Financial results

Macadamia trees flowering at Glendor orchard, Maryborough Queensland, September 2025.

Earnings summary

Net property income increased 7% primarily due to macadamia developments.

1 Net property income from leased assets increased 6.8%:

- driven by additional rental income on capital expenditure (primarily macadamia orchards), indexation and rent review mechanisms.

2 Net farming income improved:

- forecast to increase 2H26 as crops are harvested, consistent with skew in prior years.

3 AFFO in line with full-year forecasts:

- interest on debt increased primarily because of reduction in capitalised interest as developments are completed.

4 Earnings higher compared to prior period:

- mainly due to revaluation of interest rate swaps and gain on sale of water entitlements.

5 DPU in line with full-year forecasts.

Balance sheet summary

Gearing decreased (pro forma) despite capital expenditure programs.

1 Adjusted total assets increased by \$51.6m, or 2.5%, primarily due to:

- property valuation movement of \$59.4m, primarily driven by capital expenditure on macadamia and cropping developments
- partially offset by divestments of \$26.7m.

2 Adjusted NAV per unit increased \$0.02 to \$3.10 primarily due to mark-to-market of interest rate swaps.

3 Gearing decreased on a pro forma basis:

- pro forma gearing of 39.1% adjusting for 4,000 ML water sales (\$34.0m)
- additional asset sales expected during 2H26 as part of broader strategy to fund capital expenditure from proceeds of divestments and reduce gearing.

Valuations overview

Independent valuations and asset sales continue to confirm book value of assets.

1 Independent valuations completed for 25% (\$494.1m) of the portfolio property assets in the macadamia, cropping and cattle sectors, affirming book values:

- consistent with policy to independently revalue assets at least every two years.

2 Directors' valuations applied to the remaining portion of the portfolio (\$1,467.6m):

- primarily reflecting depreciation of bearer plants in line with accounting standards.

3 Divestment of \$26.7m of assets at or above book values, including:

- two sugarcane properties (\$6.3m)
- 2,254ML water entitlements (\$19.3m).

Capital management

Full funding available for committed development expenditure (2H26 and FY27) from bank debt facilities.

- **Scheduled refinancing of syndicated debt facility** during the period including two-year extension of \$410m debt tranche tenor.
- **Facility remains well within key covenants:**
 - LVR 48.6% vs. 60.0% covenant
 - ICR 2.63x vs. 1.50x covenant.
- **Undrawn debt headroom** of \$89.4m sufficient for 2H26 and FY27 committed capital expenditure:
 - lower FY27 committed capital expenditure as major developments are complete or well-progressed.

Increase to J&F Guarantee

Increasing the J&F Guarantee will be accretive to AFFO.¹

History of Guarantee increases¹

Pro forma AFFO impact – current proposals¹

Proposal details

- The J&F Guarantee is a security arrangement which supports a cattle finance facility for RFF-lessee JBS, which has been in place since 2018.
- As a result of growth in JBS operational requirements, increases to the J&F Guarantee have been previously approved by Unitholders in 2020 and 2022. JBS have recently requested a further increase to the cattle finance facility, requiring a commensurate increase to the Guarantee.
- Unitholders will be asked to vote on a \$28m increase (Resolution 1) and a further \$40m increase contingent on \$80m of asset sales (Resolution 2). Asset sales ensure that RFF's pro forma LVR does not increase.
- Increases to the J&F Guarantee are accretive to RFF. On a full-year basis an increase of \$28m provides approximately 0.5 cpu of additional AFFO, and a \$68m increase generates 1.0 cpu additional AFFO (pro forma).¹
- Documentation expected to be provided to Unitholders in March 2026.**

Article: Feedlots and the beef industry

Note:
 1. Full information will be contained in the Notice of Meetings and Explanatory Memorandum to be released via ASX. Full-year AFFO impact assumes full utilisation of the Guarantee during the period. Pro forma AFFO impact is not a revised forecast, given the short period of utilisation in FY26, the FY26 forecast AFFO will remain unchanged at 11.7cpu.

FY25 emissions disclosure

- RFM disclosed RFF emissions starting FY23. Disclosure includes Scope 1 and Scope 2 greenhouse gas (GHG) emissions for assets under the Fund's operational control, consistent with the Greenhouse Gas Protocol.
- Scope 1 emissions: 18,380 tonnes of CO₂-e and Scope 2 emissions: 1,002 tonnes of CO₂-e
- Scope 1 and Scope 2 emissions remain modest relative to the overall size of its agricultural portfolio, reflecting the predominance of leased assets outside RFF's operational control.

Cotton crop at Mayneland, central Queensland, August 2025.

Appendix A – Summarised comprehensive income

- Revenue from farming operations and cost of goods sold relates to sale of farming proceeds (primarily cattle, cropping, sugar and macadamias).
- Other income mainly relates to annual allocation sales of unleased water.
- Property and other expenses increased mainly due to the increased property rates, utilities and corporate costs.
- Finance costs increased mainly due to a reduction in interest capitalised as developments are completed.
- Depreciation and impairments relates to P&E and equipment finance lease owned within RF Active (RFA).
- Change in fair value of biological assets relates to farming operations (harvested and unharvested) on unleased Maryborough properties (sugarcane), Beerwah and Bauple (macadamias), Swan Ridge and Moore Park (macadamias), Kaiuroo and Yarra (cropping and cattle).
- Property revaluations totalled (\$9.3m) (including bearer plants, investment property, intangibles and property owner-occupied).
- Income tax expense relates to RFA and AWF.¹ RFT treated as a flow-through trust for tax purposes.

Notes:

1. RFM Australian Wine Fund (AWF) is a subsidiary of Rural Funds Trust (RFT) that has formed its own tax consolidated group.
2. Management fees calculated 0.6% and asset management fees calculated 0.45% of adjusted total assets excluding acquisition costs of macadamia properties under development, Wyseby, Beerwah and Bauple, Kaiuroo and derivative financial assets. 1H26 management fee is 0.92% (1H25: 0.92%) of the average adjusted total assets during the half year.

Appendix B – AFFO composition

- Adjusted funds from operations (AFFO) is pre-tax and excludes fair value adjustments, depreciation and impairment to represent RFF's operating result.
- Property expenses relate to costs directly attributable to the properties (eg insurance, rates and taxes on properties and applicable cost recovery). Other expenses relate to non-property overheads (eg ASX, bank, audit, registry fees and cost recovery).
- Farming operations relate to operations on unleased Maryborough properties (sugarcane), Beerwah and Bauple (macadamias), Swan Ridge and Moore Park (macadamias), Kaiuroo and Yarra (cropping and cattle). Change in fair value of biological assets related to the profit recognised for the harvested crops and cattle sold (or realised) during the half year.
- Share of loss in joint ventures relates to the operating result from 50% investment in Cotton JV Pty Ltd during the period.
- Property leases are largely triple net.

Appendix G - Investment and development strategy

To generate income and capital growth from improving and leasing agricultural assets.

Spectrum of investment opportunities¹

Development strategies

Productivity developments

Increasing the amount of the commodity that can be produced which supports increased asset values and rents.

Higher and better use

Converting agricultural land to produce a more profitable commodity which supports increased asset values and rents.

Note:

1. The income and growth figures presented in the chart above have been provided to differentiate the profile of income and growth that can be derived from different assets. They are based on RFM's experience and historical observations of agricultural lease transactions and historical rates of growth. They are neither forecasts nor projections of future returns. Past performance is not a guide to future performance.
