ASX release

Worley selected by Chevron Cyprus for Aphrodite Gas Field Development FEED

Worley Limited (ASX: WOR) (“Worley”) has been selected by Chevron Cyprus Limited (a subsidiary of Chevron Corporation) to provide Front End Engineering Design (FEED) and procurement services for the Aphrodite Field Development Project, located offshore from Cyprus in the Eastern Mediterranean. The contract will be delivered by Worley under a reimbursable engineering and procurement contract.

Worley will provide FEED engineering across the full Aphrodite Field development, including subsea systems, the floating production unit, export gas pipeline and onshore receiving facilities. Worley will also provide procurement services for equipment associated with the floating production unit and onshore facilities.

This contract builds on Worley’s pre-FEED for the project and bridging phase work delivered during 2025, with this next stage of the project expected to be completed by December 2026.

The Aphrodite development is Cyprus’ first offshore gas development and is expected to achieve first gas in 2032. Worley will be executing the work through its Global Integrated Delivery model and will be leveraging expertise from teams across five countries.

“We are pleased to continue our long-standing relationship with Chevron, drawing on our global gas development expertise and Global Integrated Delivery model to support the progression of this strategically important energy project,” said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O’Leary, Group Company Secretary.
