

ASX ANNOUNCEMENT

31 March 2026

Monthly Activity Report for February 2026

Papyrus Australia Ltd (ASX:PPY) is pleased to report its activities pertaining to the month ended 28 February 2026 and the monthly Appendix 4C cash flow report released to the market on 31 March 2026.

Executive Chair Overview

Papyrus Australia continued to build strong operational momentum through February, with the commissioning and early operation of the Adelaide Rapid Prototyping & R&D Facility marking a significant milestone in our commercialisation pathway. The facility is now actively delivering on its core research objectives, including optimisation of pulp furnish for multiple product applications, refinement of equipment design for scale-up, and the production of both moulded product samples and pulp for the TBS contract board trials. These activities are central to validating our technology at commercial scale and supporting upcoming customer and partner engagements.

Financially, Papyrus released its Interim Financial Report for the half-year ending 31 December 2025, providing shareholders with a clear view of the Company's financial position as we progress toward commercial production.

With the R&D facility now operational and delivering meaningful outputs, Papyrus enters the next phase of development with increasing confidence. The Company remains focused on executing its commercial strategy, strengthening its technology platform, and positioning itself for scale-up and revenue generation.

Operational Activity – Rapid Prototyping & R&D Facility

The Adelaide Rapid Prototyping & R&D Facility reached a major operational milestone in February, with commissioning completed and the facility now actively running its first research and development programs. This marks the transition from installation to productive operation of the entire production system, enabling Papyrus to accelerate technology validation, product development, and scale-up planning.

With the facility online, the team has progressed a series of core research objectives central to commercial readiness:

- **Optimisation of pulp furnish for multiple production applications:**
Systematic trials are underway to refine fibre characteristics and pulp blends to suit a range of moulded and board-based products. These optimisation activities are generating valuable data that will inform both product performance and downstream manufacturing parameters.
- **Equipment design optimisation for material flow and scale-up:**
The facility is being used to test and refine equipment configurations, material-handling pathways, and process settings. Insights from these trials are directly supporting the engineering design of future commercial-scale plant layouts and equipment selections.
- **Production of moulded product samples:**
Initial moulding runs have commenced, producing sample trays and other prototype products for internal evaluation and upcoming customer demonstrations. Early outputs are meeting expected quality benchmarks, reinforcing confidence in the technology's scalability.
- **Production of pulp for TBS contract board samples:**
The facility has begun producing pulp specifically for the TBS contract board trials. This work is a

critical step in validating Papyrus' fibre technology for commercial board production and supporting the Company's commitments under the TBS agreement.

Collectively, these activities demonstrate strong operational progress and position the R&D facility as a key enabler of Papyrus' commercialisation strategy, providing the technical foundation for product validation, customer engagement, and future production deployment.

Financial Activity

Papyrus released the Interim financial report for the half year ending 31 December 2025.

During the month of February there were no related party payments.

The expenditure reported for the month ending February 2026 Appendix 4C cash flow report for Papyrus relates primarily to:

- a. Prototyping equipment procurement costs
- b. Staff, legal, compliance and other overhead costs

There were no other payments to an associate or a related party.

Al Jawhari

Notes

1. This monthly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past month, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this monthly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 107: Statement of Cash Flows apply to this report. If this monthly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's Corporate Governance Principles and Recommendations, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
