

ASX Announcement FBR Limited

FBR finalises A\$4.7 million R&D Tax Incentive Cash Rebate for FY25

Friday, 20 March 2026 – Robotic technology company **FBR Limited (ASX:FBR; OTCID:FBRKF)** ('FBR' or 'Company') is pleased to advise that it has finalised its R&D tax incentive cash rebate of approximately A\$4.7 million from the Australian Taxation Office (ATO) for the year ended 30 June 2025 with payment anticipated to occur next week.

FBR has currently drawn down approximately A\$3.74 million from its R&D revolving tax loan facility with Radium Capital, and will repay this balance owing to Radium Capital from the ATO funds received, leaving approximately A\$960,000 cash retained by FBR before costs. FBR may draw again on this revolving loan facility against its expected tax refund for the year ended 30 June 2026 and any further additional eligible R&D expenditure rebates with respect to overseas findings for the year ended 30 June 2025, which continues to be subject of advice and regulator consideration.

This announcement has been authorised for release to the ASX by the FBR Board of Directors.

About FBR Limited

FBR Limited (ASX: FBR; OTCID: FBRKF) designs, develops and builds dynamically stabilised robots to address global needs in a safer, more efficient and more sustainable way. These robots are designed to work outdoors using the company's core Dynamic Stabilisation Technology® (DST®).

Applications of DST® include Hadrian®, Mantis™ and Firehawk™. Hadrian® is a bricklaying robot that builds structural walls faster, safer, more accurately and with less wastage than traditional manual methods. Hadrian® provides Wall as a Service®, FBR's unique commercial offering, to builders on demand. Hadrian® robots are also available for purchase by order. Mantis™ is a high deposition welding robot for the large-scale metal fabrication industries such as mining, shipbuilding and defence manufacture. Firehawk™ is an autonomous refractory lining robot that removes human labour from the process of lining ladles used in steel production with refractory bricks.
