**Nigel Lange, Chief Executive Officer and Managing Director, commented:**

*“We are pleased to announce a capital raising, including strong commitments received under the Placement from institutional and professional investors. Together with the fully underwritten Entitlement Offer, the capital raising is intended to strengthen the Company’s balance sheet and support execution of key near and medium-term clinical, regulatory and commercial milestones.*

*In CY26, the key focus for the Company will be Germany, representing a significant commercial and strategic opportunity. The planned G-BA clinical trial is expected to involve approximately 40 hospitals and is anticipated to commence in 1H CY26. Patients not eligible to participate in the fully funded trial will still be eligible for reimbursement and can be treated on a commercial basis. Data generated through the G-BA process is expected to support future reimbursement submissions in other major European markets, including the UK, France, BENELUX, and Nordics. In addition, the data generated in the G-BA trial will be used to bolster OncoSil’s body of evidence and support future consideration for inclusion of OncoSil™ treatment in Germany (S3) and broader European treatment guidelines (ESMO).*
