## ASX RELEASE

### Corporate Update: Managing Director Resignation

---

**Platina Resources Limited (ASX: PGM) (“Platina” or “the Company”)** advises that its Managing Director, Mr Corey Nolan, has tendered his resignation and in line with his contract, has provided three months’ notice.

Mr Nolan has been involved with the Company for more than seven years and during this time led the successful strategic transformation of Platina from a platinum and specialty metals focused company to a Western Australian gold-focused explorer. A key milestone of this transition was the divestment of the Company’s scandium project to Rio Tinto, which has left Platina well-funded and strongly positioned to advance its gold exploration and development strategy.

Platina Chairman, **Mr Brian Moller**, said:

“On behalf of the Platina Board, I have regrettably accepted Corey’s resignation, however we understand his desire to pursue a new opportunity after more than seven years in the role. On behalf of the Board, I would like to thank Corey for his significant contribution to Platina over the past seven years. We appreciate his commitment and dedication and wish him every success in his future endeavours.”

The Board will shortly commence a search for a new Managing Director, both internally and externally.

**This announcement was authorised by Mr Brian Moller, Chairman of Platina Resources Limited.**
