MEDIA RELEASE

27 February 2026

Austral Gold Files Appendix 4E Preliminary Final 2025 Report

Established gold producer Austral Gold Limited (Austral or the Company) (ASX: AGD; TSX-V: AGLD; OTCQB: AGLDF) is pleased to announce that it's Appendix 4E: Preliminary Final Report for the year ended 31 December 2025 ("FY25"). The complete Report is available under the Company's profile at www.asx.com.au, www.sedarplus.ca and on the Company's website at australgold.com.

FY25 Highlights

- **Reopening of the Casposo Mine (Argentina)** during FY25, contributing 4,283 GEOs in Q4. Combined with 11,109 GEOs from the Guanaco Mine Complex (Chile), total FY25 production was 15,392 GEOs.
- **Profit after tax of US\$14.7 million** (FY24: loss of US\$27.1 million), representing the first net profit since FY20.
- **Net cash generated from operating activities of US\$9.3 million**, compared with net cash used in operating activities of US\$6.5 million in FY24.
- **Average realised price of US\$3,576 per GEO**, C1 cash cost of US\$2,264 per GEO, and AISC of US\$2,501 per GEO.
- **Cash and cash equivalents of US\$10.5 million** (FY24: US\$3.6 million).
- **Financial debt of US\$26.6 million** (FY24: US\$26.6 million) and **net financial debt of US\$16.0 million** (FY24: US\$23.0 million).

Post year-end:

- **Sold 6,588,761 shares of Unico Silver** for net proceeds of **US\$4.7 million**. Of this amount, US\$2.7 million were used to **exercise 15 million options at A\$0.26 per share to acquire 15 million Unico shares**.
- **Private placement** raised gross proceeds of **A\$8.456 million (approximately US\$5.9 million)** with commitments received on 17 February 2026 and closed on 23 February 2026.

About Austral Gold

Austral Gold is a growing gold and silver mining producer building a portfolio of quality assets in the Americas based on three strategic pillars: production, exploration and equity investments. Austral continues to lay the foundation for its growth strategy by advancing its attractive portfolio of producing and exploration assets. Under its equity investments pillar, Austral holds shares in ASX-listed Unico Silver, as previously disclosed in the December 2025 Quarterly Report.

REVIEW OF RESULTS

For the Year Ended 31 December 2025

The following report on the review of results for the year ended 31 December 2025 ("FY25") and 2024 ("FY24") together with the consolidated financial report of Austral Gold Limited (the Company) and its subsidiaries (referred to hereafter as the Group).

The review is presented within the context of the Group's strategic framework, which is based on three core pillars: Production, Exploration and Equity Investments.

PRINCIPAL ACTIVITIES

PRODUCTION

During the year ended 31 December 2025, the Company re-opened the Casposo Mine in Argentina, achieving record fourth quarter production of 4,283 gold equivalent ounces (GEOs). Combined with 11,109 GEOs produced at the Guanaco Mine Complex in Chile, total production for the year was 15,392 GEOs.

Net cash from operating activities of US\$9,252 thousand in FY25, achieved at average selling price of US\$3,576 per GEO and operating cash cost per GEO of US\$2,264 and all-in-sustaining cost of US\$2,501.

Production guidance for 2026 has been established at 27,000–33,000 GEOs, representing approximately a twofold increase compared with 2025 production.

EXPLORATION

During the year, the Company completed a Technical Report for Casposo¹ prepared in accordance with NI 43-101 standards. The report supports an after-tax Net Present Value (NPV) of US\$72.7 million, based on a gold price assumption of US\$2,855 per ounce, over an estimated mine life of 74 months.

During the fourth quarter of 2025, the Company defined its 2026 exploration program, focused on near-mine and brownfields targets surrounding its wholly owned processing facilities in Argentina and Chile, including the Manantiales Project and the Juncal Project.

EQUITY INVESTMENTS

During the year, the Company maintained its strategic shareholding in ASX-listed Unico Silver and realised gains from the partial sale of its Unico shareholding as well as from the sale of other publicly listed securities held within the portfolio.

The investment portfolio enhances balance sheet flexibility and may provide an additional source of capital to support a portion of the Company's exploration and development activities that underpin its operating asset base.

EVENTS SUBSEQUENT TO REPORTING PERIOD

Subsequent to 31 December 2025, the Company exercised its 15 million Unico options.

On 23 February 2026, the Company completed a strategic private placement raising A\$8,456 thousand (approximately US\$5.9 million) before costs from sophisticated and institutional investors in Australia.

⁽¹⁾ Technical Report dated 14 October 2025 and effective 30 April 2025 on the Casposo Mine Calingasta Department, San Juan Province, Argentina. Report in accordance with CIM Definitions 2014, National Instrument 43-101 ("NI 43-101") and Joint Ore Reserves Committee Code, 2012 (JORC 2012), prepared by non-independent employees and Competent Persons of the Group, Marcos Valencia, Guillermo Valdés and Francisco Pavez, employees of the Company.

OPERATING AND FINANCIAL RESULTS OF THE GROUP

During FY25, the Group realised a profit before and after income tax of US\$18,462 thousand (FY24: loss of \$32,209 thousand) and US\$14,726 thousand (FY24: loss of US\$27,074 thousand), respectively. This represents the Group's first profit after income tax since FY20.

Sales revenues from operations increased by US\$14,380 thousand to US\$51,170 thousand (FY24: US\$36,790). Gross profit increased to US\$16,707 thousand, representing a margin of 32.6%, up from US\$3,557 and a margin of 9.7% in FY24.

The increase in revenue was primarily driven by higher production following the commencement of commercial production at Casposo, and a 52% increase in the average price of gold sold to US\$3,576 per ounce and an 87% increase in the price of silver sold to US\$52 per ounce.

The increase in gross profit and margin was mainly due to higher production and higher sales prices, partially offset by higher production costs.

The Group's results during FY25 were also impacted by the following factors:

- i. A non-cash impairment reversal of US\$3,689 thousand relating to property plant and equipment (FY24: non-cash impairment of US\$16,705). The reversal followed a reassessment of the recoverable amount of the Casposo mine due to the restart of operations in October 2025. In FY24, the Group recognised an impairment charge relating to the remaining carrying value of the Amancaya mine in Chile due to the decision to temporarily cease operations in that area.
- ii. An impairment loss of US\$782 thousand relating to exploration and evaluation assets (FY24: US\$8,836 thousand). The FY25 impairment primarily relates to two properties in Chile acquired from Revelo Resources in 2021. The FY24 impairment was primarily attributable to the Jaguelito project in Argentina.
- iii. An Increase in administration expenses of US\$413 thousand to US\$6,742 thousand (FY24: US\$6,329 thousand), primarily attributable to higher employee-related costs associated with additional personnel required for the restart of Casposo and performance-based remuneration accrued during the year. This increase was partially offset by lower business property and other taxes. In addition, administration expenses as a percentage of sales revenue decreased to 13.2% (FY24: 17.2%), reflecting higher sales revenue during the period.
- iv. An increase in other income of US\$11,096 thousand to US\$13,954 thousand (FY24: US\$2,858 thousand), primarily due to the realised and unrealised gains of US\$12,980 thousand (FY24: US\$1,724 thousand) arising from the sale of, and increases in the fair value of, equity securities in publicly listed mining companies.
- v. A decrease in other expenses of US\$626 thousand to US\$3,640 thousand (FY24: US\$4,266 thousand), primarily due to lower care and maintenance expenses as operations progressed towards production. Additionally, the Group's decision to terminate an agreement with the Amancaya underground contractor in FY24 contributed to the decrease. These reductions were partially offset by production start-up costs of US\$1,496 thousand incurred at the Casposo plant (FY24 US\$382 thousand)
- vi. A decrease in finance income of US\$3,703 thousand to US\$50 thousand (FY24: US\$3,753 thousand), primarily due to a US\$3,652 thousand decrease in foreign exchange gains to US\$nil (FY24: US\$3,652 thousand). The FY24 foreign exchange gains were mainly due to the increase in the value of the US dollar versus the Chilean peso.
- vii. A decrease in finance costs of US\$1,083 thousand to US\$4,774 thousand (FY24: US\$3,691 thousand), primarily attributable to foreign exchange losses of US\$1,478 thousand arising from movements in the US dollar relative to the Chilean peso and Argentine peso.

The Group's overall cost of production ("C1") per GEO and all-in sustaining cost ("AISC") per GEO increased to US\$2,264 and US\$2,501 in FY25, from US\$1,943 and US\$2,164 in FY24, respectively. Production in FY25 was higher than in FY24 due to commercial production at Casposo commencing in October 2025.

At Guanaco, the cost of production ("C1") per GEO and all-in sustaining cost ("AISC") per GEO increased to US\$2,602 and US\$2,834 in FY25, from US\$1,943 and US\$2,164 in FY24, respectively. The increase was primarily attributable to lower production volumes in FY25, following the temporary suspension of the agitation leach circuit for approximately three months after the workplace fatality reported in late August 2025.

At Casposo the cost of production ("C1") per GEO and all-in sustaining cost ("AISC") per GEO was US\$1,387 and US\$1,638 respectively. The lower unit costs were primarily attributable to processing material sourced exclusively from stockpiles.

FINANCIAL POSITION

The Group held cash and cash equivalents of US\$10,531 thousand at 31 December 2025 (2024: US\$3,590 thousand). When combined with the fair value of 1,930 unsold and unrefined gold equivalent ounces ("GEOs") in inventory with a fair value of US\$8,280 thousand (31 December 2024: 490 GEOs with a fair value of US\$1,296 thousand), total liquidity amounted to US\$18,811 thousand (31 December 2024: US\$4,886 thousand).

Trade and other receivables (current and non-current) decreased by US\$73 thousand to US\$4,914 thousand at 31 December 2025 (31 December 2024: US\$4,987 thousand). The decrease was mainly due to the recognition of VAT receivables at Casposo following its transition to production. This was partially offset by receipt of the US\$2,000 thousand access fee under the Toll Processing Agreement executed in December 2024 with ASX-listed Challenger Gold Limited and received in January 2025, together with a decrease in supplier prepayments.

Other financial assets increased by US\$7,050 thousand to US\$10,433 thousand at 31 December 2025 (31 December 2024: US\$3,383 thousand), primarily due to unrealised gains on shares and options held in Unico Silver.

Inventories increased by US\$1,162 thousand to US\$9,866 thousand at 31 December 2025 (31 December 2024: US\$8,704 thousand) mainly due to higher gold bullion and gold in process at Casposo.

Property, plant and equipment increased by US\$10,415 thousand to US\$40,470 thousand at 31 December 2025 (31 December 2024: US\$30,055 thousand), primarily reflecting capital expenditures at the Casposo plant and a partial reversal of the 2018 impairment at Casposo.

Current trade and other payables increased by US\$789 thousand to US\$15,572 thousand at 31 December 2025 (31 December 2024: US\$14,783 thousand), primarily due to higher royalty payables outstanding at year end.

Net current liabilities decreased by US\$164 thousand to US\$5,987 at 31 December 2025 (31 December 2024: US\$5,823 thousand). The Group expects its net current liability position to continue to improve in FY26, supported by higher production volumes and improved margins.

Combined net financial debt (loans, borrowings, lease liabilities and bank overdraft net of cash and cash equivalents) decreased by US\$6,965 thousand to US\$16,040 thousand at 31 December 2025 (31 December 2024: US\$23,005 thousand). Total financial debt was US\$26,571 thousand at 31 December 2025, of which US\$19,332 thousand (representing 72.8% of total financial debt) was classified as short-term. The short-term financial debt includes US\$1,606 thousand of US\$12,396 thousand of related party loans, lease liabilities, bank overdraft and the short-term portion of two long-term bank loans. The decrease in financial debt was impacted by the repayment of a US\$2,000,000 loan plus accrued interest of US\$133,000 in shares of Unico Silver owned by the Company (see note 19 to the financial statements for further details), provided by Inversiones Financieras del Sur SA ("IFISA"), the Company's largest shareholder, under a loan agreement dated 25 September 2024 (the "Loan Agreement").

Net assets increased by US\$15,331 thousand from 31 December 2024 to US\$29,696 thousand at 31 December 2025 (31 December 2024: US\$14,365 thousand), mainly due to the turnaround to a net profit for FY25.

CASH FLOW

During FY25, net cash generated from operating activities increased by US\$15,744 to US\$9,252 thousand, compared with net cash used in operating activities of US\$6,492 thousand in FY24. This improvement was primarily attributable to higher cash receipts from sales driven by increased production following the commencement of commercial production at Casposo, together with stronger margins supported by higher gold and silver prices and lower unit production costs.

Net cash used in investing activities totalled US\$2,475 thousand (FY24:US\$5,030 thousand provided), primarily comprising:

- Capital expenditures of US\$7,904 thousand (FY24:US\$434 thousand), mainly relating to additions to plant, property and equipment, with the majority attributable to the Casposo plant. FY24 additions included US\$334 thousand for the Heap Reprocessing Project at Guanaco.
- Proceeds of US\$3,797 thousand from the sale of equity securities (FY24:US\$4,742 thousand), primarily relating to Unico Silver shares. This amount excludes the 8 September 2025 loan repayment with Unico Silver shares, valued at US\$2,133 thousand, to Inversiones Financieras del Sur SA (IFISA). FY24 proceeds mainly comprised US\$2,950 thousand from cash sales of Unico shares to directors Mr Elsztain and Mr Zang and to IFISA (of which they are also directors and shareholders), and US\$1,396 thousand from the on-market sale of Revival Gold Inc. shares.
- Proceeds of US\$1,108 thousand from the sale of equipment (FY24:US\$958 thousand).
- Receipt of US\$1,000 thousand (FY24: US\$750 thousand) being the final cash instalment from Unico following the 2022 sale of SCRN Properties Ltd., whose principal asset was the Pingüino exploration project.
- Exploration and evaluation expenditure of US\$468 thousand (FY24:US\$928 thousand).

Net cash provided by financing activities amounted to US\$363 thousand, (FY24: US\$3,814 thousand), including net loan proceeds of US\$3,435. Of this amount, US\$230 thousand was sourced from related parties. (FY24: US\$8,516 thousand). Interest payments on loans, leases and other financing items totalled US\$3,072 thousand (FY24:US\$3,740).

LIQUIDITY AND CAPITAL RESOURCES

Access to capital

On 23 February 2026, upon closing of the transaction, the Group completed a brokered private placement for gross proceeds of US\$5,947 thousand (A\$8,456 thousand). This financing further strengthens the Group's capital position and provides additional financial flexibility.

The Group also benefits from a supportive shareholder base and established banking relationships, both of which have demonstrated consistent financial support in prior periods. The Group expects this support to continue.

Following the exercise of the Unico Silver options in January 2026, the Group's equity investment portfolio now consists solely of Unico Silver shares. As of 31 December 2025, the portfolio was valued at US\$10,433 thousand and represents a source of liquidity that can be monetised if required.

ROUNDING

The Company is of a kind referred to in ASIC Legislative Instrument 2016/191, relating to the 'rounding off' of amounts in the directors' report. Amounts in the directors' report have been rounded off in accordance with the instrument to the nearest thousand dollars, unless otherwise indicated.

8. OPERATING SEGMENTS

Management have determined the operating segments based on reports reviewed by the Chief Operating Decision Maker (“CODM”). The CODM considers the business from both an operations and geographic perspective and has identified two reportable segments, Guanaco/Amancaya which is based in Chile and Casposo/Manantiales which is based in Argentina. The CODM monitors the performance in these two regions separately. During the year ended 31 December 2025 and 2024, the Group earned 100% of its consolidated revenue from sales made to one customer.

The table above sets out the Group's financial assets measured and recognised at fair value at 31 December 2025 and 2024 with any movements recorded through the profit or loss statement.

Unico Silver equity securities classified as level 1.

Listed equity securities consist of shares of Australian listed mining companies denominated in A\$ at 31 December 2025 and shares in Australian and Canadian listed mining companies denominated in A\$ and C\$ at 31 December 2024.

Level 3 recurring fair value

Reconciliation of Level 3 fair values

The following table presents the changes in level 3 instruments for the year ended 31 December 2025.

All figures are reported in thousands of US\$	Options

Gains recognised in other income	67
Closing balance 31 December 2024	563
Gains recognised in other income	5,562
Closing balance 31 December 2025	6,125

The main level 3 inputs used by the group in measuring the fair value of financial instruments are derived and evaluated as follows:

- These options were valued using the Black Scholes model. Key inputs into the model include the underlying share price, expiry date and volatility
- Annual volatility: measures the degree of variation in the price of the asset. Higher volatility implies greater uncertainty or risk about the asset's future price.

Transfers: there were no transfers during the year.

During January 2026, all options were exercised for shares of an Australian listed mining company (note 24.1).

All figures are reported in thousands of US\$	As at	
	31 December 2025	31 December 2024

*As part of the Group's regular inventory review process, certain materials and supplies that are considered obsolete were identified. Obsolescence is determined based on factors such as age, condition, and likelihood of use. The allowance for inventory obsolescence forming part of the above balance is US\$2,452 thousand (31 December 2024: US\$2,181 thousand) resulting in an expense of US\$251 thousand included with other expenses (note 3) thousand (31 December 2024: US\$299 thousand) and US\$20 thousand (31 December 2024: US\$8 thousand) charged to cost of sales (note 1)

Carrying value — Guanaco/Amancaya

The Guanaco and Amancaya mines have been determined by Management to be a single Cash Generating Unit (“CGU”).

In 31 December 2024, the Group decided to temporarily cease operations at the Amancaya underground mine. Since the open pit mining operations began at the Amancaya mine, ore has been transported to the Guanaco mine for processing. Following the completion of the construction of the Heap Reprocessing Project of the Heap Reprocessing Project at the Guanaco mine site, the Heap Reprocessing Project has become the primary source of mineral production for the CGU.

Since the operations at the Amancaya underground mine have now temporarily ceased, with no near-term plans to recommence operations, the Group identified an indicator of impairment and performed an assessment of the recoverable value. The Group determined the recoverable value of the Amancaya assets to be \$nil and an impairment charge of \$19,255 thousand has been recorded as at 31 December 2024, relating to mine properties (\$2,550 thousand) and property plant and equipment assets \$(16,705 thousand). The impairment charge was recorded in the Guanaco/Amancaya operating segment.

Notes to the Consolidated Financial Statements

Carrying value — Casposo

Impairment Reversal

During the year ended 31 December 2025, the Group reassessed the recoverable amount of the Casposo Mine cash-generating unit (“CGU”) following the restart of operations in October 2025. The mine had been on care and maintenance since June 2019. An impairment loss of US\$29.2 million was recognised in 2018 in respect of mining properties and property, plant and equipment associated with the Casposo CGU, based on an independent valuation that estimated a recoverable amount of US\$7.8 million at that time.

A new Technical Report dated 14 October 2025 (effective 30 June 2025), prepared in accordance with NI 43-101 and JORC 2012, estimated the after-tax net present value (“NPV”) of Casposo’s Mineral Reserves at US\$72.7 million. This reflects significant changes in the assumptions used to determine recoverable amount, including:

- higher long-term gold and silver price assumptions
- updated Mineral Reserve and Resource estimates
- revised mine plan and extended life-of-mine
- improved operating cost assumptions
- recommencement of processing activities and renewed economic use of key infrastructure

These changes constitute indicators of reversal of impairment under IAS 36.111–112.

Amount of Reversal

Based on the updated recoverable amount, the Group recognised an impairment reversal of US\$3,689 thousand during the year. The reversal relates to assets for which recoverability has been restored following the restart of operations and the updated life-of-mine plan. The impairment reversal comprises the following:

	Impairment reversal (thousands of US\$)
Processing Plant	3,075
Electrical Power Line	613
Total	3,689

The reversal has been recognised in profit or loss within “Impairment reversal/ (loss) on property plant and equipment (note 14).”

15. EXPLORATION AND EVALUATION ASSET

All figures are reported in thousands of US\$	As at December	
	2025	2024
Costs carried forward in respect of areas of interest		
Carrying amount at beginning of the year	19,459	27,894

Transfers to mine properties	-	(103)
Impairment for the year	(782)	(8,836)
Carrying amount at end of the period	19,145	19,459

The recovery of the carrying amount of the exploration and evaluation assets is dependent on the successful development and commercial exploitation or sale of the areas of interest. This balance mainly relates to expenditures at the Guanaco, and Casposo exploration areas of interest.

Additions for the years ended 31 December 2025 and 2024, exploration and evaluation expenditures related mainly to the Casposo-Manantiales project in San Juan, Argentina, and the Guanaco projects in Chile.

During the year ended 31 December 2025, the Group impaired one property and a portion of another property previously acquired from Revelo Resources, totalling US\$376 thousand. Additionally, five properties at Guanaco were impaired, two of which were partially impaired, totalling US\$406 thousand.

During the year ended 31 December 2024, the Group impaired the Jaguelito project for US\$4,943 thousand. The decision was made after Mexplor Perforaciones Mineras S.A. ("Mexplor"), with whom the Company has an option agreement, informed the Group that they are not willing to fund their share of the project. In addition, the group impaired the three properties previously acquired from Revelo Resources in 2021 for US\$3,131 thousand as no exploration and evaluation expenditures had been performed on these properties since their acquisition. Furthermore, the Group impaired two properties located near Guanaco in Chile: the San Guillermo property for US\$516 thousand and the West Natalia property for US\$246 thousand as the Group abandoned the properties.

Mine closure provision

Provision for rehabilitation work has been recognised in relation to estimated future expenditures including rehabilitating mine sites, dismantling operating facilities and restoring affected areas. These future cost estimates are discounted to their present value. The calculation of this provision requires assumptions such as application of environmental legislation, mine closure dates, available technologies and engineering cost estimates.

On 8 August 2024, the Chilean National Geology and Mining Service Agency (“Servicio Nacional de Geología y Minería” or “SERNAGEOMIN”) approved the updated Reclamation and Rehabilitation/Mine-Closure Plan (“MCP”) for the Guanaco Amancaya mine complex, resulting in a decrease of the MCP provision by US\$2,081 thousand.

The MCP provision encompasses the entire mine complex, and it foresees the initiation of closure activities in 2033, following the conclusion of production from the Heap Reprocessing Project.

As at 31 December 2025, the total restoration provision amounts to US\$8,841 thousand (31 December 2024—US\$7,440 thousand) for Guanaco/ Amancaya mine. The present value of the restoration provision was determined based on the following assumptions:

Undiscounted rehabilitation costs:

- US\$10,630 thousand (31 December 2024— US\$ 9,340 thousand);
- Discount period: 8.0 years (Discount period based on expected timing of restoration work).
- Discount rate: 2.33% (2024- 2.58%)

At 31 December 2025, the total restoration provision amounts to US\$4,107 thousand (31 December 2024: US\$4,126) for the Casposo mine. The present value of the restoration provision was determined based on the following assumptions:

- Number of years, 8.5 (31 December 2024-7 years).
- Undiscounted reclamation and rehabilitation costs: US\$4,764 thousand (31 December 2024-US\$4,760 thousand);
- Discount rate: 1.76% (2024- 2.08%)

23. CAPITAL MANAGEMENT

The Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Group maintains strong relationships with its lenders, including banks which provide the Group with borrowings and lines of credit, and the gold refinery that the Group has an agreement with, and other customers of the Group that may fund the purchase of gold and silver in advance of delivery.

24. SUBSEQUENT EVENTS

- 24.1 During January 2026, the Group sold 6,588,761 shares of Unico Silver for net proceeds of US\$4,657 thousand. Of this amount, US\$2,725 thousand were used to exercise 15 million options at A\$0.26 per share to acquire 15 million Unico shares.
- 24.2 On 23 February 2026, the Group completed a brokered private placement for gross proceeds of US\$5,947 (A\$8,456 thousand). Broker fees of 5.0% plus GST were incurred and paid. Additional costs related to the placement were incurred. However, the final amount has not yet been determined as at the date these financial statements were authorised for issue.
