

ASX RELEASE

26 February 2026

Fixed site multi-function enforcement contract expansion in Western Australia

Highlights

- Expansion of fixed site enforcement agreement with the WA Road Safety Commission for multi-function enforcement services, which was originally signed in September 2025
- Additional fixed sites expected to be progressively deployed from the second half of 2026 and throughout 2027
- The incremental contract value associated with this contract variation is expected to total approximately \$11.2 million (excluding GST)
- This variation follows the expansion and extension of the multi-function trailer-based enforcement program in Western Australia announced earlier this month

Acusensus Limited (ASX:ACE) (**Acusensus**), a technology company designing and developing artificial intelligence enabled road safety solutions, is pleased to announce the expansion of its existing agreement for fixed site multi-function enforcement in Western Australia, which was initially signed in September 2025 with the Western Australian government, acting through the Road Safety Commission unit of the Western Australian Police Force (**WA Road Safety Commission**) (**Agreement**).

The initial program saw fixed safety camera technology deployed on the Mitchell Freeway and the Kwinana Freeway to detect a range of road traffic offences, including mobile phone use, front seat vehicle occupants who are not wearing seatbelts properly, speeding both at a point in time and on an average basis over a set distance, "red X" lane violations and unlicensed vehicles. This expansion will see the new fixed solutions progressively deployed throughout the state from the second half of 2026 and throughout 2027.

The incremental contract value associated with this contract variation is expected to total approximately \$11.2 million (excluding GST). This variation follows the expansion and extension of the multi-function trailer-based enforcement program in Western Australia, which Acusensus announced earlier this month, which had a total incremental contract value of approximately \$13 million (excluding GST).

Acusensus Founder and Managing Director, Alexander Jannink, said:

"Following the expansion of the trailer-based multi-function enforcement contract with the Road Safety Commission earlier this month, we are delighted to also be progressing the fixed site expansion with this new variation. We are pleased that our ongoing partnerships with the WA Road Safety Commission will assist its ability to enforce key road safety behaviours."

About Acusensus

Acusensus is a technology company that was founded in 2018 with a mission to design and develop artificial intelligence enabled road safety solutions. Collaborating with governments and commercial stakeholders to tackle distracted driving globally is Acusensus' first priority. Acusensus has pioneered intelligent solutions that provide anywhere, anytime digital evidence that can be used in conjunction with law enforcement to drive behavioural change and improve road safety. Acusensus technology is used to detect and provide prosecutable evidence of distracted driving (mobile phone use), seatbelt compliance, speeding, railway crossing compliance and the monitoring of vehicles of interest.

Leveraging AI and sensing expertise, Acusensus also provides technology that protects workers in live traffic environments. The Forsite by Acusensus road worker safety system integrates roadside sensors, connected wearables and real time analytics to give crews early warning of approaching vehicle risks, delivering the vital seconds needed to avoid harm while generating data that helps make worksites safer over time.

Acusensus listed on the Australian Securities Exchange in January 2023. Acusensus is headquartered in Melbourne, Australia, with offices also in Sydney, Brisbane, Perth, Auckland (New Zealand), Wellington (New Zealand), Christchurch (New Zealand), London (United Kingdom), Las Vegas Nevada (United States) and Hartford Connecticut (United States).
