The exercise price will be reduced again according to the formula provided for in the ASX Listing Rules as a result of the Offer. The Company will advise the new exercise price following completion of the Offer and lodge the required documentation with ASX.

2.3 Key Risks

Potential investors should be aware that subscribing for Securities in the Company involves a number of risks. The key risk factors of which investors should be aware are set out below with additional risks specified in Section 7 of this Prospectus. These risks together with other general risks applicable to all investments in listed securities not specifically referred to, may affect the value of the Shares and Attaching Options in the future.

The following is a summary of the key risk factors (please refer to Section 7 of this Prospectus for a more extensive list of risk factors):

(a) Reinstatement to Trading

The Company's Shares were suspended by the ASX from trading on 2 February 2026 due to a delay in the Company lodging its December quarterly report. Subsequently, the quarterly report was lodged with ASX on 20 February 2026 but ASX has agreed to a voluntary suspension in trading until the earlier of an announcement of a recapitalisation and 8 May 2026.

If the Offer is successfully completed, the Company anticipates its Shares will be reinstated to trading on the ASX. However, the decision is in the ASX's

sole discretion and no assurance can be given that the voluntary suspension will be lifted.

If ASX were to refuse to restate the Company's Shares to trading, investors would be unable to exit their investment by trading on the ASX unless and until such time as the ASX was satisfied that the suspension should be lifted.

(b) **Dilution**

Upon completion of the Offer, based on the Assumption, the number of Shares in the Company will increase from 698,178,419 currently on issue to 4,189,070,514. This means that each Share will represent a significantly lower proportion of the ownership of the Company and a Shareholder who does not take up its Entitlement will be diluted by 83.3%.

(c) **Production ramp up**

The Company intends to ramp up its mining and processing operations. There is a risk that any ramp up may take longer than planned, not achieve desired kaolin product levels, revenues may be less than anticipated or costs may be higher than anticipated. This may have a materially adverse effect on the Company's financial position and prospects.

(d) **Going concern**

The continuing viability of the Company and its ability to continue as a going concern and meet its debts and commitments as and when they fall due are dependent on a number of factors, including:

- (i) the successful completion of the Offer and associated Debt Conversion;
- (ii) the continued support of the Company's key creditors and financiers, including in relation to the restructuring and repayment of existing debt obligations;
- (iii) the Company's major distributor, Dak Tai, continuing to order at least the minimum quarterly volume of product under its Offtake Agreement;
- (iv) the Company maintaining sufficient operational performance at its Wickepin processing facility, including achieving improved plant availability and throughput following recent operational disruptions;
- (v) the successful implementation of planned plant upgrades and maintenance activities intended to address operational issues identified, including abrasion-related wear in the dry separation process and other factors that have reduced plant availability and contributed to lower-than-expected production during the December 2025 quarter;
- (vi) the Company continuing to operate its mining and processing activities without material interruption; and
- (vii) the Company maintaining sufficient run-of-mine stockpiles and mining approvals to support continuous processing operations at the Wickepin plant.

In its half yearly financial report to 31 December 2026 (**HY2026 Accounts**) the Company recorded a loss from continuing operations after income tax of \$5,055,426 and had net cash outflows from operating activities of \$3,278,202 and working capital deficit of \$4,200,073.

The HY2026 Accounts include a note that the ability of the Company to continue as a going concern is dependent on maintaining the support of existing and potentially new financiers, achieving increased sales of the Company's products.

If the above matters are not achieved or resolved in the anticipated timeframe, the Company may be unable to continue as a going concern and may be required to realise its assets and discharge its liabilities other than in the ordinary course of business and at amounts different from those stated in the financial statements.

(e) **Additional requirements for capital**

The Company believes that the funds raised under the Offer, together with existing cash flow, will be sufficient to meet working capital requirements until end August 2026. This conservatively assumes that plant production volumes average 3,600 tonnes per month over that period, which is considered by the Board to be an objectively reasonable assumption.

Thereafter the Company may need to raise additional capital to meet its working capital requirements, with the objective that any additional capital raise is sufficient for the Company to fund operations until Q3 FY2027.

The Offer is intended to reduce debt and provide working capital to stabilise operations and reposition the Company following the recapitalisation to support the raising of additional funds when required.

Any additional equity financing may dilute shareholdings. Any debt financing, if available, may involve restrictions on the Company's activities. If the Company is unable to obtain additional funding as needed, it may be required to reduce the scope of its operations or dispose of assets, as the case may be.

The Company's ability to raise funds through the issue of Shares or other securities is subject to share market conditions from time to time.

There is no certainty that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company and its Shareholders. If the Company is unable to raise additional funds when required, it may not be able to continue as a going concern.

Future sustainable cashflows are contingent upon increasing plant output, reducing total costs of operations and importantly, increasing average kaolin sale prices received by focussing sales into higher value markets.

At conservative monthly production volumes of 3,600 – 4,000 tonnes from the plant, output will be committed until Q2/Q3 FY2027 in fulfilling the Dak - Tai offtake agreement, with total contracted volume to 31 December 2026 approximately 48,000 tonnes as at the date of this Prospectus (of which ~9,000 tonnes has been pre-paid by Dak Tai). Volumes of kaolin produced in excess of agreed monthly deliveries to Dak Tai, of the total contracted supply, will be produced to specifications suitable for high-value, positive

margin markets. Until this time however, the Company will not generate sustainable (positive) cashflows.

The Company may require additional capital in the future to continue operations, implement operational improvements and pursue its revised business strategy.

The Company's future capital requirements, and the Company's ability to satisfy those requirements, depend on numerous factors, many of which are beyond the control of the Company.

(f) **Operational activities**

The Company's operational activities include mining and supply of kaolin products, which are subject to operating risks that could impact the amount and quality of kaolin produced or increase the cost of production for varying lengths of time. Such difficulties include: increased costs of mining, processing, loading and equipment failures, safety incidents and accidents, freight capacity constraints and a shortage of labour. If any of these or other conditions occur in the future, they may increase the cost of the Company's activities which could adversely affect the Company's results or decrease the value of its assets.

The Company received regulatory prohibition and improvement notices in relation to its mining operations and Wickepin kaolin plant in October and December 2025, as announced to the ASX on 10 March 2026 following a query from ASX. The Company has closed out all material matters raised by these notices. While the Company is not currently aware of any reason why further notices would be received, no assurance can be given in this regard. Any such notices may adversely affect the Company's mine and plant and have a material adverse effect on the financial condition and prospects of the Company.

(g) **Financial Indebtedness**

WAK owes approximately \$27,591,751 to loan creditors of which \$1,150,000 is on an interest-free basis. It also owes \$378,073 to asset financiers (hire purchase), \$161,058 (Lease Liability) and approximately \$2,369,540 to trade creditors (including related parties). WAK has entered agreements with those creditors that have loaned it money and certain trade creditors to document the manner in which its debts will be repaid, which includes repayments in pre-defined instalments in quarterly repayments when WAK achieves free cash flow in the previous quarter. Specific agreed repayments are conditional on WAK having free cash flow. Asset financing payments continue to occur in the ordinary course of business.

(h) **Fuel Supply and Availability Risk**

The Company's processing operations require the ongoing supply of fuel (including diesel and other petroleum-based fuels) to operate plant, equipment and supporting infrastructure at the Wickepin processing facility. The availability and price of fuel may be affected by a range of factors outside the control of the Company, including disruptions to global or domestic fuel supply chains, geopolitical events, refinery outages, transportation constraints, regulatory changes, industrial action or broader energy market volatility.

If fuel becomes unavailable, restricted or significantly delayed for any period, the Company may be unable to operate its processing plant or associated equipment at planned levels or at all. Any interruption to fuel supply could result in temporary shutdowns, reduced plant availability, lower production volumes, increased operating costs, delays in meeting customer commitments and a corresponding adverse impact on the Company's financial performance and cash flow.

In circumstances where sufficient fuel cannot be obtained to maintain planned plant operations, the Company may be required to source alternative energy solutions, including renewable energy generation or supply. However, there can be no assurance that suitable renewable or alternative energy arrangements could be procured in a timely manner, on commercially acceptable terms or at all. The transition to alternative energy sources may also require additional capital expenditure, infrastructure modifications or operational adjustments, which could increase costs and delay the resumption or continuation of full plant operations.

If the Company is unable to secure sufficient fuel supply, or cannot implement alternative energy arrangements in a timely or cost-effective manner, this may materially disrupt the Company's operations, increase operating costs and adversely affect production levels. Any such outcome could have a material adverse effect on the Company's operations, financial position, financial performance and future prospects.

(i) **Executive Management**

The responsibility of overseeing the day-to-day operations and the Company's strategic management depends substantially on its senior management and key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

3. Letter from the Chair

Dear Shareholders,

As you will be aware, the Company's shares are currently suspended from trading on the ASX at the Company's request and will remain so, subject to ASX's discretion, until the earlier of an announcement confirming the completion of a recapitalisation and 8 May 2026.

The Board considers a recapitalisation is critical to overcome a shortfall in working capital and to substantially reduce the Company's debt levels. The shortfall in working capital has largely resulted from ongoing challenges with the Wickepin kaolin processing plant (as most recently disclosed to ASX on 31 December 2025).

In order to secure sufficient working capital and substantially reduce its debt, the Company has resolved to undertake a non-renounceable pro-rata entitlement offer (**Offer**) to Eligible Shareholders to raise up to approximately \$34.9 million (before costs).

Key shareholders and creditors with ~43% share ownership and holding ~\$27.5 million of debt have provided firm commitments for ~\$4.7 million in entitlements and have agreed to partially underwrite ~\$10.1 million of the Offer by way of debt for equity conversion.

If the Offer is fully subscribed up to approximately \$22.5 million of debt owed to major creditors would be repaid as part of the recapitalisation and the Company would expect to retain approximately \$11.2 million in working capital (after deducting costs of the Offer).

The Company has set a Minimum Subscription of 1.53 billion Shares (equivalent to \$15.3 million in subscriptions in cash or by debt for equity conversion).

If the Minimum Subscription is achieved:

- (a) there will be a substantial reduction in the Company's debt levels (with ~\$10.1m to be converted into equity by way of partial underwriting of the Offer by the Company's major creditors (**Debt Conversion**)¹;
- (b) the Company will raise working capital of ~\$4.7 million (after costs of the Offer) which is currently considered sufficient to fund the Company's operations until end August 2026², allowing the Company to overcome its short-term cash flow shortfall and undertake improvements to the Wickepin kaolin plant to increase production; and
- (c) the Company currently considers it will be in a strong position to raise additional working capital when required, with the objective that any additional capital raise is sufficient for the Company to fund operations until Q3 FY2027.

¹ Refer to Sections 4.7 and 5.8 of this Prospectus for further details in respect of the Debt Conversion by way of partial underwriting and the effect on control of the Company that may result and Section 8.4 for details of the Underwriting Agreements.

² Assuming that production volumes average 3,600 tonnes per month over that period, which is considered by the Board to be an objectively reasonable assumption.

The Company intends to apply to ASX to reinstate its Shares to trading on the ASX on completion of the Offer. The decision as to reinstatement is in the sole discretion of the ASX.

The issue price of \$0.01 per Share under the Offer and Shortfall Offer represents a 65% discount to the 10-day VWAP up to 29 January 2026, being the final day that the Company's Shares traded on the ASX prior to the Company's suspension from trading on the ASX.

The Management team of your Company are confident that the program of plant and other asset improvements scheduled to be effected on the closure of this Offer will lead to substantial increases in (primarily) plant availability: that is, the time that the processing plant is actually consistently producing kaolin.

The dramatic shift in demand by the Chinese kaolin market to non-USA based suppliers that materialised in early 2025 saw demand for production and shipping volumes from the Wickepin plant increase dramatically. Management have mapped the program towards plant stability against which they aspire to capitalise on this strong demand and continue to grow the customer base both inside and external to China.

At the same time, the Board are bringing corporate and financial governance skillsets to bear on the business overall. To this end, the independent directors, being Catherine Lynch and me, are working closely with management to develop first principles sales and operational budgets, as we move towards eliminating the negative gross margins on the Company's products.

The information in this Prospectus should be read carefully in its entirety before deciding whether or not to participate in the Offers. In particular applicants should consider the key risk factors outlined in Section 7 of this Prospectus.

On behalf of your Board, I invite you to consider this investment opportunity and thank you for your ongoing support for our Company.

Yours faithfully,

Matt Shackleton
Non-Executive Chair
WA Kaolin Limited

4. Details of the Offers

4.1 Offer

The Offer is being made as a pro-rata non-renounceable entitlement issue of five (5) new Shares for every one (1) Share held by Eligible Shareholders registered at the Record Date at an issue price of \$0.01 per Share together with one free Attaching Option for every two (2) new Shares issued.

The ratio of 5:1 is required to ensure the total amount to be raised allows:

- (a) the Company to materially reduce the Company's debt by at least ~\$10.1 million if only the Minimum Subscription was achieved (through the Debt Conversion) and by up to ~\$22.5 million if the Offer is Fully Subscribed; and
- (b) the Company to secure ~\$4.2 million from Century Horse by way of an Entitlement firm commitment, being a substantial portion of the \$5.2 million in cash subscriptions (before Offer costs) the Company considers it requires for working capital purposes until end August 2026 if only the Minimum Subscription is achieved.

All of the Shares offered under this Prospectus will following issue rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 6.1 of this Prospectus for further information regarding the rights and liabilities attaching to the Shares and Section 6.2 of this Prospectus for the Attaching Options.

Fractional entitlements will be rounded up to the nearest whole number.

The issued capital of the Company on a fully diluted basis as at the Last Practicable Date is 821,163,019 Shares and on completion of the Offer (based on the Assumption) would be 6,097,501,162 Shares.

Assuming the Offer is Fully Subscribed (on an undiluted basis) then the Company will raise approximately \$34,908,921 under the Offer (before costs).

The total amount raised under the Offer will be reduced by the amounts the Partial Underwriters subscribe for under their Underwriting Agreements as their underwriting commitments are to be satisfied through the discharge of an equivalent amount of debt owed to the Partial Underwriters by the Company.

The purpose of the Offer and the intended use of funds raised are set out in Sections 5.1 and 5.4 of this Prospectus.

The Offer closes on the Closing Date but the Company reserves the right to extend the Closing Date by giving notice to the ASX in accordance with the ASX Listing Rules.

The Securities in your Entitlement that are not taken up will form part of the Shortfall (see Section 4.4 below).

4.2 Existing Options

As at the date of this Prospectus, the Company has 122,984,600 Options on issue. Please refer to Section 5.3 of this Prospectus for information on the material terms of the existing Options.

For personal use only

Holders of Options must exercise their Options prior to the Record Date in order to participate in the Offer in respect of the Shares underlying their Options.

Whilst the Board does not expect any Options to be exercised prior to completion of the Offer, if all Options are exercised (and the resultant Shares issued) before the Record Date, the Offer will increase by approximately 614,923,000 Shares and 307,461,500 Attaching Options, taking the aggregate Shares and Options that may be subscribed for and issued under the Offer to a total of approximately 4,105,815,095 and 2,092,907,548 Attaching Options and the funds raised will increase by approximately \$6,149,230 to a total of approximately \$41,058,151 (before costs and rounding).

4.3 Minimum Subscription

The minimum subscription for the Offer is 1.53 billion Shares being subscribed for under the Offers by the Offer Closing Date (whether by cash subscription or Debt Conversion, with up to ~520 million Shares anticipated to be issued for cash totalling ~\$5.2 million (before costs) and up to ~1.01 billion Shares issued for the Debt Conversion) (**Minimum Subscription**).

No Securities will be issued until Applications for the Minimum Subscription have been received. If the Minimum Subscription is not achieved within 4 months after the date of issue of this Prospectus, the Company will either repay the Application monies to the Applicants or issue a supplementary prospectus or replacement prospectus to all Applicants and, in accordance with section 724 of the Corporations Act, allow all Applicants one month to withdraw their Applications and be repaid their Application monies.

4.4 Condition of the Offer

The Offer is conditional on Shareholders approving the Offer at the general meeting to be held on or about Tuesday 28 April 2026. If Shareholder approval is not obtained, the Offer will not proceed and all Application Monies will be refunded as soon as practicable.

4.5 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer.

The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three (3) months following the Closing Date of the Offer. The Shortfall Offer is currently proposed to close at 5.00pm (AEDT) on Thursday 23 July 2026 unless extended in the Board's discretion.

The issue price for each Share to be issued under the Shortfall Offer will be \$0.01, being the price at which Shares have been offered under the Offer, with one (1) Attaching Option for every two (2) new Shares issued.

All Securities issued under the Shortfall Offer shall be issued on the same terms as Securities being offered under the Offer.

Eligible Shareholders (unless subject to ASX Listing Rule 10.11 such as a Director) may apply for additional Securities under the Shortfall in accordance with the Entitlement and Acceptance Form and by paying the appropriate Application Monies

in accordance with the instructions provided with the Entitlement and Acceptance Form.

Additionally, other investors who are not currently Shareholders who wish to participate in the Shortfall may apply for Shortfall Securities by following the instructions provided with the Shortfall Application Form and paying the appropriate Application Monies.

If you are not a Shareholder and wish to participate in the Shortfall Offer, please contact the Company.

4.6 Lead Manager and the Lead Manager Options Offer

Leeuwin Wealth has been appointed as lead manager to the Offers. The terms of the appointment of the Leeuwin Wealth are summarised in section 8.6 of this Prospectus.

The Lead Manager Options Offer is a conditional offer of 40 million Options to the Lead Manager or its nominee as consideration for acting as corporate advisor and Lead Manager in relation to the Offer. The Lead Manager Options Offer is conditional upon successful completion of the Offer.

The Lead Manager offer will remain open for up to three (3) months following the Closing Date of the Offer. The Lead Manager Options Offer is currently proposed to close on the Closing Date of the Offer unless extended in the Board's discretion.

The Lead Manager Options Offer is only made to and capable of acceptance by the Lead Manager, or its nominees.

4.7 Partial Underwriting of Offer

The Offer is partially underwritten by the Partial Underwriters detailed below (upon and subject to the terms and conditions of their respective underwriting agreements (**Underwriting Agreements**)). The Partial Underwriters have collectively agreed to underwrite up to \$10.13 million of the Offer (**Underwritten Amount**) as detailed below through the conversion of debts owed by the Company to the Partial Underwriters (**Debt Conversion**).

Partial Underwriter	Underwritten Amount ¹	Underwritten Shares	Underwritten Attaching Options
Scientific Management Associates (Operations) Pty Ltd (SMAO)	\$5,459,661	545,966,055	272,983,028

TOTAL	\$10,130,000	1,013,000,000	506,500,000

Notes:

1. To be satisfied through a reduction in equivalent amount of debt owed by the Company to the applicable Partial Underwriter.

2. Wamco Industries is a related party of the Company by virtue of being controlled by the Company's Managing Director Alf Baker.

Refer to Section 8.4 for a summary of the material terms of the Underwriting Agreements which were negotiated on arms' length terms by the independent Non-Executive Directors and are on materially identical terms. No fees are payable to the Partial Underwriters for partially underwriting the Offer.

The Company sought a professional underwriter for the Offer but was unable to secure one due to the Company's Shares being suspended from trading.

The Partial Underwriters currently hold Shares and Voting Power in the Company as set out below. Refer to Section 5.8 of this Prospectus for details with respect to the potential effect of the Underwriting Agreements on the control of the Company.

Partial Underwriter	Existing Shares held directly	Existing Voting Power
Boneyard Investments	52,572,885 ¹	8.14% ¹
Wamco Industries	0 ²	10.65% ²
SMAO	0 ³	12.78% ³

Notes:

1. A further 4,269,422 Shares are held by Chemco Superannuation Fund Pty Ltd (**Chemco**), which is an associate of Boneyard Investments due to both entities being controlled by Mr Gordon Martin, resulting in Boneyard Investments/Chemco having Voting Power of 8.14% as at the Last Practicable Date.
2. Wamco Industries is an associate of Silver Tropic Pty Ltd (**Silver Tropic**) (with both entities being controlled by the Company's Managing Director Alf Baker). Silver Tropic is the registered holder of 74,375,241 Shares as at the Last Practicable Date, giving Wamco Industries/Silver Tropic Voting Power of 10.65% as at the Last Practicable Date.
3. SMAO is not the registered holder of any Shares at the Last Practicable Date. Scientific Management Associates (Victoria) Pty Ltd (**SMAV**), which is an Associate of SMAO, is the registered holder of 89,193,211 Shares as at the Last Practicable Date, giving SMAO/SMAV Voting Power of 12.78% as at the Last Practicable Date.

4.8 Allocation of Shortfall

The Directors reserve the right to issue any Shortfall at their discretion, subject to the Underwriting Agreements.

The Board intends to allocate Shortfall as follows:

- (a) firstly, to Eligible Shareholders (other than any Partial Underwriters) who have validly applied for Shortfall Securities under the Shortfall Offer before the Offer Closing Date and who do not require Shareholder approval for Shortfall Securities to be issued to them, with pro rata scale back if necessary; and
- (b) then, in the Board's discretion, to new investors determined by the Board and the Lead Manager that apply for Shortfall under the Shortfall Offer before completion of the Offer (other than the Partial Underwriters); and
- (c) then, to the Partial Underwriters by way of Debt Conversion (with the same number of Shares issued to each Partial Underwriter until their underwriting commitments are discharged); and

- (d) finally, to new investors determined by the Board and the Lead Manager that apply for Shortfall under the Shortfall Offer after the Closing Date of the Offer (other than the Partial Underwriters,

with allocations (and any pro rata scale back) taking into account the following factors, namely, the need to:

- (a) give preference to existing Shareholders of the Company in recognition of their ongoing support;
- (b) consider any new potential long-term or cornerstone investors identified; and
- (c) ensure an appropriate Shareholder base for the Company.

Except for the issue of Shares in accordance with the Underwriting Agreements, no Shortfall will be issued to a party if the effect would be to increase that party's Voting Power in the Company to an amount greater than 20%.

Refer to Section 5.8 of this Prospectus for details with respect to the Partial Underwriters who could potentially increase their Voting Power in the Company above 20.0% as a result of their underwriting commitment, depending on the Entitlements and Shortfall Securities subscribed for by the Offer Closing Date.

Notwithstanding any other provision of this Prospectus, the Directors reserve the right to issue an Applicant a lesser number of Shortfall Securities than applied for or no Shortfall Securities at all. All decisions regarding the allocation of Shortfall Securities will be made by the Directors, and will be final and binding on all Applicants under the Shortfall Offer. As such, there is no guarantee that any Shortfall Securities applied for will be issued to Applicants.

The Company will have no liability to any Applicant who receives less than the number of Shortfall Securities applied for under the Shortfall Offer. If the Company scales back any applications for Shortfall Securities under the Shortfall Offer any application monies will be pro rata returned (without interest) in accordance with the provisions of the Corporations Act.

4.9 ASX Waivers – Listing Rules 7.11.3 and 7.15

ASX Listing Rule 7.11.3 provides that the ratio of securities offered under a pro rata rights issue must not be greater than one security for each security held. ASX Listing Rule 7.11.3 does not apply where the offer is renounceable and the issue price is not more than the VWAP for securities in that class, calculated over the last 5 days on which sales in the securities were recorded before the day on which the issue was announced.

The Company's Shares have been suspended from official quotation since 2 February 2026 and will continue to be suspended until the earlier of:

- (a) a release of an announcement confirming the completion of the proposed recapitalisation of the Company (including completion of the Offer); or
- (b) the commencement of trading on Friday, 8 May 2026, unless the Company requests that the suspension be lifted earlier.

As such, the Company cannot make the Offer on a renounceable basis in order to comply with ASX Listing Rule 7.11.3. The Company therefore sought, and ASX

granted, a waiver of ASX Listing Rule 7.11.3 to the extent necessary to permit the Company to proceed with the Offer on the terms set out in this Prospectus.

It is a condition of the waiver that the Company obtain Shareholder approval for the terms of the Offer. A resolution will be put to Shareholders at the general meeting to be convened for 28 April 2026 (**General Meeting**) to seek to satisfy this condition. The votes of substantial shareholders, underwriters or sub-underwriters of the Offer, any brokers or managers of the Offer, and any of their respective Associates will be excluded from voting on the resolution. The Company has otherwise complied with the conditions of the waiver.

The Company has also been granted a waiver of ASX Listing Rule 7.15 to permit the Company to undertake the Offer with a record date that is prior to the General Meeting, on the condition that the Company's securities are not reinstated to trading prior to the General Meeting. Without this waiver, the Company would need to undertake the Offer after the general meeting, delaying the receipt of funds from the Offer by approximately three week at a time when the Company urgently requires additional working capital.

4.10 Acceptance – what Eligible Shareholders may do

An Eligible Shareholder's acceptance of the Offer must be in accordance with the Entitlement and Acceptance Form accompanying this Prospectus.

Other than where you apply for Shortfall Shares, your acceptance must not exceed your Entitlement as shown on that form.

You may participate in the Offer (and Shortfall Offer) as follows:

- (a) accept your **full** Entitlement:
- (b) accept your **full** Entitlement and apply for Shortfall under the Shortfall Offer;
- (c) accept **part** of your Entitlement and allow the balance to lapse; or
- (d) if you do not wish to accept all or part of your Entitlement, you are not obliged to do anything.

4.11 Acceptance – what new investors may do

Investors who are not Eligible Shareholders who wish to apply for Shortfall Shares should follow the instructions on the Shortfall Application Form provided with this Prospectus.

4.12 No Return of Application Forms

Eligible Shareholders do NOT need to return their Entitlement and Acceptance Form to the Company provided payment is made for Securities applied for using BPAY® or EFT in accordance with the instructions on their Entitlement and Acceptance Form.

Eligible Shareholders can obtain their Entitlement and Acceptance Form details online at <https://portal.automic.com.au/investor/home>.

Investors who wish to subscribe for Shortfall Securities under the Shortfall Offer do NOT need to return a Shortfall Application Form to the Company provided payment

is made for Securities applied for using BPAY® or EFT in accordance with the instructions on the Shortfall Application Form.

4.13 No payment by cheque

The Company has resolved that Applications cannot be paid for by cheque.

4.14 Payment by BPAY

For payment by BPAY®, please follow the instructions on the Entitlement and Acceptance Form which can be accessed online at the offer website <https://portal.automic.com.au/investor/home>. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (a) you do not need to submit the Entitlement and Acceptance Form if you pay by BPAY® but are taken to have made the declarations on that Entitlement and Acceptance Form; and
- (b) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application Monies paid by BPAY®.

4.15 By Electronic Funds Transfer (EFT)

If you are an Eligible Shareholder resident outside Australia, and unable to pay using BPAY®, you may make payment by Electronic Funds Transfer (EFT). Please follow the instructions on your Entitlement and Acceptance Form. You can only make a payment via EFT if you are the holder of an account that supports EFT transactions to an Australian bank account. Please note that should you choose to pay by EFT:

- (a) you must make payment to the entitlement offer bank account using your unique entitlement reference number for payment. **You must quote your unique entitlement reference number as your payment reference/description when processing your EFT payment. Failure to do so may result in your funds not being allocated to your Application and the Securities not being issued (and the funds refunded);** and
- (b) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares (and Attaching Options) which is covered in full by your application monies.

4.16 Cut-off for Receipt of BPAY® and EFT Payments

Applicants should be aware of the cut off time for payment to the Company's Share Registry, which for the Offer is 5.00pm (AWST) on the Closing Date. Applicants should also be aware of their own financial institutions cut-off time and associated fees with processing a funds transfer. It is the Applicant's responsibility to ensure that funds are submitted correctly so that payment is received by the closing date and time, including taking into account any delay that may occur as a result of payments being made after 3.00pm (WST) and/or on a day that is not a business day.

Any application monies received for more than your final allocation of Shares (only where the amount is \$1.00 or greater) will be refunded. No interest will be paid on any application monies received or refunded.

4.17 ASX quotation

Application for Official Quotation of the Shares offered pursuant to this Prospectus on the ASX will be made in accordance with the timetable set out at the commencement of this Prospectus.

If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three (3) months after the date of this Prospectus, (or such period as varied by the ASIC), the Company will not issue any Securities under this Prospectus and will repay all Application Monies for the Securities within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares offered for subscription.

4.18 Issue of Securities

Shares and Options issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules and timetable set out in Section 2.1 of this Prospectus.

Shortfall Securities that have been applied for before the completion of the Offer will be issued contemporaneously with completion of the Offer. Shortfall Securities applied for after completion of the Offer will be issued progressively until the Shortfall Offer closes.

Where the number of Shares and Options issued is less than the number applied for, or where no issue is made, surplus Application Monies will be refunded without any interest to the Applicant as soon as practicable.

Pending the issue of the Shares and Options or payment of refunds pursuant to this Prospectus, all Application Monies will be held in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Shares and Options issued under the Offer will be provided in accordance with the ASX Listing Rules and timetable set out at the commencement of this Prospectus. Holding statements for any Shortfall Securities issued under the Shortfall Offer will be provided as soon as practicable after their issue.

4.19 CHESS and Issuer Sponsorship

The Company will not be issuing share certificates for the Shares and Options offered under this Prospectus. The Company is a participant in CHESS, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHESS will be issuer sponsored by the Company. Because the sub-registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Investors who are issued Shares and Options under this Prospectus will be provided with a holding statement (similar to a bank account statement) that sets out the number of Shares and Options issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

4.20 Foreign shareholders

The Offer is being made to all Shareholders on the Record Date, including those with registered addresses outside Australia. The Company therefore does not need to appoint a nominee for the purposes of section 615 of the Corporations Act or ASX Listing Rule 7.7.1(c).

4.21 Rounding

Fractional entitlements will be rounded up to the nearest whole number. All references to numbers of Securities to be issued pursuant to this Prospectus are expressed subject to rounding.

4.22 Enquiries

Any questions concerning the Offer or Shortfall Offer should be directed to Abhi Anand, Company Secretary, on +61 8 9439 6300 or by email to Abhi Anand aanand@wakaolin.com.au.

The exercise price will be reduced again according to the formula provided for in the ASX Listing Rules as a result of the Offer. The Company will advise the new exercise price following completion of the Offer and lodge the required documentation with ASX.

Total		\$15,300,000	100.0%	\$34,908,921	100.0%

Notes:

1. To the extent the Partial Underwriters take up their Underwriting commitments of up to \$10.13 million, these repayments will be deemed to be made under the Debt Conversion and the total funds raised from the Offer will be reduced by an equivalent amount.
2. Refer to Section 8.15 of this Prospectus for further details relating to the estimated expenses of the Offers.

The above table is a statement of current intentions as of the date of this Prospectus. To the extent the Company raises more than \$5.2 million (after costs) in cash from the Offer, it intends to apply up to ~\$7.2 million of any additional cash funds raised above this amount towards costs of the Offer, plant improvements and working capital before any further debt is repaid. As with any budget, intervening events and new

circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way funds are applied on this basis.

The Company's current cash resources and additional capital proposed to be raised by the Offers are sufficient to meet its current stated objectives.

If the full subscription amount is not raised under the Offers, the Company's proposed use of funds will be scaled back accordingly. The Board considers that the Company will still be able to progress its key objectives until additional funding sources are secured.

The pro-forma statement of financial position includes the following adjustments:

- A. The Offer raising \$5.2 million in cash (Minimum Subscription) and \$34,908,921 (on a Fully Subscribed basis) before deducting the estimated expenses of the Offer of \$427,472 (Minimum Subscription) and \$1,207,474 (Full Subscription). The total amount raised under the Offer will be reduced by the amounts the Partial Underwriters subscribe for under their Underwritten Amount (as their Underwriting commitment will be satisfied through the discharge of an equivalent amount of debt owed by the Company to them); and
- B. Material adjustments for the period of the offer have been made in the above Pro-forma balance sheet.

5.6 Potential dilution of Shareholders

Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 83.33% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus). Examples of how the dilution may impact Shareholders are set out in the table below:

Holder	Holding at Record Date	% at Record Date	Entitlements under the Offer	Holdings if Offer not taken up	% post Offer
Shareholder 1	100,000,000	14.32%	500,000,000	100,000,000	2.39%
Shareholder 2	50,000,000	7.16%	250,000,000	50,000,000	1.19%
Shareholder 3	20,000,000	2.86%	100,000,000	20,000,000	0.48%
Shareholder 4	10,000,000	1.43%	50,000,000	10,000,000	0.24%
Shareholder 5	1,000,000	0.14%	5,000,000	1,000,000	0.02%

Note:

- The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Shortfall Offer.

5.7 Details of substantial holders

Based on publicly available information, the Company's substantial holders (i.e. holders with a Relevant Interest of 5% or more in the Company's Shares) as at the date of this Prospectus, and their Entitlement (including any Entitlement of their Associates) under the Offer, are set out in the table below.

Holder	Existing Shares held	Voting Power ¹	Entitlement (Shares) ²	Subscription Sum	Existing Shares plus Entitlement Shares ³	Maximum Potential Voting Power ⁴
Kenneth Hall ⁵	158,193,197	22.66%	790,965,985	\$7,909,660	949,159,182	31.44%

Silver Tropic Pty Ltd ⁸	74,375,241	10.65%	371,876,205	\$3,718,762	446,251,446	21.59%
Boneyard Investments ⁹	52,572,885	8.14%	262,864,425	\$2,628,644	319,706,732	28.15%
Total	459,091,358	66.37%	2,295,456,790	\$22,954,568	2,758,817,570	N/A

Notes:

- In the event all Entitlements are accepted by Eligible Shareholders there will be no change to the substantial holders on completion of the Offer.
- Entitlement includes one (1) Attaching Option (\$0.02 exercise price, expiring 30 April 2030) for every two (2) Shares subscribed.
- The "Existing Shares plus Entitlement Shares" column shows the number of Shares that would be held by the relevant substantial holder assuming the substantial holder and their Associates subscribe for their full Entitlements under the Offer. This column does not include any Shares that may be issued to the relevant substantial holder or its Associates pursuant to underwriting arrangements under the Offer. The potential effect of those underwriting arrangements on the Voting Power of the relevant parties is shown in the next column and described in Section 5.8.
- Maximum potential Voting Power is calculated on the basis that the Minimum Subscription under the Offer is achieved and assumes that the relevant substantial holder and its Associates subscribe for their full Entitlements under the Offer and, where applicable, that the relevant substantial holder or its Associates also participate through underwriting commitments. As a result, the Voting Power shown may include Shares issued in excess of the Entitlements shown in the table. Refer to Section 5.8 for full details of the underwriting arrangements and their effect on control of the Company.

5. Held as trustee for the Hall Park Trust. Kenneth Hall is a former director of the Company (resigned 20 October 2025). The Company does not currently anticipate Mr Hall will take up his Entitlement. If he does not, his Voting Power will be reduced to a maximum of 7.10% on a Minimum Subscription basis.
 6. SMAV has indicated it does not intend to take up any of its Entitlement. Its Associate, SMAO, is instead Underwriting ~\$5.5 million of the Offer by way of Debt Conversion. As such, it is anticipated that SMAV/SMAO's Voting Power will increase to a maximum of 28.51% on a Minimum Subscription basis as detailed in Section 5.8 below and Section 8.5 for details of the SMAO Underwriting Agreement.
 7. Century Horse has executed a firm commitment letter that it will subscribe for its full Entitlement of 423,784,120 Shares under the Offer, for a total subscription amount of \$4,237,841. Century Horse is an Associate of former Director Sean Hu (resigned 21 November 2025), with Mr Hu Century Horse's Chief Executive Officer.
 8. Held as trustee for the Wamco Industries Unit Trust other than 312,500 Shares held directly by Director Alfred Baker. Director Alfred Baker is a shareholder and a director of Silver Tropic and an indirect unit holder in the Wamco Industries Unit Trust. Silver Tropic has advised that it does not intend to take up its Entitlement. Its Associate, Wamco Industries, has agreed to underwrite \$1.15 million of the Offer by way of Debt Conversion. This underwriting will result in Silver Tropic /Wamco Industries' Voting Power being reduced to a maximum of 8.50% on a Minimum Subscription basis. Refer to Section 5.8 for further details on the effect of this Underwriting on control of the Company and Section 8.5 for details of the Wamco Industries Underwriting Agreement.
 9. Boneyard Investments has executed a firm commitment letter that it will subscribe for \$500,000 of its Entitlement. It has also agreed to underwriting ~\$3.5 million of the Offer by way of Debt Conversion. This will result in its Voting Power increasing to a maximum of 20.59% on a Minimum Subscription basis. Refer to Section 5.8 for further details on the effect of this Underwriting on control of the Company and Section 8.5 for details of the Boneyard Investments Underwriting Agreement.

5.8 Effect of Offer on Control of the Company

The potential effect that the issue of the Shares and Attaching Options under the Offer will have on the control of the Company, and the consequences of that effect, will depend on a number of factors, including Eligible Shareholders' interest in taking up their Entitlements and participation in the Shortfall Offer, as well as the level of participation by Eligible Shareholders and third party investors in taking up Securities under the Shortfall Offer, and the extent to which the Partial Underwriters acquire Shares under their underwriting commitments.

Section 5.8.1 below details the potential control effect on control of the Company of the Partial Underwriters' partial underwriting of the Offer.

If all Eligible Shareholders subscribe for their Entitlements, there will not be any effect on the control of the Company.

If the existing substantial Shareholders of the Company take up some or all of their Entitlements, they may increase their Voting Power in the Company above 20% (or from above 20%) potentially up to the maximum Voting Power as detailed in Section 5.7 above if only the Minimum Subscription is achieved.

However, as noted in that section and Table 2 below, the Company expects only the following substantial shareholders will acquire more than 20% Voting Power if only the Minimum Subscription is achieved:

- (a) SMAO, SMAV and their Associates: up to 28.51% Voting Power;
- (b) Boneyard Industries and its Associates: up to 20.59% Voting Power; and

- (c) Century Horse and its Associates: up to 22.82% Voting Power.

5.8.1 Effect of Partial Underwriting

As set out in Section 4.7 of this Prospectus, the Partial Underwriters have agreed to underwrite through Debt Conversion up to 1.013 billion Shares of the Offer upon and subject to the terms and conditions of the Underwriting Agreements. The Partial Underwriters' current Voting Power, as at the Record Date, is set out in Section 4.7 above.

Where cash applications received under the Offer exceed \$24 million, the underwriting commitments will be reduced on a dollar-for-dollar basis by the amount by which cash applications exceed \$24 million. Any reduction in underwriting commitments reduces the number of Shares issued to the Partial Underwriters proportionally to their respective underwriting commitments.

Accordingly, the effect of the underwriting arrangements on the voting power of the Partial Underwriters will depend on the level of participation by Shareholders under the Offer.

The tables below illustrate the potential effect of the underwriting arrangements on the voting power of the Partial Underwriters in a number of scenarios. These scenarios are provided for illustrative purposes only.

Table 1 – Current control and Offer Full Subscribed

The table below shows the Voting Power of the Partial Underwriters and their Associates at the date of this Prospectus and assumes that all Shareholders take up their Entitlements (including the Partial Underwriters or their Associates as applicable) under the Offer, such that the underwriting arrangements are not triggered.

Under this scenario, all Shareholders participate in the Offer on a pro-rata basis and the relative voting power of each Shareholder remains unchanged.

Partial Underwriter	Shares held at date of Prospectus by Partial Underwriter & Associates	Voting Power	Shares held assuming Fully Subscribed	Voting Power
Boneyard Investments ¹	56,842,307	8.14%	341,053,842 ⁴	8.14%

This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

Subject to the rights of any preference shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. The Directors may set aside any amounts that they may determine as reserves, to be applied at the discretion of the

Directors, for any purpose for which the Company's profits may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on shares which are participating shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

(d) Winding-up

(g) Future increase in capital

The issue of any new Shares is under the Directors' control. (h) Variation of rights

By resolution of the Board, the Company may vary the rights attached to Shares in a class of Shares by the issue of new Shares not having the same rights attached as any shares already issued.

7. Risk factors

7.1 Introduction

The Securities offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors consider the risk factors described below, together with information contained elsewhere in this Prospectus, publicly available information, circumstances peculiar to them and that they consult their professional advisers before deciding whether to apply for Shares and Options pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are general risks, many if not all of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares.

The Securities to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

7.2 Key risks

Section 2.3 of this Prospectus summarises the key risks that apply to the Company.

7.3 Company specific risks

(a) Kaolin prices and foreign exchange

As a significant portion of the Company's kaolin products are exported overseas, prices may fluctuate and may be affected by a number of factors beyond the control of the Company. Potential future production from the Company's mining tenements will be dependent upon the sustainable price of kaolin. The Company has certain agreements and orders with various customers including those in Australia and overseas. The Company's financing is denominated in Australian dollars and most of any future development and operational activities will also be denominated in Australian dollars. A significant portion of its sales revenue will be denominated in US dollars and the Company's ability to fund activities and make debt repayments may be adversely affected if the Australian dollar rises against the US dollar. The Company has a hedging policy in place and will undertake hedging of its foreign exchange risks to alleviate any pressure this may cause.

A material and extended fall in kaolin prices will likely affect the timing, viability and profitability of WA Kaolin's future operations, earnings and financial position (because the cost of extraction is higher than the likely return).

(b) **Tenure risks and native title**

Mining tenements are only granted for a specified term and subject to periodic renewal. The renewal of the term of granted tenements is also subject to the discretion of the Minister and the Company's ability to meet the conditions imposed on the relevant licence, including payment of annual rents and meeting prescribed expenditure commitments which, in turn, is dependent on the Company being sufficiently funded. The inability of the Company to meet those conditions may have a materially adverse effect on the operations, financial position and/or overall performance of the Company.

(c) **Metallurgy**

Metal and/or mineral recoveries are dependent upon the metallurgical process, and by its nature contain elements of significant risk such as:

- (i) developing an economic process route to produce a saleable product; and
- (ii) changes in mineralogy in the ore deposit can result in inconsistent product recovery, affecting the economic viability of the project.

If the Company does not meet agreed product specifications, the Company's ability to sell kaolin to those distributors or customers, or to sell the kaolin at the anticipated price, will be adversely affected.

(d) **Technology**

Any failure or delay in developing new technology or an inability to exploit technology as successfully or cost-effectively as competitors, could result in a decrease in customer demand, which could have a material adverse effect on the Company's business and cash flows, prospects for growth, financial condition and results of its operations.

(e) **Unforeseen expenses**

The Company's cost estimates and financial forecasts include appropriate provisions for material risks and uncertainties and are considered to be fit for purpose for proposed activities of the Company. If risks and uncertainties prove to be greater than expected, or if new currently unforeseen material risks and uncertainties arise, the expenditure proposals of the Company are likely to be adversely affected.

(f) **Customers**

The Company is currently negotiating offtake agreements for its intended expanded production. The Company has customers in place for current production and letters of intent for a certain quantity of the intended expanded production. However, there is a risk that the Company may not secure offtake agreements in respect of any, or all, of its intended expanded production or that any offtake agreement may not be on favourable terms having regard to the differing grades of product. If the customers reneged on their contractual obligations or otherwise failed to pay for kaolin product delivered, or declined to receive further kaolin product, this would have a consequential effect on the Company's financial position.

(g) **Counterparty**

The Company's ability to receive payment for kaolin product produced, sold and delivered will depend on the continued creditworthiness of and contractual performance by its distributors, customers and other counterparties. If deterioration of the creditworthiness of these counterparties occurs, or if they otherwise fail to adhere to or terminate arrangements, the Company's business could be adversely affected.

7.4 Industry specific risks

(a) Resource and reserve estimates

Any resource or reserve estimates released by the Company in the future will be expressions of judgement based on knowledge, experience and industry practice. Estimates which are valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource and reserve estimates are imprecise and depend to some extent on interpretation, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations and financial performance.

(b) Development, mining, processing and production

The business of minerals development, mining, processing and production involves many risks and may be impacted by factors including ore tonnes, yield, input prices (some of which are unpredictable and beyond the Company's control), overall availability of free cash to fund continuing development activities, labour force disruptions, cost overruns, change in the regulatory environment and other unforeseen contingencies.

Other risks also exist such as environmental hazards (including discharge of pollutants or hazardous chemicals), industrial accidents and occupational and health hazards. Such occurrences could result in damage to, or destruction of, production and processing facilities, personal injury or death, environmental damage, delays in mining, increased production costs and other monetary losses and possible legal liability to the owner or operator of a mine or processing plant. The Company may become subject to liability for pollution or other hazards against which it has not insured or cannot insure, including those in respect of past mining activities in an area for which it was not responsible.

(c) Infrastructure and transport

The Company's ability to achieve production targets, receive goods and services and export products may be restricted by access to power networks, roads and other infrastructure.

(d) Environmental

The Company's current and proposed activities are subject to state and federal laws and regulations concerning the environment. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Mining and processing operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of

waste products occurring as a result of production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations.

The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations may become more onerous, making the Company's operations more expensive.

Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programs or mining activities.

(e) **Safety legislation**

Mines and processing plant are subject to a range of safety legislation which may change in a manner that may include requirements in addition to those now in effect, and a heightened degree of responsibility for companies and their directors and employees.

(f) **Competition risk**

The industry in which the Company is involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operation and financial performance of the Company's projects and business.

(g) **Industrial action**

The Company is subject to the risk of industrial action and work stoppages by employees and contractors who provide services which are necessary for the continued operation of the Company's businesses.

(h) **Pandemic**

Outbreaks of pandemics or diseases, including, for example, the outbreak of the coronavirus disease (COVID-19), may have a material adverse effect on the Company's business. The Company's share price may be adversely affected by economic uncertainty caused by pandemics such as COVID-19.

(i) **Climate change**

There has been increasing concern by the public and regulators globally on climate change issues. As a mining company, the Company is exposed to both transition risks and physical risks associated with climate change. Transitioning to a lower-carbon economy may entail extensive policy, legal, technology and market changes and, if demand for kaolin declines, the Company will find it difficult to commercialise any resources it discovers. Physical risks resulting from climate change can be acute or chronic. Acute physical risks refer to those that are event-driven, including increased

severity of extreme weather events, such as cyclones or floods. Chronic physical risks refer to longer term shifts in climate patterns (for example, sustained higher temperatures) that may cause sea level rises or chronic heat waves. The transition and physical risks associated with climate change (including also regulatory responses to such issues and associated costs) may significantly affect the Company's operating and financial performance.

7.5 General risks

(a) Stock market fluctuations and economic conditions

The Shares to be issued under this Prospectus will be quoted on the ASX. The price of Shares may rise or fall and there is no certainty in respect of profitability, dividends, return of capital, or the price at which the Shares may trade on the ASX.

The selling value of the Shares will be determined by the stock market and will be subject to a range of factors beyond the control of the Company, and the Directors and officers of the Company. Such factors include, but are not limited to:

- (i) the demand for and availability of Shares;
- (ii) movements in domestic interest rates;
- (iii) exchange rates;
- (iv) general and domestic economic activity; and
- (v) fluctuations in the Australian and international stock markets.

Returns from an investment from the Shares may also depend on general stock market conditions as well as the performance of the Company. There can be no guarantee that there will be an active market in the Shares.

Changes in economic and business conditions or government policies in Australia or internationally may affect the fundamentals which underpin the projected growth of the Company's target markets or its cost structure and profitability. Adverse changes in such things as the level of inflation, interest rates, exchange rates, government policy (including fiscal, monetary and regulatory policies), consumer spending and employment rates, amongst others, are out of the control of the Company and may result in material adverse impacts on the business or its operating results.

(b) Taxation

The acquisition and disposal of Securities will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of subscribing for Securities from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.

(c) **Liquidity of Shares**

There may be relatively few potential buyers or sellers of the Shares on the ASX at any time. This may increase the volatility of the price of the Shares. It may also affect the prevailing market price at which Shareholders are able to sell their Shares. This may result in a market price being received which is less than the price that Shareholders paid to acquire their Shares.

(d) **Investment risks**

As with any stock market investment, there are various risks associated with investing in the Company. Potential investors should consider whether the Shares offered under this Prospectus are a suitable investment having regard to their own personal investment objectives and financial circumstances and the risk factors set out in this section. Many of these risk factors are outside the Directors' control. Whilst some common risk factors are set out in this section, it is not possible to produce an exhaustive list. The Directors recommend that potential investors consult their professional advisers before deciding whether to apply for Securities.

(e) **Adverse changes to government policy and taxation**

Changes in relevant taxation laws, interest rates, other legal, legislative and administrative regimes, and government policies, may have an adverse effect on the assets, operations and ultimately the Company's financial performance. These factors may ultimately affect the Company's financial performance and the market price of the Securities.

(f) **Insurance risks**

The Company's operations are insured in accordance with industry practice, however in certain circumstances, the Company's insurance may not be of a nature or the level to provide adequate insurance cover. The occurrence of an event that is not covered or not fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance against all risks associated with mining exploration and production is not always available and where available the costs can be prohibitive.

(g) **Claims, liability and litigation**

Although the Company is not currently involved in any legal proceedings and the Directors are not aware of any legal proceedings pending or threatened against the Company, the risk of litigation remains a general risk to the Company. The Company may incur costs in making payments to settle any such claims which may not be adequately covered by insurance or at all. Any litigation or settlement may have an adverse impact on the Company's financial position.

(h) **Global conflicts**

Ongoing geopolitical conflicts, including the conflicts between Russia and Ukraine and in the Middle East involving the United States, Israel, Palestine and Iran (**Current Conflicts**), have contributed to volatility and uncertainty in global financial and commodity markets. The nature and extent of the potential impact of the Current Conflicts on global economic conditions and

capital markets remains uncertain and may adversely affect investor sentiment and the market price of the Company's Shares.

The Current Conflicts may also give rise to broader macroeconomic impacts, including fluctuations in commodity and energy prices, supply chain disruptions, inflationary pressures, increased cybersecurity risks and changes in global trade or financial market conditions. In addition, government or industry responses to the Current Conflicts, including sanctions, trade restrictions, export controls or other regulatory measures, may impact global economic activity and business operations more broadly.

While the Company does not currently have direct operations or material exposure in the jurisdictions directly affected by the Current Conflicts, any deterioration in global economic conditions, financial markets or supply chains may adversely affect the Company's business, financial position and operating results. The situation remains fluid and the extent and duration of any impacts are inherently uncertain and largely outside the control of the Company.

7.6 Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Securities offered under this Prospectus.

Therefore, the Shares to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Potential investors should consider that investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for Securities under this Prospectus.

8. Additional information

8.1 Litigation

As at the date of this Prospectus, the Company Group is not involved in any legal proceedings and the Directors are not aware of any legal proceedings pending or threatened against the Company Group.

8.2 Continuous disclosure obligations

The Company is a “disclosing entity” (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company’s securities. The Offer is an offer of Shares which are ‘continuously quoted securities’ for the purposes of the Corporations Act.

Under section 677 of the Corporations Act, a reasonable person is taken to expect information to have a material effect on the price or value of the Company’s quoted securities if the information would, or would be likely to, influence persons who commonly invest in securities in deciding whether to acquire or dispose of the Company’s quoted securities.

This Prospectus is a “transaction specific prospectus”. In general terms a “transaction specific prospectus” is primarily required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities (and where options are offered, the rights attaching to the underlying securities). It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is issued in circumstances where significant publicly available information in relation to the Company exists by virtue of disclosures to ASX. This Prospectus does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors are encouraged to have regard to the other publicly available information available through the ASX in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three (3) months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not generally been included in this Prospectus other than certain information required to be included in this Prospectus by the Corporations Act.

The Company, as a disclosing entity under the Corporations Act, states that:

- (a) the Company is subject to regular reporting and disclosure obligations;

- (b) copies of documents lodged with the ASIC in relation to the Company may be obtained from, or inspected at, the offices of the ASIC; and

 - (iii) any continuous disclosure notices given by the Company to ASX in accordance with the ASX Listing Rules as referred to in section 674(1) of the Corporations Act after the lodgement of the annual financial report referred to in (i) and before the lodgement of this Prospectus with ASIC.

Copies of all documents lodged with ASIC in relation to the Company can be inspected, or a copy obtained, at the registered office of the Company during normal office hours.

8.5 Underwriting Agreements

The Company has entered into underwriting agreements with each of the Partial Underwriters to partially underwrite \$10.13 million of the Offer.

The Underwritten Amounts will be satisfied through the discharge of an equivalent amount of debt owed to the Partial Underwriters. The debts captured under the Underwriting Agreements are as follows:

The Partial Underwriters will be treated on an equal basis, that is, the same number of Shares will be issued to each Partial Underwriter until their underwriting commitments is discharged.

The obligations of the Partial Underwriters will only be reduced to the extent more than \$24.0 million in cash subscriptions are received. In that event, their obligations will be reduced equally on a dollar for dollar basis by amounts raised in excess of \$24.0 million.

The Company will not pay the Partial Underwriters any fees for their Underwritten Amounts.

A Partial Underwriter has the right to terminate their Underwriting Agreement prior to the issue of their Underwritten Shares by giving notice to the Company and without any cost or liability in the following circumstances:

For the purposes of the termination right, a material adverse effect means:
- (i) a material adverse effect on the outcome of the Offers or on the subsequent market for the Underwritten Shares (including, without limitation, a material adverse effect on a decision of an investor to invest in Underwritten Shares); or
 - (ii) a material adverse effect on the condition, trading or financial position and performance, profits and losses, results, prospects, business or operations of the Company and its Subsidiaries taken as a whole.

8.9 2026 Offtake Agreement – Dak Tai Trading Limited

As disclosed to ASX on 31 December 2025, the Company has entered into an offtake agreement with Dak Tai Trading Limited (**DTT**) (an entity associated with former non-executive director Sean Hu, who resigned from the board in November 2025) for the supply of kaolin products during the 2026 calendar year (**Offtake Agreement**). The Offtake Agreement provides for an aggregate annual contract value of approximately US\$5.6 million (A\$8.6 million), subject to agreed pricing and delivery performance.

The Offtake Agreement includes a delivery milestone requiring the Company to deliver a minimum of 12,000 tonnes of product by 31 March 2026. As at the date of this Prospectus, the Company expects that deliveries for the March quarter will be below this milestone due to reduced plant availability and throughput during the December 2025 quarter. As a result, DTT's quarterly minimum volume purchase obligations automatically cease. The Company and DTT continue to work cooperatively to manage delivery scheduling and prioritisation of outstanding orders and the Company does not currently anticipate DTT will reduce the quantities of product it orders below the minimum quarterly volumes but no assurance can be given in this regard.

8.10 Stanco Joint Venture MOU

The Company has entered into a Memorandum of Understanding (**MOU**) with Stanco International Corp. (**Stanco**), a key distribution partner and associate of former non-executive director Sean Hu, to establish a 50:50 incorporated joint venture (**JV**) to develop, market and sell high value kaolin products such as engineered clays, fine particle size kaolins and coated kaolins (**JV Products**) in China and Taiwan (and, if agreed in the future, the Asia Pacific region) outside the fibreglass industry (**Territory**).

The MOU provides for the establishment of a jointly owned entity (**JVCo**), product supply arrangements, and coordinated market development activities leveraging Stanco's distribution network. The JVCo will have the exclusive right to sell, market and distribute the Company's products, including JV Products, in the Territory. JVCo may appoint third parties to on-sell/distribute in the Territory, with Stanco having a first right of refusal for Company products including JV Products in the Territory, and for JV Products outside the Territory.

The parties have agreed to negotiate the definitive agreements contemplated by the MOU, including a shareholders agreement for JVCo, a kaolin supply agreement and management services agreement in good faith by 30 May 2026. The MOU is

conditional on Board and (if applicable) shareholder approval of Stanco and the Company, execution of the definitive agreements by 30 May 2026 or such later date as agreed by the parties, capitalisation of JVCo and all necessary approvals.
