing coordination with the Catamarca Ministries of Environment and Mining. While timing of the final approval of the Exploitation EIA is controlled by the government of Catamarca, current timeline for final approval is 1H2026.

Power Supply

- Lake continued to engage with power provider YPF Luz on the “Northern Power-Line” Option.
- In an effort to further reduce Kachi’s operating costs via lower power costs, the Company continues to explore alternative power solutions.

Operational Update (cont'd)

Kachi

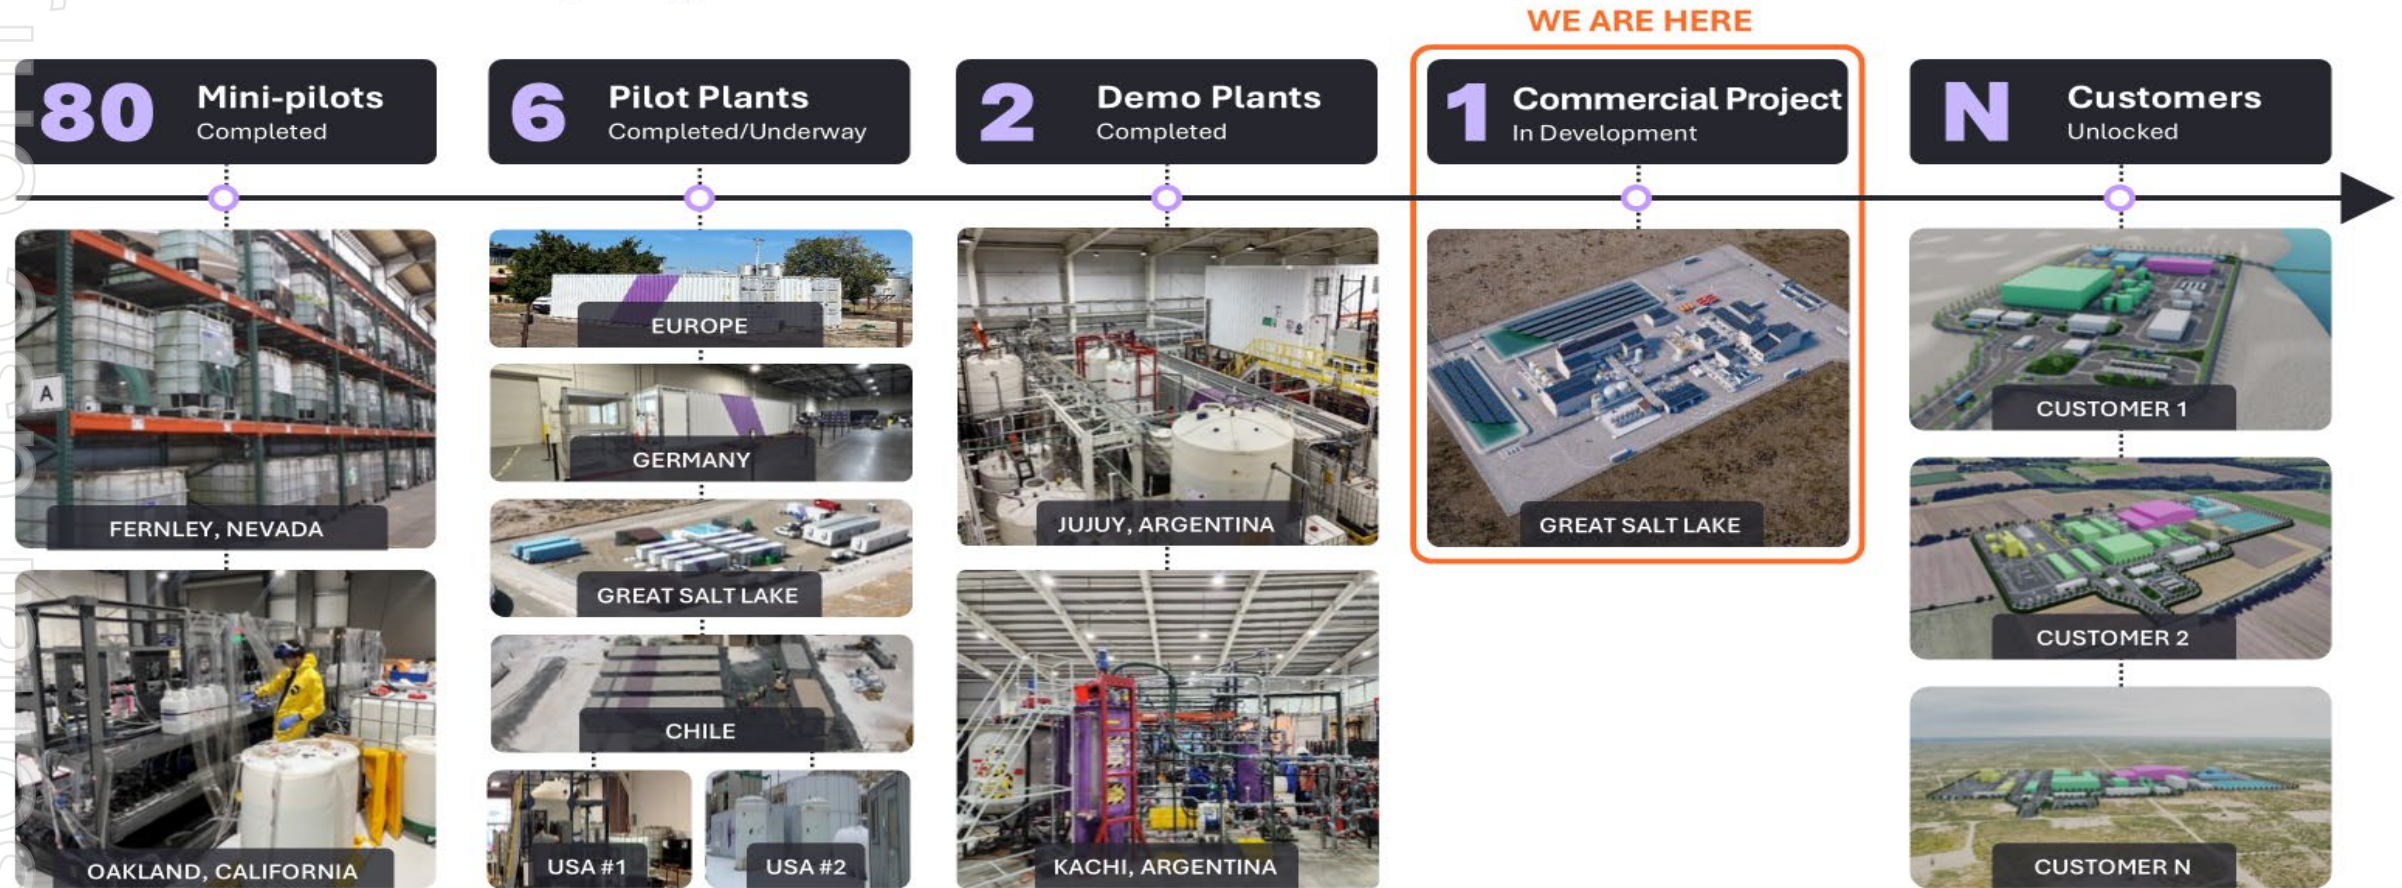

Lilac's fifth-generation ion exchange technology

- During the quarter, Lilac released its white paper for its Gen 5 Lilac IX technology which is expected to benefit Kachi by lowering brine pretreatment requirements and delivering improvements in media productivity, cycle life, and eluate quality, driving down capital and operating costs and simplifying project flowsheets while maintaining recovery rates of over 96%.¹
- Post quarter end, Lilac announced two important advancements:
 - Completed construction of Lilac's commercial-scale ion exchange media ("IXM") manufacturing line in Fernley, Nevada. The facility will initially produce 200 tonnes of IXM per year, sufficient to support up to 100,000 tonnes per annum ("tpa") of lithium carbonate equivalent ("LCE") production globally.
 - A binding 10-year offtake agreement with Traxys North America for lithium carbonate produced at Lilac's planned Great Salt Lake facility in Utah; the project leverages proven Gen 5 Lilac IX technology, which achieved 87% lithium recovery on the lake's ultra-low-grade brine (69 mg/L lithium) during successful pilot plant operations completed in 2025.
