# Letter from the Chair

Dear Shareholders

On behalf of your Directors, I am pleased to invite you to participate in this Renounceable pro-rata one-for-two entitlement offer at an issue price of \$0.015 per New Share to raise up to \$4,032,830 (before costs) (**Entitlement Offer**), with one free attaching New Option for every two New Shares issued under the Offers.

Each of Craig Moulton and Paul Atherley intend to participate in the Entitlement Offer, and the Company's major shareholder, Metals One PLC, has agreed to invest \$1,000,000.

The Entitlement Offer is partially underwritten to \$1,500,000 by the Lead Manager and Underwriter, Mahe Capital Pty Ltd, with a sub-underwriting commitment of \$318,363 from Metals One PLC.

The Board continues to see significant strategic value in the Company's Chikundo Copper Project in Tanzania. Copper is a cornerstone commodity for the global energy transition, driven by electrification, infrastructure investment and decarbonisation initiatives worldwide. The Chikundo Copper Project provides the Company with leveraged exposure to this thematic through a large-scale, highly prospective copper system located within an established mineralised belt. As funding permits, the Company intends to progressively advance the project in a disciplined and capital-efficient manner, while maintaining a strong focus on balance sheet strength and long-term shareholder value.

The proceeds from the Offers will be applied to exploration of the Chikundo Copper Project, resource development activities at the Chilalo Graphite Project, costs associated with the Offers, repayment of the short-term loan and for general working capital.

To the extent that the Company does not raise the maximum of \$4,032,830 (before costs) pursuant to the Offers, the Company will adjust the use of funds to reflect the amount actually raised.

## **Entitlement Offer**

Under the Entitlement Offer, Eligible Shareholders are entitled to subscribe for:

- (a) one New Share for every two Existing Shares in the Company held on the Record Date, being 5:00pm (AWST) on Monday, 16 February 2026 (**Record Date**); and
- (b) one free attaching New Option for every two New Shares issued under the Offers.

Shares issued under the Entitlement Offer will rank equally with Existing Shares.

The Entitlement Offer is Renounceable and therefore your Entitlements may be traded on the ASX or otherwise transferred. In this regard, refer to sections 2.5 and 3.

Further details in respect of how Eligible Shareholders can participate in the Entitlement Offer are set out in sections 3.2 to 3.7.

## **Top Up Offer**

Eligible Shareholders may also apply (in excess of their Entitlement) for New Shares not subscribed for by other Eligible Shareholders pursuant to the Entitlement Offer at the same issue price as the Entitlement Offer (subject to the allocation policy set out in section 2.2) (**Top Up Offer**).

Further details in respect of how Shareholders can participate in the Top Up Offer are set out in section 3.4.

## Shortfall placement

Any Shares which are not taken up in accordance with the Entitlement Offer or the Top Up Offer (**Shortfall Shares**) may (subject to the allocation policy set out in section 2.2) be placed by the Lead Manager in consultation with the Company within three months of the Closing Date.

## Applications

The Entitlement Offer and the Top Up Offer are scheduled to close at 5:00pm (AWST) on Thursday, 5 March 2026.

Eligible Shareholders wishing to participate in the Offers must ensure that they have completed their Application before this time in accordance with the instructions set out at in their Entitlement and Acceptance Form and section 3 of this Prospectus.

The Prospectus includes further details of the Offers and the effect of the Offers on the Company, and a statement of the risks associated with investing in the Company in connection with the Entitlement Offer. This is an important document and should be read in its entirety. If you have any doubts or questions in relation to the Prospectus you should consult your stockbroker, accountant, solicitor or other independent professional adviser to evaluate whether or not to participate in the Offers.

On behalf of the Board, I look forward to your continued support and on updating you on the Company's progress.

Yours faithfully

Mr Paul Atherley  
Non-Executive Chair

<p><b>Risk factors</b></p> <p>Potential investors should be aware that subscribing for Securities in the Company involves a number of risks. The key risk factors of which investors should be aware are set out in section 5, including (but not limited to) risks in respect of:</p> <p>(a) <b>Default notice risk</b></p> <p>The Company's subsidiary and holder of ML 716/2023, Kudu Graphite Limited, has received a default notice from the Mining Commission of Tanzania. The default notice stated that the Company's subsidiary had, amongst other things, not commenced mining operations on the Mining Licence within 18 months of the date of grant of the Mining Licence. Both of the Company's Projects are</p>						Section 5

<p>situated on this tenement. The Company has also engaged Clyde &amp; Co Tanzania to assist in responding to the notice and advising on its regulatory obligations.</p>	
<p>It has been reported that 95 similar notices have been issued to large and medium-scale mining companies in Tanzania for alleged breaches of licence conditions.</p>	
<p>Under Section 62(a) of the Tanzanian <i>Mining Act, 2019</i>, Mining Licence holders are required to commence mining activities within 18 months, although the Mining Commission of Tanzania has a discretion to allow a default to be remedied over a stipulated period. The Company's Mining Licence 716/2023 was granted on 28 August 2023.</p>	
<p>Upon receipt of the default notice, the Company submitted responses, along with supporting documentation, to the Mining Commission of Tanzania to address the various grounds of default detailed in the default notice, including advising of steps that the Company has already taken to develop the project. As part of its response, the Company also submitted a list of its next development milestones for the project.</p>	
<p>Whilst the Mining Commission of Tanzania has acknowledged receipt of the Company's update, it has not formally endorsed the revised development schedule. Until such time as the Company commences mining activities to the satisfaction of the Mining Commission of Tanzania, there remains a risk that the Mining Licence could be suspended or cancelled.</p>	
<p>In light of the Company's ongoing dialogue with the Mining Commission of Tanzania, the discretion provided under the Tanzanian Mining Act, 2019, recent public instances of default notices similar to that received by the Company being lifted, the Company's submission of an amended development plan and revised commitment to an earlier production date, the Company considers it unlikely that the Mining Commission of Tanzania will suspend or revoke the Mining Licence.</p>	
<p>However, as the matter is not formally resolved, if the Mining Commission of Tanzania were to conclude that material breaches have occurred, the Company could face regulatory sanctions, including fines or, in the unlikely event, licence suspension or revocation. Any such outcome may disrupt operations, harm the Company's financial performance and lead to a decrease in the trading price of Shares. The Directors will update the market on any material developments.</p>	
<p><b>(b) Additional requirements for capital</b></p> <p>The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offers to execute plans to scale up its operations. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations. There is no guarantee that the Company will be able to secure any</p>

additional funding or be able to secure funding on terms favourable to the Company.	
<p><b>(c) Going Concern risks</b></p> <p>The Company's Annual Financial Report for the year ending 30 June 2025 included a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern.</p> <p>Notwithstanding the 'going concern' qualification included in the Company's Annual Financial Report for the year ending 30 June 2025, the Directors believe that upon the successful completion of the Offers, the Company will have sufficient funds to adequately meet the Company's current commitments (as set out in the use of funds table in section 4.1) and short-term working capital requirements. However, further funding may be required to meet the medium to long-term working capital costs of the Company.</p>	
<p><b>(d) Control risk</b></p> <p>ARCH Sustainable Resources GPCo Limited is currently the largest Shareholder of the Company and has a relevant interest in approximately 23.76% of the Shares on issue. Should no other Shareholders (other than the Underwriter) take up their Entitlements, ARCH Sustainable Resources GPCo Limited's Voting Power may increase to 27.31% as a result of the Offers.</p> <p>Metals One PLC is also a significant Shareholder and has a relevant interest in approximately 16.90% of the Shares on issue. Should no Shareholders (other than the Underwriter) take up their Entitlements, Metals One PLC's Voting Power may increase to 23.06% as a result of the Offers, including through the issue of Shares under its sub-underwriting commitment. Craig Moulton, Managing Director of the Company, is also the Executive Chair of Metals One PLC.</p> <p>The significant holdings of ARCH Sustainable Resources GPCo Limited and Metals One PLC mean that each has the ability to influence the financial decisions of the Company, and its interests may not align with those of all other Shareholders. The Company is not aware of any association between ARCH Sustainable Resources GPCo Limited and Metals One PLC for the purposes of the Corporations Act.</p>	
<p><b>(e) Potential for dilution</b></p> <p>In addition to potential control impacts set out in section 4.4, Shareholders should note that if they do not participate in the Offers, their holdings are likely to be diluted by approximately 33.33% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).</p> <p>No immediate dilution will occur as a result of the issue of New Options under this Prospectus. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this Prospectus (including Lead Manager Options) are issued and exercised into Shares, Shareholders who do not participate in the Offers are likely to be diluted by an aggregate of approximately 43.22% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).</p>	
<p><b>(f) Sovereign risk – Tanzania</b></p> <p>The Projects are located in Tanzania and are subject to the risks associated</p>

	<p>with operating in foreign countries. There are risks attached to exploration and mining operations in a developing country like Tanzania which are not necessarily present in a developed country like Australia. These risks vary and may include economic, social or political instability or change, hyperinflation, currency non-convertibility or instability and changes of (or the interpretation of) law affecting foreign ownership, government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, labour relations as well as government control over natural resources or government regulations that require the employment of local staff or contractors or require other benefits to be provided to local residents. The Company may also be hindered or prevented from enforcing its rights with respect to a governmental instrumentality.</p> <p>Any future material adverse changes in government policies or legislation in Tanzania that affect foreign ownership, exploration, development or activities of companies involved in mining exploration and production, may affect the viability and profitability of the Company. Operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on exploration, development, mining production, price controls, export controls, currency remittance, income taxes, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people, water use, local economic empowerment or similar policies, employment, contractor selection and mine safety. Operations may also be affected by failure to comply strictly with applicable laws, regulations and local practices relating to mineral right applications and tenure, could result in loss, reduction or expropriation of entitlements. The occurrence of these various factors creates uncertainties that cannot be accurately predicted and could have an adverse effect on the Company's operations or profitability.</p> <p>In Tanzania, the State retains ownership of the minerals and consequently retains control of the exploration and production of mineral resources. Accordingly, these operations may be materially affected by the government through royalty payments, export taxes and regulations, surcharges, value added taxes, production bonuses and other charges.</p>	
(g) <b>Emerging Market</b>	<p>The Company's main assets are located in Tanzania. When conducting operations on foreign assets in emerging markets such as Tanzania, ASX listed entities may face a number of additional risks that companies with operations wholly within Australia may not face. For example, the ability to implement effective internal control and risk management systems and good corporate governance principles, having regard to the separation of executive management and the Board from the location of the Projects and the need to rely on consultants and professional advisors in those jurisdictions.</p>	
(h) <b>Uninsurable risks</b>	<p>The Company's business is subject to a number of risks and hazards generally, including without limitation, adverse environmental conditions, industrial accidents, labour disputes, civil unrest and political instability, unusual or unexpected geological conditions, changes in the regulatory environment and natural phenomena such as inclement weather conditions, floods and earthquakes.</p>	

Key Information	Further Information
<p>The Company will maintain insurance coverage that is substantially consistent with mining industry practice. However, there is no guarantee that such insurance or any future necessary coverage will be available to the Company at economically viable premiums (if at all) or that, in the event of a claim, the level of insurance carried by the Company now or in the future will be adequate, or that a liability or other claim would not materially and adversely affect the Company's business.</p>	
<p><b>(i) Tenure, access and grant of applications</b></p> <p>Title and rights to mining and exploration tenements in Tanzania are governed by Tanzanian legislation and are subject to the holder complying with the terms and conditions applicable to those tenements. There is a risk that if the holder does not comply with the terms and conditions applicable to a particular tenement, it may lose its rights to that tenement. In particular, all the mining and exploration tenements in Tanzania which the Company, through its subsidiaries, has or may, upon grant, have an interest in, will be subject to expenditure and work commitments. If sufficient exploration activities have not been carried out on a tenement the Company may suffer damage through loss of opportunity to develop any mineral resources on that tenement.</p> <p>Further, all of the tenements in which the Company has, or will have, an interest may be subject to applications for renewal or extension from time to time. The renewal or extension of the term of each tenement is subject to the applicable legislation. Renewal conditions may be imposed and such conditions may include increased expenditure and work commitments. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.</p> <p>There is no guarantee that current or future tenements and/or applications for new tenements and/or applications for renewal of existing tenements will be approved. If a tenement is not renewed for any reason, the Company may suffer damage through loss of the opportunity to develop and discover any mineral resources on that tenement.</p>	
<p><b>(j) Occupier's consent</b></p> <p>The title to tenements held by the Company may also be affected by the provisions of law which provide for the protection of lawful occupiers of the area. According to section 95(1)(b) of the Tanzanian <i>Mining Act, 2019</i>, no holder of a mineral right shall exercise any of its rights conferred by its licence over an area of land which is the site of, or which is within 200 metres of any inhabited, occupied or temporarily unoccupied house or building without prior consultation with the relevant local government authority, including the village council and thereafter the written consent of the lawful occupier.</p> <p>Therefore, where a mineral right granted to an applicant is over an area of land inhabited by lawful occupiers then the Company as holder of such a mineral right is required to obtain the lawful occupier's written consent, following necessary consultation, prior to exercising any of the rights conferred under its mineral right. Failure to obtain the lawful occupier's prior written consent would not invalidate the licence holder's mineral right but the lawful occupier may make a claim against the licence holder.</p>	

(k)	<p><b>Environmental and other regulatory risks</b></p> <p>Environmental laws in Tanzania are strict. Every activity from exploration through to development and mining require compliance with the regulations for environmental protections by virtue of section 81 of the <i>Environmental Management Act, 2004</i>. Under section 81, an Environmental Impact Assessment Report is a mandatory requirement and the outcome of the assessment may be negative. It is expected that the Company's activities will have an impact on the environment, particularly at the time of advanced exploration and any mine development.</p> <p>There are certain risks inherent to the Company's activities, such as accidental spills, leakages or other unforeseen circumstances, which could subject the Company to environmental liability. The Company and/or its subsidiaries will require other various governmental approvals and permits in Tanzania from time to time in connection with various aspects of its activities. To the extent such approvals or permits are required and not obtained, or are delayed, the Company may experience delays affecting its scheduled project development.</p> <p>There can be no assurance that future changes in environmental regulation in Tanzania, if any, will not materially and adversely affect the Company's business, prospects, financial condition and results of operations.</p>	
(l)	<p><b>Operations</b></p> <p>The operations of the Company may be affected by various operational risks and hazards, including:</p> <ul style="list-style-type: none"><li>(A) inability to develop the Company's assets into an economic business;</li><li>(B) failure to locate or identify mineral deposits, over estimation of reserves;</li><li>(C) failure to achieve predicted grades in exploration and mining;</li><li>(D) failure to completely test the deposit, with the result that the Company does not completely understand the metallurgy of a deposit, which may affect extraction costs;</li><li>(E) technical difficulties encountered in exploration and mining;</li><li>(F) inappropriate design of mining plant, difficulties in commissioning and operating plant and equipment;</li><li>(G) mechanical failure or plant breakdown;</li><li>(H) adverse weather conditions;</li><li>(I) industrial and environmental accidents and industrial disputes; and</li><li>(J) unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment and failure to obtain necessary consents and approvals.</li></ul>	
(m)	<p>These risks and hazards could also result in damage to, or destruction of, production facilities, personal injury, environmental damage, business interruption, monetary losses and potential legal liability. While the Company intends to maintain insurance with coverage consistent with industry practice, no assurance can be given that the Company will be able to obtain such insurance coverage at reasonable rates (or at all), or that any coverage it obtains will be adequate and available to cover such claims.</p> <p><b>Exploration</b></p> <p>Any future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and</p>

	technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, changing government regulations and many other factors beyond the control of the Company.	
	The success of the Company will also depend upon the Company, being able to maintain title to the mining licence and the mineral exploration licences comprising the Projects and obtaining all required approvals for their contemplated activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the Projects, a reduction in the cash reserves of the Company and possible relinquishment of one or more of the mineral exploration licences comprising the Projects.	
(n)	<b>Logistics and infrastructure</b>  The Projects in Tanzania are subject to logistical risk of a long supply line should there be a requirement to import materials and equipment from outside the continent of Africa. The Projects are located in a remote area of south-eastern Tanzania where there are some infrastructure deficiencies.  While the Company has access to the Mtwara port, which is 220km by road from the Chilalo Project, and the nearby Nachingwea airport is suitable for the transport of people and consumables, the Company will need to establish reliable road transport and sources of power and water in order for mining operations to be viable, none of which can be assured.  The Company will need to establish the facilities and material necessary to support operations in the remote location in which it is situated. The lack of availability of such resources may adversely affect mining feasibility and may, in any event, require the Company to arrange significant financing, locate adequate supplies and obtain necessary approvals from national regional governments, none of which can be assured.	
(o)	<b>Reputational risk</b>  The Company's operations are dependent on positive relationships with a small number of organisations (including the government of Tanzania). Damage to the Company's reputation within Tanzania due to the actual or perceived occurrence of any number of events could negatively impact the Company.  Reputation loss may lead to increased challenges in developing and maintaining community relations, decreased investor confidence, and the impediment of the Company's overall ability to advance the Projects, thereby having a material adverse impact on financial performance, cash flows and growth prospects.	
(p)	<b>Tax risk</b>  The Company has not obtained specific tax advice in relation to the Offers. While the Directors are not aware of any material adverse taxation consequences arising as a result of the Offers, there is a risk that relevant taxation authorities, including in foreign jurisdictions, may take a different view and seek to impose taxes on the Company or its controlled entities. Any such tax liabilities may have a material adverse effect on the Company's financial

<p>position.</p> <p><b>(q) Future indirect disposal tax risk</b></p> <p>The Tanzanian Income Tax Act 2004 contains indirect disposal tax provisions which apply where there is a change of more than 50% in the underlying ownership of a Tanzanian entity compared to the ownership in that entity over the past 3 years. This indirect disposal tax is calculated at a rate of 30% on the deemed gain realised by the Tanzanian entity (if any). Generally, Tanzanian tax authorities have not historically sought to impose change of control taxes as a consequence of the trading of holding company shares listed on a stock exchange. Nevertheless, this prospect, together with the prospect that any potential takeover bidder for the Company in the future may potentially offer a discounted offer price by reason of the potential application of this tax, could result in a discount to the trading price of Shares on ASX, and if this change of control tax were imposed on Ngwena Tanzania Limited or Kudu Graphite Limited at any time, the Company would bear the financial burden.</p> <p><b>(r) Other risks</b></p> <p>Other risks described in section 5 include commodity prices and exchange rate risks, exploration costs, resource and reserves and exploration targets, mine development, equipment and availability, risks associated with changes in legislation and climate change regulation.</p> <p>In addition, investment in New Shares and attaching New Options is also subject to general risks, including economic risks, market conditions, litigation risks, dividends, force majeure, taxation, conflict and other risks, unforeseen risk and counterparty risk.</p>	
<p><b>Transaction specific prospectus</b></p> <p>This Prospectus is a transaction specific prospectus for offers of continuously quoted securities (as defined in the Corporations Act) and has been prepared in accordance with section 713 of the Corporations Act. It does not contain the same level of disclosure as an initial public offering prospectus. In making representations in this Prospectus, regard has been had to the fact that the Company is a disclosing entity for the purposes of the Corporations Act and certain matters may reasonably be expected to be known to investors and professional advisers whom potential investors may consult.</p>	Important Information

## Allocation policy

The Directors reserve the right to allocate Shares pursuant to the Top Up Offer in their absolute discretion in consultation with the Lead Manager. Accordingly, there is no guarantee that any applications under the Top Up Offer will be successful. In exercising this discretion, the Board will take into consideration a number of factors, including the Company's best interests, minimising any potential unacceptable control effect on the Company, maximising the total funds raised from the Offers, an Applicant's existing shareholdings, the extent to which an Applicant has sold or bought shares in the Company before and after both the announcement of the Entitlement Offer and the Record Date, the financial needs of the Company, and the optimal composition of the Company's register following the Offers.

It is a term of the Top Up Offer that should the Company scale back applications for New Shares thereunder, the Applicant will be bound to accept such lesser number allocated to it. There is no guarantee that Applicants will receive New Shares applied for under the Top Up Offer. The Directors reserve the right to issue to an Applicant a lesser number of New Shares pursuant to the Top Up Offer than the number for which the Applicant applies, or to reject an Application, or to not proceed with the Top Up Offer. In that event, Application Monies for New Shares pursuant to the Top Up Offer will be refunded by the Company (without interest) in accordance with the provisions of the Corporations Act.

In relation to the application of Corporations Act controls on Shareholders exceeding 20% Voting Power in the Company as a result of participation in the Offers and reliance on the Rights Issue Exception from takeover rules, refer to sections 4.3(b) and 4.3(c).

Directors and related parties of the Company will not be issued any New Shares pursuant to the Top Up Offer or the Shortfall without the prior approval of Shareholders.

### **2.3 Shortfall Placement**

The Directors reserve the right to make offers of Shortfall Shares to new investors who are invited to apply for Shortfall Shares, being the balance of any New Shares which are not taken up pursuant to the Entitlement Offer and the Top Up Offer, as contemplated in ASX Listing Rule 7.2 Exception 3, applying the allocation policy described in section 2.2.

Shortfall Shares (and attaching New Options) will be placed within three months of the Closing Date of the Entitlement Offer and the Top Up Offer.

Based on the Company's share register as at the date immediately preceding this Prospectus, the Company has 8 Ineligible Shareholders (being 0.45% of all Shareholders) holding approximately 1.25% of all Shares on issue, are Ineligible Shareholders.

The Company believes that it is unreasonable to extend the Offers to Ineligible Shareholders. The Company has formed this view having considered:

- (b) the cost of complying with the legal requirements and the requirements of regulatory authorities in the overseas jurisdictions where the Ineligible Shareholders are situated.

## Appointment of Nominee under ASX Listing Rule 7.7

Pursuant to ASX Listing Rule 7.7, the Company has appointed Mahe Capital as nominee to sell the Entitlements to which Ineligible Shareholders are entitled.

The Company is seeking ASIC approval for the appointment of Mahe Capital as nominee under section 615 of the Corporations Act, and Mahe Capital's appointment will remain subject to obtaining this approval.

The Offers, combined with the appointment of Mahe Capital under section 615 of the Corporations Act (assuming ASIC approves the appointment, for which the Company

has applied to ASIC), complies with both the Rights Issue Exception and the Underwriter Exception.

Accordingly, when an Eligible Shareholder applies for some or all of their Entitlement , they are permitted to increase their Voting Power:

- (i) from 20% or below 20% to above 20%; and
- (ii) from a starting point of above 20% and below 90%,

as a result of participating in the Entitlement Offer without breaching section 606(1) of the Corporations Act.

#### Top Up Offer - Limitation

However, participation in the Top Up Offer in excess of an Eligible Shareholder's Entitlement is limited by the prohibition in section 606(1) of the Corporations Act summarised in section (a) above, as the Rights Issue Exception does not include acquisitions under shortfall facilities.

The Underwriter will rely on the Underwriter Exception to the extent necessary. Following the Offers, the Underwriter may increase their Voting Power in the Company in accordance with this Prospectus to the extent set out in section (e) below.

#### (d) **Substantial Holders**

The Company currently has two Substantial Holders, being Shareholders holding at least 5% of the Company's issued share capital. These are set out below:

Substantial Holder	Shares held <sup>1</sup>	Shareholding (%) <sup>1</sup>
ARCH Sustainable Resources GPCo Limited	127,739,331	23.76%
Metals One PLC	90,885,000	16.90%

**Notes:**

1. As at the date of this Prospectus.
2. Craig Moulton, Managing Director of the Company, is also the Executive Chair of Metals One PLC.

If all Entitlements are accepted, there will be no change to the Voting Power of the Substantial Holders on completion of the Offers.

Otherwise, assuming in each case, that:

- (i) the substantial holder takes up only its full Entitlement;
- (ii) no other Shareholders (including other substantial holders) take up their Entitlements and hence, no New Shares are issued under the Top Up Offer; and
- (iii) the Underwriter underwrites the Entitlement Offer up to the Underwritten Amount and does not sub-underwrite or otherwise disperse Shares it is obliged to acquire,

each substantial holder respectively will increase its holding of Shares and Voting Power in the Company, and the Underwriter will acquire Shares, as follows:

- (iv) ARCH Sustainable Resources GPCo Limited would be issued 63,869,666 New Shares, equating to a maximum aggregate holding of 191,608,997 Shares and a

maximum shareholding percentage of 27.31% (with the Underwriter holding a maximum of 14.25%) on completion of the Offers; and

(v) Metals One PLC would be issued 45,442,500 New Shares, equating to a maximum aggregate holding of 136,327,500 Shares and a maximum shareholding percentage of 19.96% (with the Underwriter holding a maximum of 14.64%) on completion of the Offers. This calculation does not include any Shares that may be issued to Metals One PLC under its sub-underwriting commitment.

(e) **Underwriting and sub-underwriting**

Mahe Capital

Mahe Capital has agreed to underwrite the Entitlement Offer up to \$1,500,000, representing 100,000,000 Shares, being 18.60% of current Shares on issue as at the date of this Prospectus. However, that amount and resulting New Shares that may be taken up by Mahe is reduced by the dispersion to the sub-underwriter described below.

As at the date of this Prospectus, Mahe Capital does not hold any Shares in the Company, and its Associate holds 1,300,000 Options in the Company.

The table below illustrates the maximum potential Voting Power that the Underwriter may acquire as a result of the Offers:

Underwriter	Current Shares	Current Voting Power	Entitlement to New Shares	Maximum Shares Underwritten	Maximum Total Shares	Maximum Voting Power
Mahe Capital	0	0%	0	100,000,000 <sup>1</sup>	100,000,000	15.68%

**Notes:**

1. Based on the underwriting commitment of \$1,500,000. Assumes no Entitlement uptake other than by the Underwriter, resulting in there being 637,710,676 Shares on issue at close of the Offers, assuming that no Existing Options are exercised during the Offer Period. Assumes that the Underwriter does not place New Shares forming part of the shortfall to third parties.

To the extent that Eligible Shareholders take up their Entitlements, the maximum Voting Power of the Underwriter and sub-underwriter will correspondingly decrease.

Sub-Underwriter:

Sub-Underwriter	Current Shares	Current Voting Power	Sub-Underwritten Amount	Sub-Underwritten Shares <sup>2</sup>	Entitlement to New Shares	Maximum Shares <sup>1</sup>	Maximum Voting Power <sup>1</sup>
Metals One PLC	90,885,000	16.90%	\$318,363	21,224,167	45,442,500	157,551,667	23.06%

**Notes:**

1. Assumes no Entitlement uptake other than by the Underwriter and the sub-underwriter, including their Entitlement to New Shares under the Entitlement Offer, resulting in there being 683,153,176 Shares on issue at close of the Offers, assuming that no Existing Options are exercised during the Offer Period.
2. One New Option will be issued for every two New Shares issued to the sub-underwriter.
3. Craig Moulton, Managing Director of the Company, is also the Executive Chair of Metals One PLC.

The table above illustrates that the maximum Voting Power that the Underwriter and the sub-underwriter may acquire should no Shareholders (other than those who are underwriting and sub-underwriting) take up any Entitlements.

The Underwriter and sub-underwriter may rely on the Underwriter Exception. The Underwriter will not exceed 19.9% Voting Power as a result of the underwriting

arrangements. However, as set out above, the sub-underwriter's maximum Voting Power may exceed 19.9% as a result of its sub-underwriting commitment. Accordingly, the Underwriter Exception may be applicable to any acquisition of relevant interests arising under the sub-underwriting arrangement.

Where Shares are issued pursuant to the exercise of New Options, the Voting Power of the sub-underwriter will increase, but the issue of Shares on exercise of those New Options will be subject to section 606 of the Corporations Act (summarised in section 4.3(a) above). The likelihood of New Options being exercised is dependent on the price of Shares from time to time until the New Options expire.

The Company, in consultation with the Underwriter, will ensure that the Offers comply with the provisions of Chapter 6 of the Corporations Act and are consistent with the policy guidelines contained in ASIC Regulatory Guide 6 and Takeovers Panel Guidance Note 17.

(f) **General limitation**

No securities will be issued to an applicant under the Offers if the issue would contravene the takeover provisions in section 606 of the Corporations Act. To that end, in exercising any discretion under the Top Up Offer, the Company will not do so in a manner that is likely to lead to an unacceptable control effect on the Company (having regard to paragraph 22 of Takeovers Panel Guidance Note 17).

#### 4.4 Effect of the Offers on Shareholder Voting Power

If all Eligible Shareholders take up their Entitlements, the issue of Securities under the Offers will have no effect on control of the Company and all Shareholders will hold the same percentage interests in the Company, subject only to changes from Ineligible Shareholders who are unable to participate in the Offers.

However, Shareholders should note that if they do not participate in the Offers, their holdings are likely to be diluted (as compared to their holdings and number of Shares on issue as at the date of the Prospectus). The maximum dilution that would occur if no Entitlements were taken up by existing Shareholders is approximately 33.33%.

Examples of how the dilution may impact Shareholders are set out in the table below:

Holder	Holding as at Record Date	% at Record Date	Entitlement	Holding if Entitlement Offer not taken up	% holding if Entitlement Offer not taken up
Shareholder 1	134,427,669	25%	67,213,835	134,427,669	16.67%
Shareholder 2	53,771,068	10%	26,885,534	53,771,068	6.67%
Shareholder 3	26,885,534	5%	13,442,767	26,885,534	3.33%
Shareholder 4	13,442,767	2.5%	6,721,384	13,442,767	1.67%
Shareholder 5	5,377,107	1%	2,688,554	5,377,107	0.67%
Shareholder 6	537,711	0.1%	268,856	537,711	0.07%

The dilution effect shown in the table above is the maximum percentage on the assumption that those Entitlements not accepted are subscribed for under the Top Up Offer. In the event all Entitlements are not accepted and some or all of the resulting shortfall is not subsequently taken up, the dilution effect for each Shareholder not accepting their Entitlement will be a lesser percentage.

Assuming all New Options offered pursuant to this Prospectus (including Lead Manager Options) are issued and exercised into Shares, Shareholders who do not participate in the Offers are likely to be diluted by an aggregate of approximately 43.22% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).

The above table also assumes that no other Shares are issued or equity securities converted into Shares prior to the Record Date.

#### 4.5 Foreign Ineligible Shareholders

As the Entitlement Offer is renounceable, the Company will, in accordance with ASX Listing Rule 7.7, appoint Mahe Capital to arrange for the sale of Entitlements that would have been given to Ineligible Shareholders and to account to them for the net proceeds of the sale. In this regard, refer to sections 2.13, 2.14 and 2.15.

#### 4.6 Effect of the Offers on the Company's financial position

To illustrate the effect of the Offers on the financial position of the Company, section 9 sets out:

- (a) the audited statement of financial position of the Company; and
- (b) the unaudited pro forma statement of financial position of the Company,

both as at 30 June 2025.

The unaudited pro forma statement of financial position has been prepared on a going concern basis, which contemplates the continuity of normal business activity and the realisation of assets and settlement of liabilities in the normal course of business.

The unaudited pro forma statement of financial position has been prepared on the basis that the assets and liabilities of the Company have not been subject to any material change between 30 June 2025 and the completion of the Offers except for movements in working capital resulting from transactions and expenditures incurred in the normal course of business.

The unaudited pro forma statement of financial position is presented on the following bases:

- (a) the underwritten amount the Entitlement Offer (\$1,500,000) is taken up; and
- (b) full subscription of all Entitlements.

The unaudited pro forma statement of financial position is presented in abbreviated form and does not include all disclosures required by the Australian Accounting Standards applicable to annual financial statements.

The key assumptions on which the unaudited pro forma statement of financial position is based are:

- (a) the pro forma statement of financial position has not been audited or reviewed and does not include any other expenditure of the proceeds other than the costs of the Offers of approximately \$215,737 (on a full subscription basis). Refer to section 2.7; and
- (b) the unaudited effects of the Offers assume full subscription to the Entitlement Offer, being the issue of approximately 268,855,338 New Shares at \$0.015 each and 134,427,669 New Options, subject to rounding and assuming that no Existing Options are exercised before 5:00pm (AWST) on the Record Date.

## 5. Risk Factors

---

Activities in the Company and its controlled entities, as in any business, are subject to risks, which may impact on the Company's future performance. The Company and its controlled entities have implemented appropriate strategies, actions, systems and safeguards for known risks, however, some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which Shareholders need to be aware of in evaluating the Company's business and risks of increasing investment in the Company. Shareholders should carefully consider the following factors in addition to the other information presented in this Prospectus.

The principal risks include, but are not limited to, the following:

### 5.1 Risks specific to the Company

#### (a) Default notice risk

The Company's subsidiary and holder of ML 716/2023, Kudu Graphite Limited, has received a default notice from the Mining Commission of Tanzania. The default notice stated that the Company's subsidiary had, amongst other things, not commenced mining operations on the Mining Licence within 18 months of the date of grant of the Mining Licence. Both of the Company's Projects are situated on this tenement. The Company has also engaged Clyde & Co Tanzania to assist in responding to the notice and advising on its regulatory obligations.

It has been reported that 95 similar notices have been issued to large and medium-scale mining companies in Tanzania for alleged breaches of licence conditions.

Under Section 62(a) of the Tanzanian *Mining Act, 2019*, Mining Licence holders are required to commence mining activities within 18 months, although the Mining Commission of Tanzania has a discretion to allow a default to be remedied over a stipulated period. The Company's Mining Licence 716/2023 was granted on 28 August 2023.

Upon receipt of the default notice, the Company submitted responses, along with supporting documentation, to the Mining Commission of Tanzania to address the various grounds of default detailed in the default notice, including advising of steps that the Company has already taken to develop the project. As part of its response, the Company also submitted a list of its next development milestones for the project.

Whilst the Mining Commission of Tanzania has acknowledged receipt of the Company's update, it has not formally endorsed the revised development schedule. Until such time as the Company commences mining activities to the satisfaction of the Mining Commission of Tanzania, there remains a risk that the Mining Licence could be suspended or cancelled.

In light of the Company's ongoing dialogue with the Mining Commission of Tanzania, the discretion provided under the Tanzanian Mining Act, 2019, recent public instances of default notices similar to that received by the Company being lifted, the Company's submission of an amended development plan and revised commitment to an earlier production date, the Company considers it unlikely that the Mining Commission of Tanzania will suspend or revoke the Mining Licence.

However, as the matter is not formally resolved, if the Mining Commission of Tanzania were to conclude that material breaches have occurred, the Company could face

regulatory sanctions, including fines or, in the unlikely event, licence suspension or revocation. Any such outcome may disrupt operations, harm the Company's financial performance and lead to a decrease in the trading price of Shares. The Directors will update the market on any material developments.

(b) **Additional requirements for capital**

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offers. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations. There is no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

(c) **Going concern risks**

The Company's Annual Financial Report for the year ending 30 June 2025 included a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern.

Notwithstanding the 'going concern' qualification included in the Company's Annual Financial Report for the year ending 30 June 2025, the Directors believe that upon the successful completion of the Offers, the Company will have sufficient funds to adequately meet the Company's current commitments (as set out in the use of funds table at section 4.1) and short-term working capital requirements. However, further funding may be required to meet the medium to long-term working capital costs of the Company.

(d) **Control risk**

ARCH Sustainable Resources GPCo Limited is currently the largest Shareholder of the Company and has a relevant interest in approximately 23.76% of the Shares on issue. Should no other Shareholders (other than the Underwriter) take up their Entitlements, ARCH Sustainable Resources GPCo Limited's Voting Power may increase to 27.31% as a result of the Offers.

Metals One PLC is also a significant Shareholder and has a relevant interest in approximately 16.90% of the Shares on issue. Should no Shareholders (other than the Underwriter) take up their Entitlements, Metals One PLC's Voting Power may increase to 23.06% as a result of the Offers, including through the issue of Shares under its sub-underwriting commitment. Craig Moulton, Managing Director of the Company, is also the Executive Chair of Metals One PLC.

The significant holdings of ARCH Sustainable Resources GPCo Limited and Metals One PLC mean that each has the ability to influence the financial decisions of the Company, and its interests may not align with those of all other Shareholders. The Company is not aware of any association between ARCH Sustainable Resources GPCo Limited and Metals One PLC for the purposes of the Corporations Act.

As a result of the Offers, ARCH Sustainable Resources GPCo Limited may acquire more than 25% Voting Power in the Company, in which case it would have the ability to prevent a special resolution from being passed by the Company (such resolution requiring at least 75% of the votes cast by members entitled to vote on the resolution). Special resolutions are required to approve certain Company matters including seeking the delisting of the Company, amending the Constitution, approving the voluntary winding up of the Company and, if at any time the share capital of the Company is divided into different classes of Shares, approving the variation of the rights attached to any such class.

**(e) Potential for dilution**

In addition to potential control impacts set out in section 4.4, Shareholders should note that if they do not participate in the Offers, their holdings are likely to be diluted by approximately 33.33% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

No immediate dilution will occur as a result of the issue of New Options under this Prospectus. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this Prospectus (including Lead Manager Options) are issued and exercised into Shares, Shareholders who do not participate in the Offers are likely to be diluted by an aggregate of approximately 43.22% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).

It is not possible to predict what the value of the Company, a Share or an Option will be following the completion of the Offers being implemented and the Directors do not make any representation as to such matters.

The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.018 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offers.

**(f) Sovereign risk – Tanzania**

The Projects are located in Tanzania and are subject to the risks associated with operating in foreign countries. There are risks attached to exploration and mining operations in a developing country like Tanzania which are not necessarily present in a developed country like Australia. These risks vary may include economic, social or political instability or change, hyperinflation, currency non-convertibility or instability and changes of (or the interpretation of) law affecting foreign ownership, government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, labour relations as well as government control over natural resources or government regulations that require the employment of local staff or contractors or require other benefits to be provided to local residents. The Company may also be hindered or prevented from enforcing its rights with respect to a governmental instrumentality.

Any future material adverse changes in government policies or legislation in Tanzania that affect foreign ownership, exploration, development or activities of companies involved in mining exploration and production, may affect the viability and profitability of the Company. Operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on exploration, development, mining production, price controls, export controls, currency remittance, income taxes, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people, water use, local economic empowerment or similar policies, employment, contractor selection and mine safety. Operations may also be affected by failure to comply strictly with applicable laws, regulations and local practices relating to mineral right applications and tenure, could result in loss, reduction or expropriation of entitlements. The occurrence of these various factors creates uncertainties that cannot be

accurately predicted and could have an adverse effect on the Company's operations or profitability.

Tanzania's legal system is less developed than more established countries and this could result in the following risks:

- (A) political difficulties in obtaining effective legal redress in the courts whether in respect of a breach of law or regulation or in an ownership dispute;
- (B) a higher degree of discretion held by various government officials or agencies;
- (C) the lack of political or administrative guidance on implementing applicable rules and regulations, particularly in relation to taxation and property rights;
- (D) inconsistencies or conflicts between and within various laws, regulations, decrees, orders and resolutions; or
- (E) relative inexperience of the judiciary and court in matters affecting the Company.

The commitment from local business people, government officials and the judicial system to abide by legal requirements and negotiated agreements may be more uncertain, creating particular concerns with respect to licences and agreements for business. These may be susceptible to revision or cancellation and legal redress may be uncertain or delayed. There can be no assurance that legal arrangements with the Company will not be adversely affected by the actions of the government authorities or others. As such, the effectiveness and enforcement of any such arrangements cannot be assured.

In Tanzania, the State retains ownership of the minerals and consequently retains control of the exploration and production of mineral resources. Accordingly, these operations may be materially affected by the government through royalty payments, export taxes and regulations, surcharges, value added taxes, production bonuses and other charges.

There can be no guarantee that the Company will be able to generate a positive return for its Shareholders if an event occurs in Tanzania which materially adversely affects the value of the Projects.

**(g) Emerging Market**

The Company's main assets are located in Tanzania. When conducting operations on foreign assets in emerging markets such as Tanzania, ASX listed entities may face a number of additional risks that companies with operations wholly within Australia may not face. For example, the ability to implement effective internal control and risk management systems and good corporate governance principles, having regard to the separation of executive management and the Board from the location of the Projects and the need to rely on consultants and professional advisors in those jurisdictions.

**(h) Uninsurable risks**

The Company's business is subject to a number of risks and hazards generally, including without limitation, adverse environmental conditions, industrial accidents, labour disputes, civil unrest and political instability, unusual or unexpected geological conditions, changes in the regulatory environment and natural phenomena such as inclement weather conditions, floods and earthquakes. Such occurrences could result in damage to mineral properties or facilities, personal injury or death, environmental damage to the Company's properties or the properties of others, delays in development, monetary losses and possible legal liability.

The Company will maintain insurance coverage that is substantially consistent with mining industry practice. However, there is no guarantee that such insurance or any future necessary coverage will be available to the Company at economically viable premiums (if at all) or that, in the event of a claim, the level of insurance carried by the Company now or in the future will be adequate, or that a liability or other claim would not materially and adversely affect the Company's business.

(i) **Tenure, access and grant of applications**

Title and rights to mining and exploration tenements in Tanzania are governed by Tanzanian legislation and are subject to the holder complying with the terms and conditions applicable to those tenements. There is a risk that if the holder does not comply with the terms and conditions applicable to a particular tenement, it may lose its rights to that tenement. In particular, all the mining and exploration tenements in Tanzania which the Company, through its subsidiaries, has or may, upon grant, have an interest in, will be subject to expenditure and work commitments. If sufficient exploration activities have not been carried out on a tenement to Company may suffer damage through loss of opportunity to develop any mineral resources on that tenement.

Further, all of the tenements in which the Company has, or will have, an interest may be subject to applications for renewal or extension from time to time. The renewal or extension of the term of each tenement is subject to the applicable legislation. Renewal conditions may be imposed and such conditions may include increased expenditure and work commitments. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.

There is no guarantee that current or future tenements and/or applications for new tenements and/or applications for renewal of existing tenements will be approved. If a tenement is not renewed for any reason, the Company may suffer damage through loss of the opportunity to develop and discover any mineral resources on that tenement.

It is the Company's intention to satisfy the conditions that apply to the tenements. However, there are no guarantees that, in the future, the minimum expenditure and other conditions that apply to the tenements will be satisfied. If the conditions that apply to a tenement are not satisfied, the Company may be subject to penalties or forfeiture applications. Any of these events could have a materially adverse effect on the Company's prospects and the value of its assets.

(j) **Occupier's consent**

The title to tenements held by the Company may also be affected by the provisions of law which provide for the protection of lawful occupiers of the area. According to section 95(1)(b) of the Tanzanian *Mining Act, 2019*, no holder of a mineral right shall exercise any of its rights conferred by its licence over an area of land which is the site of, or which is within 200 metres of any inhabited, occupied or temporarily unoccupied house or building without prior consultation with the relevant local Government authority, including the village council and thereafter the written consent of the lawful occupier.

Therefore, where a mineral right granted to an applicant is over an area of land inhabited by lawful occupiers then the Company as holder of such a mineral right is required to obtain the lawful occupier's written consent, following necessary consultation, prior to exercising any of the rights conferred under its mineral right. Failure to obtain the lawful occupier's prior written consent would not invalidate the licence holder's mineral right but the lawful occupier may make a claim against the licence holder.

**(k) Environmental and other regulatory risks**

Environmental laws in Tanzania are strict. Every activity from exploration through to development and mining require compliance with the regulations for environmental protections by virtue of section 81 of the Tanzanian *Environmental Management Act, 2004*. Under section 81, an Environmental Impact Assessment Report is a mandatory requirement and the outcome of the assessment may be negative. It is expected that the Company's activities will have an impact on the environment, particularly at the time of advanced exploration and any mine development.

It is in the interest of the Company to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws, in order to minimise damage to the environment and risk of liability which includes personal criminal liability under section 98 of the Tanzanian *Environmental Management Act, 2004*. In a normal situation it is expected that despite diligently observing in all material respects applicable environmental laws and regulations, there are certain risks inherent to the Company's activities, such as accidental spills, leakages or other unforeseen circumstances, which could subject the Company to environmental liability. The Company and/or its subsidiaries will require other various governmental approvals and permits in Tanzania from time to time in connection with various aspects of its activities. To the extent such approvals or permits are required and not obtained, or are delayed, the Company may experience delays affecting its scheduled project development.

Environmental laws are dynamic and can change over time. The Company is unable to predict the effect of additional environmental laws and regulations that may be adopted in the future. Additional laws or regulations may materially increase the Company's cost of doing business or affect its operations. The cost and complexity of complying with any additional environmental laws and regulations may prevent the Company from being able to develop potentially economically viable mineral deposits.

Further, environmental legislation is evolving in a manner which will likely require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There can be no assurance that future changes in environmental regulation in Tanzania, if any, will not materially and adversely affect the Company's business, prospects, financial condition and results of operations.

**(l) Operations**

The operations of the Company may be affected by various operational risks and hazards, including:

- (A) inability to develop the Company's assets into an economic business;
- (B) failure to locate or identify mineral deposits, over estimation of reserves;
- (C) failure to achieve predicted grades in exploration and mining;
- (D) failure to completely test the deposit, with the result that the Company does not completely understand the metallurgy of a deposit, which may affect extraction costs;
- (E) technical difficulties encountered in exploration and mining;
- (F) inappropriate design of mining plant, difficulties in commissioning and operating plant and equipment;

- (G) mechanical failure or plant breakdown;
- (H) adverse weather conditions;
- (I) industrial and environmental accidents and industrial disputes; and
- (J) unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment and failure to obtain necessary consents and approvals.

These risks and hazards could also result in damage to, or destruction of, production facilities, personal injury, environmental damage, business interruption, monetary losses and potential legal liability. While the Company intends to maintain insurance with coverage consistent with industry practice, no assurance can be given that the Company will be able to obtain such insurance coverage at reasonable rates (or at all), or that any coverage it obtains will be adequate and available to cover such claims.

The exploration and operational costs of the Company will be based on certain assumptions with respect to the method and timing of exploration and the nature of the operating activity. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that any cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

There can be no assurance that any exploration tenement, or any other mining tenements acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. The development timeframe for a project is dependent in part on obtaining various approvals and permits. The time it requires to obtain such approvals is in many cases not certain. To the extent that these approvals, permits and licences are issued at the discretion of the relevant regulatory authorities, there is no certainty that the Company will be able to obtain the grant of these approvals within any proposed timeframe, or at all.

(m) **Exploration**

Any future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, changing government regulations and many other factors beyond the control of the Company.

The success of the Company will also depend upon the Company, being able to maintain title to the mining licence and the mineral exploration licences comprising the Projects and obtaining all required approvals for their contemplated activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the Projects, a reduction in the cash reserves of the Company and possible relinquishment of one or more of the mineral exploration licences comprising the Projects.

## (n) Logistics and infrastructure

The Projects in Tanzania are subject to logistical risk of a long supply line should there be a requirement to import materials and equipment from outside the continent of Africa. The

Projects are located in a remote area of south-eastern Tanzania where there are some infrastructure deficiencies.

While the Company has access to the Mtwara port, which is 220km by road from the Chilalo Project, and the nearby Nachingwea airport is suitable for the transport of people and consumables, the Company will need to establish reliable road transport and sources of power and water in order for mining operations to be viable, none of which can be assured.

The Company may engage expatriate workers to perform certain functions in Tanzania. In order to develop the Projects, the Company will need to establish the facilities and material necessary to support operations in the remote location in which it is situated.

The lack of availability of such resources may adversely affect mining feasibility and may, in any event, require the Company to arrange significant financing, locate adequate supplies and obtain necessary approvals from national regional governments, none of which can be assured.

**(o) Reputational risk**

The Company's operations are dependent on positive relationships with a small number of organisations (including the government of Tanzania). Damage to the Company's reputation within Tanzania due to the actual or perceived occurrence of any number of events could negatively impact the Company.

Reputation loss may lead to increased challenges in developing and maintaining community relations, decreased investor confidence, and the impediment of the Company's overall ability to advance the Projects, thereby having a material adverse impact on financial performance, cash flows and growth prospects.

**(p) Tax risk**

The Company has not obtained specific tax advice in relation to the Offers. While the Directors are not aware of any material adverse taxation consequences arising as a result of the Offers, there is a risk that relevant taxation authorities, including in foreign jurisdictions, may take a different view and seek to impose taxes on the Company or its controlled entities. Any such tax liabilities may have a material adverse effect on the Company's financial position.

**(q) Future indirect disposal tax risk**

The Tanzanian *Income Tax Act, 2004* contains indirect disposal tax provisions which apply where there is a change of more than 50% in the underlying ownership of a Tanzanian entity compared to the ownership in that entity over the past 3 years. This indirect disposal tax is calculated at a rate of 30% on the deemed gain realised by the Tanzanian entity (if any). Generally, Tanzanian tax authorities have not historically sought to impose change of control taxes as a consequence of the trading of holding company shares listed on a stock exchange. Nevertheless, this prospect, together with the prospect that any potential takeover bidder for the Company in the future may potentially offer a discounted offer price by reason of the potential application of this tax, could result in a discount to the trading price of Shares on ASX, and if this change of control tax were imposed on Ngwena Tanzania Limited or Kudu Graphite Limited at any time, the Company would bear the financial burden.

## 5.2 Industry-specific risks

### (a) Commodity prices and exchange rate risks

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of graphite and copper products exposes the potential income of the Company to commodity price and exchange rate risks.

Changes in the market price of mineral commodities have historically fluctuated widely, and will affect the profitability of the Company's operations and its financial condition in the future, if and when the Company enters production. The Company's revenues, long term profitability and viability will depend on the price of the graphite produced from the Chilalo Project and the copper produced from the Chikundo Project. The market prices of graphite and copper are set in the world market and are affected by numerous industry factors beyond the Company's control, including demand, expectations with respect to the rate of inflation, interest rates, currency exchange rates, industrial demand for metals, global graphite and copper production levels, inventories, cost of substitutes, changes in global or regional investment or consumption patterns, sales by producers and other holders, and global and regional political and economic factors.

Unlike the majority of base and precious metals, there is no designated exchange or index for graphite pricing. As a result, there is a lack of market transparency associated with the price of graphite. However, copper is traded on established global exchanges and its price is subject to volatility driven by macroeconomic conditions, supply disruptions and industrial demand.

A decline in the market price of flake graphite or copper below the Company's production costs for any sustained period would have a material adverse impact on the profit, cash flow and results of the operations of the Projects, and may adversely affect anticipated future operations. Such a decline could also have a material adverse impact on the ability of the Company to finance the exploration and development of its existing and future mineral projects.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

### (b) Exploration costs

The exploration costs estimates of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainty, and accordingly, the actual costs may materially differ from the estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely impact the Company's viability.

### (c) Resource and reserves and exploration targets

The Company has identified a number of exploration targets based on geological interpretations and geophysical data, geochemical sampling and limited historical drilling. However, there is insufficient data to provide certainty over the extent of the mineralisation. Whilst the Company intends to undertake additional exploratory work with the aim of defining a resource, no assurances can be given that additional exploration will result in the determination of a resource on any of the exploration targets identified. Even

if a resource is identified no assurance can be provided that this can be economically extracted.

Reserve and resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when initially calculated may alter significantly when new information or techniques become available. In addition, by their very nature resource and reserve estimates are imprecise and depend to some extent on interpretations which may prove to be inaccurate.

**(d) Mine development**

Possible future development of mining operations at the Projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.

If the Company commences production on any of the Projects, its operations may be disrupted by a variety of risks and hazards which are beyond the control of the Company. No assurance can be given that the Company will achieve commercial viability through the development of the Projects.

The risks associated with the development of a mine will be considered in full should the Projects reach that stage and will be managed with ongoing consideration of stakeholder interests.

**(e) Equipment and availability**

The Company's ability to undertake mining and exploration activities is dependent upon its ability to source and acquire appropriate mining equipment. Equipment is not always available and the market for mining equipment experiences fluctuations in supply and demand. If the Company is unable to source appropriate equipment economically or at all then this would have a material adverse effect on the Company's financial or trading position.

**(f) Risks associated with changes in legislation**

Changes to mineral exploration or investment policies and legislation or a shift in political attitude within the jurisdiction in which the Company operates may adversely affect the Company's proposed operations and profitability. Government action or policy change in relation to access to lands and infrastructure, compliance with environmental regulations, export restrictions, taxation, royalties and subsidies may adversely affect the Company's operations and financial performance. The Company is governed by a series of national laws and regulations. Breaches or non-compliance with these laws and regulations can result in penalties and other liabilities.

These may have a material adverse impact on the financial position, financial performance, cash flows, growth prospects and share price of the Company.

These laws and regulations may be amended from time to time, which may also have a material adverse impact on the financial position, financial performance, cash flows,

growth prospects and share price for the Company. The legal and political conditions in Tanzania and any changes thereto are outside the control of the Company.

The introduction of new legislation or amendments to existing legislation by the national government, developments in existing common law, or the interpretation of the legal requirements which govern the Company's operations or contractual obligations, could adversely affect the assets, operations and, ultimately, the financial performance of the Company and the value of its securities. In addition, there is a commercial risk that legal action may be taken against or by the Company in relation to commercial matters.

In addition, the evolution and interpretation of Tanzanian legislation is uncertain and may impose restrictions on the Company.

The Company's business is subject to various levels of government controls and regulations which are revised from time to time. The Company is unable to predict what legislation may be proposed that might affect its business or when any such proposals, if enacted, might become effective. Such changes could require increased capital and operating expenditures and could prevent or delay certain operations by the Company. To the extent the Company is unable to comply with any such legislation, whether in the future or past, the Company may be unable to continue to successfully operate.

**(g) Climate change regulation**

The extraction and processing of resources is relatively energy intensive and is currently dependent on the consumption of fossil fuels. Increased regulation and government policy designed to mitigate climate change may adversely affect the Company's cost of operations and adversely impact the financial performance of the Company.

There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly relevant to the Company include:

- (i) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage;
- (ii) certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns; all these risks associated with climate change may significantly change the industry in which the Company operates; and
- (iii) adverse weather events which may disrupt field work and operational activities.

These examples sit amongst an array of possible climate-related restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, should these risks materialise, the Company may be adversely impacted.

## 5.3 General risks

### (a) Economic risk

General economic conditions, movements in interest and inflation rates and currency exchange rates, introduction of tax reform and new legislation may have an adverse effect on the Company, as well as on its ability to fund its operations.

### (b) Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

### (c) Litigation risks

The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.

### (d) Dividends

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

### (e) Force majeure

Force majeure is a term used to refer to an event beyond the control of a party claiming that the event has occurred. Significant catastrophic events – such as war, acts of terrorism, pandemics, loss of power, cyber security breaches or global threats – or natural disasters - such as earthquakes, fire or floods or the outbreak of epidemic disease – could disrupt the Company's operations and interrupt critical functions, or otherwise harm the business. To the extent that such disruptions or uncertainties result in delays or

cancellations of the deployment of the Company's products and solutions, its business, results of operations and financial condition could be harmed.

**(f) Taxation**

The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Prospectus.

**(g) Conflict and other risks**

General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including outbreaks of international hostilities, armed conflict, terrorism, sabotage, civil unrest, labour disputes, security operations and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics may have an adverse effect on the Company's operations and financial performance, including the Company's exploration, development and production activities, as well as on its ability to fund those activities.

General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.

Ongoing or emerging geopolitical tensions and conflicts in various regions of the world have the potential to disrupt global supply chains, commodity markets, capital markets and economic conditions generally. The nature, extent and duration of any such disruptions are uncertain and may adversely affect the Company's operations, financial performance and the trading price of the Shares. As geopolitical situations evolve, their outcomes and consequences remain inherently unpredictable.

**(h) Unforeseen risk**

There may be other risks which the Directors are unaware of at the time of issuing this Prospectus which may impact on the Company, its operations and/or the valuation and performance of its Shares.

**(i) Counterparty risk**

The Company has entered into, and will likely continue to enter into, a number of commercial agreements with third parties. There is a risk that the counterparties may not meet their obligations under those agreements.

The ability of the Company to achieve its stated objectives will depend on the performance by the counterparties, with whom the Company has contracted, or will contract with, of their obligations under the relevant agreements. If any party defaults in the performance of its obligations, it may be necessary for the Company to approach a court to seek a legal remedy, which can be costly.

## **5.4 Investment speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred

to above, may in the future materially affect the financial performance of the Company and the value of the Shares offered under this Prospectus.

Therefore, the Securities to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for Shares pursuant to this Prospectus.

## 6. Rights attaching to Securities

---

### 6.1 Rights and liabilities attaching to Shares

A summary of the rights attaching to Shares (with which New Shares rank equally) in the Company is below. This summary is qualified by the full terms of the Constitution (a full copy of the Constitution is available from the Company on request free of charge) and does not purport to be exhaustive or to constitute a definitive statement of the rights and liabilities of Shareholders. These rights and liabilities can involve complex questions of law arising from an interaction of the Constitution with statutory and common law requirements. For a Shareholder to obtain a definitive assessment of the rights and liabilities which attach to Shares in any specific circumstances, the Shareholder should seek legal advice.

#### (a) General meeting

Subject to the Constitution and to the rights or restrictions attached to any shares or class of shares, each member is entitled to receive notice of and, except in certain circumstances, Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act.

#### (b) Ranking of Shares

At the date of this Prospectus, all Shares are of the same class and rank equally in all respects. Specifically, the New Shares issued pursuant to this Prospectus will rank equally with existing Shares.

#### (c) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of Shares, at general meetings of Shareholders or classes of Shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for the Share, but in respect of partly paid Shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

#### (d) Direct voting

The Directors may determine that Shareholders may cast votes to which they are entitled on any or all of the resolutions (including any special resolution) proposed to be considered at, and specified in the notice convening, a meeting of Shareholders, by direct vote.

Direct voting is a mechanism by which Shareholders can vote directly on resolutions which are to be determined by poll. Votes cast by direct vote by a Shareholder are taken to have been cast on the poll as if the Shareholder had cast the votes on the poll at the meeting. In order for direct voting to be available, Directors must elect that votes can be cast via direct vote for all or any resolutions and determine the manner appropriate for the casting of direct votes. If such a determination is made by the Directors, the notice of meeting will include information on the application of direct voting.

**(e) Dividend rights**

Subject to the Corporations Act, the Constitution, the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

No dividend shall carry interest as against the Company.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit.

**(f) Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution of the Company, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution of the Company, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability.

**(g) Shareholder liability**

As the New Shares issued under the Offers are fully paid Shares, they are not subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

**(h) Transfer of Shares**

Generally, Shares are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act or the Listing Rules.

The Directors may ask ASX Settlement Pty Limited to apply a holding lock, or decline to register a transfer of Shares for reasons including where the transfer is not in registrable form or where the refusal to register the transfer is permitted under the Listing Rules. If the Directors request a holding lock or, decline to register a transfer, the Company must give the holder of the shares (in circumstances of a holding lock request), or the party lodging the transfer (in circumstances of a refusal to register), written notice of the refusal and the reason for refusal. The Directors decision to decline to register the transfer or to apply for a holding lock is not invalidated if that notice is not given.

**(i) Restricted Securities**

In the event of a breach of the Listing Rules or a breach of a restriction agreement entered into by the Company under the Listing Rules relating to Restricted Securities (as defined in the Listing Rules), the Shareholder holding the Restricted Securities in question shall cease to be entitled to any dividends, distribution or any voting rights in respect of those Restricted Securities during the period of such breach.

**(j) Small holdings**

The Directors may sell the Shares of a Shareholder if that Shareholder holds less than a marketable parcel of Shares, provided that the procedures set out in the Constitution are followed. A non-marketable parcel of Shares is defined in the Listing Rules and is, generally, a holding of shares with a market value of less than \$500.

**(k) Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of shares, the rights attaching to the Shares may only be varied by the consent in writing of the holders of three-quarters of the issued shares of that class, or with the sanction of a special resolution passed at a separate general meeting of the holders of the shares in that class.

**(l) Alteration of Constitution**

The Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

**(m) Receipt of notices**

All notices, certificates, statements, demands, appointments, directions and other documents provided to Shareholders must be in writing and may be given personally, by post or electronically.

**(n) Preference shares**

The Company may issue preference shares including preference shares which have certain redemption and conversion rights. The rights attaching to preference shares are those set out in the Constitution.

**(o) Listing Rules**

The Constitution provides that notwithstanding anything in the Constitution, if the Listing Rules prohibit an act being done, the act must not be done. Nothing in the Constitution prevents an act being done that the Listing Rules require to be done. If the Listing Rules require an act to be done or not to be done, authority is given for that act to be done or not to be done (as the case may be). If the Listing Rules require the Constitution to contain a provision or not to contain a provision the Constitution is deemed to contain that provision or not to contain that provision (as the case may be). If a provision of the Constitution is or becomes inconsistent with the Listing Rules, the Constitution is deemed not to contain that provision to the extent of the inconsistency.
