

3 February 2026

Sales Momentum Continues in Current Quarter

January Gross Sales up 41% on the prior month to \$305,000

Freehill Mining Limited (ASX: FHS 'Freehill' or 'the Company') is pleased to confirm a further steady increase in gross sales in January 2026 to approximately \$305,000, a 41% increase on the prior months sales of approximately \$216,000. This is the fourth consecutive increase in monthly sales, greatly strengthens the pool of cash receivables and illustrates the growing momentum in the Company's aggregates business with added revenue materialising from supply to the local cement industry in the La Serena/Coquimbo region.

As previously stated, while the improving revenue profile is encouraging, operations are being impacted by plant downtime and the limitations of operating with a single plant. Sector demand is considerably healthy and steps are being taken to mitigate against these challenges so Freehill can fully capitalise on multiple market opportunities.

Freehill will continue to update shareholders on its operations and remains well-placed in the pursuit of new project opportunities in copper and gold.

Approved for release by the Board of the Company.
