

10 February 2026

Amended Quarterly Activities and Cash Flow Report

Golden Globe Resources Limited (ASX:GGR) (GGR or the “Company”) have provided this amendment to the 31 December 2025 Quarterly Report as released on 23 January 2026.

This amendment addresses matters regarding Listing Rule 18.7 and refers to:

- Listing Rule 5.3.3 – details of tenements acquired or disposed of during the quarter including location map of current tenements (page 3)
- Detailed description of the Exploration and Project expenditures for the quarter (page 7)
- Breakdown of the exploration expenditure for each project (page 7).

For and on behalf of the Board of Directors

Colin McMillan

Managing Director and CEO

ASX ANNOUNCEMENT

Amended Quarterly Activities Report for period ending 31 December 2025

Highlights

- Successful completion of Initial Public Offering (IPO) and admission to the official list of the ASX on Friday 31st October
- Oversubscribed IPO raising the maximum allocation of A\$8.5 million to advance exploration across a highly prospective portfolio of copper-gold assets in New South Wales and Queensland
- Finalisation of all land access arrangements in place and on-site mobilisation of a multi-purpose drill rig to commence first-phase drill program at flagship Dooloo Creek project
- Subsequent commencement of drill program by experienced drilling services contractor Central Deep Hole Drilling (CDHD) at the Northern Gold Prospect, one of four primary targets on the property
- First-phase drilling program planned for ~4,000 metres, split approximately evenly between diamond core and reverse circulation (RC) drilling
- Exploration program guided by a new geological and targeting model, building on high-grade historic gold results and extensive prior datasets
- A mandatory 50% relinquishment of the Alma tenement in Qld was submitted for approval procedure in December 2025.

Golden Globe Resources Ltd ("GGR" or the "Company") is pleased to provide the following quarterly activities summary for the period ended 31 December 2025.

Managing Director, Colin McMillan commented:

"December marked a milestone quarter for Golden Globe Resources, with the successful completion of our IPO and the rapid transition into active drilling at Dooloo Creek. The commencement of diamond drilling so soon after listing reflects both the quality of the project and our readiness to execute on the exploration strategy outlined in the Prospectus."

Dooloo Creek is located at an outstanding geological address and hosts widespread gold and copper anomalies that warrant systematic follow-up exploration. This program is designed to test a new geological model that we believe better explains the high-grade mineralisation observed across the project. We look forward to providing our investors with regular updates as drilling progresses and assay results are received, alongside the planned commencement of exploration the highly prospective Neila Creek project in the NSW Lachlan Fold Belt."

REVIEW OF OPERATIONS

Tenement Status

Golden Globe Resources holds three Gold and Copper Projects, located in Australia:

- Dooloo Creek project (Queensland)
 - Dooloo Creek Permit
 - Ridler Permit
- Alma project (Queensland)
- Neila Creek project (New South Wales)

The location of GGR's projects is shown in the figure below:

Figure 1. Location of GGR Projects.

Ownership and Permitting

GGR has acquired a 100% legal and/or beneficial interest in 3 granted tenements in Queensland.

GGR has completed a Joint Venture Agreement with ARGODATA to earn up to a 90% interest in a granted tenement in New South Wales.

The total area of the tenements is 417.07km².

The tenement status for GGR projects remains unchanged with the exception of the mandatory relinquishment of 50% of the Alma tenement, this procedure being submitted during December, and is:

Tenement	Type	Status	Expiry	Area (km ²)
Dooloo Creek Project				
EPM 15343	Exploration Licence	Granted	20 Jun 2029	21.82
EPM 27728	Exploration Licence	Granted	28 Jul 2026	56.12
Alma Project				
EPM 27722	Exploration Licence	Granted	21 Dec 2025	294.6
Neila Creek Project				
EL 8864	Exploration Licence	Granted	17 Jun 2027	42.73

Farm-In Agreement

During the Quarter, GGR completed a Farm-In and Joint Venture agreement with ARGODATA as mentioned above to obtain exclusive access to a proprietary database generated by the Neural Network process developed by BWG (now known as ARGODATA).

This process involves the use of Artificial Intelligence to generate exploration targets based on the processing of available data across the Eastern portion of the Lachlan Fold Belt and is considered to be a significant exploration tool for GGR's ongoing target generation and development process.

The Neila Creek Farm-In and Joint Venture Agreement was concluded on the 22 December 2025.

Exploration – Dooloo Creek Project, Queensland

Golden Globe's principal focus during the quarter was the commencement of drilling at the Dooloo Creek Project, a 100%-owned gold-copper exploration asset covering approximately 78km² within the New England Orogen of southeast Queensland.

Diamond drilling commenced on 9 December 2025 at the Northern Gold Prospect, with drilling services provided by Central Deep Hole Drilling (CDHD). The initial program is designed to comprise approximately 4,000 metres of drilling, split between diamond core and RC drilling, with the core component expected to take around two months to complete.

Dooloo Creek benefits from a substantial historical exploration database, including approximately 9,100 metres of prior drilling in 57 holes, of which around 4,000 metres were completed by Golden Globe in earlier campaigns. Historic drilling intersected

widespread gold and copper anomalism, including zones of strong grades over meaningful widths.

Figure 2. Drilling commenced at the Dooloo Creek project on drill hole NG001 in December 2025.

Geological Model and Targeting Strategy

While parts of the broader project area have seen previous drilling, the Northern Gold Prospect itself is largely untested by drilling, providing a compelling opportunity for new discoveries. Other components of the current drill program will test extensions and offsets to historically encouraging intercepts elsewhere on the project.

During the quarter, Golden Globe also advanced a new exploration model for Dooloo Creek, informed by re-interpretation of geological, geochemical and geophysical datasets.

The model is partly based on sampling altered intrusives, key structures, and skarns that yielded gold assays such as 28.8g/t at Northern Gold, 51.7g/t at Eastern Breccia, 39.5g/t at Silver Plain, and 43.9g/t at True Blue, and has been designed to help better explain the high grades and geochemical zonation observed across the project to-date.

Corporate – IPO and ASX Listing

During the December quarter, Golden Globe Resources successfully completed its Initial Public Offering and listing on the ASX raising A\$8.5 million before costs ("The Placement") to advance its projects as defined in the below table. This activity marks the Company's transition to a fully funded, publicly listed explorer.

Table - Use of funds from A\$8.5 million placement

Use of Funds under Prospectus	Funds allocated under Prospectus 19 Aug 2025	Funds expended between Placement and 31 Dec 2025	Variance	
Exploration Expenditure				
Dooloo Creek	3,664,063	171,324	3,492,739	95%
Alma	164,000	5,460	158,540	97%
Neila Creek	1,802,575	128,284	1,674,291	93%
Total	5,630,638	305,068	5,325,570	95%
Operational Expenditure				
Additional Expenses and Working Capital	2,199,371	1,041,331	1,158,040	53%
Costs of Offer (excluding GST)	998,170	765,237	232,933	23%
Total	3,197,541	1,806,568	1,390,973	44%
Total Use of Funds	8,828,179	2,111,636	6,716,543	76%

IPO proceeds were allocated in line with Prospectus objectives, with a clear focus on:

- advancing drilling and exploration at Dooloo Creek,
- accelerating technical work programs, and
- maintaining a disciplined approach to corporate and working capital expenditure.

Payments to related parties of the entity and their associates are set out in the attached Appendix 5B. The payments relate to director fees to non-executive directors in the normal course of business at commercial rates, excluding reimbursements of out-of-pocket expenses.

The Company's ability to commence drilling shortly after listing demonstrates strong execution capability and early delivery against stated IPO milestones.

Outlook

With drilling now underway, Golden Globe Resources is entering a period of sustained exploration activity. The Company expects to provide regular updates on drilling progress, geological observations and assay results as the program advances.

The December quarter establishes a strong operational platform for 2026, positioning Golden Globe to build momentum as a newly listed explorer focused on disciplined capital deployment and discovery-driven growth.

March Quarter Planned Activities

- Continue diamond and RC drilling at Dooloo Creek with the aim to further identify and better define gold and copper anomalies across the multiple target areas
- Commence drilling at the Neila Creek project in NSW with an initial Phase 1 program of three diamond holes to provide geological and spatial information of interpreted mineralisation
- Begin exploration of the Alma project in Qld via a focused desk-top review of primary targets to identify areas of interest for an H2 2026 commencement of field based exploration.

CORPORATE SUMMARY

A summary of the exploration and project evaluation expenditures for the quarter is provided as follows:

Item	Dooloo Creek	Alma	Neila Creek	Total Q4 2025 (\$)
Drilling exploration	9,172	-	9,359	18,531
Geophysical surveys	-	-	-	-
Exploration Management	176,631	5,460	48,925	231,016
Surface Right Usage	-	-	-	-
Administrative costs	-	-	71,007	71,007
Other	-	-	-	-
Grand Total	185,803	5,460	129,291	320,554

For the purpose of ASX Listing Rule 5.3.1, payments for exploration, evaluation and development during the quarter totalled A\$320,554. Details of activities undertaken during the quarter are as described in this report.

The exploration management costs incurred during the quarter primarily relate to field supplies and logistical preparations for the upcoming drilling program, laboratory and assay services, and consulting and professional fees capitalised to the Company's exploration projects. Administrative costs largely relate to acquisition and implementation of new technology to be deployed and utilised on the Neila Creek Project.

The Company undertook approximately five days of drilling activities during the quarter, with the majority of drilling-related expenditure expected to be incurred in the March 2026 quarter as the program progresses.

For the purpose of ASX Listing Rule 5.3.2, the Company confirms there were no mining production and development activities undertaken during the quarter.

For the purpose of ASX Listing Rule 5.3.5, payments to directors of Golden Globe Resources Limited during the quarter totalled A\$366,467. The payments were in respect of directors' salaries, fees and superannuation.

As at 31 December 2025, Golden Globe Resources held approximately A\$6.4 million in cash.

Figure 3. Located 30km north of Monto in southeast Queensland, GGR's Dooloo Creek project is surrounded by World class deposits.

This release has been compiled by and approved by the Board of GGR.

Competent Persons Statement

The information included within this release is a fair representation of available information compiled by Colin McMillan B.Sc., MAusIMM, a competent person who is a Member of the Australian Institute of Mining and Metallurgy. Colin McMillan is employed by GGR Ltd as Managing Director & CEO and has been Head of Geology for the Company. Colin McMillan has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves. Colin McMillan consents to the inclusion in this presentation of the matters based on his work in the form and context in which it appears.

Figure Notes and Forward-Looking Statement

The information that has been extracted from prior announcements referred to in this release, are available to view at www.goldengloberesources.com. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of exploration results, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement. The information in this announcement that relates to previous exploration results was first reported by the Company in accordance with ASX listing rule 5.7 in the following Company ASX market releases:

- Prospectus Golden Globe Resources Limited, 19 August 2025
