¹⁰Material assumptions include (i) mining contractor efficiencies are maintained at target levels, (ii) processing recoveries consistent with past performance, (iii) all necessary permits and licences are maintained, held or obtained as required. ¹¹Based on an assumed THB/USD exchange rate of 31.50, silver price of US\$31/oz, gold price of US\$3,100/oz and sold ounces consistent with mid-range FY26 production guidance. ¹²Gold equivalent ounces ('AuEq') are calculated using a fixed gold-to-silver ratio of 88.5:1. ¹³The formula used is: AuEq (oz) = Au (oz) + [Ag (oz) ÷ 88.5]. Metal equivalence is applied uniformly for the purpose of reporting and does not reflect actual realised prices or metallurgical recoveries. AuEq should not be considered as a substitute for, or proxy of a direct economic valuation.
