

December 2025 Quarterly Activities Report and Appendix 4C

Review of Operations

During the reporting period, the Company made meaningful progress toward aligning its technical development activities with its objective of advancing its Digital Sound Reconstruction (DSR) platform toward commercial readiness.

The Company's efforts during the quarter continued to focus on establishing and validating mass manufacturability of its groundbreaking digital MEMS speaker array to the required specifications and tolerances. On 24 December 2025, the Company announced the successful validation of a major technical milestone arising from its independent manufacturing process development program. Static metrology and structural measurements conducted on the delivered lead wafer, fabricated using our amended process, demonstrated that all critical structural specifications and tolerances were met or exceeded with a very high degree of precision.

Subsequent activities to date have focused on extending process validation to enable preliminary acoustic measurements. While certain incompatibilities between the partially completed wafer and the Company's proprietary acoustic measurement infrastructure have limited full testing, the Company has nonetheless been able to confirm a number of critical acoustic parameters that indicate strong alignment between measured device behaviour and the acoustic simulations when working with wafers that are fabricated to our specification.

Despite the obstacles the Company continues to advance acoustic evaluation through interim adaptations to our testing infrastructure while we await completion and delivery of additional wafers, expected during February and March. These wafers are anticipated to be fully compatible with the Company's measurement systems and suitable for downstream integration and packaging.

Payments to related parties

The amounts included in Item 6.1 include directors' fees and superannuation paid to non-executive directors or entities associated with non-executive directors of \$37,753.

Unsecured loans

No additional unsecured loan funds were received during the quarter from 4F Investments Pty Limited (a company associated with the Chairman - Fred Bart). The principal balance of the unsecured loan between 4F Investments Pty Limited and the Company remains at \$5,582,988. This unsecured loan facility attracts an interest rate of 12% (capitalised until repayment of the loan facility) and is repayable when the Company undertakes a capital raise.

4F Investments Pty Limited has agreed to provide ongoing working capital funding of up to \$6 million over the next twelve months, to be funded progressively as required. This funding will be provided through the existing unsecured loan facility held with Audio Pixels and will be converted into convertible notes with attaching options (subject to shareholder approval). This and any additional funding provided by 4F Investments will be secured via a charge over the intellectual property assets of the Company once approved at the next meeting of shareholders.

If the next delivery of packaged chips fails to meet testing specifications or the Company fails to re-list on the ASX within 120 days, 4F Investments Pty Limited has the option to cease funding the Company.

Additional Convertible Note funding

On 27 October 2025, the Company announced it had raised an additional \$1.25M in funding from the issue of new convertible notes to two sophisticated investors. The terms of the Convertible Notes include a maturity date of 31 January 2027, are unsecured, and will attract an interest rate of 12% per annum, capitalised until the Note is fully repaid or converted into Shares. The Notes are convertible to ordinary shares at A\$9.04 or lower if the Company undertakes a placement of ordinary shares at a lower price at any time until the expiry date, in which case the conversion price will be at a 30% discount to the placement price, with a conversion price floor of \$3.50 per share.

The investors will also receive 375,000 free attaching unlisted options (150,000 options per A\$500,000 invested) with a strike price of A\$7.59. These unlisted options expire on 5 May 2027.

The issue of the additional Notes takes the face value of Convertible Notes outstanding to \$13.75M.

ASX Suspension

The Company's shares remain in suspension from trading on the ASX. The Company is working toward having the suspension lifted.

This announcement has been authorised for release to ASX by Fred Bart, Chairman.

8.6 If item 8.5 is less than 2 quarters, please provide answers to the following questions:	
8.6.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: Yes	

- 8.6.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: Yes. In order to sustain the anticipated level of R&D activities, additional funding will be required to continue to advance the research and development program. The precise timing, method and quantum of the additional funding to be secured remains subject to ongoing review and discussions between the Board as well as its advisers and potential funders. The timing of securing additional funds will also be subject to market conditions prevailing at the time and is expected to be coordinated with the demonstration of the MEMS GEN-II wafers and chips.

The Company has raised an additional \$1.25M in funding through the issuance of new convertible notes during the quarter (refer ASX announcement dated 27 October 2025).

4F Investments Pty Limited has agreed to provide ongoing working capital funding of up to \$6 million over the next twelve months, to be funded progressively as required. This funding will be provided through the existing unsecured loan facility held with Audio Pixels and will be converted into convertible notes with attaching options (subject to shareholder approval). This and any additional funding provided by 4F Investments will be secured via a charge over the intellectual property assets of the Company once approved at the next meeting of shareholders.

If the next delivery of packaged chips fails to meet testing specifications or the Company fails to re-list on the ASX within 120 days, 4F Investments Pty Limited has the option to cease funding the Company.

- 8.6.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes. The Company has sufficient working capital to continue operations for the near term, and during this time the Company intends to raise additional capital to meet its business objectives once it is in a position to demonstrate the MEMS GEN-II wafers and chips.

Note: where item 8.5 is less than 2 quarters, all of questions 8.6.1, 8.6.2 and 8.6.3 above must be answered.
