Syrah Resources | ASX: SYR

# Important Notice and Disclaimer (1/4)

## Important Notice and Disclaimer

**IMPORTANT:** You must read the following carefully before continuing or making use of the information contained in this presentation. By attending an investor presentation or briefing, or accepting, accessing or reviewing this presentation, you acknowledge and agree to the terms set out in this important notice and disclaimer. This presentation is dated 26 March 2026 and has been prepared by Syrah Resources Limited (ABN 77 125 242 284) (and/or its subsidiaries, as the context requires, "Company", "Syrah" or "Syrah Resources") in relation to an accelerated non-renounceable entitlement offer of New Shares to be made to eligible institutional shareholders of Syrah ("Institutional Entitlement Offer") and eligible retail shareholders of Syrah ("Retail Entitlement Offer") under section 708AA of the Corporations Act as modified by ASIC Corporations (Non-Traditional Rights Issues) Instrument 2016/84 and ASIC Corporations (Disregarding Technical Relief) Instrument 2016/73 ("Entitlement Offer", the "Offer" or the "Equity Raising").

## Summary information

This presentation contains summary information about the Company and its activities which is current as at the date of this presentation. The information in this presentation is of a general nature and does not purport to be complete nor does it provide or contain all the information that would be required in a prospectus or other disclosure document prepared in accordance with the requirements of the Corporations Act, or that an investor should consider when making an investment decision. No representation or warranty, express or implied, is provided in relation to the accuracy or completeness of the information. Statements in this presentation are made only as of the date of this presentation unless otherwise stated and the information in this presentation remains subject to change without notice. This presentation should be read in conjunction with the Company's other periodic and continuous disclosure announcements lodged with the Australian Securities Exchange ("ASX"), which are available at [www.asx.com.au](http://www.asx.com.au).

## JORC Reporting

Investors should note that it is a requirement of the ASX listing rules that the reporting of Ore Reserves and Mineral Resources in Australia comply with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves 2012 Edition (the "JORC Code"), whereas mining companies in other countries may be required to report their mineral reserves and/or resources in accordance with other guidelines (for example, SEC Industry Guide 7 in the United States). Investors should note that while the Company's Mineral Resource and Ore Reserve estimates comply with the JORC Code, they may not comply with the relevant guidelines in other countries and, in particular, do not comply with (i) National Instrument 43-101 (Standards of Disclosure for Mineral Projects) of the Canadian Securities Administrators (the "Canadian NI 43-101 Standards"); or (ii) SEC Industry Guide 7, which governs disclosures of mineral reserves in registration statements filed with the U.S. Securities and Exchange Commission ("SEC"). Information contained in this presentation describing mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of Canadian or US securities laws. In particular, SEC Industry Guide 7 does not recognise classifications other than proven and probable Reserves and, as a result, the SEC does not permit mining companies to disclose their Mineral Resources including measured, indicated or inferred Resources in SEC filings. Accordingly, if the Company were reporting in accordance with SEC Industry Guide 7, it would not be permitted to report any Mineral Resources, and the amount of Reserves it has estimated may be lower. You should not assume that quantities reported as "Resources" will be converted to Reserves under the JORC Code or any other reporting regime or that the Company will be able to legally and economically extract them. In addition, investors should note that under SEC Industry Guide 7, mine life may only be reported based on Ore Reserves.

# Important Notice and Disclaimer (2/4)

## No new information or data

This presentation contains references to exploration results, Mineral Resource and Ore Reserve estimates, and feasibility study results including production targets, all of which have been cross referenced to previous ASX market announcements made by the Company. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements and, in the case of estimates of Mineral Resources and Ore Reserves, and feasibility study results including production targets, that all material assumptions and technical parameters underpinning the estimates in the relevant ASX market announcement continue to apply and have not materially changed.

## Not financial or product advice

This presentation is for information purposes only and is not a prospectus, product disclosure statement or other offer document under Australian law or the law of any other jurisdiction. This presentation has not been, nor will it be, lodged with the Australian Securities and Investments Commission ("ASIC"). This presentation is not financial product or investment advice, a recommendation to acquire New Shares or accounting, legal or tax advice. It has been prepared without taking into account the objectives, financial or tax situation or needs of any individual. Any references to, or explanations of, legislation, regulatory issues or any other legal commentary (if any) are indicative only, do not summarise all relevant issues and are not intended to be a full explanation of a particular matter. You are solely responsible for forming your own opinions and conclusions on such matters and the market, and for making your own independent assessment of the information in this presentation. Before making an investment decision, prospective investors should consider the appropriateness of the information having regard to their own objectives, financial and tax situation and needs, and seek legal and taxation advice appropriate to their jurisdiction and personal circumstances. The Company is not licensed to provide financial product advice in respect of its securities. Cooling off rights do not apply to the acquisition of New Shares.

## Investment risk

An investment in New Shares is subject to investment and other known and unknown risks, some of which are beyond the control of the Company. The Company does not guarantee any particular rate of return or the performance of the Company, nor does it guarantee the repayment of capital from the Company or any particular tax treatment. Investors should have regard (amongst other things) to the risk factors outlined in this presentation under the heading "Key risks" when making their investment decision.

## Financial data

All dollar values are in Australian dollars (\$) or A\$ unless stated otherwise. The information contained in this presentation may not necessarily be in statutory format. Certain figures, amounts, percentages, estimates, calculations of value and fractions provided in this presentation are subject to the effect of rounding. Accordingly, the actual calculation of these figures may differ from the figures set out in this presentation.

## Past performance

Past performance and any pro forma information given in this presentation is given for illustrative purposes only and should not be relied upon as (and is not) an indication of the Company's views, nor anyone else's, on its future performance, financial position or condition, including the future trading price of the Company's securities. Investors should note that past performance, including past share price performance, of Syrah cannot be relied upon as an indicator of (and provides no guidance as to) future performance including future share price performance.

## Non-IFRS financial measures

Any pro forma financial information included in this presentation has been prepared by the Company in accordance with the measurement and recognition principles, but not the disclosure requirements, prescribed by the Australian Accounting Standards. Investors should also be aware that certain financial data included in this presentation may be "non-IFRS financial information" under ASIC Regulatory Guide 230: "Disclosing non-IFRS financial information" published by ASIC and/or "non-GAAP financial measures" under Regulation G of the U.S. Securities Exchange Act of 1934. The Company believes this non-IFRS financial information provides, and these non-GAAP financial measures provide, useful information to users in measuring the financial performance and conditions of Syrah. The non-IFRS financial information and these non-GAAP financial measures do not have a standardised meaning prescribed by Australian Accounting Standards and, therefore, may not be comparable to similarly titled measures presented by other entities, nor should they be construed as an alternative to other financial measures determined in accordance with Australian Accounting Standards. Investors are cautioned, therefore, not to place undue reliance on any non-IFRS financial information or non-GAAP financial measures and ratios included in this presentation. Such financial information does not purport to be in compliance with Article 3-05 of Regulation S-X under the U.S. Securities Act.

# Important Notice and Disclaimer (3/4)

## Future performance and forward-looking statements

This presentation contains certain forward-looking statements. The words "expect", "anticipate", "estimate", "intend", "believe", "guidance", "should", "could", "may", "will", "predict", "plan", "likely", "may", "propose", "forecast", "target", "outlook" and other similar expressions are intended to identify forward-looking statements. Forward-looking statements in this presentation include, without limitation, statements regarding: plans, strategies and objectives of management, the timetable and outcome of the Offer and the use of the proceeds thereof; the ability to reach binding documentation with respect to the strategic funding proposals from the U.S. Government and AustralianSuper; the capital and operating costs, timetable and operating metrics for the Balama Graphite Operation; the viability of future opportunities such as spherical graphite, future agreements; future market supply and demand; and future mineral prices. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements. Forward-looking statements, opinions and estimates provided in this presentation are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. You are strongly cautioned not to place undue reliance on forward-looking statements.

Forward-looking statements, including projections, guidance on future earnings and estimates are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Forward-looking statements may be affected by a range of variables which could cause actual results or trends to differ materially, including but not limited to the following risks: ability to implement the proposed transactions contemplated in the strategic funding proposals from the U.S. Government and AustralianSuper, dependence on commodity prices, availability of funding, impact of inflation on costs, exploration risks, including the risks of obtaining necessary licences and diminishing quantities or grades of Ore Reserves, risks associated with remoteness, environmental regulation risk, currency and exchange rate risk, political risk, war and terrorism and global economic conditions, as well as earnings, capital expenditure, cash flow and capital structure risks and general business risks. No representation, warranty or assurance (express or implied) is given or made in relation to any forward-looking statement by any person (including the Company or Macquarie Capital (Australia) Limited, the lead manager and underwriter of the Offer ("Lead Manager")). In particular, no representation, warranty or assurance (express or implied) is given that the occurrence of the events expressed or implied in any forward-looking statements in this presentation will actually occur. Actual results, performance or achievement may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. The forward-looking statements in this presentation speak only as of the date of this presentation. Subject to any continuing obligations under applicable law or any relevant ASX listing rules, the Company and the Lead Manager disclaim any obligation or undertaking to provide any updates or revisions to any forward-looking statements in this presentation to reflect any change in expectations in relation to any forward-looking statements or any change in events, conditions or circumstances on which any such statement is based. Nothing in this presentation will under any circumstances create an implication that there has been no change in the affairs of Syrah since the date of this presentation.

## Diagram, charts, graphs and tables

Any diagrams, charts, graphs and tables appearing in this presentation are illustrative only and may not be drawn to scale.

## Not an offer

This presentation is not and should not be considered an offer or an invitation to acquire, or a solicitation or recommendation in relation to the subscription, purchase or sale of, Company securities (including the New Shares to be offered and sold in the Offer) or any other financial products in any jurisdiction and neither this presentation nor anything in it will form any part of any contract for the acquisition of New Shares.

The distribution of this presentation (including an electronic copy) in jurisdictions outside Australia may be restricted by law and any such restrictions should be observed. Any failure to comply with such restrictions may constitute a violation of applicable securities laws. This document does not constitute an offer to sell, or a solicitation of an offer to buy, securities in the United States. Any securities described in this document (including the New Shares to be offered and sold in the Offer) have not been, and will not be, registered under the U.S. Securities Act or the securities laws of any state or other jurisdiction of the United States and may not be offered or sold to any person in the United States except in transactions exempt from, or not subject to, the registration requirements of the U.S. Securities Act and any other applicable United States state securities laws. By accepting this presentation you represent and warrant that you are entitled to receive such presentation in accordance with the above restrictions and the international offer restrictions set out in this presentation, and agree to be bound by the limitations contained herein. Any non-compliance could contravene applicable securities laws. Please refer to the section of this presentation headed "International Offer Restrictions" for more information.

# Important Notice and Disclaimer (4/4)

## Disclaimer

To the maximum extent permitted by law, the Company, the Lead Manager and their respective affiliates and related bodies corporate, and their respective directors, officers, partners, employees, agents and advisers (the "Extended Parties"): (i) exclude and disclaim all liability, for any expenses, losses, damages or costs incurred by you as a result of your participation in any offer of the New Shares (including the Offer) and the information in this presentation being inaccurate or incomplete in any way for any reason, whether by negligence or otherwise; and (ii) make no representation or warranty, express or implied, as to the currency, accuracy, reliability, timeliness or completeness of information in this presentation, or likelihood of fulfilment of any forward-looking statement or any event or results expressed or implied in any forward-looking statement. The Lead Manager has not, nor have any of its Extended Parties or the Company's advisers, authorised, permitted or caused the issue, submission, dispatch or provision of this presentation and none of them makes or purports to make any statement in this presentation, and there is no statement in this presentation which is based on any statement by any of them. The Lead Manager has not, nor have any of their Extended Parties, independently verified any of the information in this presentation.

To the maximum extent permitted by law, you agree to release and indemnify the Lead Manager and its Extended Parties from and against all claims, actions, damages, remedies or other matters, whether in tort, contract or under law or otherwise, arising from or which may arise from or in connection with the provision of, or any purported reliance on, this presentation and you covenant that no claim or allegations will be made against the Lead Manager or its Extended Parties in relation to this presentation. The Lead Manager and its Extended Parties make no recommendations as to whether you or your related parties should participate in or concerning the Offer, and you represent, warrant and agree that you have not relied on any statements made by the Lead Manager or any of its Extended Parties in relation to the Offer and you further expressly disclaim that you are in a fiduciary relationship with any of them. The Lead Manager and its Extended Parties are full service financial institutions engaged in various activities, which may include (but are not limited to) underwriting, trading, financing, corporate advisory, financial advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and nonfinancial activities and services including for which they have or may receive customary fees and expenses or other transaction consideration. In the course of these activities the Lead Manager and its Extended Parties may at any time for their own account or the accounts of their clients, make or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments, and such investment and trading activities may involve or relate to assets, securities and/or instruments of the Company, and/or persons and entities with relationships with the Company. The Lead Manager and its Extended Parties may receive customary fees and consideration in respect of such activities. The Lead Manager and its Extended Parties may also communicate independent investment recommendations, market colour or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

The Lead Manager is the underwriter of the Offer. The Lead Manager is acting for and providing services to the Company in relation to the Offer and will not be acting for or providing services to the Company's shareholders or creditors. The Lead Manager has been engaged solely as an independent contractor and is acting solely in a contractual relationship on an arm's length basis with the Company. The Lead Manager, in conjunction with its affiliates, is acting in the capacity as such in relation to the Offer and will receive fees and expenses for acting in this capacity. The Lead Manager and/or its affiliates are or may in the future be lenders to the Company or its affiliates. The engagement of the Lead Manager by the Company is not intended to create any agency or other relationship between the Lead Manager and the Company's shareholders or creditors.

In connection with the Offer, one or more institutional investors may elect to acquire an economic interest in the New Shares ("Economic Interest") instead of subscribing for or acquiring the legal or beneficial interest in those securities. The Lead Manager and/or its Extended Parties may, for its own account, write derivative transactions with those investors relating to the New Shares to provide the Economic Interest, or otherwise acquire New Shares in the Company in connection with the writing of those derivative transactions in the Offer and/or the secondary market. As a result of those transactions, the Lead Manager and/or its Extended Parties may be allocated, subscribe for or acquire New Shares or securities of the Company in the Offer and/or the secondary market, including to hedge those derivative transactions, as well as hold long or short positions in those securities. These transactions may, together with other securities in the Company acquired by the Lead Manager and/or its Extended Parties in connection with their ordinary course sales and trading, principal investing and other activities, result in a member of the Lead Manager and/or its Extended Parties disclosing a substantial holding and earning fees.

The Lead Manager and/or its Extended Parties may also receive and retain other fees, profits and financial benefits in each of the above capacities and in connection with the above activities, including in its capacity as underwriter to the Offer.

You acknowledge and agree that the determination of eligibility of investors for the purposes of the Offer is determined by reference to a number of matters, including legal requirements, logistical and registry constraints and the discretion of the Company and the Lead Manager and each of the Company and the Lead Manager (and each of their respective Extended Parties) disclaim any duty or liability (including for negligence) in respect of that determination and the exercise or otherwise of that discretion, to the maximum extent permitted by law. Further, you acknowledge and agree that any allocation of New Shares (other than pursuant to an entitlement under the Offer) is at the sole discretion of the Company and the Lead Manager and each of the Company and the Lead Manager (and their respective Extended Parties) disclaim any duty or liability (including for negligence) in respect of the exercise or otherwise of that discretion, to the maximum extent permitted by law. The Lead Manager may rely on information provided by or on behalf of institutional investors in connection with managing, conducting and underwriting the Offer without having independently verified that information and the Lead Manager and any of its Extended Parties do not assume responsibility for the fairness, currency, accuracy, reliability or completeness of that information.

The Company and the Lead Manager reserve the right to change the timetable in their absolute discretion including by closing the Offer early, withdrawing the Offer entirely, closing the bookbuild early or extending the Offer closing time (generally or for particular investor(s)) in their absolute discretion (but have no obligation to do so), without recourse to them or notice to you.

# Positioning Syrah for long-term success

1

**Syrah is the first mover in graphite with the only integrated AAM supply chain outside of China**

2

**Balama is the largest and highest-grade graphite resource ex-China with significant production capacity to supply a growing global market**

3

**Upon completion, the non-binding Strategic Funding Proposals<sup>1</sup> would reset Syrah's balance sheet and position it for long term success with pro forma liquidity of up to US\$198m**

4

**DFC is expected to have a 20% shareholding in Syrah following the Strategic Funding Proposals<sup>2</sup>**

**The Strategic Funding Proposals<sup>1</sup> are subject to, among others, execution of binding documentation, Government of Mozambique approvals, other government and regulatory approvals, DFC and DOE approvals, and Syrah shareholder approval. Accordingly, while the parties seek to progress matters on the terms and conditions in the Strategic Funding Proposals, there is no assurance, certainty or guarantee that the matters in such proposals will become binding, or if they do become binding, that they will become binding on the terms and conditions set out in full in Section 5.**

**Notes:**

1. Refer to Section 1 for information on the Strategic Funding Proposals. Refer to slide 14 and 15 for more detail on pro forma liquidity and ownership. There is a risk that the Strategic Funding Proposals are not successfully implemented, refer to Key Risk 1. Additionally, if implemented, there is a risk that Syrah cannot drawdown the Secondary Convertible Loan Notes and/or refinance the loans and convertible loan notes at maturity which may require the company to raise capital and impact its ability to operate as a going concern. Refer to Key Risk 7.

2. Includes shares issued as part of the debt-for-equity swap and via warrants. Refer to Section 1 for further details.

# Strategic Funding Proposals to reset Syrah's balance sheet

## Step 1: Equity raising, DFC debt-for-equity swap and DFC loan disbursement<sup>1</sup>

- Fully underwritten US\$72m (~A\$104m) equity raising at an offer price of A\$0.105 per share (“**Equity Raising**”)
- AustralianSuper<sup>2</sup> commitment to take up its full pro rata entitlement being A\$35m and sub-underwrite the Institutional Entitlement Offer and Retail Entitlement Offer up to A\$69m<sup>3</sup>
- DFC proposes to convert US\$6m of its existing loan to Syrah shares at the Equity Raising offer price (“**Tranche 1**”) for a pro forma Syrah shareholding of ~4%<sup>4</sup>
- Further US\$15m DFC loan disbursement for Balama<sup>5</sup>

## Step 2: Additional DFC debt-for-equity swap and convertible loan notes<sup>1</sup>

- Syrah is targeting financial close in 2H 2026 (requiring >50% of shares which are permitted to vote in favour and which are voted<sup>6</sup>), following which, Syrah will:
  - Convert a further US\$25m (US\$31m total) of the existing DFC loan to Syrah shares (“**Tranche 2**”)<sup>4</sup>
  - Convert a substantial portion of its remaining indebtedness to new primary convertible loan notes
  - Have no cash interest or principal repayments for the next three years
  - Have pro forma liquidity of up to US\$198m<sup>7</sup> including US\$68m of new secondary convertible loan notes

## US Government support for Syrah

- DOE's and DFC's<sup>8</sup> Strategic Funding Proposals are designed to support Syrah's successful development of a secure domestic supply chain for graphite AAM
- DFC to have a ~20% shareholding in Syrah on completion of the debt-for-equity swap and exercise of warrants
- DFC to have the right to nominate a director to the Syrah Board following completion of Tranche 1<sup>9</sup> of its debt-for-equity swap and subject to Australian Foreign Investment Review Board (“**FIRB**”) approval
- Syrah is exploring a US secondary listing in the next 12 months

**If Syrah is unsuccessful in implementing the Strategic Funding Proposals, it would negatively impact Syrah's forward-looking liquidity significantly as it would not have access to the elements of the proposals including, but not limited to, the debt-for-equity swap, conversion of debt to convertible loan notes, issuance of secondary convertible loan notes and forbearance agreements. This may result in Syrah needing to raise additional capital and/or impact Syrah's ability to continue as a going concern, either of which could significantly, negatively, impact the value of its shares**

Notes: 1. Refer to Key Risks 1 and 7 for further information on the Strategic Funding Proposals.

2. AustralianSuper Pty Ltd as trustee of AustralianSuper (“AustralianSuper”).

3. Immediately following the equity raise, AustralianSuper may hold >50% of the issued capital in Syrah. Refer to slide 12 and 15 and Key Risk 22 for further information.

4. **Both tranches of the DFC debt-for-equity swap are subject to DFC internal approvals, execution of documentation and satisfaction of any conditions in documents**, and the second tranche of the DFC debt-to-equity swap is also subject to further conditions, including additional documents, **Syrah shareholder approval for the amount above unutilised placement capacity and governmental and regulatory approvals**.

5. Syrah's subsidiary Twigg Exploration and Mining Limitada (“Twigg”) would receive a further US\$15m disbursement from the DFC loan to fund working and sustaining capital for Balama prior to DFC loan conversion to CLNs. **The DFC loan disbursement is subject to satisfaction of conditions to disbursement, execution of documentation relating to event of default waivers and conditions, and DFC internal approvals**.

6. AustralianSuper, DOE and DFC (and their respective associates) may not be able to vote any shares held in favour of such shareholder approval resolutions to the extent they are benefitting from the resolution. The shareholder resolutions will need to be passed by a majority of votes held by shareholders who are permitted to vote on the resolutions. Refer to Key Risk 1.

7. Refer to slide 14 for more detail on pro forma liquidity.

8. Refers to the following agencies: United States International Development Finance Corporation (“DFC”) and United States Department of Energy (“DOE”).

9. As defined on slide 11. DFC proposal to convert US\$6m of its existing loan to Syrah shares at A\$0.105 per share under Syrah's unutilised placement capacity under Listing Rule 7.1.

# Syrah is the Western leader in graphite and anode materials

## First mover advantage as ex-China partner of choice

Syrah is the leading supplier of graphite and Active Anode Material (“AAM”) outside of China with a multi-year headstart to alternative suppliers

## Geopolitically strategic critical minerals assets

Balama is the only large-scale operation and high-grade resource outside of China

Vidalia is the only commercial scale natural graphite AAM facility in the US

## Growing graphite market driven by the battery boom

In 2025, battery production grew +29% year on year<sup>1</sup>

Ex-China battery demand forecast to grow +14% p.a. from 2026 to 2040<sup>1</sup>

## The only integrated mine-to-anode supply chain in the US

US is reliant on imports for AAM today, Syrah is targeting first commercial AAM sales in 2H 2026 and ramp-up towards 11.25ktpa production capacity thereafter<sup>2</sup>

## US Government support for secure critical minerals

US DFC and DOE support and equity alignment through Strategic Funding Proposals alongside multiple US policy initiatives to support Syrah’s objectives

## Rapidly growing and bifurcating end markets

US AAM imports from ex-China have grown +5x year on year<sup>3</sup> as a new independent ex-China market develops<sup>4</sup>

### Notes:

1. Source: Benchmark Mineral Intelligence Natural Graphite Forecast Report, Q4 2025.

2. Refer to Key Risk 9 for further information on operations.

3. Includes merchandise imported into the United States under HTSUS codes 25041050 and 38019000. Note that certain merchandise imported under these HTSUS codes may not be used as natural graphite AAM and natural graphite AAM imported into the United States may not be recorded under these HTSUS codes. Exports to the US from certain countries have been excluded.

4. Refer to Key Risk 4 for further information on the graphite market.

# US Government interventions are reshaping markets in Syrah's favour

**>US\$1bn p.a.**

45X Production Credits accruing to each Tier 1 US battery maker that will require minimum levels of non-PFE (i.e. non-Chinese) input materials, including AAM<sup>1,2</sup>

**US\$7-9m p.a.**

Estimated Section 45X Production Credits accruing to Syrah prior to phase down from 2030 to 2032<sup>2,3</sup>

**35%**

Combined administrative import tariffs effective on Chinese AAM imports<sup>2</sup>

**~US\$165m**

Section 48C tax credit awarded to Syrah for Vidalia expansion<sup>2,4</sup>

**Announced ~US\$12bn**

US Government "Project Vault" to stockpile critical minerals including graphite<sup>2</sup>

“In today's era of global competition, economic security is national security.

With this transaction, we will secure U.S. access to one of the largest graphite reserves in the world, supply jobs for the U.S. and our allies, and support a valuable hub of economic activity for the people of Mozambique.”

***Ben Black, DFC CEO***

1. Source: Company filings, equity research. Refer to ASX releases dated 28 January 2026.
2. Refer to Key Risks 12 and 13 for further information on regulations and government policy.
3. Refer to ASX release dated 11 September 2025.
4. Refer to ASX release dated 13 January 2025.

# 1 Transaction Overview

NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

ersonal use only

# Step 1: Equity raising, DFC debt-for-equity swap and DFC loan disbursement

## Equity Raising and non-binding key terms<sup>1</sup>

- Syrah is undertaking a fully underwritten accelerated non-renounceable entitlement offer of A\$104m (US\$72m) at an offer price of A\$0.105 per share
  - AustralianSuper has committed to take up its full entitlement under the Equity Raising (~A\$35m) and sub-underwrite the Institutional Entitlement Offer and Retail Entitlement Offer up to ~A\$69m (66% of the Equity Raising)
  - Immediately following settlement of the Equity Raising, AustralianSuper may own more than 50% of Syrah's shares<sup>2</sup> until the execution of the DFC debt-for-equity swap Tranche 1 and Tranche 2, and conversion of DFC warrants
- Additionally, Step 1 of the non-binding Strategic Funding Proposals<sup>3</sup> includes:
  - Further US\$15m DFC loan disbursement for Balama<sup>4</sup>
  - DFC proposal to convert US\$6m of its existing loan to Syrah shares at A\$0.105 per share under Syrah's unutilised placement capacity (Tranche 1)<sup>5</sup>
- Funding from Step 1 and Step 2 of the Strategic Funding Proposals<sup>3</sup> will be used to:
  - Fund Vidalia working capital to achieve commercial AAM sales
  - Ramp-up Balama to targeted levels (subject to market demand)
- Certain events of default of DFC and DOE loans remain unresolved and Syrah has received non-binding Strategic Funding Proposals from DFC and DOE to amend these loans (refer to Key Risk 8)<sup>6</sup>

Notes: 1. This should be read in conjunction with the information included in Key Risks 1 and 7. A\$ proceeds converted into US\$ based on a USD/AUD exchange rate of 0.6939 where relevant.

2. Refer to slide 12 and 15 and Key Risk 22 for further information.

3. The Strategic Funding Proposals are subject to execution of binding documentation, DFC and DOE approvals, regulatory approvals and Syrah shareholder approval and consideration given to the information included in Key Risks 1 and 7.

Accordingly, while the parties seek to progress matters on the terms and conditions in the Strategic Funding Proposals, there is no assurance, certainty or guarantee that the matters in such proposals will become binding, or if they do become binding, that they will become binding on the terms and conditions set out in full in Section 5. Investors should also consider the Key Risks section.

4. Subject to DFC approvals and other conditions, Syrah's subsidiary Twigg Exploration and Mining Limitada ("Twigg") would receive a further US\$15m disbursement from the DFC loan to fund working and sustaining capital for Balama and prior to DFC loan conversion to CLNs.

5. Both tranches of the DFC debt-for-equity swap are subject to DFC internal approvals, execution of documentation and satisfaction of any conditions in documents, and the second tranche of the DFC debt-to-equity swap is also subject to further conditions, including additional documents, Syrah shareholder approval for the amount above unutilised placement capacity and governmental and regulatory approvals.

6. Refer to Key Risks 1 and 8 for further information on the Strategic Funding Proposals and loan default risks.

7. Unrestricted cash held by Syrah's parent company and non-operating subsidiaries.

8. Estimated DOE/DFC loan restructuring costs and subject to adjustment.

9. Differences may arise due to rounding.

Equity Raising costs	4	3
<b>Total uses<sup>9</sup></b>	<b>161</b>	<b>111</b>

# Step 2: Additional DFC debt-for-equity swap and convertible loan notes

## Non-binding key terms<sup>1</sup>

- Step 2 of the non-binding Strategic Funding Proposals contemplates the following to reset Syrah's balance sheet:
  - DFC to convert an additional US\$25m of its existing loan to Syrah shares at A\$0.105 per share (the Tranche 2 debt-for-equity swap)<sup>2</sup>
  - DFC to be issued and immediately exercise warrants with an exercise price of A\$0.0001 per share for the additional purchase of (or be issued new shares at A\$0.0001 per share representing) 5% of Syrah shares on a fully diluted basis (excluding CLNs)<sup>2</sup>
  - DFC to convert its remaining loan balance to a secured Primary Convertible Loan Note (“**Primary CLN**”)
  - DOE to convert US\$40m of its existing loan to a secured Primary CLN
  - AustralianSuper's Series 4, 5 and 6 Notes to be reissued as or amended to be an unsecured Primary CLN with an updated conversion price of A\$0.1982 per share and a 3-year term from issuance<sup>3</sup>
  - DFC may be issued up to US\$30m, and AustralianSuper may be issued up to US\$38m, Secondary Convertible Loan Notes (“**Secondary CLNs**”) which would have the same key terms as the Primary CLNs, except the terms of issuance<sup>4</sup>
  - Up to US\$28m AustralianSuper Secondary CLNs shall be issued within six months with the issuance subject to approvals<sup>4</sup>

Notes: 1. The Strategic Funding Proposals are subject to execution of binding documentation, DFC and DOE approvals, regulatory approvals and Syrah shareholder approval and consideration given to the information included in Key Risks 1 and 7. There is a risk that the Strategic Funding Proposals are not successfully implemented, refer to Key Risk 1. Additionally, if implemented, there is a risk that Syrah cannot drawdown the Secondary Convertible Loan Notes and/or refinance the loans and convertible loan notes at maturity which may require the company to raise capital and impact its ability to operate as a going concern. Refer to Key Risk 7. A\$ proceeds converted into US\$ based on a USD/AUD exchange rate of 0.6939 where relevant.

2. Both tranches of the DFC debt-for-equity swap are subject to DFC internal approvals, execution of documentation and satisfaction of any conditions in documents, and the second tranche of the DFC debt-to-equity swap is also subject to further conditions, including additional documents, Syrah shareholder approval for the amount above unutilised placement capacity and governmental and regulatory approvals.

3. Compared to existing conversion price of AustralianSuper Series 4, 5 and 6 Notes of A\$1.3686 per share and is subject to adjustment due to the Equity Raising prior to the Strategic Funding Proposals. The conversion price will be adjusted to A\$1.1312 per share following the Equity Raising.

4. The US\$28m AustralianSuper Secondary CLNs to be issued within six months, net of any other agreed funding received by Syrah. Issuance of the DFC Secondary CLNs (US\$30m) would be in DFC's sole discretion, upon request by Syrah. The remainder of the AustralianSuper Secondary CLNs (minimum US\$10m) will be issued pro rata with the final equivalent portion of the DFC Secondary CLN, unless otherwise issued upon request by Syrah in AustralianSuper's sole discretion.

5. Sources: US\$57m, equal to DFC loan balance (including US\$73.5m principal and interest accrued) as at 31 December 2025, plus further US\$15m disbursement and less US\$31m debt-for-equity swap. Uses: US\$82m, equal to DFC loan balance (including US\$73.5m principal and interest accrued) as at 31 December 2025, plus further US\$15m disbursement and less US\$6m Tranche 1 debt-for-equity swap. The face value of the actual principal amount of the Primary CLN issued to DFC will depend on the outstanding principal and accrued interest of the DFC loan at financial close.

6. Equal to the outstanding principal and accrued interest of the existing AustralianSuper Series 4, 5 and 6 Notes (and inclusive of unamortised establishment costs) as at 31 December 2025. The face value of the actual principal amount of the CLN will depend on the outstanding principal and accrued interest at financial close of the existing AustralianSuper Series 4, 5 and 6 Notes.

7. Differences may arise due to rounding.

Source of funds (pro forma as at 31 December 2025) <sup>1</sup>	A\$m	US\$m

1. There is a risk that the Strategic Funding Proposals are not successfully implemented, refer to Key Risk 1. Additionally, if implemented, there is a risk that Syrah cannot drawdown the Secondary Convertible Loan Notes and/or refinance the loans and convertible loan notes at maturity which may require the company to raise capital and impact its ability to operate as a going concern. Refer to Key Risk 7.

2. TERP is the theoretical ex-rights price at which New Shares should trade immediately after the ex-date for the entitlement offer. TERP is a theoretical calculation only and the actual price at which New Shares trade immediately after the ex-date for the entitlement offer will depend on many factors and may not equal TERP.

3. Includes ~39m Performance Rights and ~4m Share Rights.

4. Includes ~17m warrants agreed to be issued to DFC (see ASX release dated 17 November 2025), further ~2m warrants expected to be issued to DFC with the further US\$15m DFC loan disbursement and additional warrants exercisable for the purchase of an additional 5% of Syrah shares on a fully diluted basis (excluding CLNs).

5. Syrah had restricted cash of US\$10m available to fund Balama operating and capital costs and US\$17m available to fund Vidalia operating and capital costs as at 31 December 2025.

6. Equal to outstanding loan principal and accrued interest (net of unamortised loan origination costs) as at 31 December 2025.

7. Subject to DFC approvals and other conditions, Syrah's subsidiary Twigg Exploration and Mining Limitada ("Twigg") would receive a further US\$15m disbursement from the DFC loan to fund working and sustaining capital for Balama prior to DFC loan conversion to CLNs.

8. Equal to outstanding principal and accrued interest of the AustralianSuper Series 4, 5 and 6 Notes (net of unamortised establishment costs) as at 31 December 2025.

9. The actual face value of Primary CLNs will depend on the outstanding principal, accrued interest and fees of the DFC loan, DOE loan and AustralianSuper Series 4, 5 and 6 Notes at financial close. Interest will continue to be accrued on the existing loans and notes at the existing rates until the Strategic Funding Proposals reach financial close. DFC loan balance adjusted for US\$31m DFC debt-for-equity swap.

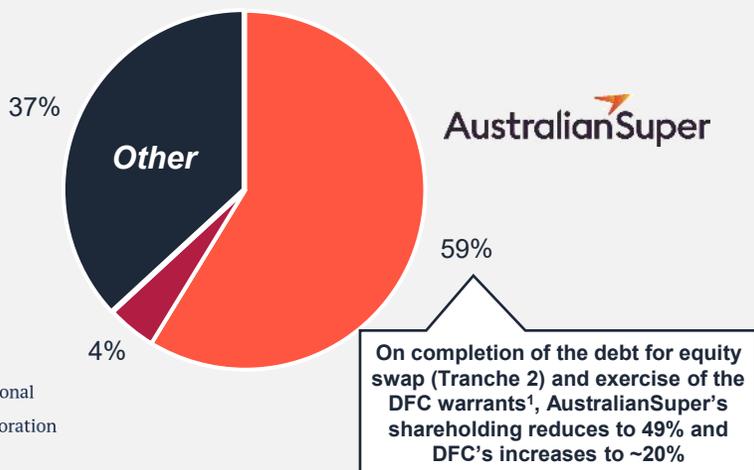

10. Up to US\$28m AustralianSuper Secondary CLNs may be issued within six months, net of any other agreed funding received by Syrah. Issuance of the DFC Secondary CLNs (US\$30m) would be in DFC's sole discretion, upon request by Syrah. The remainder of the AustralianSuper Secondary CLNs (minimum US\$10m) will be issued pro rata with the final equivalent portion of the DFC Secondary CLN, unless otherwise issued upon request by Syrah in AustralianSuper's sole discretion.

11. A\$ proceeds converted into US\$ based on a USD/AUD exchange rate of 0.6939 where relevant.

# US Government pathway to substantial ownership

- Syrah is exploring a secondary listing in the US in response to strong investor interest in the critical minerals sector
- AustralianSuper remains supportive of the current Board and its strategy of ramping up production at Balama and achieving commercial sales at Vidalia
- DFC debt-for-equity swap would provide DFC with a near-term shareholding in Syrah following the Equity Raising<sup>1</sup>
- Non-binding Strategic Funding Proposals<sup>2</sup> outline a pathway for DFC, DOE and AustralianSuper to convert Primary and Secondary CLNs to Syrah shares

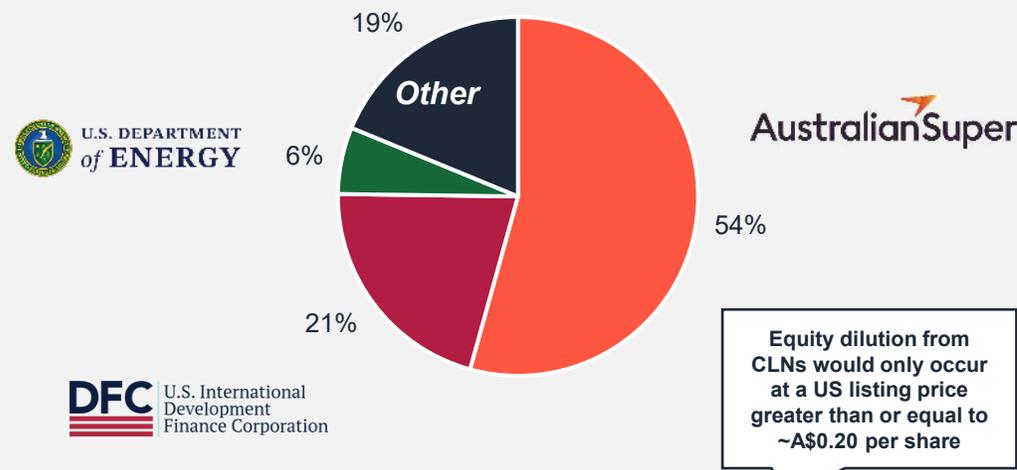

## 1 Post Equity Raising, DFC loan disbursement and DFC debt-for-equity swap (Tranche 1) (fully diluted)<sup>3</sup>

Market cap: US\$218m (Illustrative at A\$0.128 per share TERP)<sup>4</sup>

CLNs outstanding: US\$232m (as at 31 December 2025)

## 2 Post CLN conversion and DFC warrant exercise at financial close (fully diluted)<sup>3,5</sup> (All Primary and US\$28m Secondary CLNs converted<sup>3,5</sup>)

Market cap: US\$664m (Illustrative market cap at A\$0.1982 per share)<sup>4</sup>

Nil CLNs outstanding post debt-equity swap at maturity

Notes:

1. Both tranches of the DFC debt-for-equity swap are subject to DFC internal approvals, execution of documentation and satisfaction of any conditions in documents, and the second tranche of the DFC debt-to-equity swap is also subject to further conditions, including additional documents, Syrah shareholder approval for the amount above unutilised placement capacity and governmental and regulatory approvals.
2. The Strategic Funding Proposals are subject to execution of binding documentation, DFC and DOE approvals, regulatory approvals and Syrah shareholder approval (>50% of shares which are permitted to vote in favour and which are voted) and consideration given to Key Risks 1 and 7.
3. Assumes AustralianSuper takes up its full entitlement being A\$35m, acquires all other shares offered under the Institutional Entitlement Offer and Retail Entitlement Offer pursuant to its sub-underwriting commitment; the non-binding US\$7m DFC debt-for-equity completes and all DFC warrants are issued and converted to Syrah shares. Immediately following the equity raise, AustralianSuper may hold >50% of the issued capital in Syrah. Refer to slide 12 and Key Risk 22 for further information.
4. Refer to Key Risk 22 for further information on the risks associated with substantial shareholdings.
5. Analysis is at financial close and assumes US\$28m AustralianSuper Secondary CLNs are issued and remaining Secondary CLNs (US\$40m) are unissued. See Section 5 for further details and a second case which considers Syrah shareholdings if conversion occurs at maturity.

# 2 Syrah investment thesis

ersonal use only  
NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

# World class Balama resource supports Syrah's strategy

World class operation underpinned by the **largest and highest-grade graphite resource** (ex-China)

+50-year JORC Ore Reserve-backed mine life<sup>1</sup>

In 2H 2025 following restart, **Balama operated in campaign mode at 120ktpa<sup>2</sup>** production rate with ample capacity available for further ramp-up

Syrah is participating in a rapidly growing ex-China graphite market with its annual ex-China sales growing over **70% from 2023 to 2025<sup>3</sup>**

Balama has a **nameplate capacity of 350ktpa with ~US\$361m capital invested** and historical annual production of up to 163ktpa<sup>4</sup>

Production rates of 20kt per month expected to underpin **C1 operating cost guidance of US\$430-480/t<sup>5</sup>** with further cost improvement as production rates increase

**Strong support from Mozambique Government** and alignment with local and provincial stakeholders for sustainable Balama operations

- Notes:
1. 2025 Balama Ore Reserve and Mineral Resource statement included in Syrah's 2025 Annual Report released to ASX on 26 March 2026.
  2. Q4 2025 production rates annualised.
  3. Total Balama natural graphite sales by end destination.
  4. Maximum calendar year production achieved in 2022.
  5. Balama C1 cost (FOB Nacala/Pemba) medium-term cost guidance is US\$430-480/t at a 20kt per month production rate.

# Vidalia producing AAM and ready for ramp-up

**Only commercial-scale AAM production facility in North America**, with deep technical competencies in AAM qualification and integrated production developed over a 10-year period

**Full readiness for production ramp-up** with operating cost guidance of US\$4.30-4.80/kg<sup>1</sup> which provides medium-term margin potential

**Currently cost competitive** with Chinese and Indonesian supply on an export market-landed basis (in the US) when producing at commercial AAM volumes<sup>2</sup>

Syrah has **Tier 1 North American EV / battery maker customers** – including Tesla and Lucid

Ongoing engagement with **foundational offtake partner Tesla** with **alleged default cure period extended to 1 June 2026**<sup>3</sup>

**Vidalia fully constructed and commissioned** with **~US\$317m capital invested**

Expansion to 45ktpa AAM capacity FID-ready **subject to customer and financing commitments**

Notes:

1. Syrah guidance for Vidalia's steady state operating cost. Includes cost of US\$425/t (FOB Nacala) for Balama natural graphite, reflecting an approximate all-in cost of production at Balama at full plant utilisation, costs of transporting Balama natural graphite from Nacala to Vidalia and maintenance costs. Excludes loan-related consulting and legal costs and Section 45X Production Credit.

2. Refer to Key Risks 2 and 3 noting the recent US International Trade Commission final negative AD/CVD determination may delay AAM sales from Vidalia and limit near term demand growth for AAM produced in the United States.

3. See ASX release dated 16 March 2026.

# FY25 full year financial results

## Syrah 2H FY25 highlights and financials

### BALAMA PRODUCTION

**67kt** (half year)  
73% recovery and 95% grade

### GRAPHITE SALES

**55kt** (half year)  
86% fine to coarse sales mix

### AVERAGE SALES PRICE

**US\$606/t CIF<sup>1</sup>**  
down 6% year on year

### BALAMA OPEX COST

**US\$559/t FOB<sup>2</sup>**  
in operating period

### VIDALIA OPERATIONS

AAM produced and facility operated for qualification processes

### VIDALIA SALES

Qualification progressed with Tier 1 customers

### 2H FY25 EARNINGS

(US\$9m) EBITDA  
(US\$41m) NPAT<sup>3</sup>

### CASH

**US\$77m** (US\$18m unrestricted<sup>4</sup>)  
as at 31 December 2025

## Key observations

- 2H FY25 reflects campaign operations at Balama and ongoing qualification at Vidalia
- Syrah released its FY25 results on the ASX on 26 March 2026 which included:
  - 2025 Balama Ore Reserve and Mineral Resource statement included in 2025 Annual Report with no material changes from the prior statement
  - PwC has provided an audit sign-off on Syrah which notes that the company is a going concern with material uncertainty– the completion of the US\$72m Equity Raising and Strategic Funding Proposals are central to future liquidity
  - Events subsequent to 31 December 2025, specifically the final negative AD/CVD determination by ITC, may impact the future carrying value of Vidalia if not offset by other tariff and policy positions, and market factors
- Syrah has had significant recent operating and cash flow losses and there is a risk these losses continue in the future in the absence of market developments, policy measures, the maintenance or improvement of market pricing, and/or a successful ramp-up of key assets to targeted levels. This may impact Syrah's future liquidity outlook, its access to capital and negatively impact its share price. Please refer to Key Risk 2 (Future Funding Requirements for Operating Losses)

Notes: Prior corresponding period is not comparable due to Balama's extended non-operating period. See ASX releases 12 December 2024 and 23 July 2025.

1. CIF Destination Port. Based on third party customer sales.

2. FOB Nacala/Pemba. Operating cost is for the operating period and excludes fixed costs in non-operating periods.

3. Statutory net profit after tax.

4. Excludes restricted cash of ~US\$59m for reserves associated with the DOE loan, reserves associated with the DFC loan and proceeds in Syrah restricted project and operating accounts. US\$10m restricted cash is available to fund Balama operating and capital costs and US\$17m restricted cash is available to fund Vidalia operating and capital costs.

# Operational and financial outlook

## Balama

Syrah expects **Balama production and sales of ~23kt and ~20kt** in Q1 2026, including a recent breakbulk shipment to Indonesia in March 2026 demonstrating release of market inertia post-ITC determination

Syrah is targeting a **medium-term ramp-up of Balama to 200-240ktpa** of graphite production which is expected to result in C1 cash costs falling to US\$430-480/t

A ramp-up of Balama in the medium-term to targeted levels is dependent on market growth and developments, including policy initiatives to support ex-China producers

## Vidalia

Vidalia is producing high-quality AAM and has **full readiness for ramp-up** and is **market competitive with Chinese and Indonesia export AAM into the US**

Syrah is targeting commencement of commercial AAM sales to battery and OEM customers following qualification which is expected in 2H 2026 with **positive operating cash flow from 2H 2027 onwards**<sup>1</sup>

Cash flow to benefit from **45X Production Credits** with ~US\$7-9m p.a. expected through to end of 2029 and phasing down amount from 2030 to 2032<sup>1</sup>

## Corporate

**Forecast cash of US\$51m expected as at 31 March 2026** including US\$8m unrestricted cash (excluding Equity Raising net proceeds and the further US\$15m DFC loan disbursement)

Pro forma liquidity of up to US\$198m<sup>2</sup> **provides financial flexibility** to ramp-up assets towards targeted levels

Strengthened balance sheet with no **cash interest or principal repayments** for the next three years<sup>2</sup>

Syrah is targeting **positive operating cash flow** at **Balama** and **at the corporate level** in the medium-term which is linked to a successful ramp-up of key assets and market developments

Syrah's expectations regarding demand for its products, the pricing achievable for them, its ability to supply product and its forward-looking operating costs may not materialise as contemplated in this presentation, which would negatively impact Syrah's forward-looking liquidity. This may result in Syrah needing additional capital and/or impact Syrah's ability to continue as a going concern, either of which could significantly, negatively, impact the value of its shares.

### Notes:

1. Section 45X Production Credits for the 11.25ktpa AAM Vidalia facility operating at capacity are estimated to be ~US\$7-9m per annum. Refer to ASX releases dated 11 September 2025 and 28 January 2026.
2. The Strategic Funding Proposals are subject to execution of binding documentation, DFC and DOE approvals, regulatory approvals and Syrah shareholder approval and consideration given to the information included on slides 6 and 7.

# 3 Graphite and Anode Market Context

ersonal use only  
NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

# Balama's position in an undersupplied ex-China market

Balama is well-positioned to capitalise on increasing ex-China natural graphite demand

NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

Ex-China battery market **growing 14% per year**<sup>1</sup> supported by commercial and geopolitical supply chain objectives

**Significant progress contracting Balama volumes ex-China** through offtakes with POSCO (24-60ktpa), NextSource (up to ~7ktpa<sup>3</sup>), Westwater, and Vidalia feedstock (up to ~21ktpa)

**Near term sales opportunities continue to Indonesia** (multiple breakbulk shipments expected to be delivered in 2026), **US Defense Logistics Agency** (proposal submitted and being evaluated) and **engaged commercially with several other parties**

Syrah **completed sales of 40kt to Indonesia (for consumption in AAM production) and the United States** during 2H 2025

Expected natural graphite market deficit requires **long term forecast price of almost US\$1,000/t<sup>2</sup>** to incentivise new ex-China supply sources

Balama is the **largest ex-China supplier of natural graphite and underpins Syrah's strategy** for further AAM capacity development at Vidalia and globally

## Notes:

1. Source: Benchmark Mineral Intelligence Natural Graphite Forecast Report, Q4 2025.

2. Based on long-term natural graphite price forecast (FOB East Africa; 2040 real; -100mesh) from Benchmark Mineral Intelligence Natural Graphite Forecast Report, Q4 2025. See Key Risks section for further information.

3. Average annual volumes based on an up to ~68kt in aggregate volume and seven-year term. Actual annual delivery volumes under the offtake agreement may vary year to year.

# Demand for Syrah's products is forecast to grow significantly

The energy transition and battery deployment underpins growth in natural graphite demand

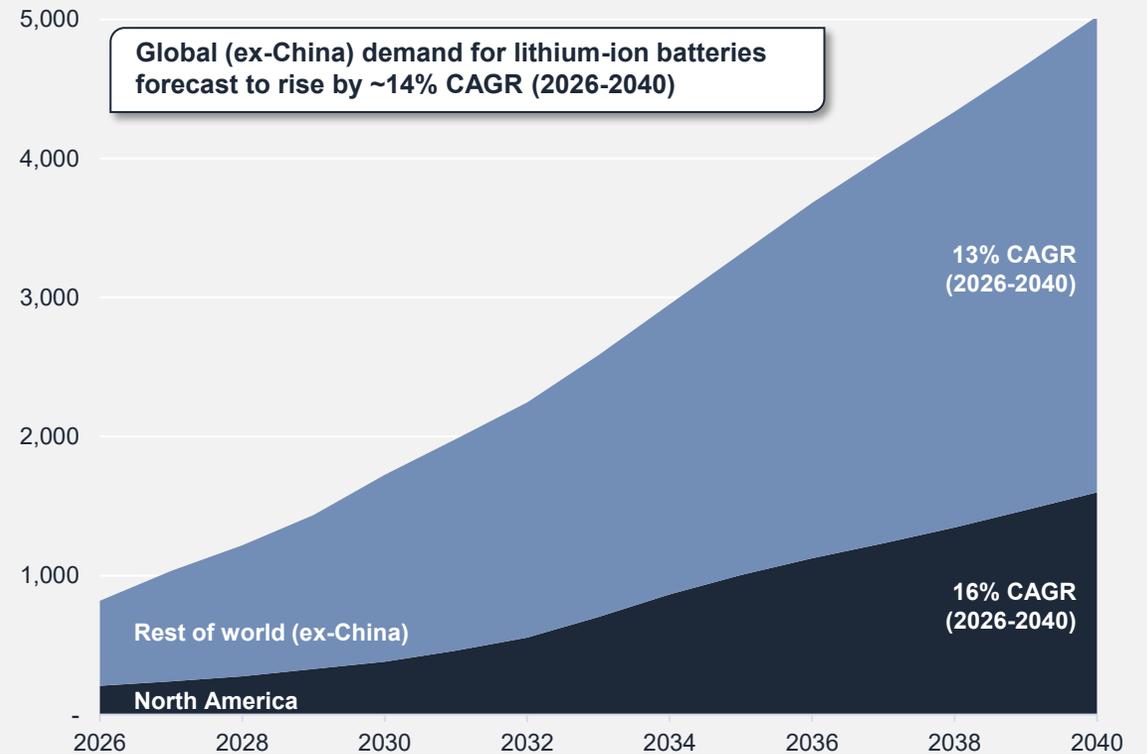

## Higher prices required for new supply to close expected future deficits

Ex-China natural graphite demand and supply (ktpa)<sup>1</sup>

## Energy transition accelerating demand for Syrah's products

Battery cell demand by geography (MWh, ex-China)<sup>1</sup>

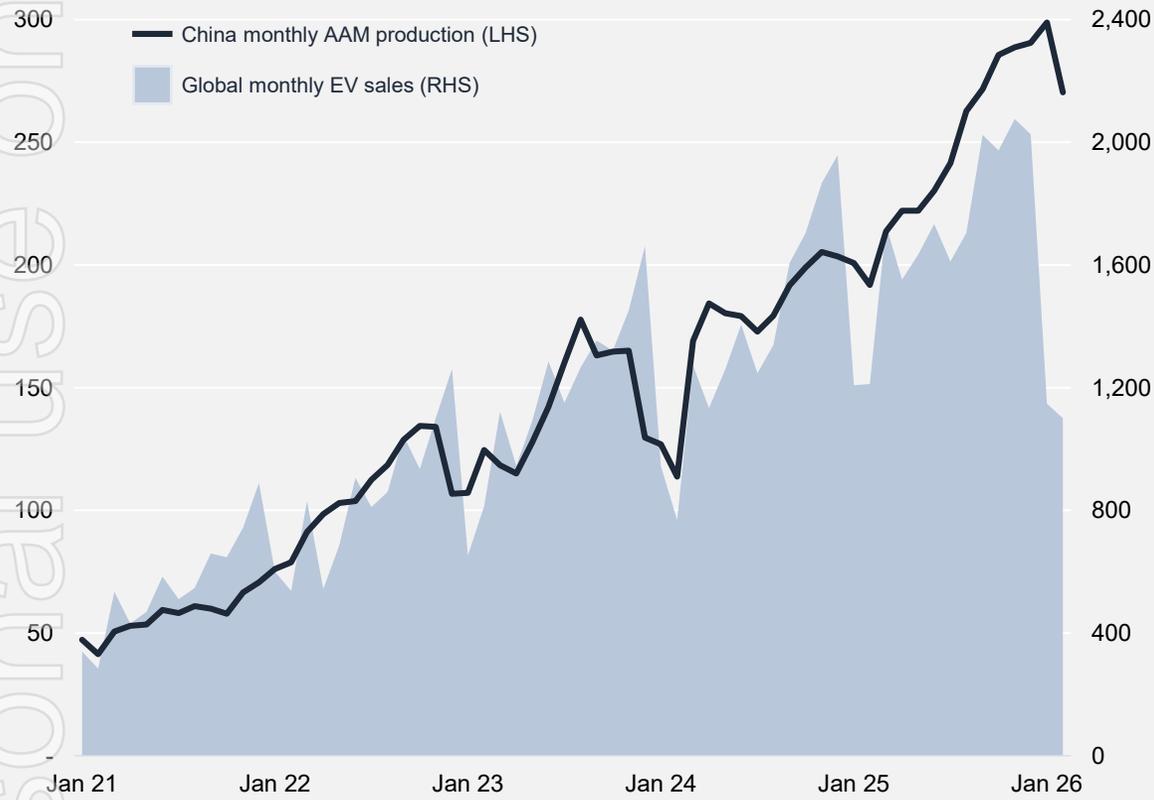

Notes:  
1. Source: Benchmark Mineral Intelligence Natural Graphite Forecast Report, Q4 2025.

# Syrah's end-markets are scaling

Global EV market growth, including in the US, has driven substantial recent growth in Syrah's end markets

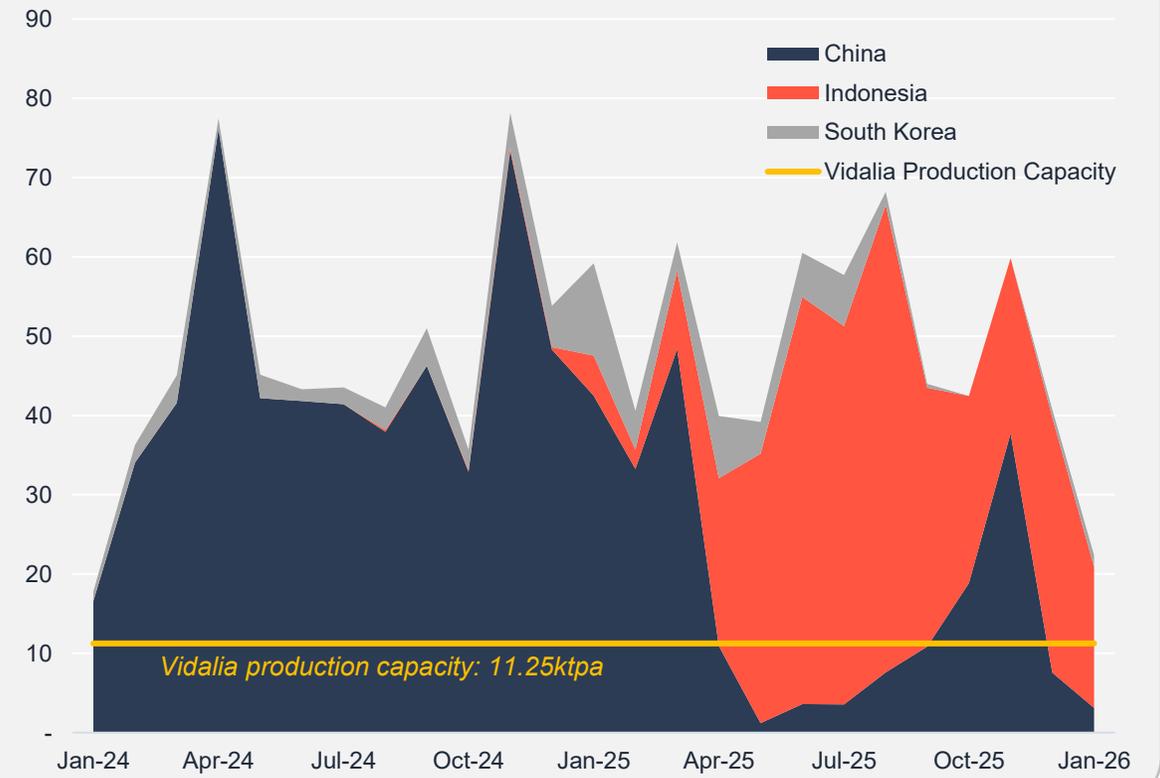

## Global EV Adoption Accelerating Natural Graphite Demand

Global monthly EV sales ('000 Units)<sup>1</sup> and China monthly AAM production (kt)<sup>2</sup>

## Rising US Imports of Ex-China Natural Graphite Anode Materials

Natural graphite AAM exports to the US (kt)<sup>3</sup>

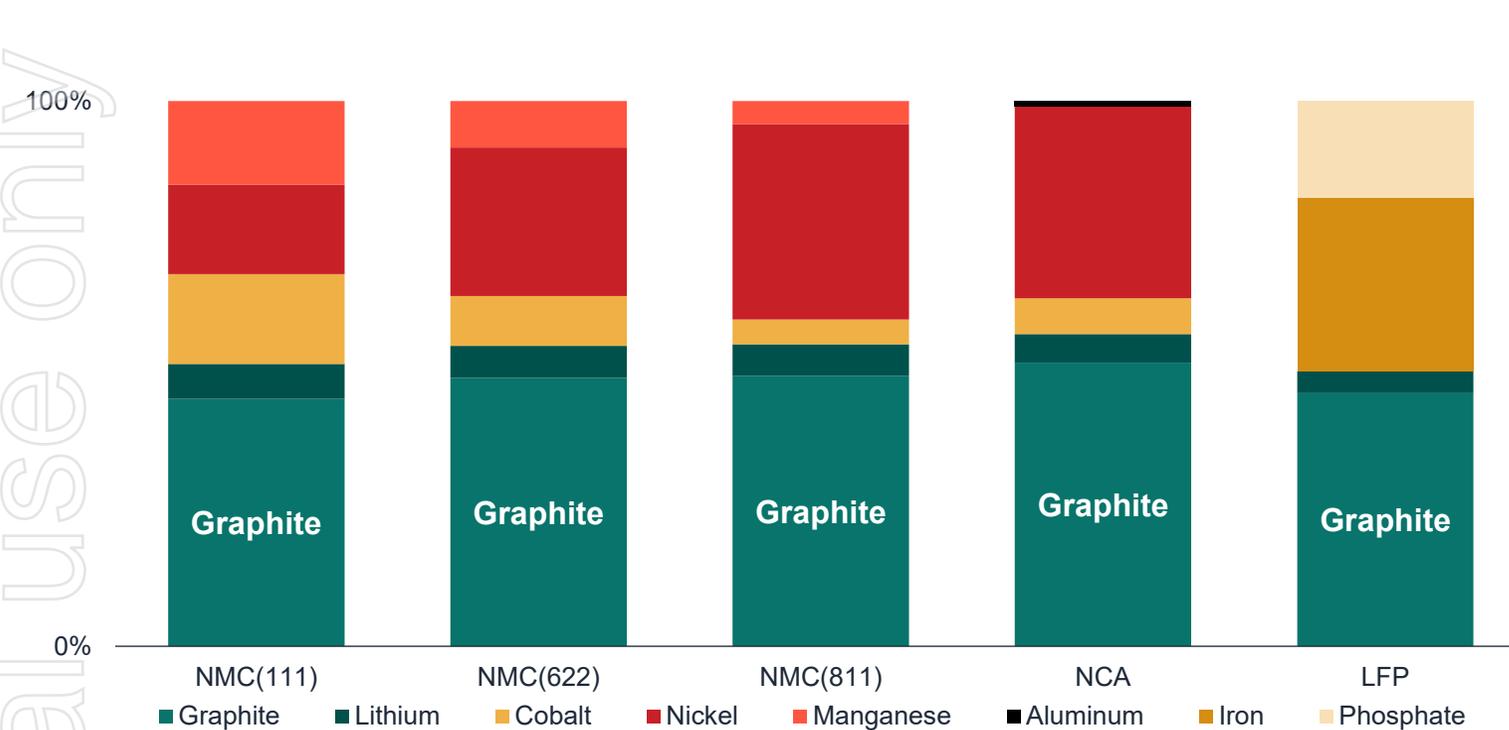

Notes:

- 1. Data sourced from Global Data - Hybrid & EV Bulletin February 2026 and Rho Motion.
- 2. Data sourced from ICCSino.
- 3. Includes merchandise imported under HTSUS codes 25041050 and 38019000. Note that certain merchandise imported under these HTSUS codes may not be used as natural graphite AAM and natural graphite AAM imported into the United States may not be recorded under these HTSUS codes. Exports to the US from certain countries have been excluded.

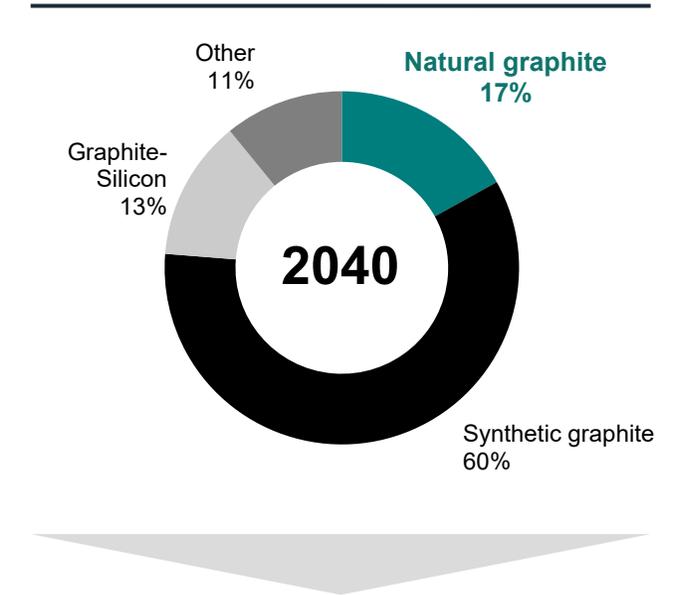

# Graphite is fundamental to battery production

Lithium-ion batteries used in EV and stationary storage are highly reliant on graphite materials

Critical mineral composition of batteries<sup>1</sup>

Global AAM forecast demand for batteries<sup>2</sup>

**Graphite contributes to a significant amount of the bill of raw materials in all current commercial battery chemistries**

**Synthetic graphite AAM overcapacity and intense market competition has led to a significant reduction in natural graphite's share of battery anodes in China**

**Natural graphite has a greater share of battery anodes in the ex-China battery industry relative to the Chinese battery industry**

# Equity Raising overview

## Fully underwritten ~US\$72m Equity Raising

<b>Offer Structure</b>	<ul style="list-style-type: none"> <li>Syrah is undertaking a fully underwritten 1-for-1.32 pro-rata non-renounceable entitlement offer to raise approximately ~A\$104m (~US\$72m<sup>1</sup>) (“Entitlement Offer”)</li> <li>Approximately 994 million new fully paid ordinary shares (“New Shares”) to be issued under the Entitlement Offer, representing approximately 76% of existing shares on issue</li> </ul>
<b>Offer Price</b>	<ul style="list-style-type: none"> <li>The entitlement offer will be conducted at A\$0.105 per New Share ( “Offer Price”) representing a:             <ul style="list-style-type: none"> <li>– 17.8% discount to the Theoretical Ex-Rights Price (“TERP”)<sup>2</sup> of A\$0.128 per share; and</li> <li>– 27.6% discount to Syrah’s closing price of A\$0.145 per share on the ASX as at 24 March 2026</li> </ul> </li> </ul>
<b>Institutional Offer</b>	<ul style="list-style-type: none"> <li>The institutional component of the entitlement offer (“Institutional Entitlement Offer”) will be conducted by way of a bookbuild process, opening on Thursday, 26 March 2026 and closing on Thursday, 26 March 2026</li> <li>Entitlements under the Institutional Entitlement Offer that are not taken up and entitlements of ineligible institutional shareholders and ineligible retail shareholders under the Entitlement Offer will be offered for sale in the bookbuild</li> </ul>
<b>Retail Entitlement Offer</b>	<ul style="list-style-type: none"> <li>The retail component of the Entitlement Offer (“Retail Entitlement Offer”) will open at 10.00am (Melbourne time) on Thursday, 2 April 2026 and close at 5.00pm (Melbourne time) Friday, 17 April 2026</li> <li>Only eligible retail shareholders with a registered address in Australia or New Zealand, as at 7:00pm (Melbourne time), on Monday, 30 March 2026 (“Record Date”) may participate in the Retail Entitlement Offer</li> <li>Under the Retail Entitlement Offer, eligible retail shareholders that take up their full entitlement may also apply for additional New Shares in excess of their entitlement at the Offer Price (allocation of oversubscriptions subject to the overall level of participation in the Entitlement Offer and at the discretion of Syrah’s Board of Directors)</li> </ul>
<b>Ranking</b>	<ul style="list-style-type: none"> <li>New Shares issued under the entitlement offer will rank pari passu with existing shares from the date of issue</li> </ul>
<b>Lead Manager &amp; Underwriter</b>	<ul style="list-style-type: none"> <li>Macquarie Capital (Australia) Limited is acting as Sole Lead Manager, Underwriter and Bookrunner to the entitlement offer</li> <li>The Equity Raising is fully underwritten</li> </ul>
<b>AustralianSuper</b>	<ul style="list-style-type: none"> <li>AustralianSuper has committed to:             <ul style="list-style-type: none"> <li>– Apply for and take up its full entitlement under the Institutional Entitlement Offer, being ~A\$35m<sup>3</sup></li> <li>– Sub-underwrite the Institutional Entitlement Offer and Retail Entitlement Offer up to ~A\$69m (up to ~66% of the Equity Raising)</li> </ul> </li> <li>On completion of the Equity Raising, AustralianSuper’s shareholding in Syrah will be between ~34% and ~63%, depending on the final take up under the Entitlement Offer<sup>3</sup></li> </ul>
<b>Syrah Directors</b>	<ul style="list-style-type: none"> <li>Syrah Directors Sara Watts and Rob Edel intend to participate in the entitlement offer in respect of shares they hold</li> </ul>

Notes:

1. A\$ proceeds converted into US\$ based on the USD/AUD exchange rate of 0.6939.

2. TERP is the theoretical ex-rights price at which New Shares should trade immediately after the ex-date for the entitlement offer. TERP is a theoretical calculation only and the actual price at which New Shares trade immediately after the ex-date for the entitlement offer will depend on many factors and may not equal TERP.

3. Based on Syrah shareholding of AustralianSuper (direct and indirect holdings) as at 24 March 2026. AustralianSuper’s pro-rata under the Entitlement Offer is calculated by the direct holding only. Refer to Slide 15 for further detail.

# Strategic Funding Proposals next steps

- Tranche 2 debt-for-equity swap subject to FIRB approval and Syrah shareholder approval
- Syrah and its financial adviser, Macquarie Capital, continue to progress the strategic partnering and investment process<sup>1</sup>
- Syrah is targeting financial close for the Strategic Funding Proposals in the second half of 2026:
  - Syrah will dispatch an explanatory memorandum to shareholders with further details in due course
  - Syrah will keep shareholders updated on the proposed date for a general meeting to approve the Strategic Funding Proposals and the Tranche 2 DFC debt-for-equity swap
- Issuance of the new equity, warrants and CLNs by Syrah proposed in the non-binding Strategic Funding Proposals from DOE and from DFC and AustralianSuper are non-binding and subject to the following key conditions, among others:
  - Execution of legally binding transaction documentation
  - DFC and DOE approvals
  - Government approvals (including Mozambique and Australia)
  - Regulatory approvals (including ASX approvals)
  - Syrah shareholder approval (>50% of shares which are permitted to vote in favour and which are voted)<sup>2</sup>
- The Strategic Funding Proposals are non-binding and subject to approvals, refer to Key Risk 1 for further information<sup>2</sup>

## Notes:

1. See Partnership Process section in Syrah's September 2025 quarterly activities report released to ASX on 28 October 2025.

2. In general terms, AustralianSuper, DOE and DFC (and their respective associates) may not be able to vote any shares held in favour of such shareholder approval resolutions to the extent they are benefitting from the resolution. In general terms, the shareholder resolutions will need to be passed by a majority of votes held by shareholders who are permitted to vote on the resolutions. To the extent such approvals are not obtained, some or all of the aspects of the Strategic Funding Proposals may not be capable of implementation.

# 5 Key terms of the Strategic Funding Proposals

ersonal use only

# Summary of DFC/AustralianSuper non-binding proposals (1/2)

Following initial engagement by Syrah, Syrah has received strategic funding proposals from DFC and AustralianSuper (**Strategic Funding Proposal**), the key terms of which are set out below. These matters are subject to, among other things, agreement of binding documentation, government and regulatory approvals (including Government of Mozambique), DFC and DOE approvals and shareholder approval. Accordingly, while the parties seek to progress matters on the following terms, there is no certainty or guarantee that the matters in the Strategic Funding Proposals will become binding, or if they do become binding, if they will become binding on the terms set out below.

<b>Parties</b>	<ul style="list-style-type: none"> <li>Syrah Resources Limited (<b>Syrah</b>), United States International Development Finance Corporation (<b>DFC</b>) and AustralianSuper Pty Ltd as trustee for AustralianSuper (<b>AustralianSuper</b>).</li> </ul>
<b>DFC debt-for-equity swap and Contingent DFC funding</b>	<ul style="list-style-type: none"> <li>Further disbursement of US\$15m by DFC via the DFC loan, subject to DFC approvals (refer to slide 7 for further details)</li> <li>Conversion of up to US\$31m of the DFC loan into Syrah ordinary shares at the Offer Price within 30 business days of receipt of funds from the equity raise (<b>Tranche 1 DFC Equity Conversion</b>). Refer to slides 11 and 13 for further details.</li> <li>The remaining balance of the US\$31m of the DFC loan is converted into Syrah ordinary shares at the Offer Price, subject to FIRB approval and shareholder approval if required (<b>Tranche 2 DFC Equity Conversion</b>) (together the Tranche 1 DFC Equity Conversion and Tranche 2 DFC Equity Conversion are the <b>DFC Equity Conversions</b>). Refer to slides 12 and 13 for further details.</li> <li>Conversion of remaining aggregate principal amount of the DFC loan (together with all interest and fees due) following the DFC Equity Conversions into a secured convertible note issued by Syrah (<b>Primary DFC Notes</b>)</li> <li>DFC may disburse up to an additional US\$30m at its sole discretion upon request by Syrah, if needed for Balama, in exchange for the issuance by Syrah of additional secured convertible notes (<b>DFC Secondary Notes</b>) (together the DFC Primary Notes and the DFC Secondary Notes are the <b>DFC Notes</b>)</li> </ul>
<b>AustralianSuper convertible notes</b>	<ul style="list-style-type: none"> <li>Series 4, 5 and 6 Notes (together with all accrued interest) held by AustralianSuper to be reissued as or amended to be one series of convertible notes equal to principal and accrued interest at the time of financial close on the terms set out below (<b>AustralianSuper Primary Notes</b>)</li> <li>AustralianSuper may invest up to an additional US\$38m in exchange for the issue of up to four tranches of additional convertible notes by Syrah (<b>AustralianSuper Secondary Notes</b>) (together the AustralianSuper Primary Notes and the AustralianSuper Secondary Notes are the <b>AustralianSuper Notes</b>)</li> <li>AustralianSuper will invest up to US\$28m in exchange for AustralianSuper Secondary Notes within six months of the date of this document, net of any other agreed funding received by Syrah. The remaining minimum US\$10m may be disbursed on the earlier of (i) when AustralianSuper agrees to disburse such amounts at its sole discretion upon a request from Syrah; and (ii) pro rata when the DFC disburses the final equivalent \$10m portion of its DFC Secondary Notes</li> </ul>
<b>Key terms of DFC Notes and AustralianSuper Notes</b>	<ul style="list-style-type: none"> <li>Face value – Equal to principal and accrued interest and fees at the time of financial close for the DFC loan and AustralianSuper Series 4, 5 and 6 Notes</li> <li>Maturity date – Three years from issuance date (which is subject to satisfaction of CPs noted below)</li> <li>Interest rate – 11.0% per annum, capitalised quarterly</li> <li>Security – DFC Notes will be secured by DFC's existing Twigg security package and shares and assets of the guarantors including a guarantee by Twigg and other Syrah entities. AustralianSuper Notes are unsecured</li> <li>Events of default – DFC (events of default include cross-default to defaults under the Omnibus Agreement, including DFC policy requirements); AustralianSuper (customary events of default)</li> <li>Change of control (DFC Notes only) – Includes notes are repayable in the event of any change of control or sale of Syrah and any of its affiliates, without prior DFC consent, to anyone other than a purchaser who is wholly owned and controlled by Australian or US entities or persons (subject to satisfactory completion of KYC)</li> <li>DFC and AustralianSuper may, at their election at any time the notes are outstanding, convert any of their outstanding notes into equity. DFC and AustralianSuper must convert 50% of their respective outstanding notes upon Syrah obtaining a secondary listing in the US, subject to the market price being at or above the conversion price.</li> </ul>

**Investors should also consider the Key Risks section**

NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

Syrah Resources Limited

# Summary of DFC/AustralianSuper non-binding proposals (2/2)

## Key terms of DFC Notes and AustralianSuper Notes (continued)

- DFC Notes and AustralianSuper Notes will convert into Syrah ordinary shares at the conversion price of A\$0.1982 per share, being the 30-day volume weighted average price of Syrah shares up to 24 March 2026
- Each of DFC and AustralianSuper may appoint a technical adviser in respect of Balama and Vidalia
- Following the completion of Tranche 1 of the DFC Equity Conversions, DFC has the right to appoint a financial advisor to lead the strategic investor sale process<sup>1</sup>
- Following the DFC Equity Conversions, DFC has an anti-dilution right in order to maintain a minimum 9.95% shareholding in Syrah
- DFC has a right, provided that DFC's exercise of this right is subject to FIRB approval (as required), to: (i) appoint a Board observer immediately, and (ii) nominate a Board director at the completion of the Tranche 1 DFC Equity Conversion until DFC has a 9.95% shareholding and then for so long as it retains a minimum 9.95% shareholding, and (iii) two Board directors at a minimum 20% shareholding. AustralianSuper has a right to nominate a Board director for as long as it retains a minimum 9.95% shareholding, and nominate two Board directors at a minimum 20% shareholding
- Syrah is required to explore a secondary listing in the US over the next 12 months
- Syrah will not have an early redemption right for the DFC Notes and AustralianSuper Notes

## Definitive documents and conditions precedent

- The Term Sheet is non-binding and subject to the negotiation and execution of definitive transaction documents and the satisfaction (or waiver) of conditions precedent
- Definitive/binding transaction documents to be agreed:
  - Omnibus Agreement comprising the terms of the warrants to be issued to DFC and the terms of the DFC Primary Notes and DFC Secondary Notes. The agreement will also contain certain covenants including with respect to key performance metrics, offtake agreements aligned to USG interests and maintenance of security;
  - Convertible Note Agreement between Syrah and AustralianSuper in respect of the AustralianSuper Primary Notes and AustralianSuper Secondary Notes; and
  - Any other necessary documentation
- Conditions precedent to the definitive documents include:
  - Successful completion of the US\$72m equity raising by 30 April 2026;
  - An extension to the forbearance agreement agreed between Syrah and DOE with respect to the DOE loan, including the release of the current 45X tax credit of US\$9.2 million;
  - Entry into security documentation and a joint and several guaranty provided by Twigg and other Syrah Group entities with respect to the secured DFC convertible notes;
  - All applicable government and regulatory approvals (including ASX, Government of Mozambique and Australian Foreign Investment Board approvals to the extent required), Syrah shareholder approval, third party consents and board approvals;
  - The DFC Equity Conversions and conversion of the remaining portion of the DFC loan to DFC Primary Notes;
  - Issuance of the DFC Equity Conversion Shares or issuance and immediate exercise of the DFC Equity Conversion Warrants
  - Conversion of US\$40m of the DOE Loan into secured convertible notes issued by Syrah;
  - Conversion of the AustralianSuper Series 4, 5 and 6 Notes to AustralianSuper Primary Notes;
  - Issue of US\$28m of the AustralianSuper Secondary Notes within 6 months of the date of this document unless alternative funding is provided by Syrah to be agreed by each of DFC, DoE and AustralianSuper; and
  - Issue of warrants to DFC under Waiver #9, issue of further warrants in connection with DFC's \$15 million loan disbursement, and, at DFC's election, simultaneously with the Tranche 2 DFC Equity Conversion, issue DFC (i) warrants in consideration for the DFC Equity Conversions immediately exercisable for the purchase of an additional 5% of Syrah ordinary shares on a fully diluted basis (including all warrants, the DFC Equity Conversions and the equity raise, but excluding all DFC Notes, DOE Notes and AustralianSuper Notes) (**5% Shares**) at an exercise price of AUD\$0.0001 per share, or (ii) 5% Shares at a price of AUD\$0.0001 per share, subject to all relevant approvals including by FIRB and ASX.

## Governing law

- DFC agreements: New York law
- AustralianSuper agreements: Victorian law

Notes: 1. See Partnership Process section in Syrah's September 2025 quarterly activities report released to ASX on 28 October 2025.

# Summary of DOE non-binding proposals (1/2)

Syrah has received a strategic funding proposals from DOE (“**Strategic Funding Proposals**”) the key terms of which are set out below. These matters are subject to, among other things, agreement of binding documentation, regulatory approvals, DFC and DOE approvals and shareholder approval. Accordingly, while the parties seek to progress matters on the following terms, there is no certainty or guarantee that the matters in the Strategic Funding Proposals will become binding, or if they do become binding, if they will become binding on the terms set out below.

<b>Parties</b>	Syrah Resources Limited ( <b>Syrah</b> ) and the United States Department of Energy ( <b>DOE</b> )
<b>Forbearance Period</b>	<ul style="list-style-type: none"> <li>As previously disclosed by Syrah in ASX releases, certain events of default (not relating to any loan principal and interest payment obligations) have been triggered under Syrah’s loan agreement with DOE (<b>Loan Agreement</b>). Syrah entered into a forbearance agreement with DOE (<b>Forbearance Agreement</b>) on July 29, 2025 in relation to certain then-existing events of default under the Loan Agreement and cross-defaults arising under the DFC Loan Agreement, effective for 2 years. The Forbearance Agreement would be amended and restated pursuant to an omnibus agreement as part of the Strategic Funding Proposal.</li> <li>Effective from the date all conditions precedent (referred to below) are satisfied (the <b>Extended Forbearance Effective Date</b>), and so long as certain ‘Forbearance Termination Events’ do not occur, DOE’s agreement to forbear (as described further below) would be extended until April 20, 2029</li> </ul>
<b>Forbearance</b>	<ul style="list-style-type: none"> <li>During the period from the Extended Forbearance Effective Date until April 20, 2029, (the Forbearance Period), DOE would agree to forbear from the exercise and enforcement of remedies and would not otherwise bring any litigation, arbitration or other judicial proceedings, in connection with:             <ul style="list-style-type: none"> <li>certain events of default (including cross-defaults under the DFC Loan Agreement) existing as of the Extended Forbearance Effective Date and identified in the amended and restated Forbearance Agreement; and</li> <li>certain events of default that may arise during the Forbearance Period and are also identified in the amended and restated Forbearance Agreement.</li> </ul> </li> </ul>
<b>Additional termination events</b>	<ul style="list-style-type: none"> <li>In addition to the ‘Forbearance Termination Events’ in the existing Forbearance Agreement, the following, amongst others, are to be ‘Forbearance Termination Events’:             <ul style="list-style-type: none"> <li>Tesla Inc.’s (<b>Tesla</b>) alleged right to terminate the offtake contract (<b>Tesla Agreement</b>) ceases to be subject to a cure period satisfactory to DOE in its sole discretion;</li> <li>Syrah Technologies LLC’s (<b>Syrah Tech</b>) failure to provide DOE satisfactory evidence of its achievement of “Qualification” under the Tesla Contract by December 31, 2026; and</li> <li>Syrah Tech’s failure to provide DOE satisfactory evidence of “Full Production” and commencement of “Purchase Commitment” by Tesla or its “Authorised Purchaser” (each as defined in the Tesla Contract) on or before May 31, 2027.</li> </ul> </li> </ul>
<b>Conversion of portion of Loan Agreement</b>	<ul style="list-style-type: none"> <li>US\$40m of the aggregate principal amount of the DOE loan (together with all accrued interest and fees payable with respect to such portion) would be converted into a senior secured convertible loan note issued by Syrah (CLN).</li> </ul>
<b>Syrah Change of Control</b>	<ul style="list-style-type: none"> <li>DOE would agree to forbear from exercising remedies in respect of the event of default arising from AustralianSuper increasing its shareholding in Syrah above 33% due to the proposed DFC strategic funding proposal</li> </ul>

**Investors should also consider the Key Risks section**

NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

# Summary of DOE non-binding proposals (2/2)

## Key terms of CLN

- Face value: Approximately US\$40m
- Maturity Date: 3-year term from Issuance Date (which is subject to the satisfaction of the conditions to the Extended Forbearance Effective Date)
- Interest rate: 11.00% p.a. capitalised quarterly
- Conversion terms:
  - Convertible at DOE's election at any time from Issuance Date and up to maturity at DOE's discretion.
  - DOE must convert 50% of its outstanding notes upon Syrah becoming listed in the US, subject to the market price being at or above the conversion price.
- Conversion price: A\$0.1982 per share, being the 30-day volume weighted average price of Syrah shares up to 24 March 2026.
- Security: secured by DOE's existing security package including a guaranty by Syrah Tech and Syrah US Holdings Pty Ltd in respect of Syrah's obligations under the CLN Documents (Guaranty)
- Events of default: CLN events of default to include cross-default to Forbearance Termination Events and other Events of Default under the Loan Agreement, including DOE policy requirements.
- DOE may appoint a technical adviser in respect of Balama and Vidalia
- DOE has a right, provided that DOE's exercise of this right is subject to FIRB approval, to: (i) appoint a Board observer immediately and at all times following the Issuance Date unless DOE has a Director on the Board of Syrah and (ii) nominate a Board director for as long as it has and retains a minimum 9.95% shareholding, and two directors at a minimum of 20% shareholding
- Syrah is required to explore a US listing over the next 12 months
- Syrah will not have an early redemption right for the CLN

## Definitive documents and conditions precedent

- The Strategic Funding Proposals is non-binding and subject to the negotiation, internal approvals, the execution of definitive transaction documents and the satisfaction (or waiver) of conditions precedent
- Definitive/binding transaction documents to be agreed may include, but are not limited to:
  - Omnibus agreement comprising amended and restated forbearance agreement, all required finance document amendments (including an amendment to the Accounts Agreement to provide that proceeds of 45X Tax Credits shall be deposited into the Ramp-Up Reserve Account instead of the Revenue Account) and security confirmations
  - CLN documents
  - Guaranty
- Key conditions precedent to Extended Forbearance Effective Date:
  - Execution and delivery of the above documents
  - Successful completion of the equity raise by 30 April 2026
  - Up to US\$31m of the aggregate principal amount of the DFC loan converted to Syrah ordinary shares at the Offer Price within 30 business days following receipt of funds from the equity raise and the remaining balance of the US\$31m of the DFC Loan is converted into Syrah ordinary shares at the Offer Price, subject to FIRB approval
  - Further disbursement of US\$15m by DFC via the DFC loan prior to conversion of the DFC loan
  - Conversion of the aggregate principal amount (including all fees and interests) under the DFC loan to secured convertible notes issued by Syrah and conversion of the AustralianSuper Series 4, 5 and 6 Notes into one series of convertible notes (See summary of DFC/AustralianSuper non-binding proposal on slides 31 and 32)
  - All applicable consents and approvals (including DOE, DFC and ASX approvals) are obtained

**Investors should also consider the Key Risks section**

### Notes:

1. The Strategic Funding Proposals are subject to execution of binding documentation, DFC and DOE approvals, regulatory approvals and Syrah shareholder approval and consideration given to the information included in Key Risks 1 and 7. Accordingly, while the parties seek to progress matters on the terms and conditions in the Strategic Funding Proposals, there is no assurance, certainty or guarantee that the matters in such proposals will become binding, or if they do become binding, that they will become binding on the terms and conditions set out in full in Section 5. Investors should also consider the Key Risks section

2. A\$ balances converted into US\$ based on a USD/AUD exchange rate of 0.6939.

3. Equal to outstanding loan principal, accrued interest and fees (net of unamortised loan origination costs) as at 31 December 2025.

4. Further US\$15m DFC disbursement is subject to receipt of DFC approvals.

5. Equal to outstanding principal and accrued interest of the AustralianSuper Series 4, 5 and 6 Notes (net of unamortised establishment costs) as at 31 December 2025.

6. **The actual face value of new primary CLNs will depend on the outstanding principal, accrued interest and fees of DFC loan and AustralianSuper Series 4, 5 and 6 Notes at financial close. Interest will continue to be accrued on the existing loans and notes at the existing rates until the Strategic Funding Proposals reach financial close. DFC loan balance adjusted for US\$31m DFC debt-for-equity swap.**

7. Up to US\$28m AustralianSuper Secondary CLNs may be issued within six months, net of any other agreed funding received by Syrah. Issuance of the DFC Secondary CLNs (US\$30m) would be in DFC's sole discretion, upon request by Syrah. The remainder of the AustralianSuper Secondary CLNs (minimum US\$10m) will be issued pro rata with the final equivalent portion of the DFC Secondary CLN, unless otherwise issued upon request by Syrah in AustralianSuper's sole discretion.

Notes:

- Assumes AustralianSuper takes up its full entitlement under the Equity Raising of ~A\$35m and acquires all other shares offered under the Institutional Entitlement Offer and Retail Entitlement Offer pursuant to its sub-underwriting commitment.
- Syrah has 1,312m ordinary shares currently on issue. Analysis assumes no further Syrah ordinary shares are issued other than in connection with the Equity Raising.
- Includes ~17.5m warrants agreed to be issued to DFC (see ASX release dated 17 November 2025), further ~2.1m warrants expected to be issued to DFC with the further US\$15m DFC loan disbursement and additional warrants exercisable for the purchase of an additional 5% of Syrah shares on a fully diluted basis (excluding CLNs).
- Includes ~39m Performance Rights and ~4m Share Rights.
- Assumes existing AustralianSuper Series 4, 5 and 6 Notes are converted into Syrah shares based on principal value and accrued interest as at 31 December 2025 and a USD/AUD exchange rate of 0.6693 as at 31 December 2025.
- Analysis assumes that US\$40m unissued Secondary CLNs provided by DFC (US\$30m) and AustralianSuper (US\$10m) remain unissued through to maturity. Illustrative analysis assuming that no other changes occur until maturity that may impact this analysis.
- Based on a conversion price of A\$0.1982 per share (equal to the 30-day VWAP of Syrah shares up to and including 24 March 2026).
- The actual face value of new primary CLNs will depend on the outstanding principal, accrued interest and fees of the DFC loan and AustralianSuper Series 4, 5 and 6 Notes at financial close. Interest will continue to be accrued on the existing loans and notes at the existing rates until the Strategic Funding Proposals reach financial close. DFC loan balance adjusted for US\$31m DFC debt-for-equity swap.

ersonal use only

# Key risks (1/19)

## Key risks overview

This section discusses some of the key risks associated with any investment in Syrah, which may affect the value of Syrah shares. The risks set out below are not necessarily listed in order of importance and do not constitute an exhaustive list of all risks involved with an investment in Syrah. Before investing in Syrah, you should be aware that an investment in Syrah has a number of risks which are specific to Syrah and some of which relate to listed securities generally, and some of which are beyond the control of Syrah. Before investing in New Shares, you should consider whether this investment is suitable for you. Potential investors should consider publicly available information on Syrah (such as that available on the websites of Syrah and ASX), carefully consider their personal circumstances and consult their stockbroker, solicitor, accountant or other professional adviser before making an investment decision.

## 1. Non-binding Strategic Funding Proposals completion risk

The strategic funding proposals from DFC, DOE and AustralianSuper including, but not limited to, the debt-for-equity swap (**Strategic Funding Proposals**) are non-binding and subject to the negotiation and execution of definitive transaction documents and the satisfaction (or waiver) of conditions precedent, which include amongst other things, all applicable government, regulatory and shareholder approval (>50% of shares which are permitted to vote in favour and which are voted). There is no certainty that definitive agreements will be entered into on the terms currently contemplated in the Strategic Funding Proposals, or at all. If a transaction set out in the Strategic Funding Proposals does not proceed (including if the required government, regulatory or shareholder approvals are not obtained), or proceeds on materially different terms, or if the requisite shareholder approvals are not obtained, DOE and DFC may exercise and enforce the rights or remedies it has against Syrah for events of default under the DOE Loan and the DFC Loan respectively and the full amount of debt owing under the DFC Loan and DOE Loan may become immediately repayable.

Certain transactions set out in the Strategic Funding Proposals will require Syrah shareholder approval including for the issue of shares (including the issue of convertible notes as they may be converted into shares in certain circumstances) above Syrah's 15% placement capacity, the amendment and reissue of existing convertible notes and, to the extent a person may obtain voting power in excess of 20% of Syrah (or if already having voting power of more than 20%, to the extent such voting power increases), resolutions permitting such increase in voting power may be required under item 7 of section 611 of the Corporations Act. In general terms, AustralianSuper, the DOE and the DFC (and their respective associates) may not be able to vote any shares held in favour of such shareholder approval resolutions to the extent they are benefitting from the resolution. In general terms, the shareholder resolutions will need to be passed by a majority of votes held by shareholders who are permitted to vote on the resolutions. To the extent such approvals are not obtained, some or all of the aspects of the Strategic Funding Proposals may not be capable of implementation.

Further, in this scenario, in addition to the risks outlined above, Syrah may receive less capital than anticipated, need to seek alternative sources of funding and may experience adverse impacts on its financial position and ability to continue as a going concern, share price or market perception. As stated above, Syrah's continued ability to operate its business and effectively implement its business plan over time will depend in part on its ability to continue to satisfy conditions and meet its obligations and under the DOE Loan and the DFC Loan.

## 2. Future funding requirements for operating losses

Syrah has historically incurred losses and expects losses to continue until the end of 2028 as a result of current market prices and operational and corporate costs. Further, the recent negative determination by the US International Trade Commission (ITC) in the antidumping and countervailing duty investigation (see ASX announcement on 13 March 2026) may impact Syrah's forward-looking cash profile and extend the Company's timeframe to achieving positive operating cash flow. Syrah's ability to achieve and maintain positive free cash flow remains uncertain. Syrah is unable to predict when it will achieve positive operating cash flow, which is dependent on Balama sales, natural graphite prices, Vidalia commencing commercial sales, graphite market conditions and competition (amongst other factors). Syrah is targeting a medium-term ramp-up of Balama to 200-240ktpa of graphite production which is expected to result in C1 cash costs falling to US\$430-480/t. In respect of Vidalia, Syrah expects cash flow to benefit from 45X Production Credits with ~US\$7-9m p.a. expected through to end of 2029 and phasing down amount from 2030 to 2032. If such levels of production at Balama and Vidalia, and such cash flow benefit from 45X Production Credits are not able to be achieved, Syrah will not be able to meet its cash flow targets expressed in the presentation.

If Syrah is unable to generate sufficient operational cash flows to meet its financial obligations in the future, Syrah will need access to additional capital and there is no guarantee that additional funding through debt, equity or an asset sale will be available, or if it is, that such new funding will be on terms acceptable to the Company. The Company has access to additional capital under the Strategic Funding Proposals, which Syrah expects it will draw down on in the future, however, the proposals are non-binding and subject to the negotiation and execution of definitive transaction documents and the satisfaction (or waiver) of conditions precedent, which include amongst other things, all applicable government, regulatory and shareholder approval. A failure to secure sufficient liquidity may have a material adverse effect on the Company's ability to continue as a going concern.

# Key risks (2/19)

## 3. Commodity price risk

The demand for, and the price of, natural graphite flake and natural graphite Active Anode Material products (“Products”) is highly dependent on a variety of factors, including international supply and demand of graphite and substitutes, the price and availability of substitutes, actions taken by governments, and global economic and political developments (including, without limitation, the global geopolitical situation). Syrah’s operational and financial performance, as well as the ongoing economic viability of the Balama Graphite Operation, is heavily reliant on the price of graphite, among other factors. In this respect, prospective investors should note that, at present, there is no transparent market for graphite pricing; rather, prices are negotiated on a bilateral basis and therefore subject to factors including those set out below as well as the preferences and requirements of customers.

Depressed graphite prices and/or the failure by Syrah to negotiate favourable pricing terms (which terms may provide for fixed or market-based pricing) may materially affect the profitability and financial performance of Syrah. Further, failure by Syrah to negotiate favourable terms with agents or other third parties engaged to market and/or sell Products on its behalf, or failure by such agents or third parties to sell Products at favourable prices, may have a similar effect. Any sustained low price for Products (or low sale price achieved by Syrah, whether directly or via agents or other third parties) may adversely affect Syrah’s business and financial results and/or its ability to finance its current or planned operations and capital expenditure commitments.

Key factors which affect the price for the Products (many of which are outside the control of Syrah) include, among many other factors, the quantity of global supply of graphite as a result of the capacity utilization of existing mines, the commissioning of new mines and manufacturing facilities and the decommissioning of others; the approach to pricing by competitors (i.e. aggressive pricing at or below cost of production), political developments in countries which supply, produce and consume material quantities of Products including imposition of tariffs, duties, quotas, bans or export/import controls and regulation; the weather in such countries; the price and availability of substitutes; advancements in technologies and the uses and potential uses of the Products, and the demand for the applications for which the Products may be used (including, for example, in the steel, manufacturing, construction, and battery industries); the grade, quality, product mix and particle size distribution of the Products produced; and sentiment or conditions in the countries and industry sectors in which Syrah and its business/commercial partners sell or intend to sell the Products. Such sentiment or conditions are further affected by global trends and/or events such as the global geopolitical situation.

Given the range of factors which contribute to the price of the Products, and the fact that pricing is subject to negotiation, it is particularly difficult for Syrah to predict with any certainty the prices at which Syrah will sell its Products. The effect of changes in assumptions about future prices may include, amongst other things, changes to Mineral Resources and Ore Reserves estimates and the assessment of the recoverable amount of Syrah’s assets.

## 4. Market risk

Segments within the global natural graphite market, and more discrete geographic markets as a result of geopolitical factors, are currently undergoing significant supply and demand transformation. New supply of Products, principally driven by the Balama Graphite Operation, are competing directly with existing production sources, principally from China. Demand for lithium-ion battery energy storage continues to gain momentum, particularly in electric vehicles. This demand is expected to increase as adoption of electric vehicles increases. However, the rate and timing of such demand increase is uncertain, and any market forecasts provided may not be accurate.

As new and existing sources of supply compete against developing demand, there are a range of market scenarios and timeframes to which Syrah is potentially exposed. Syrah may need to adjust its operational and commercial strategies as market conditions unfold. This may include sourcing further capital to sustain and develop the business until sources of demand mature.

## 5. Mineral resources and ore reserves

Mineral Resources and Ore Reserves are estimates of mineralisation that have reasonable prospects for eventual economic extraction in the future, as defined by the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (“JORC Code”). JORC Code compliant statements relating to Syrah’s Ore Reserves and Mineral Resources are estimates only. An estimate is an expression of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available.

In addition, by their very nature, Resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change and may be updated from time to time. This may result in alterations to mining plans or changes to the quality or quantity of Syrah’s Ore Reserves and Mineral Resources, which may, in turn, adversely affect Syrah’s operations.

# Key risks (3/19)

## 5. Mineral resources and ore reserves (continued)

Mineral production involves risks, which even a combination of experience, knowledge and careful evaluation may not be able to adequately mitigate.

No assurance can be given that the anticipated tonnages or grade of minerals will be achieved during production or that the indicated level of recovery rates will be realised. Additionally, material price fluctuations, as well as increased production and operating costs or reduced recovery rates, may render any Resources or Reserves, including potential mineral Resources or Reserves containing relatively lower grades, uneconomic or less economic than anticipated, and may ultimately result in a restatement of such Resource or Reserve. This in turn could impact the life of mine plan and therefore the value attributable to mineral inventory and/or the assessment of recoverable amount of Syrah's assets and/or depreciation expense.

Moreover, short-term operating factors relating to such potential mineral Resources or Reserves, such as the need for sequential development of mineral bodies and the processing of new or different mineral types or grades, may cause a mining operation to be unprofitable in any particular period. In any of these events, a loss of revenue or profit may be caused due to the lower-than-expected production or ongoing unplanned capital expenditure in order to meet production targets, or the higher than expected operating costs.

## 6. Vidalia expansion

Expansion of the Vidalia Active Anode Material Facility is subject to a range of risks and variables which may impact upon Syrah's ability to achieve large scale Active Anode Material production at the site.

Syrah continues to rely on a number of third-party contractors and suppliers to undertake the expansion of the Vidalia site through construction and then to undertake operation of the expanded facility. If Syrah and those contractors or suppliers do not manage the project effectively or consistently with Syrah's expectations, construction may be delayed or cost more than anticipated or not operate as anticipated. Such contractors or suppliers may not be available to perform services for Syrah when required or may only be willing to do so on terms that are not acceptable to Syrah. Further, construction and operations may be constrained or hampered by capacity constraints, mobilisation issues, plant, equipment, materials and staff shortages, weather impacts, importation issues, industrial and environmental accidents, industrial disputes and unexpected increases in the costs of labour, consumables, spare parts, plant and equipment, and IT failures or disruptions and other global trends or events (such as extreme health events and global geopolitical uncertainty and national or regional governmental response to such events). In the event that a contractor or supplier underperforms or is terminated by Syrah, Syrah may not be able to find a suitable replacement on satisfactory terms within a reasonable time or at all. These circumstances may have a material adverse effect on the timeliness and cost of the construction of the expansion of the Vidalia Active Anode Material Facility or its operations.

Further, expansion of the Vidalia Active Anode Material Facility may not deliver the volumes, production efficiencies or product quality expected by Syrah. This could occur where plant and equipment does not perform as required or as expected, including in accordance with its nameplate design capacity. In such circumstances, Syrah may be required to make additional investments in plant and equipment.

Delays in construction or underperforming operations could result in cost overruns, or impact customer arrangements, which may result in a reduction in revenues, contractual claims against Syrah by customers, or deteriorating relationships with customers. Cost overruns may also result in the plant expansion not delivering the returns Syrah expects, and as a result negatively impact its financial performance.

Syrah is progressing transition engineering, permitting and other long lead procurement activities on the expansion of Vidalia's production capacity to 45ktpa AAM, inclusive of 11.25ktpa AAM ahead of a final investment decision proposal to be considered by the Syrah Board. The expansion has a capital expenditure estimate of US\$539m as evaluated in the Definitive Feasibility Study and other associated costs of the project. The expansion is dependent on Syrah obtaining appropriate and timely funding, securing sufficient offtake arrangements, and on the timing of the final investment decision. These factors are interdependent and there is no guarantee that they will resolve simultaneously or when desired by the Company.

# Key risks (4/19)

Details of the sources and uses of the funds to be raised under the Offer are set out on slide 11 of this presentation. The funds raised under the Offer, together with Syrah's existing cash reserves, are currently expected to be sufficient, and will be used to fund operations and capital requirements of the Vidalia Active Anode Material Facility to achieve initial ramp-up to commercial production, to fund capital costs for the Balama Graphite Operation including development of tailing storage facilities, through to production volumes which would underpin break-even profitability, loan restructuring costs and costs of the Offer and to support corporate and working capital requirements. However, no assurance can be given by Syrah that its short-term funding requirements will not change owing to events that unexpectedly and adversely impact Syrah's business. For example, if any of the risks identified in this 'Key Risks' section were to occur and materially and adversely impact Syrah's business, including risks associated with the operation of the Vidalia Active Anode Material Facility, commodity price risks, market risks, operational risks, shipping constraints, loan default risks and counterparty risks, then Syrah may require additional funding in the short term.

Syrah requires significant capital to develop and grow its business and expects to incur expenses, including those relating to construction, procurement of equipment, research and development, regulatory and lender compliance, operations, sales and distribution as Syrah builds its brand and market its Products and general and administrative costs as Syrah scales its operations. The Company's ability to become profitable in the future will depend on its ability not only to successfully market its Products, but also to control its costs, and will require the Company to obtain additional funding. In particular, Syrah's continued ability to operate its business and effectively implement its business plan over time will depend in part on its ability to continue to satisfy conditions and meet obligation of the US Department of Energy loan ("DOE Loan"), and the US International Development Finance Corporation loan ("DFC Loan"), generate free cash flow, to raise funds for operations and growth activities and to service, repay and refinance debts as they fall due. While Syrah is producing saleable Products from the Balama Graphite Operation, it is not yet cash flow positive. Syrah may also require additional financing, in addition to cash reserves, to meet operation and capital expenditure requirements for the Balama Graphite Operation, the Vidalia Active Anode Material Facility activities and general administrative expenditures, as well as acquisitions and new or existing projects. This includes any further optimisation projects (including Vanadium) at Balama for which Syrah may require additional funding in the future to execute on that strategy. Syrah's ability to service its debt depends upon its financial position, performance and cash flows which to some extent are subject to factors beyond the control of Syrah. If Syrah is unable to meet its repayment obligations, it may face additional financial penalties, higher interest rates or difficulty obtaining further funding in the future. There is also a risk that any covenants related to financial performance and position may be breached and the facilities may be repayable sooner than anticipated.

There can be no guarantee that Syrah will be able to raise additional funding on acceptable terms or at all. An inability to obtain finance on acceptable terms or at all may cause, among other things, substantial delays in, or prevent, the operation of the Balama Graphite Operation, potential Vanadium development and the operation and further expansion of the Vidalia Active Anode Material Facility. To the extent that Syrah does require funding for its future capital needs, the availability and terms of such funding are uncertain and may be less favourable to Syrah than anticipated, which may negatively impact on Syrah's future profitability and financial flexibility. Funding terms, including under the DOE Loan and DFC Loan, may change or place restrictions on the manner in which Syrah conducts its business and impose limitations on Syrah's ability to execute its business plan and growth strategies (including its downstream strategy).

Under the terms of the convertible notes issued to AustralianSuper as summarised in Syrah's ASX announcements on 27 April 2023, 26 June 2023 and 30 July 2025, there is a possibility that the convertible notes may need to be redeemed (wholly or in part) either at maturity or earlier in accordance with the terms of the convertible notes. Specifically, Syrah may be required to redeem the Notes for cash, if: (i) AustralianSuper has not elected to convert the convertible notes prior to maturity (approximately 5 years from issue); (ii) a third party takeover offer or scheme of arrangement in respect of all of the shares of Syrah becomes unconditional, and AustralianSuper has not elected to convert the convertible notes into fully paid ordinary shares of Syrah; or (iii) AustralianSuper elects to redeem rather than convert the convertible notes in connection with an event of default (which includes customary events such as in relation to failure to repay amounts due, insolvency events, committing an event of default under any of its debt financing arrangements over an agreed cap, liabilities over an agreed cap in respect of a decision by a court or similar body, fundamental and material changes to business undertaking, ceasing to be listed on the ASX or any breach of warranty or representation).

As set out on slides 31-32, Syrah has received Strategic Funding Proposals from DFC and AustralianSuper pursuant to which Syrah and AustralianSuper intend to negotiate and execute definitive transaction documents to restructure AustralianSuper's outstanding convertible notes including in relation to extending the maturity date and amending the conversion price, which may be subject to regulatory, government and Syrah shareholder approval. Please see summary of the non-binding Strategic Funding Proposals with DFC and AustralianSuper on slides 31-32 of this presentation for further information.

## 7. Liquidity and capital management / funding risk

# Key risks (5/19)

## 7. Liquidity and capital management / funding risk (continued)

Post implementation of the Strategic Funding Proposals, the Liquidity and Capital Management Financial Risk will continue and there remains a risk for investors that Syrah cannot issue the Secondary CLNs and the company cannot repay or refinance its senior loan and Primary and Secondary CLNs at maturity in three years, this may pose a risk for the company in terms of being required to raise additional capital, ownership dilution from a future debt-for-equity swap or an event of default. These factors may impact Syrah's ability to operate as a going concern and negatively impact the value of Syrah's shares.

If the Company raises additional funds through collaboration and licensing arrangements with third parties, the Company may have to relinquish some rights to technologies or product candidates on terms that may not be favourable. Any additional capital raising efforts may divert management from day- to-day activities, which may adversely affect the ability to develop and commercialize our current and future product candidates, if approved. If the Company is unable to raise capital when needed or on acceptable terms, the Company may be forced to delay, reduce or altogether cease certain operations or future commercialisation efforts.

## 8. Loan default risks

Under Syrah's loan facilities with DOE and DFC, and the forbearance agreement with DOE (**Forbearance Agreement**), it must comply with financial and other covenants including holding minimum cash in certain loan reserves. Should Syrah default on its obligations under these arrangements (including the obligation to meet financial covenants) one or more events of default will occur.

As previously disclosed by Syrah in ASX announcements, certain events of default (not relating to any loan principal and interest payment obligations) have been triggered under the DOE Loan. DOE has agreed with Syrah to forbear from the exercise and enforcement of any rights or remedies it has against Syrah for a period of 2 years (subject to earlier termination upon the occurrence of certain termination events) under the Forbearance Agreement (**Forbearance Period**). Certain termination events have occurred under the Forbearance Agreement during the Forbearance Period, accordingly, any unpaid loan principal and interest payments accruing including any late fees are immediately due and payable and Syrah may have to sell some assets to repay outstanding amounts. As set out on slides 33-34, Syrah has received a non-binding strategic proposal from DOE, pursuant to which the parties intend to negotiate and execute definitive transaction documents for DOE to extend the period of forbearance for a further 3 years to April 2029 and convert up to US\$40m of the aggregate principal amount of the DOE Loan (together with all accrued interest and fees payable with respect to such amount) into a secured convertible note issued by Syrah. Please see summary of the non-binding proposal with DOE on slides 33-34 of this presentation for further information.

As previously disclosed by Syrah in ASX announcements, certain events of default (not relating to any loan principal and interest payment obligations) also currently exist under the DFC Loan, which DFC has waived conditionally or temporarily. In addition, there are events of default which have arisen since the last waiver agreement was entered into with DFC on November 14, 2025 which Syrah is discussing with DFC. If Syrah does not comply with the terms of such waivers, the full amount of debt may become immediately repayable, and Syrah's lenders may enforce the security granted and sell some of all of Syrah's assets if Syrah does not have sufficient funds to repay such loans. As set out on slides 31-32, Syrah has received a Strategic Funding Proposals from DFC and AustralianSuper under which Syrah and DFC intend to negotiate and execute definitive transaction documents for DFC to convert the entire aggregate principal amount of the DFC Loan (together with all interest and fees) into a secured convertible note issued by Syrah. Please see summary of the non-binding Strategic Funding Proposals with DFC and AustralianSuper on slides 31-32 of this presentation for further information.

There is also no guarantee that DFC will continue to waive existing or new events of default under the DFC Loan, or that Syrah will continue to comply with the terms of such waiver. In this scenario, the full amount of debt may become immediately repayable, and Syrah's lenders may enforce the security granted and sell some of all of Syrah's assets if Syrah does not have sufficient funds to repay such loans.

Further, the convertible notes proposed to be issued to DFC, AustralianSuper and DOE under the Strategic Funding Proposals will have a maturity date of 3 years from the issuance date. In the event Syrah obtains a secondary listing in the US, 50% of the outstanding notes are to be converted to Syrah shares, to the extent not already converted, subject to the market price being above the conversion price. If there are any outstanding notes that have not been converted into Syrah shares at the maturity date, the principal amount and all interest owing under such convertible notes will become immediately repayable.

## 9. Operational risks

### **Balama Graphite Operation**

At Balama, there is a risk that difficulties may arise as part of the processing and production of minerals, including failures in plant and equipment, difficulties in obtaining and importing replacement equipment, and difficulties with product liberation, separation, screening, filtration, drying and bagging.

Other risks include, and are not limited to, weather, availability of materials, availability and productivity of skilled and experienced workers and contractors, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of labour, consumables, spare parts or plant and equipment, IT failures or disruptions, security concerns globally and in Mozambique, unanticipated changes in government regulation and risks associated with increased global uncertainty and/or global events such as military conflicts and extreme health events. Failures or deficiencies in processes, systems, plant and equipment required for the Balama Graphite Operation may be uncovered, and addressing such failures or deficiencies may result in Syrah incurring unexpected costs and production ramp up delays. Any of these outcomes could have a material adverse impact on Syrah's results of operations and financial performance.

In addition, there is a risk that unforeseen geological or geotechnical issues may be encountered when developing and mining ore reserves, such as unusual or unexpected geological conditions, pit wall failures, tailings storage facility failures, rock bursts, seismicity and cave ins. In any of these events, a loss of revenue may be caused due to the lower than expected production and/or higher than anticipated operation and maintenance costs and/or ongoing unplanned capital expenditure in order to meet production targets.

Due to the remoteness of the Balama Graphite Operation, Syrah is subject to an increased number of risks including a lack of access to key infrastructure, security requirements, rising fuel costs, changes to transport route conditions and requirements, unexpected delays and accidents that could, singularly or collectively, materially negatively impact upon Syrah's financial performance and position. Any prolonged interruption or negative changes in access to key infrastructure and logistics processes, including, for example, road access and integrity, bridge access and integrity, transport of product to the Port of Nacala, clearing of product through customs and shipping from the port, including shipping delays and rescheduling, could have significant adverse effects on the Syrah's ability to produce and sell product and therefore generate revenue, and/or the cost of those activities. Further, as the Balama Graphite Operation is located in a remote part of Africa, it is particularly susceptible to the availability of personnel, specialist services, parts, equipment and supplies on a timely basis.

Any inability to resolve any unexpected problems relating to these operational risks or adjust cost profiles on commercial terms could adversely impact continuing operations, Mineral Resources and Ore Reserves estimates and the assessment of the recoverable amount of Syrah's assets.

Production guidance and targets are as always subject to assumptions and contingencies which are subject to change as operational performance and market conditions change or other unexpected events arise. Any production guidance is dependent on a number of factors including maintenance and operation of the mine and plant without material equipment failure, loss of continuity of experienced personnel and achievement of recovery rates from the resource. These risks are discussed in more detail elsewhere in this section.

### **Vidalia Active Anode Material Facility**

At the Vidalia Active Anode Material Facility, there is a risk that difficulties may arise as part of the production of natural graphite active anode material, including failures in plant and equipment, difficulties in obtaining and importing replacement equipment, and difficulties with milling, purification or surface treatment.

# Key risks (7/19)

## 9. Operational risks (continued)

Other risks include, and are not limited to, weather, availability of materials, availability and productivity of skilled and experienced workers and contractors, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of labour, consumables, spare parts or plant and equipment, IT failures or disruptions, security concerns globally and in the United States, unanticipated changes in government regulation and risks associated with increased global uncertainty and/or global events such as military conflicts and extreme health events. Failures or deficiencies in processes, systems, plant and equipment required for the Vidalia Active Anode Material Facility may be uncovered, and addressing such failures or deficiencies may result in Syrah incurring unexpected costs and production ramp up delays. Any of these outcomes could have a material adverse impact on Syrah's results of operations and financial performance.

Any inability to resolve any unexpected problems relating to these operational risks or adjust cost profiles on commercial terms could adversely impact continuing operations, production estimates and the ability for Syrah to enter into further offtake agreements.

Operating cost guidance is subject to assumptions and contingencies which are subject to change as operational performance and market conditions change or other unexpected events arise. Any guidance is dependent on a number of factors including maintenance and operation of the facility without material equipment failure, loss of continuity of experienced personnel and the volume and quality of resource supply from Balama.

Given the vertical integration of Vidalia and Balama, any difficulties or delays impacting the Balama Graphite Operation may have a flow on effect on the Vidalia Active Anode Material Facility.

## 10. Shipping Constraints

Syrah's sale of graphite from Mozambique is dependent on the global shipping market. Disruption, delays and/or limited capacity in shipping lines may therefore impact Syrah's business.

During 2025, global shipping faced schedule unreliability and disruption to services due to a range of factors. Disruption stemmed from ongoing conflict in the Middle East diverting ships away from the Suez Canal and causing port congestion at major ports along with uncertainty regarding tariffs on imports into the USA. Container availability from the Port of Nacala was stable with regular vessel calls and capacity by major container lines. Planning is required to manage equipment imbalance and space on container vessels during peak agriculture season. Infrastructure and poor conditions of roads, especially during the rainy season, remain a risk for our road logistics between the Balama Graphite Operation and the Ports of Nacala and Pemba. This was highlighted when a bridge collapsed and was washed away during a cyclone in March.

## 11. Cost Inflation

Higher than expected inflation rates generally, whether as a result of economic factors or government policy including but limited to trade controls and tariffs, specific to the mining and minerals processing industries, or specific to the countries where Syrah operates or sources supplies, could be expected to increase operating and capital expenditure costs and potentially reduce the value of future project developments. While, in some cases, such cost increases might be offset by increased selling prices, there is no assurance that this would be possible. To the extent that such offset is not possible, this could adversely impact Syrah's financial performance.

## 12. Regulatory Risk

Syrah's businesses are subject, in each of the countries in which it operates, or the countries into which it sells its Products, to various national and local laws and regulations relating to, among other things, construction, exploration and mining activities as well as the import, export, marketing and sale of goods, whether directly or indirectly. A change in the laws which apply to Syrah's businesses or the way in which they are regulated, or changes to the laws affecting the sale of the Products such as trade sanctions, restrictions, bans, tariffs, and/or incentives could have a material adverse effect on the carrying value of material assets or otherwise have a material adverse effect on Syrah's businesses and financial condition. Syrah's operations may also be adversely impacted by the introduction or modification of government policies in Australia, Mozambique, China, the United States or other countries. Such policies may include: (1) market interventions;(2) policies that may impact any of global shipping routes, the graphite market or demand for or use of electric vehicles; (3) the reduction in financial support or taxation incentives for the production or purchase of battery materials or electric vehicles; or (4) import or export controls, quotas or tariffs.

## 12. Regulatory Risk (continued)

Syrah's ability to comply with regulatory requirements in the areas of occupational health and safety, environment and product security; competition; anti bribery; corruption; sanctions; and taxation is critical to retaining our licenses to operate and the strength of its balance sheet and financial performance. Given the nature of Syrah's business products, its customer profile and the industry and jurisdictions in which it has business operations, compliance with relevant anti-bribery and corruption, money laundering and sanctions laws are particular areas of business risk. Any failure to comply with anti-bribery and corruption, money laundering and sanctions laws may have a material adverse effect on Syrah.

The Balama Graphite Operation is subject to the laws of Mozambique. Under those laws, certain rights are granted in favour of the Mozambique Government and certain obligations imposed on Syrah.

To manage the impact of this risk, Syrah through its subsidiary, Twigg Exploration and Mining Limitada, has entered into a binding and enforceable agreement with the Mozambique Government ("Mining Agreement"). Among other purposes, the Mining Agreement assists in managing regulatory risk. The Mining Agreement consolidates all prior project documents and approvals and provides the Company with clarity around the governing laws and includes provisions concerning the mining rights and other obligations for the Balama Graphite Operation in Mozambique. It also clarifies the obligations to provide a 5% non-diluting free carried equity interest in Twigg to the Government of Mozambique entity and to offer at market value up to 10% of the equity of Twigg to investors on the Mozambique stock exchange within 5 years from the commencement of commercial production (as defined in the Mining Agreement) which occurred on 12 April 2018. A summary of the key commercial terms of the Mining Agreement can be found in the Company's ASX release dated 27 September 2018.

Syrah's operations could be adversely affected by government actions in Mozambique which alter the terms or operation of the Mining Agreement in respect of the Balama Graphite Operation or otherwise impact upon the way Syrah conducts its operations and/or Syrah's relationship with, and obligations to, the Mozambique Government. Such government action could adversely impact Syrah's financial and operational performance and its financial position, if it results in an increase in royalty payments, taxes or similar payments that Syrah is required to make or if it otherwise reduces the proportion of revenues or profits derived from the Balama Graphite Operation which Syrah is entitled to retain. Syrah's business activities are also subject to obtaining, and maintaining the necessary titles, authorisations, permits and licenses and associated land access agreements with the local community and various levels of Government which authorise those activities under relevant laws and regulations. There can be no guarantee that Syrah will be able to successfully obtain, maintain or renew relevant authorisations in a timely manner or on acceptable terms to support its ongoing activities. An inability to obtain and maintain the necessary titles, authorisations, permits and licenses could have a material adverse effect on the carrying value of material assets or otherwise have a material adverse effect on Syrah's businesses and financial condition.

Governments may change or impose new policies such as the imposition of tariffs, duties, quotas, bans or export/import controls. Changes in government policy or the introduction of new policies which apply to Syrah's businesses or the way in which they are regulated, such as trade sanctions, restrictions, bans, policies impacting global shipping routes or the demand for or use of electric vehicles, tariffs, and/or financial support or taxation incentives for the production or purchase of battery materials or electric vehicles could negatively impact the demand for and/or price of Syrah's products and ultimately have a material adverse effect on Syrah's businesses and financial condition.

For example, the US Government announced various tariffs in 2025 on goods imported into the USA. The scope, implementation and duration of US tariffs remain uncertain and may change in the future. Further, any retaliatory actions by other countries remains highly uncertain which may result in the nature and extent of US tariffs changing. There is a risk that a pause or change in tariffs imposed may negatively impact, either directly or indirectly, on the pricing and demand for Syrah's products, which would have a negative impact on Syrah's operations and financial position.

The U.S. International Trade Commission (ITC) voted on a final determination in the graphite AAM AD/CVD investigation on 12 March 2026 that no AD/CVD duties at the rates that U.S. Department of Commerce has determined (refer to Syrah's ASX release dated 12 February 2026 and 13 March 2026) will be applicable on graphite AAM exports from China to the United States. Such an ITC determination may delay AAM sales from the Vidalia AAM facility, and limit near-term demand growth for AAM produced in the United States and Balama natural graphite as feedstock for natural graphite AAM facilities outside China.

## 13. Government Policy Risk

# Key risks (9/19)

## 14. Counterparty Risk (including risks related to qualification of product and renewal of sales agreements)

The ability of Syrah to achieve its stated objectives will depend on the performance of contractual counterparties.

Syrah has entered into sales, marketing and distribution agreements for the Balama Graphite Operation, and will seek to renew or replace contracts in order to match anticipated production over time or as those agreements approach their respective expiry dates. Global demand may fluctuate (based on steel production, electric vehicle and energy storage system battery demand in particular) and there is no guarantee that sales forecasts or timing will be achieved, or that supply and demand analysis will be accurate. The agreements are a mix of term agreements and spot sale agreements. Syrah's revenue and profitability depend on counterparties performing on their obligations under such agreements, and on counterparties with term agreements continuing to enter into new agreements at the end of the existing term and spot sale counterparties entering into new sales. Global events and/or trends and global geopolitical factors may also affect the ability of Syrah's customers to carry out their obligations under such agreements and/or influence renewal or subsequent contracting decisions.

In addition, the sale of Products by Syrah is subject to commercial verification and qualification processes to ensure any Products produced meet the specifications for industrial supply required by customers (including the industrial graphite markets and the battery sector). The qualification process may require approval from multiple parties in the supply chain and not just those parties with whom Syrah has contractual arrangements. Failure of Syrah's Products to qualify for purchase, or any unanticipated delay in qualifying Syrah's Products may adversely impact Syrah's financial performance and position (including by resulting in Syrah generating less revenue or profit than anticipated and/or incurring higher costs than anticipated).

Syrah has entered into various agreements for the Balama Graphite Operation and the Vidalia Active Anode Material Facility including the supply of key goods and services including diesel fuel supply, logistics, equipment, contract mining, engineering and other services. Risks associated with such agreements, some of which have arisen, include rising contract prices as well as disputes regarding variations, extensions of time and costs, and global events impacting contract performance and liability (such as geopolitical events and conflicts), all of which may give rise to delays and/or increased costs. Furthermore, the risk of variations in contract prices is a function of the inclusion of certain 'rise and fall' provisions in some of Syrah's operational agreements. Such provisions provide a mechanism by which prices charged for certain inputs are periodically adjusted based on movements in certain indices. Should any of these risks materialise, this could have a material adverse impact on Syrah's profitability, financial performance and position.

## 15. Offtake Agreements

As announced to ASX on 23 December 2021 and 29 December 2021, Syrah entered into an offtake agreement with Tesla, Inc. to supply 8kt per annum of natural graphite Active Anode Material from the Vidalia Active Anode Material Facility. The offtake obligation is subject to the satisfaction of certain conditions described in those ASX announcements and in the ASX announcements made on 23 December 2022 and 26 May 2025. If any of the conditions are not satisfied, then the agreement with Tesla may be terminated, which would result in significant excess production capacity at the Vidalia Active Anode Material Facility. As announced to ASX on 30 July 2025, Syrah noted that it had received a notice from Tesla alleging that it had defaulted on an obligation under the offtake agreement to provide conforming AAM samples from the Vidalia Active Anode Material Facility ("**Notice**"). The Notice, as subsequently amended and announced to ASX on 17 September 2025, 17 November 2025, 19 January 2026 and 16 March 2026, requires that Syrah cure the alleged default by 1 June 2026 ("**Cure Date**") otherwise Tesla may assert it has the right to terminate the offtake agreement due to the alleged default. Syrah and Tesla are closely collaborating to cure the alleged default. It is also noted that if final qualification of AAM from the Vidalia Active Anode Material Facility is not achieved by 1 June 2026, Tesla has the right to terminate the offtake agreement. If final qualification of AAM from the Vidalia Active Anode Material Facility is not achieved by 9 February 2027, Syrah has the right to terminate the offtake agreement.

As announced to ASX on 24 February 2025, Syrah entered into an offtake agreement with Lucid Group, Inc. to supply ~7kt of natural graphite Active Anode Material over a three-year term from in the Vidalia Active Anode Material Facility. The offtake obligation is subject to the satisfaction of certain conditions described in this ASX announcement. If any of the conditions are not satisfied, then the agreement with Lucid may be terminated, which would result in excess production capacity at the Vidalia Active Anode Material Facility.

# Key risks (10/19)

## 15. Offtake Agreements (continued)

Further, while Syrah will seek to secure other offtake agreements in respect of the excess production capacity not taken by Tesla and Lucid, there is no certainty that Syrah will be able to enter into such agreements in a timely manner, with acceptable parties, for sufficient volumes or on reasonable terms with new customers. Syrah's potential customers tend to be large organisations that often undertake a significant evaluation process that results in a lengthy sales cycle. In addition, purchases by large organisations are frequently subject to budget constraints, multiple approvals and unanticipated administrative processing and other delays. Finally, large organisations typically have longer implementation cycles, require greater product functionality and scalability, require a broader range of services, demand that vendors take on a larger share of risks, require acceptance provisions that can lead to a delay in revenue recognition and expect greater payment flexibility. All of these factors can add further risk to business conducted with these potential customers. Any of these circumstances may delay or prevent the entry by Syrah into offtake agreements which would adversely impact Syrah's financial performance and position including by resulting in Syrah generating less revenue than anticipated.

Termination of existing offtake agreements may reduce the likelihood of other offtake agreements.

Entry by Syrah into other offtake agreements is also subject to risks that changes in government policies affect the willingness of other parties to enter into such agreements with Syrah.

## 16. Climate Change

The impacts of climate change may affect Syrah's operations and the markets in which the Company sells its Products through regulatory changes, technological advances and other market/economic responses. The use of fossil fuels for energy is a significant source of greenhouse gases contributing to climate change, resulting in increasing support for alternative energy and making fossil fuels susceptible to changes in regulations, and potentially usage taxes. While the growth of alternative energy supply and storage options presents an opportunity for Syrah's strategy and products, the impacts of climate change may also affect the Company's assets and supply chain through:

- changes in rainfall patterns and more frequent or severe occurrences of extreme weather events or natural disasters, water shortages;
- changes to the regulatory environment for Syrah's business associated with the transitioning to a lower carbon economy and market changes related to climate change mitigation, including subject to political considerations at the time the inclusion and/or exclusion of climate change considerations in regulatory approvals specific taxation or penalties for carbon emissions or environmental damage and the imposition of or other changes to tariffs and other imposts on cross border supply chains;
- changes to the availability, terms and accessibility of debt capital and insurance; and
- an increase in the ultimate cost of fossil fuels used in Syrah's operations for transport and power generation.

Direct impacts of climate change are likely to be geographically specific and may include one or more changes in rainfall patterns, drought-induced water shortages, increases in the occurrence and intensity of extreme weather events (including bushfires, storms, freeze events and floods), and rising temperatures. The occurrence of such events, or an increase in the frequency and severity of such events, could result in damage to Syrah's mine and processing sites and equipment, interruptions to critical infrastructure such as transport, water and power supply, or loss of productivity, and increased competition for, and the regulation of, limited resources (such as power and water). Each of the above events, either individually or in aggregate, may have a material adverse effect on Syrah's operational condition and financial performance.

## 17. Water Sources

Any restrictions on Syrah's ability to access water may adversely impact on the costs, production levels and financial performance of its operations. There is no guarantee that there will be sufficient future rainfall, or that the water level at the Chipembe Dam, which supplies the Balama Graphite Operation, will be sufficient to support Syrah's water demands in relation to its sites and operations or that access to water will otherwise remain uninterrupted. Likewise, the availability of water for the Vidalia Active Anode Material Facility cannot be guaranteed. Any interruption to water access could adversely affect production and Syrah's ability to develop or expand projects and operations in the future. In addition, and while there are potential alternative water sources, there can be no assurance that Syrah will be able to obtain access to them on commercially reasonable terms or at all in the event of prolonged drought conditions or other interruptions to existing water access arrangements.

# Key risks (11/19)

## 18. Natural Disasters

As with any mining operation, Syrah is also at risk of adverse impact from natural disasters, both to the Balama Graphite Operation and the Vidalia Active Anode Material Facility and also to the logistics chain, which may include among other matters, abnormal or severe weather conditions, floods, cyclones and other natural disasters or unexpected global trends.

Environmental regulations in the jurisdictions in which Syrah has operations impose significant obligations on companies that conduct the exploration for and mining of commodities. These regulations also cover the processing of ores into final products and subsequent transportation of those Products as well as the possible effects of such activities upon the environment and local communities.

Syrah must comply with all known standards, existing laws, and regulations in each case which may entail greater or lesser costs and delays depending on the nature of the activity to be permitted and how vigorously and consistently the regulations are administered by the local authorities. There are inherent environmental risks in conducting exploration and mining activities, or industrial materials processing, giving rise to potentially substantial costs for environmental rehabilitation, damage control and losses. These risks include the occurrence of incidents such as uncontrolled tailings containment breaches, subsidence from mining activities, escape of polluting substances and uncontrolled releases of hydrocarbons that may lead to material adverse impacts on Syrah's people, host communities, assets and/ or the Company's license to operate.

Changes in environmental laws and regulations or their interpretation or enforcement may adversely affect Syrah's operations, including the potential profitability of its operations. Further, environmental legislation is evolving in a manner which may require stricter standards and enforcement (with associated additional compliance costs) and expose relevant operators to the risk of increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect Syrah's operations.

Syrah currently holds an Environmental Licence for the Balama Graphite Operation having successfully renewed its 5-year licence in January 2025. Renewal of the license is conditional on the update and resubmission of the environmental management plan and associated monitoring program data. Syrah's practices are reflected in the ISO14001 (Environmental Management Systems) certification of the Balama Graphite Operation which was successfully renewed again in 2024. However, there are no guarantees that environmental issues or concerns will not arise. If such issues or concerns were to arise, this may have an adverse effect on Syrah's ability to operate, reputation and relationships with key stakeholders, which may in turn negatively impact its financial and operational performance.

Syrah is also required to close its operations at the conclusion of their operating life and rehabilitate the lands that it disturbs in accordance with environmental license conditions and applicable laws and regulations.

To this effect, Syrah has developed a Mine Closure Plan for the Balama Graphite Operation to ensure full compliance with all regulatory requirements and including an estimate of closure and rehabilitation liabilities. These estimates of closure and rehabilitation liabilities are based on current knowledge and assumptions however actual costs at the time of closure and rehabilitation may vary. The positive social, economic, and development impacts from Balama were recognised with the achievement of the IRMA 50 level assessment during the year. While the Balama Graphite Operation has achieved an IRMA 50 level of performance, this remains subject to ongoing audit and there is no guarantee that the Balama Graphite Operation will be able to sustain this level of performance.

For the current Vidalia 11.25ktpa Active Anode Material Facility, all regulatory air and water environmental discharge requirements have been met based on current qualification volumes. There can be no guarantee that Syrah will be able to successfully obtain, maintain or renew relevant authorisations in a timely manner or on acceptable terms to support its ongoing activities. An inability to obtain and maintain the necessary titles, authorisations, permits and licenses could have a material adverse effect on the operations of the Vidalia Active Anode Material Facility and the recoverable amount of assets.

## 19. Health, Safety, Environment and Community

NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

Personal use only

# Key risks (12/19)

## 19. Health, Safety, Environment and Community (continued)

Mining, construction, production and logistics are potentially hazardous activities. There are numerous occupational health risks associated with mining and production operations and associated supporting activities such as logistics. If any injuries or accidents occur, this could have negative employee, community and/or financial implications for Syrah including potential delays or stoppages in mining, production and/or logistics activities. In addition, the location of the Balama Graphite Operation means Syrah's employees and contractors could be affected by mosquito borne diseases such as malaria which could adversely impact operations.

Syrah also faces the risk of increasing public scrutiny, and more extensive laws and regulations related to environmental, social and governance factors. Failure to act responsibly in various environmental, social and governance areas, such as corporate governance, transparency and support for local communities, and address issues like modern slavery in all aspects of its business could impact Syrah financially and reputationally and also expose Syrah to potential legal risks. Changes in health, safety and environmental laws and regulations or their interpretation or enforcement or unexpected global health risks and/or events may adversely affect Syrah's obligations and/or operations.

Syrah's mining activities may cause issues or concerns with the local community in connection with, among other things, the potential effect on the environment as well as other social impacts relating to employment, use of infrastructure and community development. In response to such risks, for the Balama Graphite Operation, Syrah has signed a Community Development Agreement with local key stakeholders and established ongoing engagement and management programs focused on optimising positive impacts and minimising the risk of negative impacts on the community. However, these programs are no guarantee that other issues or concerns will not arise with the local community. If such issues or concerns were to arise, this may have an adverse effect on Syrah's reputation and relationships with key stakeholders, which may in turn negatively impact its financial and operational performance.

Syrah's operations could be affected by political instability in Australia, Mozambique, the USA, UAE, China or other countries or jurisdictions in which it has operations, investment interests, conducts exploration activities or has sales into. Syrah is therefore subject to the risk that it may not be able to carry out its operations as it intends or to ensure the security of its assets and its people. Syrah is subject to the risk of, among other things, loss of revenue, property and equipment as a result of expropriation, war, insurrection, civil disturbance, acts of terrorism, geopolitical uncertainty, political/civil unrest, protest actions, blockades, violent criminal acts and displacement of people. Syrah has significant security measures and protocols in place, however, such security measures and protocols do not guarantee that such risks will not arise.

## 20. Sovereign/Political Risk, War and Terrorism, Force Majeure

The effect of these risks is difficult to predict and any combination of one or other of the above may have a material adverse effect on Syrah. Syrah has a limited ability to insure against some of these risks and other 'force majeure' risks (such as natural disasters or geopolitical events and conflict).

Syrah's Balama Graphite Operation is located in Mozambique and so it is subject to risks associated with operating in that country. Risks of operations in Mozambique may include economic, social or political instability or change, hyperinflation, widespread health emergencies or pandemics, reduced convertibility of local currency, sovereign loan default or collapse of the country's financial, legal and governance systems, difficulty in engaging with the local community, instability and changes of law affecting foreign ownership, government participation, taxation, working conditions, insufficient investment in infrastructure, rates of exchange, exchange control, exploration licensing, export duties, security unrest, repatriation of income or return of capital, environmental protection, mine safety, labour relations, relationships with farmers previously resettled under government programs, prompt and effective enforcement of the rule of law, as well as government control over mineral properties or government regulations that require the employment of local staff or contractors or require other benefits to be provided to local residents.

The occurrence of these various factors and uncertainties and the resulting inability of Twigg personnel and contractors to access the Balama site cannot be accurately predicted and could have an adverse effect on the operations, profitability or the recoverable amount of the assets of Syrah.

# Key risks (13/19)

## 21. Risk of Dilution

Investors who do not participate in the Offer, or do not take up all of their entitlement under the Entitlement Offer, will have their percentage security holding in Syrah diluted. Investors may also have their investment diluted by future capital raisings by Syrah. Syrah may issue new shares to finance acquisitions, capital expenditure, pay down debt or meet interest obligations, or remunerate employees which may, under certain circumstances, dilute the value of an investor's interest. Syrah will only raise equity if it believes that the benefit to investors of conducting the capital raising is greater than the short-term detriment caused by the potential dilution associated with a capital raising.

Investors may also be materially diluted in connection with the non-binding Strategic Funding Proposals due to the DFC debt-to-equity swap and conversion of the Primary and Secondary CLNs to ordinary shares in Syrah which have the resultant effect of materially lowering investors equity ownership in Syrah thereafter. It is important that investors assess the dilution of the DFC debt-to-equity swap and Primary and Secondary CLNs in making an investment decision. Please refer to slides 37 and 38 which include potential Syrah shareholdings following the DFC debt-to-equity swap and conversion of the Primary and Secondary CLNs.

## 22. Substantial shareholder

As at the date of this presentation, AustralianSuper is Syrah's largest shareholder, with its current shareholding at approximately ~34%. On completion of the Retail Entitlement Offer, in the unlikely event there is no uptake in the Retail Entitlement Offer and assuming AustralianSuper takes up its full entitlement of ~A\$35m and acquires all other shares offered under the Institutional Entitlement Offer and Retail Entitlement Offer pursuant to its sub-underwriting commitment, AustralianSuper's maximum voting power in the Company will be approximately 62% (excluding potential conversion of AustralianSuper's convertible notes). The Company understands AustralianSuper has a present intention to support the current board and its strategy of ramping up production at Balama over 2026 and 2027 and reaching commercial production at Vidalia. Notwithstanding this, AustralianSuper's interests may not align with those of all other shareholders. Assuming all of AustralianSuper's Primary and US\$28m of its Secondary CLNs are issued and converted and the DFC Notes are converted, AustralianSuper's voting power may be approximately 52%. AustralianSuper may also in the future increase its voting power by up to a further 3% over any 6-month period without Syrah shareholder approval. As AustralianSuper's voting power is likely to be more than 50% following completion of the Retail Entitlement Offer, it may be able to exercise control over the Company. This level of ownership may allow AustralianSuper to (i) determine the outcome of ordinary resolutions of the Company, which require a simple majority, (ii) veto special resolutions, which require 75% approval and (iii) influence the composition of the Board of Directors and the Company's strategic and operational direction.

The Company understands that AustralianSuper has no present intention to (i) change the business of the Company; (ii) inject further capital into the Company other than as disclosed in this presentation, (this may, however, change on the basis of the Company's future funding requirements); (iii) make any changes regarding the future employment of present employees of the Company; (iv) transfer any assets between the Company and AustralianSuper or its associates; (v) redeploy the fixed assets of the Company; or (vi) significantly change the financial or dividend distribution policies of the Company. The Company understands AustralianSuper has a present intention to support the current board and its strategy of ramping up production at Balama over 2026 and 2027 and reaching commercial production at Vidalia. Notwithstanding this, AustralianSuper's interests may not align with those of all other shareholders.

Following the issue of the Primary CLNs and assuming US\$28m of AustralianSuper's Secondary CLNs are issued, DoE ~6% and DFC ~21% will be substantial shareholders in Syrah and may also have rights to appoint a board observer and/or board nominee. As substantial holders in, and/or lenders to, Syrah, DoE and DFC may be able to influence the governance and operations of Syrah. Having regard to the financial and strategic support being provided by the DFC and DoE, Syrah considers this to be of critical and valuable importance to Syrah. However, for completeness, it should be noted that being government entities, DoE and/or DFC may have other interests which might not always align with those of other non-government shareholders.

## 23. Dividends

Any future determination as to the payment of dividends by Syrah will be at the discretion of the Directors and will depend on the financial condition of Syrah, future capital requirements and general business and other factors considered relevant by the Directors. Syrah does not currently pay dividends and no assurance in relation to the future payment of dividends or franking credits attaching to dividends can be given by Syrah.

# Key risks (14/19)

NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

<b>24. Cyber Risk</b>	<p>Syrah relies on IT software and technology service providers to support its business operations, including its manufacturing operations. Syrah also holds sensitive employee and customer data, including such individuals' and entities' financial data. Syrah's IT systems may be adversely affected by damage to computer equipment or network systems, equipment faults, power failures, computer viruses, cyber-attack from malicious third parties, misuse of systems or inadequate business continuity planning. Any failure of Syrah's IT systems as a result of any of these factors may compromise Syrah's data integrity, which may result in an inadvertent security breach in relation to such employee or customer data, or its manufacturing and supply systems and processes, which may in turn adversely affect Syrah's reputation, business operations, and financial performance and profitability or expose Syrah to third party liability.</p>
<b>25. Impairments</b>	<p>An adverse change in any of the significant assumptions used to determine the recoverable amount of the Company's non-current assets (including commodity price expectations, foreign exchange rates, discount rates, reserves and resources, and expectations regarding future operating and investment performance and capital requirements) may give rise to the potential for impairment. Further, the risks and uncertainties associated with the impact of the negative ITC determination on Syrah's operations may impact future carrying value of assets and result in future impairments. The carrying amount of assets is tested against the recoverable amount where a trigger for impairment is identified. A trigger for impairment may include the market capitalisation of the Company compared to the net book value of the assets. A summary of the key assumptions used to determine recoverable amount can be found in the Company's 2025 Annual Report.</p>
<b>26. Currency and Exchange Rate Risk</b>	<p>Syrah's activities may generate revenues, and Syrah may incur expenses, in a variety of different currencies, meaning its financial performance and position are impacted by fluctuations in the value of relevant currencies and exchange rates. In particular, Syrah is required to make certain payments under contracts for the Balama Graphite Operation in the local Mozambique currency. A lack of liquidity or depreciation in the value of the local Mozambique currency, or the failure of or difficulties in implementing exchange control mechanisms in Mozambique, could adversely impact the financial position and performance of Syrah, including by making it more difficult or costly to convert the local currency or transfer funds out of Mozambique. In addition, to date Syrah has raised capital in Australian dollars, while development costs and debt facilities are largely in US dollars or other currencies. Syrah may also hold funds on deposit in a number of currencies. Changes in exchange rates may impact the extent to which Australian dollar denominated capital is able to fund development in other currencies or meet other obligations including liquidity covenants</p> <p>Syrah's natural graphite products are denominated in US Dollars, with a significant portion of potential sales to customers in China. Fluctuations in the value of the US Dollar may impact on the competitiveness of Syrah's products to these customers. Syrah also purchases equipment and services for the Balama Graphite Operation and the development of the Vidalia Active Anode Material Facility from a number of countries, which may also be impacted by currency fluctuations against the US Dollar in particular.</p>
<b>27. Competition</b>	<p>Competition from other international graphite producers (in relation to both natural and synthetic graphite) and explorers may affect the potential future cash flow and earnings which Syrah may realise from its operations. This includes competition from existing production and new entrants into the market. The introduction of new mining, processing and production facilities and any increase in competition and supply in the global graphite market could lower the price of this commodity. Syrah may also encounter competition from other mining and exploration companies, or synthetic graphite producers for the acquisition of new projects required to sustain or increase its potential future production levels.</p> <p>The Vidalia Active Anode Material Facility may also be impacted by new entrants to the market, or existing graphite producers, pursuing a similar strategy aimed at qualifying spherical graphite or other Active Anode Material products for battery purposes.</p>

# Key risks (15/19)

## 27. Competition (continued)

The synthetic graphite AAM production overcapacity in China misaligned with demand has continued to result in intense competition and non-market, destructive pricing behaviour. Prices for synthetic graphite AAM, especially low-grade products, remain below estimated production costs in many cases. Anode margins continue to be impacted by higher petroleum and needle coke feedstock costs and low-capacity utilisation. In natural graphite AAM production, finished AAM producers have driven precursor margins and upstream feedstock margins lower over successive purified spherical graphite tenders. Although some finished AAM producers remain profitable, the majority of feedstock and precursor suppliers are not currently operating due to poor margins and low demand. There are continuing market challenges and financial pressures across the global battery materials and manufacturing sector, arising from the dominance of incumbent producers in both cell production and input battery raw materials supply. Syrah expects that underutilisation of expanded synthetic graphite AAM capacity and loss-making prices caused by intense competition will ultimately lead to consolidation or rationalisation of marginal synthetic graphite AAM supply capacity, which will ultimately support higher pricing for both synthetic graphite and natural graphite AAM.

## 28. Tax and Customs Risk

Syrah is subject to taxation and other imposts in Australia, Mozambique, the USA and the UAE, as well as other jurisdictions in which Syrah has activities, sales and investments. Changes in taxation, customs or importation laws (including double taxation treaties, royalties and similar levies, transfer pricing, tariffs and duties), or changes in the interpretation or application of existing laws by courts or applicable revenue authorities may affect the taxation or customs treatment of Syrah's business activities and adversely affect Syrah's financial condition.

Syrah also evaluates and applies for tax credits and other tax-based incentive programs which may offset future tax liabilities or provide Syrah with refunds / direct funding from certain tax authorities (e.g. US Internal Revenue Services). Syrah's ability to access these programs relies on the correct identification of and application for these programs and, in certain cases, may also depend on the ability of Syrah to meet certain requirements. An inability to correctly access these programs or meet requirements may impact on Syrah's ability to obtain these benefits in a timely way, if at all. The tax credits and other tax-based incentive programs are, in some cases, dependent on Government policies remaining unchanged. Changes in Government policies may result in tax programs no longer being available to Syrah or the financial benefits or impacts of such programs to Syrah changing.

Syrah's international contractual arrangements, asset, liability, revenue and expense recognition and taxation administration requires management judgment in relation to the application of tax laws in a number of jurisdictions. There are many transactions and calculations undertaken during the ordinary course of business where the ultimate tax determination is uncertain or in relation to which tax authorities or adjudicating bodies may take a view which is different to the view taken by Syrah. Syrah recognises liabilities for tax, and applies for different tax-based incentives, and if applicable taxation investigation or audit issues, based on whether tax will be due and payable, or credits obtained. Where the taxation outcome of such matters is different from the amount initially recorded, such difference will impact the current and deferred tax positions in the period in which the assessment is made. To the extent Syrah seeks to appeal rulings from tax authorities, the appeal process may take some time and expense to recover tax payments or refunds and may ultimately be unsuccessful.

Further, there may be delays in processing tax or duty rebates or refunds, or tax incentives for which Syrah has applied. Should it become unlikely that Syrah will recover such rebates or refunds, or access those incentives, this could also adversely affect Syrah's financial condition and require a reclassification of assets or recognition of expenses in the Company's accounts.

The revenue and profit from the Balama Graphite Operation will be subject to certain payments to the Mozambique Government (including in the form of taxes and royalties) as provided for in the Mining Agreement (see above).

Syrah will evaluate any potential tax consequences as a result of the transactions contemplated by the Strategic Funding Proposals, noting that preliminary assessment has not identified any significant tax risks

# Key risks (16/19)

NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

## 29. Share Price Fluctuations

The market price of the Company's shares will fluctuate due to various factors, many of which are non-specific to Syrah, including recommendations by brokers and analysts, Australian and international general economic conditions, inflation rates, interest rates, changes in government, fiscal, monetary and regulatory policies, global geo-political events and hostilities and acts of terrorism, and investor perceptions. Fluctuations such as these may adversely affect the market price of the Company's shares. Neither Syrah nor the Directors warrant the future performance of Syrah or any return on an investment in Syrah.

There can be no assurance of an active market for the Company's shares or that the price of the Company's shares will increase. There may be relatively few potential buyers or sellers of the Company's shares at any time, which may increase the volatility of the market price of Company's shares and may also affect the prevailing market price at which shareholders are able to sell their shares. In recent years, capital markets have experienced a high level of price and volume volatility, and the market price of securities of many companies have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur.

## 30. Insurance Risk

Syrah maintains insurance coverage as determined appropriate by its Board and management, and based on lender requirements, but no assurance can be given that Syrah will continue to be able to obtain such insurance coverage at reasonable rates (or at all) for certain events, or that any coverage it obtains will be adequate and available to cover all claims, or that claims it makes will be paid by insurance providers.

## 31. Key Personnel And Labour Market Risk

Syrah has a number of key management personnel on whom it depends to manage and run its business. From time to time, Syrah will require additional key personnel or operational staff, or key personnel may leave the business. In addition, Syrah has certain obligations regarding employment of local labour. The loss of any key personnel, coupled with any inability to attract additional or replacement suitably qualified personnel or to retain current personnel could have a material adverse effect on Syrah's operational and financial performance. This difficulty may be exacerbated given the remoteness of facilities, the lack of infrastructure in the nearby surrounding areas (in respect of the Balama Graphite Operation), variability in production profiles and strategies in response to market conditions, the shortage of local, readily available skilled labour and global events/trends (such as geopolitical events and conflict), including the national or regional governmental response to such events, which may impact a number of factors including but not limited to personnel availability, mobility and health and safety. A limited supply of skilled workers could lead to an increase in labour costs and Syrah being ultimately unable to attract and retain the employees it needs. When new workers are hired, it may also take a considerable period of training and time before they are equipped with the requisite skills to work effectively and safely. Additionally, any illegal industrial action may have the potential to be disruptive to both key management personnel and the operational workforce.

## 32. Litigation

Syrah may be involved in claims, litigation and disputes from time to time with its contractors, sub-contractors and other parties. Claims, litigation and disputes can be costly, including amounts payable in respect of judgments and settlements made against, or agreed to by, Syrah. They can also take up significant time and attention from management and the Board. Accordingly, Syrah's involvement in claims, litigation and disputes could have an adverse impact on its financial performance and position.

## 33. Global Economic Conditions

Economic conditions, both domestic and global, may affect the performance of Syrah. Adverse changes in macroeconomic conditions, including global and country-specific growth rates, the cost and availability of credit, the rate of inflation, interest rates, exchange rates, government policy and regulations, general consumption and consumer spending, input costs, employment rates and industrial disruptions, other significant global matters among others, are variables which while generally outside Syrah's control, may result in material adverse impacts on Syrah's businesses and its operational and financial performance, and position.

# Key risks (17/19)

## 34. Security Of Tenure

The maintaining of tenements, obtaining renewals, and grant of tenements or permits depends on Syrah being successful in maintaining and, where appropriate, renewing statutory approvals for its activities and proposed activities. There can be no assurance that such approvals will be obtained and there is no assurance that new conditions or unexpected conditions will not be imposed. If such approval is not obtained or new or unexpected conditions are imposed, this could have a material adverse impact on Syrah's operational and financial performance.

## 35. Underwriting Risk

Syrah has entered into an underwriting agreement with Macquarie Capital (Australia) Limited ("Lead Manager"). The Lead Manager has agreed to act as sole lead manager, underwriter and bookrunner in relation to the Entitlement Offer, subject to certain terms and conditions. Details of the fees payable to the Lead Manager are included in the Appendix 3B released to ASX on the date of this presentation.

If certain conditions are not satisfied or certain termination events occur, then the Lead Manager may terminate the underwriting agreement. A summary of the events which may trigger termination of the underwriting agreement include (but are not limited to) the following:

- a Government Agency (other than ASIC and the Takeovers Panel) commences any formal investigation or hearing, or announces its intention to do so, in each case in connection with the Entitlement Offer or a Strategic Funding Proposal;
- the Takeovers Panel:
  - between the date of the underwriting agreement and the institutional allotment date, determines to conduct proceedings, makes a declaration of unacceptable circumstances and / or makes an order (including an interim order) in connection with an application to the Takeovers Panel concerning the Entitlement Offer (or any part of it) or a Strategic Funding Proposal; or
  - after the institutional allotment date, determines to conduct proceedings and makes a declaration of unacceptable circumstances or makes an order (including an interim order) in connection with an application to the Takeovers Panel concerning the Entitlement Offer (or any part of it) or the Transaction Documents that is adverse to Syrah;
- ASIC:
  - makes an application for an order under section 1324 or 1325 of the Corporations Act in relation to the Entitlement Offer or the documents issued or published by or on behalf of Syrah in respect of the Entitlement Offer ("Offer Documents") or gives notice of an intention to prosecute Syrah or any of its directors; or
  - makes an application for an order under Part 9.5 of the Corporations Act in relation to the Entitlement Offer or the Offer Documents, or commences any hearing or investigation under Part 3 of the Australian Securities and Investments Commission Act 2001 (Cth) in relation to the Entitlement Offer or the Offer Documents and any such application, investigation or hearing made or commenced after the institutional settlement date either becomes public or is not withdrawn within 5 business days after it is made or commenced, or where it is made or commenced less than 5 business days before the retail settlement date, it has not been withdrawn before the retail settlement date;
- the group agrees to vary a material term of a Strategic Funding Proposal in a manner that is adverse to Syrah or the group, or a party to a Strategic Funding Proposal indicates that it is ceasing negotiations of long form documentation or that it is no longer pursuing a transaction contemplated by a Strategic Funding Proposal (including on the terms set out in a Strategic Funding Proposal);
- Syrah ceases to be admitted to the official list of ASX or the ordinary shares in Syrah are suspended from trading on, or cease to be quoted on, ASX (which does not include a trading halt requested by Syrah for the purposes of conducting the Institutional Entitlement Offer);
- unconditional approval (or conditional approval, provided such condition would not, in the reasonable opinion of the Lead Manager, have a material adverse effect on the success of the Entitlement Offer) by ASX for official quotation of all of the New Shares to be issued under the Entitlement Offer is refused, or not granted by the relevant settlement date (or such later date agreed in writing by the Lead Manager in its absolute discretion) or is withdrawn on or before the relevant settlement date, or ASX makes an official statement that official quotation of all or any of the New Shares to be issued under the Entitlement Offer will not be granted;

## 35. Underwriting Risk (continued)

- Syrah alters its share capital or its constitution without the prior written consent of the Lead Manager;
- other than as set out in the Offer Documents or otherwise disclosed to ASX prior to the date of the underwriting agreement, an adverse change occurs in the business, assets, liabilities, financial position or performance, profits, losses, operations, results or prospects of Syrah or the group, or an event occurs which makes it reasonably likely that such an adverse change will occur;
- any event specified in the timetable is delayed for more than 2 business days without the prior written approval of the Lead Manager;
- a director of Syrah:
  - is charged with an indictable offence relating to any financial or corporate matter or any regulatory body commences any public action against the director in his or her capacity as a director of Syrah or announces that it intends to take any such action; or
  - is disqualified from managing a corporation under the Corporations Act;
- a certificate which is required to be furnished by Syrah under the underwriting agreement is not furnished when required or a statement in that certificate is untrue, incorrect or misleading or deceptive;
- the Offer Documents contain (whether by omission or otherwise) any statement which is false, misleading or deceptive or likely to mislead or deceive, omit information required by applicable laws, or any statement or estimate in an Offer Document which relates to a future matter is or becomes incapable of being met or was not based on reasonable grounds;
- Syrah or a material subsidiary (being a subsidiary, as defined in the Corporations Act, of Syrah which at the date of the underwriting agreement represents in excess of 5% of the consolidated assets or earnings of the group) is insolvent, will before completion of the Offer, become insolvent or there is an act or omission reasonably likely to result in Syrah or a material subsidiary becoming Insolvent;
- Syrah fails to perform or observe any of its obligations under the underwriting agreement;
- a representation or warranty made or given by Syrah under the underwriting agreement proves to be, or has been, or becomes, untrue or incorrect;
- Syrah is prevented from allotting and issuing the New Shares to be issued under the Entitlement Offer within the time required by the timetable, the ASX Listing Rules, applicable laws, an order of a court of competent jurisdiction or a government agency;
- there is introduced, into the Parliament of the Commonwealth of Australia or any State or Territory of Australia or the Republic of Mozambique a law or any new regulation is made under any law, or a government agency adopts a policy, or there is any official announcement on behalf of the Government of the Commonwealth of Australia or any State or Territory of Australia or a government agency that such a law or regulation will be introduced or policy adopted (as the case may be);
- as at the close of trading on any trading day between the date the institutional offer opens and the institutional settlement date (each inclusive), the S&P/ASX 200 Index is 10% or more below its level as at the close of trading on the last trading day immediately prior to the date of the underwriting agreement; or (ii) between the institutional settlement date and the retail settlement date (each inclusive), the S&P/ASX 200 Index falls by 15% or more below its level as at the close of trading on the last trading day immediately prior to the date of the underwriting agreement, and remains at or below that level for at least 3 consecutive trading days or (if earlier) until the period ending at 5.00pm on the trading day immediately prior to the retail settlement date;

## 35. Underwriting Risk (continued)

- Syrah alters its share capital or its constitution without the prior written consent of the Lead Manager;
- the Entitlement Offer cleansing notice is or becomes defective (within the meaning of the Corporations Act), or any amendment or update to the cleansing notice is issued or is required to be issued under the Corporations Act where that defective cleansing notice or amendment or update to the cleansing notice is adverse from the point of view of an investor;
- hostilities not existing at the date of the underwriting agreement commence (whether war has been declared or not) or a major escalation in existing hostilities occurs (whether war has been declared or not) involving any one or more of Australia, the United States, Mozambique, China, Russia, Ukraine or Israel, or a national emergency is declared by any of those countries, or a major terrorist act occurs in any of those countries;
- any of the following occurs:
  - a general moratorium on commercial banking activities in Australia, the United States, Hong Kong or the United Kingdom is declared by the relevant central banking authority in any of those countries, or there is a material disruption in commercial banking or security settlement or clearance services in any of those countries;
  - trading in all securities quoted or listed on ASX, the London Stock Exchange, the Stock Exchange of Hong Kong or the New York Stock Exchange is suspended or limited in a material respect; or
  - the occurrence of any other adverse change or adverse disruption to the political or economic conditions or financial markets in Australia, the United States, Hong Kong or the United Kingdom; or
- there is a change (other than a change which has been disclosed prior to the date of the underwriting agreement) in the Board, the Chairman, the Chief Executive Officer or the Chief Financial Officer of Syrah;
- Syrah withdraws the Entitlement Offer;
- Syrah fails to lodge certain Offer Documents with the ASX by the time required;
- the due diligence committee report or any information supplied by or on behalf of Syrah to the Lead Manager in relation to the group, or the Entitlement Offer is or becomes false or misleading or deceptive, including by way of omission; or
- a scheme of arrangement or reconstruction is announced by Syrah, or another offer to security holders is announced by another person, which, if implemented, would result in a person and their associates acquiring voting power in Syrah of 50% or more.

The ability of the Lead Manager to terminate the underwriting agreement in respect of the events set out above, in some cases, is limited to circumstances where, in the reasonable opinion of the Underwriter:

- the event has, or is likely to have, a materially adverse effect on the success of the Entitlement Offer or settlement of the Entitlement Offer or the ability of the Lead Manager to market or promote or settle the Entitlement Offer; or
- there is a reasonable possibility that the event will lead to the Lead Manager being involved in a contravention of an applicable law or of the Lead Manager incurring a liability under an applicable law as a result of the event.

Syrah also gives certain representations, warranties and undertakings to the Lead Manager and an indemnity to the Lead Manager and its employees, officers, agents, affiliates and related bodies corporate and the officers, employees and agents of such affiliates and related body corporates subject to certain limited exceptions.

If the underwriting agreement is terminated by the Lead Manager, Syrah would need to find alternative financing to meet its future funding requirements. There is no guarantee that alternative funding could be sourced, either at all or on satisfactory terms and conditions. See also the 'Liquidity and Capital Management / Funding Risk' disclosure above. Termination of the underwriting agreement could materially adversely affect Syrah's business, cash flow, financial condition and results of operations.

# 7 International Offer Restrictions

NOT FOR RELEASE TO US WIRE SERVICES OR DISTRIBUTION IN THE UNITED STATES

ersonal use only

# International Offer Restrictions (1/3)

This document does not constitute an offer of new ordinary shares (“New Shares”) of the Company in any jurisdiction in which it would be unlawful. In particular, this document may not be distributed to any person, and the New Shares may not be offered or sold, in any country outside Australia except to the extent permitted below.

## Canada (British Columbia, Ontario and Quebec provinces)

This document constitutes an offering of New Shares only in the Provinces of British Columbia, Ontario and Quebec (the “Provinces”), only to persons to whom New Shares may be lawfully distributed in the Provinces, and only by persons permitted to sell such securities. This document is not a prospectus, an advertisement or a public offering of securities in the Provinces. This document may only be distributed in the Provinces to persons who are (i) “accredited investors” (as defined in National Instrument 45-106 – *Prospectus Exemptions*) and (ii) “permitted clients” (as defined in National Instrument 31-103 – *Registration Requirements, Exemptions and Ongoing Registrant Obligations*) if a lead manager offering the New Shares in Canada is relying upon the international dealer exemption under NI 31-103.

No securities commission or authority in the Provinces has reviewed or in any way passed upon this document, the merits of the New Shares or the offering of the New Shares and any representation to the contrary is an offence.

No prospectus has been, or will be, filed in the Provinces with respect to the offering of New Shares or the resale of such securities. Any person in the Provinces lawfully participating in the offer will not receive the information, legal rights or protections that would be afforded had a prospectus been filed and receipted by the securities regulator in the applicable Province. Furthermore, any resale of the New Shares in the Provinces must be made in accordance with applicable Canadian securities laws. While such resale restrictions generally do not apply to a first trade in a security of a foreign, non-Canadian reporting issuer that is made through an exchange or market outside Canada, Canadian purchasers should seek legal advice prior to any resale of the New Shares.

The Company as well as its directors and officers may be located outside Canada and, as a result, it may not be possible for purchasers to effect service of process within Canada upon the Company or its directors or officers. All or a substantial portion of the assets of the Company and such persons may be located outside Canada and, as a result, it may not be possible to satisfy a judgment against the Company or such persons in Canada or to enforce a judgment obtained in Canadian courts against the Company or such persons outside Canada.

*Statutory rights of action for damages and rescission.* Securities legislation in certain Provinces may provide a purchaser with remedies for rescission or damages if an offering memorandum contains a misrepresentation, provided the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s Province. A purchaser may refer to any applicable provision of the securities legislation of the purchaser’s Province for particulars of these rights or consult with a legal adviser.

*Certain Canadian income tax considerations.* Prospective purchasers of the New Shares should consult their own tax adviser with respect to any taxes payable in connection with the acquisition, holding or disposition of the New Shares as there are Canadian tax implications for investors in the Provinces.

*Language of documents in Canada.* Upon receipt of this document, each investor in Canada hereby confirms that it has expressly requested that all documents evidencing or relating in any way to the sale of the New Shares (including for greater certainty any purchase confirmation or any notice) be drawn up in the English language only. *Par la réception de ce document, chaque investisseur canadien confirme par les présentes qu’il a expressément exigé que tous les documents faisant foi ou se rapportant de quelque manière que ce soit à la vente des valeurs mobilières décrites aux présentes (incluant, pour plus de certitude, toute confirmation d’achat ou tout avis) soient rédigés en anglais seulement.*

## Cayman Islands

This document may be distributed, and the New Shares may be offered and sold, only from outside the Cayman Islands to institutional and professional investors in the Cayman Islands. No offer or invitation to subscribe for New Shares may be made to the public in the Cayman Islands or in any manner that would constitute carrying on business in the Cayman Islands.

# International Offer Restrictions (2/3)

## European Union (excluding Austria)

This document has not been, and will not be, registered with or approved by any securities regulator in the European Union. Accordingly, this document may not be made available, nor may the New Shares be offered for sale, in the European Union except in circumstances that do not require a prospectus under Article 1(4) of Regulation (EU) 2017/1129 of the European Parliament and the Council of the European Union (the “Prospectus Regulation”).

In accordance with Article 1(4)(a) of the Prospectus Regulation, an offer of New Shares in the European Union is limited to persons who are “qualified investors” (as defined in Article 2(e) of the Prospectus Regulation).

## Hong Kong

**WARNING:** This document has not been, and will not be, registered as a prospectus under the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong, nor has it been authorised by the Securities and Futures Commission in Hong Kong pursuant to the Securities and Futures Ordinance (Cap. 571) of the Laws of Hong Kong (the “SFO”). Accordingly, this document may not be distributed, and the New Shares may not be offered or sold, in Hong Kong other than to “professional investors” (as defined in the SFO and any rules made under that ordinance).

No advertisement, invitation or document relating to the New Shares has been or will be issued, or has been or will be in the possession of any person for the purpose of issue, in Hong Kong or elsewhere that is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to New Shares that are or are intended to be disposed of only to persons outside Hong Kong or only to professional investors. No person allotted New Shares may sell, or offer to sell, such securities in circumstances that amount to an offer to the public in Hong Kong within six months following the date of issue of such securities.

The contents of this document have not been reviewed by any Hong Kong regulatory authority. You are advised to exercise caution in relation to the offer. If you are in doubt about any contents of this document, you should obtain independent professional advice.

## New Zealand

This document has not been registered, filed with or approved by any New Zealand regulatory authority under the Financial Markets Conduct Act 2013 (the “FMC Act”).

The New Shares are not being offered to the public within New Zealand other than to existing shareholders of the Company with registered addresses in New Zealand to whom the offer of these securities is being made in reliance on the Financial Markets Conduct (Incidental Offers) Exemption Notice 2021.

Other than in the entitlement offer, the New Shares may only be offered or sold in New Zealand (or allotted with a view to being offered for sale in New Zealand) to a person who:

- is an investment business within the meaning of clause 37 of Schedule 1 of the FMC Act;
- meets the investment activity criteria specified in clause 38 of Schedule 1 of the FMC Act;
- is large within the meaning of clause 39 of Schedule 1 of the FMC Act;
- is a government agency within the meaning of clause 40 of Schedule 1 of the FMC Act; or
- is an eligible investor within the meaning of clause 41 of Schedule 1 of the FMC Act.

## Norway

This document has not been approved by, or registered with, any Norwegian securities regulator under the Norwegian Securities Trading Act of 29 June 2007 no. 75. Accordingly, this document shall not be deemed to constitute an offer to the public in Norway within the meaning of the Norwegian Securities Trading Act. The New Shares may not be offered or sold, directly or indirectly, in Norway except to “professional clients” (as defined in the Norwegian Securities Trading Act).

# International Offer Restrictions (3/3)

## Singapore

This document and any other materials relating to the New Shares have not been, and will not be, lodged or registered as a prospectus in Singapore with the Monetary Authority of Singapore. Accordingly, this document and any other document or materials in connection with the offer or sale, or invitation for subscription or purchase, of New Shares, may not be issued, circulated or distributed, nor may the New Shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore except pursuant to and in accordance with exemptions in Subdivision (4) Division 1, Part 13 of the Securities and Futures Act 2001 of Singapore (the “SFA”) or another exemption under the SFA.

This document has been given to you on the basis that you are an “institutional investor” or an “accredited investor” (as such terms are defined in the SFA). If you are not such an investor, please return this document immediately. You may not forward or circulate this document to any other person in Singapore.

Any offer is not made to you with a view to the New Shares being subsequently offered for sale to any other party in Singapore. On-sale restrictions in Singapore may be applicable to investors who acquire New Shares. As such, investors are advised to acquaint themselves with the SFA provisions relating to resale restrictions in Singapore and comply accordingly.

## Switzerland

The New Shares may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange or on any other stock exchange or regulated trading facility in Switzerland. Neither this document nor any other offering or marketing material relating to the New Shares constitutes a prospectus or a similar notice, as such terms are understood under art. 35 of the Swiss Financial Services Act or the listing rules of any stock exchange or regulated trading facility in Switzerland.

No offering or marketing material relating to the New Shares has been, nor will be, filed with or approved by any Swiss regulatory authority or authorised review body. In particular, this document will not be filed with, and the offer of New Shares will not be supervised by, the Swiss Financial Market Supervisory Authority (FINMA).

Neither this document nor any other offering or marketing material relating to the New Shares may be publicly distributed or otherwise made publicly available in Switzerland. The New Shares will only be offered to investors who qualify as “professional clients” (as defined in the Swiss Financial Services Act). This document is personal to the recipient and not for general circulation in Switzerland.

## United Kingdom

This document has not been delivered for approval to the Financial Conduct Authority in the United Kingdom and no prospectus (within the meaning of Regulation 21 of The Public Offers and Admissions to Trading Regulations 2024 (“POATRs”)) has been published or is required to be published in respect of the New Shares.

This document is issued on a confidential basis to “qualified investors” (within the meaning of paragraph 2 of Schedule 1 to the POATRs) in the United Kingdom. The New Shares may not be offered or sold in the United Kingdom by means of this document or any other document except pursuant to an exemption from the general prohibition on offers of relevant securities to the public in the United Kingdom. This document should not be distributed, published or reproduced, in whole or in part, nor may its contents be disclosed by recipients to any other person in the United Kingdom.

Any invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000, as amended (“FSMA”)) received in connection with the offer or sale of the New Shares has been, and only will be, communicated or caused to be communicated in the United Kingdom in circumstances in which section 21(1) of the FSMA does not apply to the Company.

In the United Kingdom, this document is being distributed only to, and is directed at, persons (i) who have professional experience in matters relating to investments falling within Article 19(5) (investment professionals) of the Financial Services and Markets Act 2000 (Financial Promotions) Order 2005 (“FPO”), (ii) who fall within the categories of persons referred to in Article 49(2)(a) to (d) (high net worth companies, unincorporated associations, etc.) of the FPO or (iii) to whom it may otherwise be lawfully communicated (“relevant persons”). The investment to which this document relates is available only to relevant persons. Any person who is not a relevant person should not act or rely on this document.
