ASX RELEASE

Phase 3 aircore drilling commences at Mt McKenna Gold Project.

Platina Resources Limited (Platina or the Company) has commenced drilling prospects within high-priority exploration Targets 2,3, 4 and 5 at its Mt McKenna Gold Project in Western Australia.

The Phase 3 program comprises up to 9,000 metres of aircore drilling, targeting structures and anomalies identified through geological mapping, geophysical interpretation and ground gravity surveys.

This program represents a significant component of the Company's planned 20,000 metres of aircore and reverse circulation (RC) drilling for 2026 across its Mt McKenna, Sunrise Bore and Mt Morgans South projects, all located within the highly prospective Laverton Gold District – see Figure 1.

The current program also includes approximately 3,000 metres of drilling at Target 2, which was deferred during the Phase 2 campaign in February due to ground conditions and drill rig mechanical issues. Assay results from the completed Target 2 drilling have been submitted to the laboratory and are currently pending.

Platina Managing Director, Mr Corey Nolan, said:

"We have rapidly advanced our pipeline of drill-ready targets and completed the necessary cultural heritage clearance work to enable this significant phase of drilling.

"Our technical team are particularly encouraged by the scale and number of newly identified structures across Targets 3, 4 and 5, which will now be systematically tested through this program.

"Targets defined from this phase of aircore drilling will be prioritised for follow-up with deeper reverse circulation drilling in the coming months."

DISCLAIMER

Statements regarding Platina Resources' plans with respect to its mineral properties are forward-looking statements. There can be no assurance that Platina Resources' plans for development of its mineral properties will proceed as currently expected. There can also be no assurance that Platina Resources will be able to confirm the presence of additional mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of Platina Resources' mineral properties.

ABOUT PLATINA RESOURCES LIMITED (ASX: PGM)

Platina is an Australian-based company focused on advancing early-stage metals projects through exploration, feasibility, and permitting towards development. Shareholder value is created by monetising the projects through either sale, joint venture or development.

Platina controls a 100% interest in a portfolio of gold projects in the Yilgarn Craton in Western Australia. For more information please see: www.platinaresources.com.au

REFERENCES TO PREVIOUS ASX RELEASES

The information in this report that relates to Exploration Results were last reported by the company in compliance with the 2012 Edition of the JORC Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves in market releases dated as follows:

- New gold project in the world-class Laverton gold district, 3 September 2025
- Commencement of Exploration at the Mt McKenna Gold Project, 25 September 2025
- Mt McKenna Gold Project Exploration Update, 3 November 2025
- Aircore drilling underway at Mt McKenna Gold Project, 26 November 2025
- Drilling completed at Mt McKenna and US\$1 million received, 23 December 2025
- Mt McKenna Gold Project: aircore drilling identifies 1.5km mineralised structure, 19 January 2026
- Platina outlines fully funded 2026 gold exploration strategy, 5 February 2026
- Mt McKenna Gold Project - Back-to-back drilling programs, 12 February 2026
- Mt McKenna Gold Project - Phase 2 drilling underway, 27 Feb 2026
- Ground gravity survey defines drilling targets at Mt McKenna, 11 Mar 2026

The company confirms that it is not aware of any new information or data that materially affects the information included in the market announcements referred to above and further confirms that all material assumptions underpinning the exploration results contained in those market releases continue to apply and have not materially changed.

COMPETENT PERSON STATEMENT

The information in this Report that relates to the Mt McKenna Project exploration results is based on information reviewed and compiled by Mr Rohan Deshpande who is an employee of Platina Resources and Member of the Australian Institute of Geoscientists (AIG). Mr Deshpande has sufficient experience which is relevant to this style of mineralisation and type of deposit under consideration and to the overseeing activities which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves". Mr Deshpande consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
