

Market Announcement

6 March 2026

BluGlass Limited (ASX: BLG) – Trading Halt

Trading in the securities of BluGlass Limited ('BLG') will be halted at the request of BLG, pending the release of an announcement by BLG.

Unless ASX decides otherwise, the securities will remain in trading halt until the earlier of:

- the commencement of normal trading on Tuesday, 10 March 2026; or
- the release of the announcement to the market.

BLG's request for a trading halt is attached below for the information of the market.

Request for Trading Halt – BluGlass Limited (ASX: BLG)

In accordance with ASX Listing Rule 17.1, BluGlass Limited (ASX: BLG) (**Company**) requests an immediate trading halt be granted by the ASX with respect to the Company's securities quoted on the Australian Securities Exchange.

Pursuant to ASX Listing Rule 17.1, the Company advises that:

- (a) the reason for the request is pending the Company's response to an ASX price query and the release of a price sensitive announcement in relation to a customer order (**Purpose**);
- (b) it anticipates that the trading halt will remain in place until the earlier of the commencement of normal trading on Monday, 9 March 2026 or the release of an announcement in connection with the Purpose;
- (c) the Company is not aware of any reason why the trading halt should not be granted; and
- (d) there is no other information necessary to inform the market about the trading halt.

Yours faithfully

Andrew Palfreyman

Company Secretary

This request has been approved for release by the BluGlass Board.

About BluGlass

BluGlass Limited (ASX:BLG) is a leading supplier of GaN laser diode products to the global photonics industry, focused on the industrial, defense, bio-medical, and scientific markets.

Listed on the ASX, BluGlass is one of just a handful of end-to-end GaN laser manufacturers globally. Its operations in Australia and the US offer cutting-edge, custom laser diode development and manufacturing, from small-batch custom lasers to medium and high-volume off-the-shelf products.

Its proprietary low temperature, low hydrogen, remote plasma chemical vapour deposition (RPCVD) manufacturing technology and novel device architectures are internationally recognised, and provide the potential to create brighter, better performing lasers to power the devices of tomorrow.
