### 1. COMPANY DETAILS

Name of entity:	Energy One Limited
ABN:	37 076 583 018
Reporting period	For the half year ended 31 December 2025
Previous period:	For the half year ended 31 December 2024

### 2. RESULTS FOR ANNOUNCEMENT TO MARKET

	31 Dec 2025 \$'000	31 Dec 2024 \$'000	Change \$'000	Change % %
Revenues and other income	34,753	28,818	5,935	21%
Profit from ordinary activities after tax attributable to the owners of Energy One Limited	4,009	2,463	1,546	63%
Profit for the year attributable to the owners of Energy One Limited	4,009	2,463	1,546	63%

Details of Dividends	Amount Per Share (cents)	Franked Amount Per Share (cents)	Tax Rate For Credit
<b>Current Period</b>			
No dividend declared	Nil	Nil	NA
<b>Previous periods</b>			
FY 2025 - fully franked dividend of \$0.075 (7.5 cents per share ) paid 21 October 2025.	7.5	7.5	30%
FY 2024 - no dividend paid		0.000	Nil
FY 2023 - no dividend paid		0.000	Nil

#### Comments

The profit for the Group after providing for income tax amounted to \$4,009,000 (31 Dec 2024: profit of \$2,463,000).

### 3. NET TANGIBLE ASSETS

	31 Dec 2025	31 Dec 2024
Net tangible assets per security	<u>45.69</u>	<u>16.66</u>
Net assets	65,929	57,171
Less: Right-of-use assets	(4,306)	(2,860)
Less: Intangibles	(51,805)	(52,128)
Add: Lease Liabilities	4,566	3,036
Net tangible assets per security	<u>14,384</u>	<u>5,219</u>
	<b>31 Dec 2025</b>	<b>31 Dec 2024</b>
Total number of shares issued	31,483,078	31,328,319

Sydney

## CEO's Commentary

for the half year ended 31 December 2025

Dear Shareholders

The Energy One Group is pleased to present the report for the six months to 31 December 2025.

The Group experienced strong organic growth versus the prior comparative period (pcp) of 31 December 2024, as follows:

· Group revenue (and other income)	\$34.8M	up	21%
· Annual Recurring Revenue (ARR)	\$64.0M	up	20%
· EBITDA*	\$9.7M	up	31%
· Cash-EBITDA*	\$7.3M	up	63%
· Net profit after tax*	\$4.5M	up	56%

\*Net of one-off costs for Acquisition, office fit-out and CEO transition expenses (totalling ~\$0.6M).  
ARR growth (FX adjusted) was 17.4% over pcp.

This is a great result. Even allowing for some modest one-offs, earnings growth was strong (statutory NPAT up 61% over pcp).

Revenue growth continues to be strong. Our revenue growth is all organic and has been for 3+ years. Our goal is to have recurring revenue growth in the range 15%-20% on a rolling basis, while containing (recurring) expense growth to about half that. Accordingly, in the past 12 months, expense growth has been ~11%.

Overall, this contributes to margin expansion. Our Cash-EBITDA margin grew to 21% in H1FY26. Having routinely exceeded the Rule-of-40 metric on a traditional EBITDA basis (currently at 47), we now exceed it on a Cash-EBITDA basis as well (at 41).

This has allowed us to reduce net debt to a level of only 0.4x EBITDA. The Free cash flow for the half was \$4.1M. Given this takes account of a \$2.4M dividend, then we see the business on a strong trajectory towards zero debt.

In amongst a strong financial result, we also are pleased with business outcomes such as:

- Achieving ISO 27001 (cybersecurity) accreditation, during the half
- Net Revenue Retention (i.e. among existing customers) rising to 111% helped by upsells
- Further evidence of our One-stop-shop strategy paying off, with material (new) accounts/upsells utilising multiple elements of our wholesale-energy solution suite (incl. BESS/Battery)
- Pipeline up 24% on prior year, supporting growth ambitions
- A smooth and orderly transition towards a new CEO in the second half, with continued business progress

These will be discussed further below.

### The Year in Review

**ISO 27001 Certification:** After a period of investment over approximately 2 years and \$2m, we successfully achieved certification to ISO 27001 – widely regarded as the gold standard in Information Security and Cyber security. In an age where data security and preventing cyber-attacks are highly important topics; achieving this standard means that we can offer this best-practice protection to our customers, counterparties and our people.

Our customers often are critical infrastructure in the energy grid. They have proprietary data and mission-critical system needs. We are confident that this certification will be a differentiator against competitors not able to offer such certification. It is also a clear reminder how Energy One operates in a highly governed and regulated space, not easily replaced without significant consideration for risk and cost.

**Net Revenue Retention:** Is a measure of the company's ability to retain and grow recurring revenue from existing customers. Our most recent result is an increase to 111%, up from 108% in June 25. This has been brought about mainly by upsells in existing customers as we increase our penetration of customer accounts via additional modules or services.

Latest attrition figures saw an uptick caused mainly by market exits. In Australia, gas market prices contributed to a large manufacturer ceasing trading. This alone, caused us 1% of the attrition. We note that the Government's announced introduction of various measures (including a gas-reservation scheme) is expected to have a beneficial effect on market stability. As a rule, market effects (such as exits, changed trading practices) remains the largest cause of our attrition/downsell, rather than churn to competitors (which is minimal).

**One-Stop-Shop is working:** Our positioning as the One-Stop Shop for energy is working so well that other vendors are attempting to copy us – imitation being the sincerest form of flattery!

During the half, we signed significant customers (and upsold others) to multiple modules/services.

In Australia, a customer operating in the cutting-edge BESS (battery) space expanded their relationship with us to include our advanced machine optimiser/auto-bidding solution (in addition to other modules already used). Furthermore, we provide them 24/7 trading operations services. The account was won against stiff overseas opposition and indicates our ability to provide best-practice innovative new technology at the cutting edge. Our AI-powered forecasting tools are already being proven in market and add to our holistic, agentic solution. Again, our multi-component solution is part of the unique selling proposition of our Company.

In Europe, we won a large industrial client. This customer is a household name for whom we will provide contracts software, power/gas scheduling and 24/7 services. They are on our enTrader platform for contracts and hedging, our eZ-Ops and eggSport platforms for powerplants business processes, our 24/7 services - all brought together with enFlow, our unique extensibility tool. This account is expected to be worth \$800k ARR inside 12 months.

Our appeal here is to industrial customers (as a segment) that have complex portfolios involving power and gas. We help them maximise their economic outcomes by enabling them to self-manage in the wholesale market (often for the first time) instead of being inside a retail contract. Operating in this way allows them to buy/sell energy optimised for their business processes.

We expect to win yet more industrial customers in the near future, as our solutions are a real differentiator for this segment.

**CEO transition:** We announced in mid-2025 that I intended to retire and have an orderly transition to a new CEO. After a full international search, the Board appointed Ben Tranier (currently, GM-Europe) to the role. Ben has been with us (now) for 18 months. Before that, he spent many years at a leading energy software vendor, where he was a leader in winning major accounts, strategy development and business growth. Ben is already bringing that expertise and vision to our operations, as manifested by his overseeing of major account wins in Europe and delivering ARR growth of 28% in the past 12 months.

### Looking Forward

Energy One remains committed to supporting our customers through the energy transition. Despite various geo-political changes, the transition continues to move forward.

In 2024, Europe installed another 70GW of *new* renewable generation capacity (Source: IRENA) maintaining an average 10% growth rate over the past 5 years. This is expected to continue.

This annual installation rate rivals (in size) the entire Australian generation fleet capacity (~73GW). However, the Australian market also grew, reaching 40% renewables penetration in terms of production. Like with Europe, the Australian Energy Market Operator (AEMO) noted in its recent 2026 *Generation Information* report that there is more development to come, with 43GW committed/expected and 326GW announced, the vast majority of which being renewables and storage (BESS).

Meanwhile, gas remains a key transition fuel source and AEMO estimates that gas for gas-fired generation will steadily grow over the next 20 years, facilitating roll-out of renewables to replace it in the long term.

We also expect the energy mix will eventually grow to incorporate other successful green fuel developments such as hydrogen. For example, we are finalising solutions for carbon dioxide storage programs/ and for compressed air storage/generation-reuse.

At the same time, the market is innovating rapidly towards behind-the-meter (DERMS) markets. The first entry point for this is 'virtual trading' where capacity on these assets (e.g. generation/load) can be aggregated and traded. We have proven solutions for this opportunity and are already winning customers in this innovative market space.

The pipeline across our business is strong. the pipeline (ARR) is up 24% over December 2025. Our messaging and our marketing efforts continue to bring in this new interest. Website hits (in 12 months) were up to 55,000, with 172 web generated leads. We attend multiple trade shows and at the major trade show in E-world, we had some 290 meetings in 3 days, up ~20% on the prior year – indicating interest for our solutions remains strong.

### **Artificial Intelligence (AI) – Extending our competitive advantages**

We see AI as a major enabler for our long-term business prospects.

**Productivity gains** – Our current focus internally is rapidly enhancing productivity.

To this end, all our developers actively use AI in their IDE, with Windsurf, Github CoPilot and JetBrains being prominent. We are approximately 12 months into our AI adoption and already seeing productivity gains (measured across developer activity) of >50%.

**On the sales side**, we also *sell* AI. For example, tools for probabilistic methods are most useful, particularly forecasting (especially short term) since these scenarios lend themselves to it. Coupled with our proven optimisation and automation (algo trading) these agentic systems are of great benefit to our customers, especially in the fast-paced, high-frequency trading markets (such as European spot markets and BESS trading).

Specific examples of how we are using AI to enhance our offerings include:

- A short-term forecasting module using live data to outperform market benchmarks. This is being market-launched and enhanced now, and forms part of our full-suite agentic autobidding solution.

## CEO's Commentary (continued)

for the half year ended 31 December 2025

- In built AI-assistant for our leading NemSight data product, allowing users to make bespoke query requests of the data, including of our synthesised, proprietary datasets to return context rich dashboard outputs
- New product development – we are experiencing rapid progress in developing new tools. An example of this was our Virtual Trading module which was substantially accelerated using AI development.

In a technical/productivity sense, we are seizing the opportunity to accelerate through new developments, build out Roadmap items, be faster to-market. This is the real, short-term advantage. It is likely that (in the future) this may lead to resource savings. However, our initial focus is productivity, deploying faster and getting our innovations into the rapidly changing energy market.

For us (and our offerings) AI/automation is also about efficiencies of scale and scope, that we are best placed to implement. We currently supervise automated trading for 50 electricity assets per duty trader. This can be scaled further, and we are scoping/developing fully AI-native operations systems to help enable this.

However, the use of Human-in-the-Loop is still essential in regulated markets where compliance with market/grid rules is not negotiable.

In addition, it is worth noting the following aspects, that have traditionally (and will continue) to make our solutions hard to replace by outsiders:

- System of Record** – Our systems hold the *Ground Data* which makes them deterministic in the sense that auditors, regulators and corporate governance rely on them to be the *Single Source of Truth*.
- Regulation and compliance lock-in** – Energy grids are complex and regulated, as are their corresponding markets. Compliance is key. Grids operate within extremely tight frequency tolerances (normal range is 50Hz +/- 0.15Hz) measured in millisecond intervals. With such strict tolerances, grid operators *insist* on full operational compliance by participants, and breach of grid rules can result in heavy penalties. As mentioned, grid operators insist on having Human-in-the-Loop. Someone at the plant needs to answer the phone, if called. It is not easy to simply swap-out existing proven operational systems without huge risk and disruption - which is one reason why customers are reluctant to do it (sticky).
- Proprietary data** – AI tools need something to train upon. Most of the data in the industry is both proprietary *and* confidential. Public data is available only incidentally, or in certain market niches and will not ever include the *private* data. In the case of informal (OTC/B2B) markets, price discovery is usually via the telephone, i.e. no public data is available. Some brokers offer forward curves, but this data is aggregated and proprietary to brokers.

Moreover, given our role, we have access to data and we synthesise and improve that data using internal domain expertise. Likewise, we can (for example) train our tools on it, making us best-placed to build these innovations. New entrant competitors might well understand the industry, but they don't have access to the data.

- Network Effects** – This is the cornerstone of our *One Stop Shop* differentiator. With meaningful market share in our markets, we are positioned to be the market standard. This allows us to meet customers who may start trading electricity, then maybe add gas, move to a new geography etc. We note that our NRR is sitting at 111%, showing upsells and cross-sells, in action.
- Complexity, Embedding and Reach** – We have market-leading connectivity to the interface points our customers need, across multiple grids/hubs, geographies, exchanges and counterparty systems. We are the 'plumbing' of the market. Customers perhaps using other tools to make trading decisions, still appreciate being able to lodge those transactions over our network.

## CEO's Commentary (continued)

for the half year ended 31 December 2025

- f) **Cybersecurity and systemic risk** – Writing the code and developing tools is one thing. Building a supportable, cybersecure data and deployment System, is another. *Unsupported code*, developed internally, is (and always has been) a major systemic risk in financial businesses, which is why governance and data security is invariably strongly enforced internally. Likewise, switching to unproven systems is a decision not taken lightly.
- g) **Lastly**, Energy One does not price on seats. We price on size and complexity. If customers (happily) achieve economies via internal use of AI, they still transact through us. We are the *plumbing* of the industry.

**Acquisition/Inorganic growth update**

In line with our previous disclosures, we believe we now have the building blocks in place to enable our growth ambitions. Our ongoing focus is to build out our capability and to expand organically. However, we investigate good acquisition opportunities and will be willing to act upon them as they arise.

**Summary and Guidance**

While not providing specific guidance, the second half of FY26 is expected to be good (if not stronger) than the first half.

As indicated previously, our desired trajectory is to deliver 15%-20% of recurring revenue growth on an ongoing basis, whilst also growing margins. This remains the goal. However, we reserve the right to invest in any significant projects, as required.

Energy One is operating in what is arguably the most exciting sector in the world today, the green power revolution. We enable new customers to enter this market, to monetise their energy and where appropriate, assist our existing customers to make the transition from traditional fuel sources without interrupting current operations. The world is making its way toward a 'Net Zero' future, and Energy One is proudly playing its part in facilitating this revolution.

I have no doubt Ben Tranier, our new CEO, will take our company to the next level. I look forward to supporting him from a board position and helping where needed (e.g. such as M&A). Ben takes over as CEO on 1 March 2026.

**Shaun Ankers - Chief Executive Officer**

**Interim Financial Report  
for the half year ended 31 December 2025**

<b>Contents</b>	<b>Page</b>
Directors' Report	10
Auditor's Independence Declaration	11
Consolidated Statement of Profit or Loss and Other Comprehensive Income	12
Consolidated Statement of Financial Position	13
Consolidated Statement of Changes in Equity	14
Consolidated Statement of Cash Flows	15
Notes to Consolidated Financial Statements	16
Directors' Declaration	25
Independent Auditor's Review Report	26

Your directors present their report on Energy One Limited (the Company) and its controlled entities (the Group) for the half year ended 31 December 2025.

**Directors**

The names of directors who held office during or since the end of the half-year :

Andrew Bonwick – Chairman  
Shaun Ankers – Chief Executive Officer  
Ian Ferrier - Non-executive Director  
Leanne Graham - Non-executive Director  
Michael Ryan – Non-executive Director  
Richard Kimber - Non-executive Director

**Principal activities**

The principal activity of the Group during the financial year was the supply and development of software and services to energy companies and utilities.

There were no significant changes in the nature of the principal activities of the Group during the half year.

**Review of operations**

The revenue and other income for the Group for the half year was \$34,753,000 (31/12/2024: \$28,818,000). The earnings before depreciation, amortisation, interest and tax (EBITDA) was \$9,428,000 (31/12/2024: \$7,393,000). The net profit before tax was \$5,457,000 (31/12/2024: \$3,483,000) and net profit after tax for the Group for the half year was \$4,009,000 (31/12/2024: \$2,463,000).

**Significant changes in the state of affairs**

There were no material changes to the state of affairs of the Group in the first half of the financial year ended 30 June 2026. The Group has continued to invest in people and systems to ensure that Energy One maintains its position both as a leader in information systems within the energy trading and risk management (ETRM) software and services market - both in Australasian and European markets.

**Rounding of amounts**

Amounts in this report have been rounded off to the nearest thousand dollars, unless otherwise stated, in accordance with Corporations Instrument 2016/191, as issued by the Australian Securities and Investments Commission relating to 'rounding-off'.

**Auditor's independence declaration**

The auditor's independence declaration, as required under section 307C of the Corporations Act, for the period ended 31 December 2025 has been received and can be found after this Directors' Report.

**Andrew Bonwick**  
Chairman  
25 February 2026

**Shaun Ankers**  
Managing Director & Chief Executive Officer

## DECLARATION OF INDEPENDENCE BY IAN HOOPER TO THE DIRECTORS OF ENERGY ONE LIMITED

As lead auditor for the review of Energy One Limited for the half-year ended 31 December 2025, I declare that, to the best of my knowledge and belief, there have been:

1. No contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the review; and
2. No contraventions of any applicable code of professional conduct in relation to the review.

This declaration is in respect of Energy One Limited and the entities it controlled during the period.

**Ian Hooper**  
Director

**BDO Audit Pty Ltd**

Sydney, 25 February 2026

## Notes to the Financial Statements

for the half year ended 31 December 2025

### Note 1 Summary of Material Accounting Policies

This consolidated interim financial report for the half-year reporting period ended 31 December 2025 ("the financial period") has been prepared in accordance with the requirements of the Corporations Act 2001, and Australian Accounting Standards including AASB 134: Interim Financial Reporting.

This consolidated interim financial report is intended to provide users with an update on the latest annual financial statements of Energy One Limited and its subsidiaries ('the Group'). As such, it does not contain information that represents relatively insignificant changes occurring during the half-year within the Group. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Group for the year ended 30 June 2025, together with any public announcements made during the half-year in accordance with the continuous disclosure requirements of the Corporations Act 2001.

The consolidated interim financial report is presented in Australian dollars and all values are rounded to the nearest thousand dollars, except when otherwise indicated. This presentation is consistent with the requirements of Legislative Instrument 2016/191, issued by the Australian Securities and Investments Commission, relating to the 'rounding off' of amounts in the Financial Statements.

The same accounting policies and methods of computation have been followed in this interim financial report as were applied in the most recent annual financial statements and the corresponding interim reporting period.

#### *New and amended standards adopted by the Group*

The following amendments are effective for the period beginning 1 July 2025:

- Lack of exchangeability (Amendment to IAS 21 *The Effects of Changes in Foreign Exchange Rates* )

On 15 August 2023, the IASB issued Lack of Exchangeability which amended IAS 21 The Effects of Changes in Foreign Exchange Rates (the Amendments). The Amendments introduce requirements to assess when a currency is exchangeable into another currency and when it is not. The Amendments require an entity to estimate the spot exchange rate when it concludes that a currency is not exchangeable into another currency. These amendments had no effect on the consolidated financial statements of the Group.

Charged to income	(465)	516
Deferred tax liability on prior period acquisitions	219	323
Foreign exchange variance	81	(40)
Prior period tax adjustment	0	60
Closing balance net deferred liability	<u>(3,464)</u>	<u>(3,299)</u>

## Notes to the Financial Statements

for the half year ended 31 December 2025

	Consolidated Group	
	31 Dec 2025	30 Jun 2025
	\$ '000	\$ '000
<b>Note 5</b>		
<b>Cash and Cash Equivalents</b>		
Cash and cash equivalents	<b>4,592</b>	3,972

At the reporting date, the Consolidated Group has no deposits with banks that are used for restricted bank guarantees.

### Note 6 Trade and Other Receivables

#### Current

Trade receivables	<b>9,237</b>	10,287
Allowance for expected credit losses	<b>(153)</b>	(29)
Contract assets	<b>1,455</b>	938
Other receivables	<b>51</b>	29
	<b>10,590</b>	11,225

#### (a) Contract assets

Amounts recorded as contract assets represents revenues recorded on projects not invoiced to customers at year end. These amounts have met the revenue recognition criteria but have not reached the payment milestones contracted with customers. Revenue is determined with reference to the stage of completion of the transaction at reporting date and where outcome of the contract can be estimated reliably. Stage of completion is determined with reference to the services performed to date as a percentage of total anticipated services to be performed.

Reconciliation of the written down values at the beginning and end of the current and previous financial year are set out below:

Opening balance	<b>938</b>	1,141
Amounts invoiced during the period	<b>(1,018)</b>	(4,410)
Amounts accrued during the period	<b>1,535</b>	4,207
Closing balance	<b>1,455</b>	938

#### Fair Value, Credit and Interest Rate Risk

Due to the short-term nature of these receivables, their carrying amount is assumed to approximate their fair value. The maximum exposure to credit risk at the reporting date is the carrying amount of each class of receivables mentioned above. The Group further manages credit risk by billing the majority of recurring service revenue on a monthly or quarterly basis and for project engagements billing typically occurs through the life of the project on a milestone basis.

The following table details the Group's trade and other receivables exposed to credit risk (prior to collateral and other credit enhancements) with ageing analysis and impairment provided for thereon. Amounts are considered as 'past due' when the debt has not been settled, with the terms and conditions agreed between the Group and the customer or counter party to the transaction. Receivables that are past due are assessed for impairment by ascertaining solvency of the debtors and are provided for where there are specific circumstances indicating that the debt may not be fully repaid to the Group.

## Notes to the Financial Statements

for the half year ended 31 December 2025

### Note 6 Trade and Other Receivables (continued)

The balances of receivables that remain within initial trade terms (as detailed in the table) are considered to be of high credit quality.

		Gross amount	trade terms	31-60 days	61-90 days	>90 days
<b>31 Dec 2025</b>	in \$'000					
Trade receivables and contract assets		10,692	7,479	1,744	744	725
Other receivables		51	51	0	0	0
Expected credit losses		(153)	0	0	0	(153)
<b>Total</b>		<b>10,590</b>	<b>7,530</b>	<b>1,744</b>	<b>744</b>	<b>572</b>
<b>30 Jun 2025</b>	in \$'000					
Trade receivables and contract assets		11,223	9,319	997	380	527
Other receivables		31	(2)	0	0	33
Expected credit losses		(29)	0	0	0	(29)
<b>Total</b>		<b>11,225</b>	<b>9,317</b>	<b>997</b>	<b>380</b>	<b>531</b>

Trade receivables and contract assets are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses. Trade receivables are generally due for settlement within 30 days. The Group has applied the simplified approach to measuring expected credit losses, which uses a lifetime expected loss allowance. To measure the expected credit losses, trade receivables have been grouped based on days overdue. The expected credit loss determined using the simplified approach is \$153,000 (2024: \$73,000). Contract assets are included within initial trade terms as they are subject to 30 days credit terms on billing. The increase in accounts receivable over 30 days balances primarily reflects the seasonal impact of the Christmas, year-end holiday customer office closures and the bulk billing of European regulator charges in November 2025. \$1,955,000 has been collected since report date for balances over 30 days.

The Parent Company executed a finance facility with National Australia Bank on 11 April 2022 which was renewed on the 13 June 2024 and now expires on 30 April 2027. The renewed finance facility has two components being an amortising loan of \$10,625,000 with repayments of \$625,000 due on a quarterly basis and a second loan for \$10,000,000 that is interest only. At 31 December 2025 the facility limit was \$20,625,000 with \$10,231,000 available for redraw. Interest is based on the 3, 4 or 6 month bank bill rate as chosen by the company with both a margin and facility fee payable. During H1 FY2026 an average interest rate (including the facility fee) of 6.53% was charged on these facilities. The facilities are fully secured by a fixed and floating charge over the assets and operations of all group entities and have market standard positive and negative covenants, undertakings and events of default typical for the nature of facility. At the date of this report the Group is in compliance with all requirements of the facility.

### Note 18 Segment information

The Group is managed primarily on the basis of product and service offerings and operates in two geographical segments, being Australasia and Europe. An additional segment for a small number of Group related costs has also been identified. The Directors assesses the performance of the operating segment based on the accounting profit and loss in that segment.

There was no intersegment revenue for the period.

The Directors have determined the Group is organised into the segments for profit and loss purposes as represented in the following table

	Group	Australasia	Europe	Group	Australasia	Europe

\* Certain comparative amounts for the year ended 31 December 2024 have been reclassified to conform with the presentation adopted in the current year. These reclassifications relate to changes in the internal management reporting structure and chart-of-accounts mapping and do not impact total profit, total comprehensive income, or net assets for the prior period.

	Consolidated Group	
	31 Dec 2025	31 Dec 2024
	\$ '000	\$ '000
Reconciliation of unallocated amounts to profit after tax :-		
Earnings before interest, tax and acquisition costs	6,037	4,266
Finance costs	(521)	(784)
Interest received	8	4
Acquisition and related costs	(67)	(3)
<b>Profit before income tax</b>	<b>5,457</b>	<b>3,483</b>

Segment revenue excludes interest received. Expenses exclude interest paid, depreciation, amortisation and acquisition costs.

During the financial period, the Australasian segment derived 20% (31 December 2024: 22%) of revenue from the top three customers and the UK/Europe segment derived 23% (31 December 2024: 27%) from the top three customers.

### Note 19 Commitments

The Group has no commitments as at 31 December 2025 or at the comparative period end.

### Note 20 Subsequent Events

No matter or circumstance has arisen since 31 December 2025 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

## Notes to the Financial Statements

#### Share Rights Vesting to Shares

- On 1 September 2025 87,210 share rights valued at \$450,003 issued to the Group CEO vested to shares.
- On 1 September 2025 19,380 share rights valued at \$100,001 issued to the Group CFO vested to shares.
- On 31 October 2025 36,640 share rights valued at \$167,078 issued to the non-executive directors vested to shares.
- On 1 December 2025 2,880 share rights valued at \$16,790 issued to French staff vested to shares. A further 480 service rights were cancelled as service conditions were not met.

#### Share Rights Issued

- On 21 October 2025 4,570 share rights valued at \$18.35 per share (\$83,860 in total) were issued to the Group CEO that vest on 15 December 2027 based on service conditions.
- On 21 October 2025 1,610 share rights were issued to certain non-executive directors that vest on 31 October 2026 based on service conditions. The number of rights issued was based on the market value of EOL shares at the time of EOL's FY2025 AGM Notice being issued (\$14.25 per share) to shareholders with an accounting valuation of \$18.35 subsequently being applied to the share rights. The accounting valuation is based on the market value of EOL shares on the Grant Date of 21 October 2025 being the date shareholders approved the rights issue to the non-executive directors.
- On 19 August 2025 30,000 share rights had their vesting conditions altered so they vest purely based on continuous service. The share rights were revalued at this time to align to the current share price of \$13.94 per share.

#### Rights on Hand

The following table summarises share rights on hand, performance conditions and vesting dates:

Holder	Service Based	30 June 2026	Service Based	Share Price Based	Total
	31-Oct-26	EPS 15-Dec-26	15-Dec-27	15-Dec-27	
Non-executive directors	1,610	0	0	0	1,610
Group CEO	0	18,590	23,160	201,875	243,625
Group CFO	0	12,216	12,216	112,568	137,000
Management	0	152,070	182,070	1,066,892	1,401,032
	<b>1,610</b>	<b>182,876</b>	<b>217,446</b>	<b>1,381,335</b>	<b>1,783,267</b>

**Directors' Declaration  
for the half year ended 31 December 2025**

In the Directors' opinion:

- (a) the financial statements and notes set out on pages 12 to 24 are in accordance with the Corporations Act 2001, including:
- (i) complying with Accounting Standard AASB 134: Interim Financial Reporting and the Corporations Regulations 2001;
  - (ii) giving a true and fair view of the Group's financial position as at 31 December 2025 and of its performance for the half year ended on that date; and
- (b) there are reasonable grounds to believe that the Group will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the Directors' made pursuant to section 303(5)(a) of the Corporations Act 2001

## INDEPENDENT AUDITOR'S REVIEW REPORT

To the members of Energy One Limited

### Report on the Half-Year Financial Report

#### Conclusion

We have reviewed the half-year financial report of Energy One Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 31 December 2025, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the half-year ended on that date, material accounting policy information and other explanatory information, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the accompanying half-year financial report of the Group does not comply with the *Corporations Act 2001* including:

- i. Giving a true and fair view of the Group's financial position as at 31 December 2025 and of its financial performance for the half-year ended on that date; and
- ii. Complying with Accounting Standard AASB 134 *Interim Financial Reporting and the Corporations Regulations 2001*.

#### Basis for conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to the audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001* which has been given to the directors of the Company, would be the same terms if given to the directors as at the time of this auditor's review report.

#### Responsibility of the directors for the financial report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

#### Auditor's responsibility for the review of the financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2025 and its financial performance for the half-year ended on that date and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
