

## March 2026 Quarterly Activities Report

The March 2026 Quarter marked a **step-change period for Solstice** with outstanding drilling results from its 100%-owned **Nanadie Copper-Gold Project** in WA. Phase 1 drilling delivered a series of **highly significant wide, high-grade intercepts**, reinforcing the potential to materially expand an already **significant copper-gold system**.

### Nanadie Highlights

- A 23-hole (6,030m) **Phase 1 Reverse Circulation (RC) drilling** program delivered **exceptional wide, high-grade drill results**, confirming **strong growth potential** in both **tonnage and grade**. These outcomes have driven the design of an expanded and accelerated follow-up drill campaign.
- **Phase 1 RC drilling delivered the strongest intercepts recorded to date**, including:
  - ❖ **62m @ 1.55% Cu, 0.66g/t Au to end of hole (EOH) in NANRC004** (including **22m @ 2.78% Cu, 1.25g/t Au**)<sup>1</sup>;
  - ❖ **97m @ 0.73% Cu, 0.30g/t Au EOH in NANRC001**<sup>1</sup>;
  - ❖ **55m @ 1.07% Cu, 0.26g/t Au EOH in NANRC018**<sup>1</sup>; and
  - ❖ **numerous wide intercepts at or above the current MRE grade** in most holes, highlighting multiple avenues for MRE growth along strike, laterally and at depth.
- **Phase 2 drilling is underway**, comprising:
  - ❖ RC drilling focused on defining higher-grade zones, as well as in-fill and extensional drilling and step-out exploration; and
  - ❖ dedicated diamond drilling to extend holes that ended in strong mineralisation and test key plunge and depth extensions beyond the operating limit of RC drilling.
- The Company completed a **highly successful \$32.6M Placement** (before costs), attracting new domestic and international institutional investors alongside existing shareholders. Combined with existing cash and funds flowing from option exercises, Solstice now holds a robust cash position of **\$48.4M, providing a clear runway for sustained MRE expansion, definition and exploration** drilling, resource growth and early-stage studies.
- Nanadie hosts a shallow Inferred **Mineral Resource Estimate (MRE) of 40.4Mt** containing **162,000t of copper** and **130,000oz of gold**<sup>2</sup> extending over ~1km of strike and up to 200m in width, all within a large, granted Mining Lease.
- **Phase 1 drilling has extended the mineralised system laterally, along strike to the north and south and at depth, while also highlighting the potential for higher-grade zones.**
- Nanadie represents a substantial and strategically important copper inventory in a market characterised by strong demand growth and severely constrained global supply.

## Managing Director's Comment

Solstice Minerals' Chief Executive Officer and Managing Director, Mr Nick Castleden, said:

*"Phase 1 RC drilling at Nanadie was an outstanding success, with the majority of holes intersecting significant mineralisation at or above current Mineral Resource grades, despite this being a drill program designed to simply find the 'edges' of the large mineralised system. Importantly significant high-grade high-volume mineralisation was intersected to the end of hole in NANRC001, 004 and 018, and strong open-ended high-grade intercepts elsewhere.*

*"These results present a clear opportunity to define higher-grade positions for incorporation into future Mineral Resource upgrades, which will be a key focus of the ongoing Phase 2 program. This will include extending selected holes that ended in strong copper-gold mineralisation with diamond 'tails' capable of drilling beyond the operating limit of RC drilling at depth. The program has opened up multiple pathways for meaningful resource growth along strike, laterally and at depth, reinforcing Nanadie's potential to emerge as a significant copper-gold project in WA.*

*"We were delighted by the strong support received from both new and existing institutional investors in our recent Placement, including the addition of a North American fund as a substantial holder. The strong institutional support will enable us to accelerate our work. This was the first significant Placement Solstice has undertaken since listing and it was completed at five times our IPO price – which reflects the significant interest in Nanadie and its company-making potential.*

*"Against the backdrop of a strengthening copper and gold price environment and favourable long-term supply-demand fundamentals, investable copper growth projects in Tier-1 mining jurisdictions are becoming increasingly scarce. Nanadie is well positioned in this context, and we look forward to advancing the project through sustained drilling and ongoing resource growth. The Solstice team has done exceptionally well to get two rigs back in action and, over the coming months, we will continue to explore the open-ended high-grade mineralisation and look to materially expand the MRE over time."*

Solstice Minerals Limited (**Solstice** or the **Company**) is pleased to present its Quarterly Activities Report for the period ended 31 March 2026.

## 1. EXPLORATION OPERATIONS

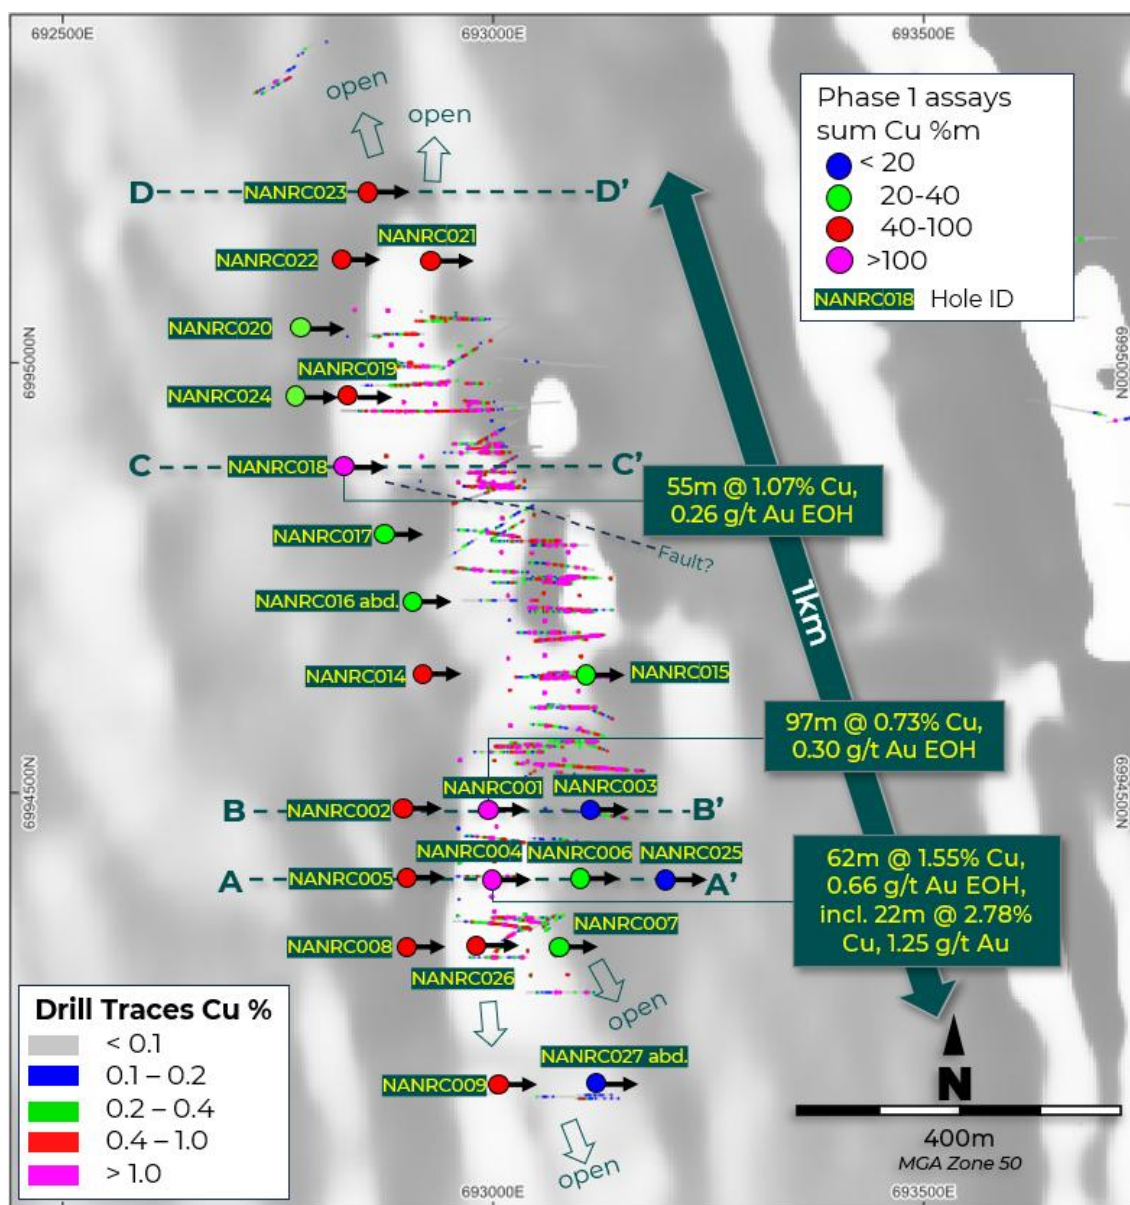

### Nanadie Copper-Gold Project

During the Quarter, all assay results were returned from the Company's Phase 1 MRE expansion drill program (23-holes for 6,030m) at the advanced 100%-owned **Nanadie Copper-Gold Project**, located northwest of Sandstone in WA's Goldfields. **This was the Company's first-ever drilling at the project and was an outstanding success**, returning wide and high-grade drill results and a multitude of intercepts at or above MRE grade, opening up strong targets for continued growth (**Figure 1** and **Table 1**).

In the southern part of the historical MRE, drilling intersected multiple zones of disseminated chalcopyrite mineralisation on several traverses, delivering numerous significant intercepts, some of which extend to end of hole (EOH).

In particular **NANRC004** was very strongly mineralised, with significant intercepts outside of the existing MRE including **62m @ 1.55% Cu, 0.66g/t Au to EOH**, including a lower zone of **22m @ 2.78% Cu, 1.25g/t Au**, which is **the best >1% Cu intercept in the entire Nanadie Project area to-date**. This hole is flanked by NANRC005 and NANRC006, both of which also intersected multiple zones of significant mineralisation (A-A' in **Figure 1**, **Figure 2** and **Figure 3**).

**Figure 1. Nanadie Deposit aeromagnetic imagery showing all Phase 1 RC drill collars (coloured for sum of Cu% metres downhole) and high-grade intercepts<sup>1</sup>, and down-hole copper values in all previous drilling<sup>2</sup>, projected to surface. Cross-sections labelled A-A', B-B' etc.**

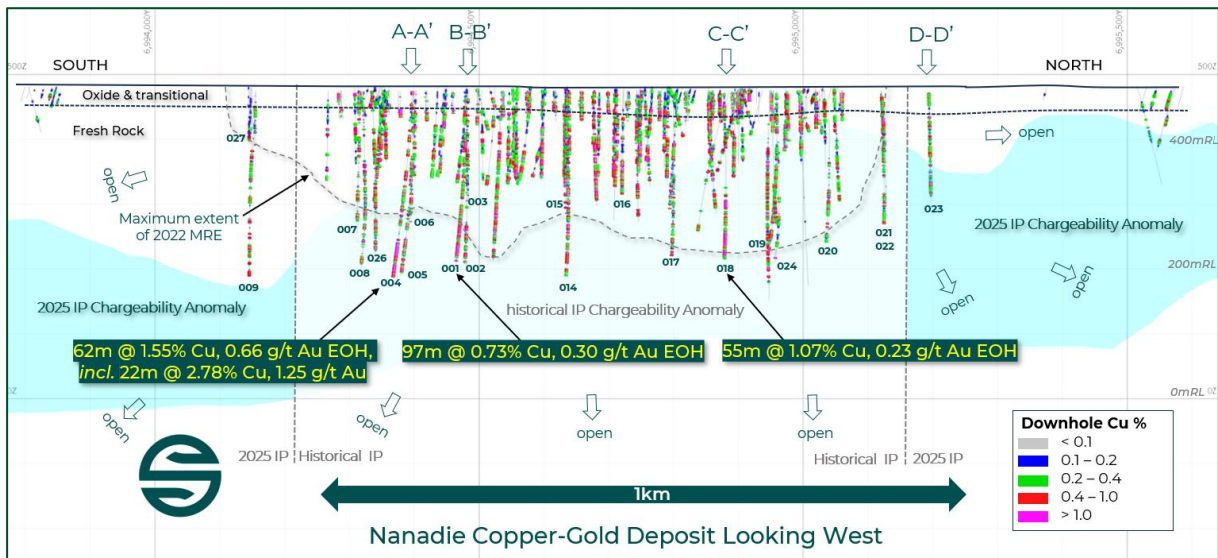

Figure 2. Nanadie long section looking west, showing all Phase 1 drillholes labelled, high grade intercepts<sup>1</sup>, southern IP chargeability anomaly<sup>3</sup>, and location of selected cross-sections A-A', B-B' etc relative to the maximum extent of the 2022 MRE block model and historical drilling<sup>2</sup>.

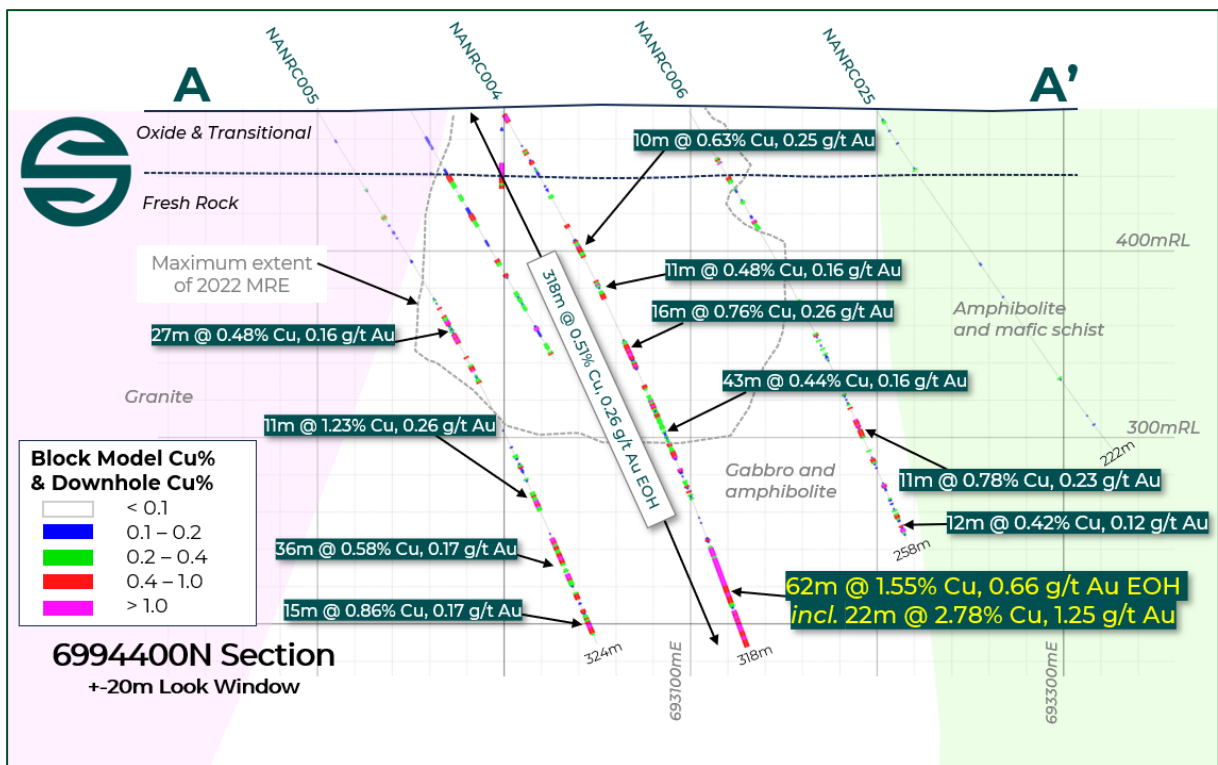

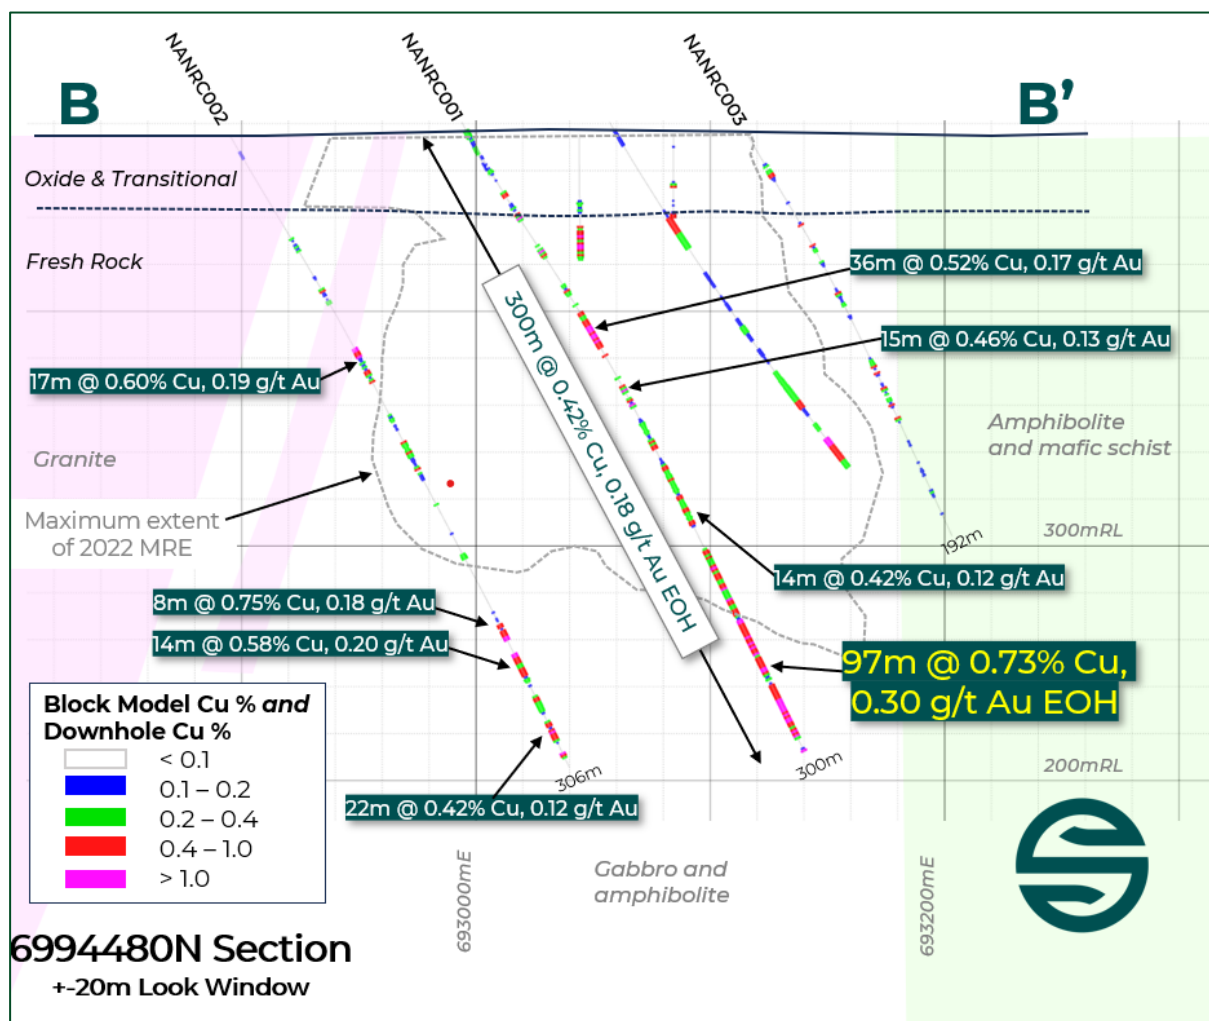

Figure 3. Nanadie Project cross-section 6994400N showing Phase 1 drillholes NANRC004 to NANRC006, and NANRC025<sup>1</sup> relative to the 2022 MRE block model and historical drilling<sup>2</sup>.

The high-grade mineralisation in NANRC004 is well supported on a traverse of holes 80m to the north, where **NANRC001** is also widely mineralised, with separate zones of significant mineralisation encountered including a continuous interval of strong mineralisation outside of the existing MRE totalling **97m @ 0.73% Cu, 0.30g/t Au EOH**, including **20m @ 1.02% Cu, 0.37g/t Au**

as well as shallower hits to **36m @ 0.52% Cu, 0.17g/t Au<sup>1</sup>**. Flanking drillhole NANRC002, located 100m to the west, also intersected zones well above MRE grade (**Figure 4**).

**Figure 4. Nanadie Project cross-section 6994480N showing Phase 1 drillholes NANRC001 to NANRC003<sup>1</sup>, relative to the 2022 MRE block model and historical drilling<sup>2</sup>.**

On a section 80m to the south of NANRC004, drillholes **NANRC007**, **NANRC008** and **NANRC026** intersected widespread MRE grade copper-gold mineralisation over a mineralised package at least 200m wide returning numerous intercepts 20m to 60m downhole (**Figure 1** and **Table 1**).

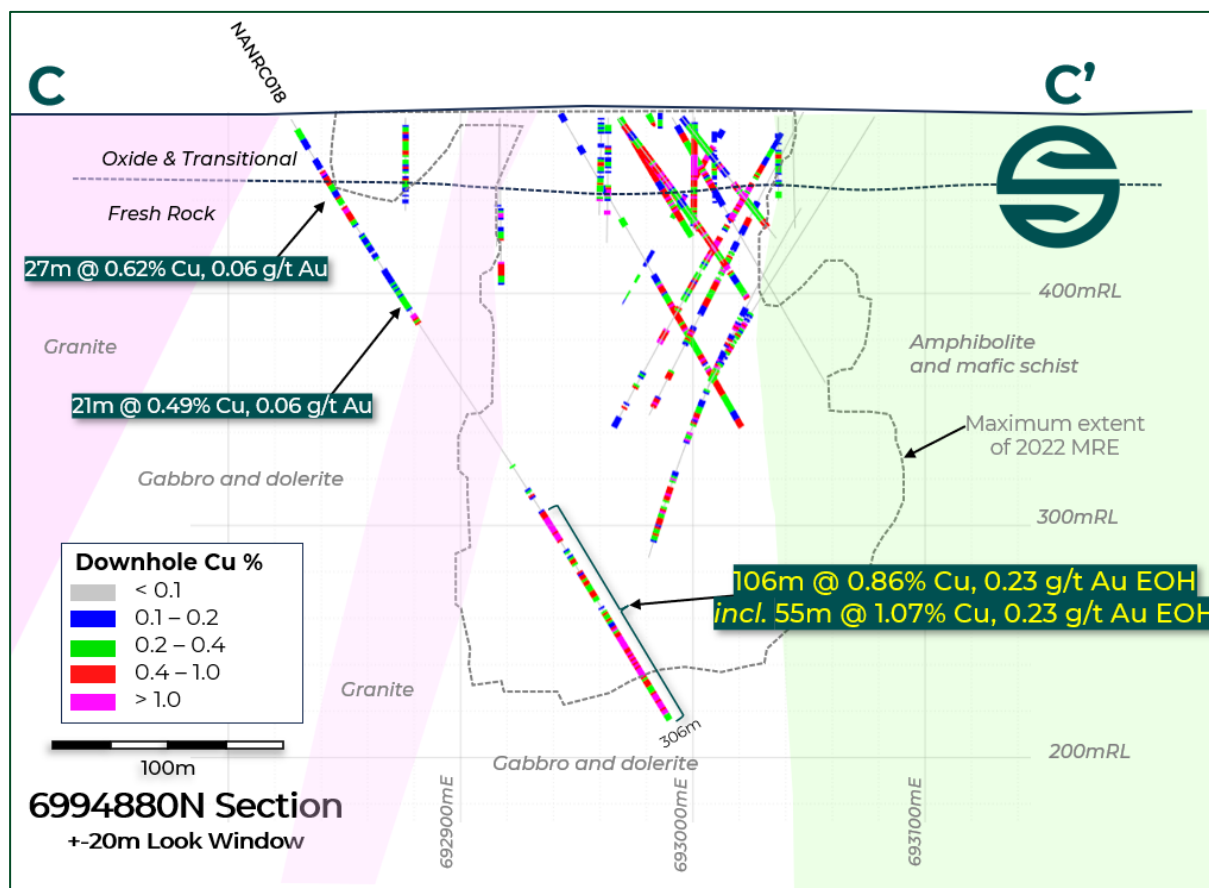

Drillhole **NANRC009** was drilled on a step-out exploration line a further 160m to the south (**Figure 1** and **Figure 2**) to test below shallow holes at the southern limit of historical drilling. This **southernmost** hole intersected multiple zones of mineralisation and copper anomalism, well beyond the MRE boundary confirming that the Nanadie system is **live and open to the south**.

Intercepts in NANRC009 included **23m @ 0.40% Cu, 0.13g/t Au**, and **10m @ 0.54% Cu, 0.23g/t Au EOH<sup>1</sup>**, with grades increasing downhole toward a deep IP conductivity target<sup>3</sup> that extends southward (**Figure 2**). This hole is well positioned to be extended to test the IP feature via a diamond drilling (DD) 'tail'.

Drilling along the NW flank of the Nanadie system also delivered exploration success, led by the exceptionally strong mineralisation encountered in NANRC018, including **106m @ 0.86% Cu, 0.23g/t Au EOH**, including **55m @ 1.07% Cu, 0.26g/t Au EOH<sup>1</sup>** (Figure 1, Figure 2 and Figure 5).

The NANRC018 intercept also contains significantly elevated **silver grades to 53.6g/t Ag<sup>1</sup>** that may be structurally related to a highly mineralised silver intercept of **7m @ 500.8g/t Ag, 0.48% Cu** including **2m @ 1,470g/t Ag** in a historical drillhole located 80m to the north<sup>2</sup>.

**Figure 5. Nanadie Project cross-section 6994880N showing Phase 1 drillhole NANRC018<sup>1</sup>, relative to historical drilling<sup>2</sup>, the boundary of the 2022 MRE block model and simplified geology.**

NANRC018 is well supported by NANRC019 on a section 80m to the north (Figure 1), which intersected multiple zones of mineralisation at or above MRE grade.

At the northern extensions of the deposit, drillholes NANRC020 to NANRC027 successfully demonstrated that the deposit also remains **open to the north**, with wide >0.40% Cu intercepts returned beyond the limits of the MRE, and strong high-grade indications that are coincident with a northward trending **IP chargeability** feature identified in Solstice's 2025 dipole-dipole survey<sup>3</sup> (Figure 1 and Figure 2).

Importantly, the **northernmost hole** NANRC023 intersected **44m @ 0.52% Cu, 0.23 g/t Au**, incl. **14m @ 1.02% Cu, 0.58g/t Au**, within a broad mineralised zone of **187m @ 0.31% Cu, 0.11 g/t Au<sup>1</sup>** (Figure 6). This hole is well-supported by NANRC021 located 80m to the south, which returned **33m @ 0.52% Cu, 0.12 g/t Au**, and **29m @ 0.93% Cu, 0.30 g/t Au<sup>1</sup>**.

Figure 6. Nanadie Project cross-section 6995200N showing Phase 1 step-out drillhole NANRC023<sup>1</sup> simplified geology, and outline of a 2025 IP chargeability anomaly<sup>3</sup>.

In summary, the Company's Phase 1 drilling campaign delivered multiple successes which have prompted immediate follow-up RC and diamond drilling. **An approximate 8,000m Phase 2 RC program is now in progress** that will focus on testing around the high-grade open intercepts in NANRC001, NANRC004 and NANRC018, as well as expanding on the wealth of step-out and down-dip extensional targets and testing IP features beyond the current drilling (**Figure 2**).

Separately, **a dedicated diamond drill rig is also on-site**, extending holes that ended in strong mineralisation and testing key plunge and dip targets nearby that lie beyond the limit of RC operating depths.

**At present a total of 11 RC holes have been earmarked for diamond 'tails', for approximately 2,000m of core**, and it is expected more tails may be added as the RC program progresses.

**Table 1. All Phase 1 RC Drillhole details and significant intercepts<sup>1</sup>.**

								<i>and</i>	<b>27m @ 0.42% Cu, 0.15 g/t Au</b>	179
								<i>and</i>	<b>52m @ 0.40% Cu, 0.14 g/t Au</b>	226
<b>NANRC027</b>	Nanadie	RC	693127	6994155	475	-60	90	99 <i>abd.</i>	<i>Abandoned</i>	

Significant intercepts in Table 1 are reported at a greater than 10m interval at >0.4% Cu, on the basis of a 0.2% Cu and 0.1g/t Au lower cut-off and allowing for a maximum 5m internal dilution. Note: NANRC010 to NANRC013 were drilled on a reconnaissance traverse 2km to the north of Nanadie.

## About the Nanadie Copper Gold Deposit

Nanadie is situated within a granted Mining Lease approximately 100km northwest of Sandstone (Figure 7) and hosts an existing Inferred MRE of **40.4 million tonnes at 0.4% copper and 0.1g/t gold**, containing **162,000 tonnes of copper** and **130,000 ounces of gold** (Table 2)<sup>2</sup>. The deposit represents a substantial inventory of strategic metals with attractive long-term market fundamentals.

Historical drilling below a shallow soil and sand cover and weathering profile has defined a wide, near-surface accumulation of disseminated and remobilised sulphide veinlet style chalcopryrite (+/- pyrrhotite and pyrite) mineralisation over 150m wide and over 1km long. Approximately 90% of the MRE is fresh rock mineralisation below 40m depth. Significant zones of >1% Cu occur where chalcopryrite vein density increases, and increased sulphide veining is typically accompanied by raised gold values. No deleterious sulphide species are present.

**Table 2: Nanadie Well 2012 JORC Mineral Resource Estimate<sup>2</sup>.**

Resource Category	Material Type	Volume	Tonnes	Cu Grade (%)	Cu Metal (t)	Au Grade (g/t)	Au Metal (oz)	Ag Grade (g/t)	Ag Metal (oz)
Inferred	Oxide	1,300,000	3,500,000	0.44	16,000	0.12	13,000	0.70	74,000
	Transitional	200,000	600,000	0.45	3,000	0.12	2,000	1.50	31,000
	Fresh	11,700,000	36,300,000	0.39	143,000	0.10	115,000	1.10	1,259,000
<b>Total</b>		<b>13,200,000</b>	<b>40,400,000</b>	<b>0.4</b>	<b>162,000</b>	<b>0.10</b>	<b>130,000</b>	<b>1.00</b>	<b>1,364,000</b>

Note: Differences in sum totals of tonnages and grades may occur due to rounding cut-off at 0.25% Cu, reported grades and tonnages for all metals are estimated top-cut grades and tonnages.

Photo 1. Typical RC drill samples (NANRC001)<sup>1</sup> at Nanadie. Note limited oxidation profile below shallow sandy soils.

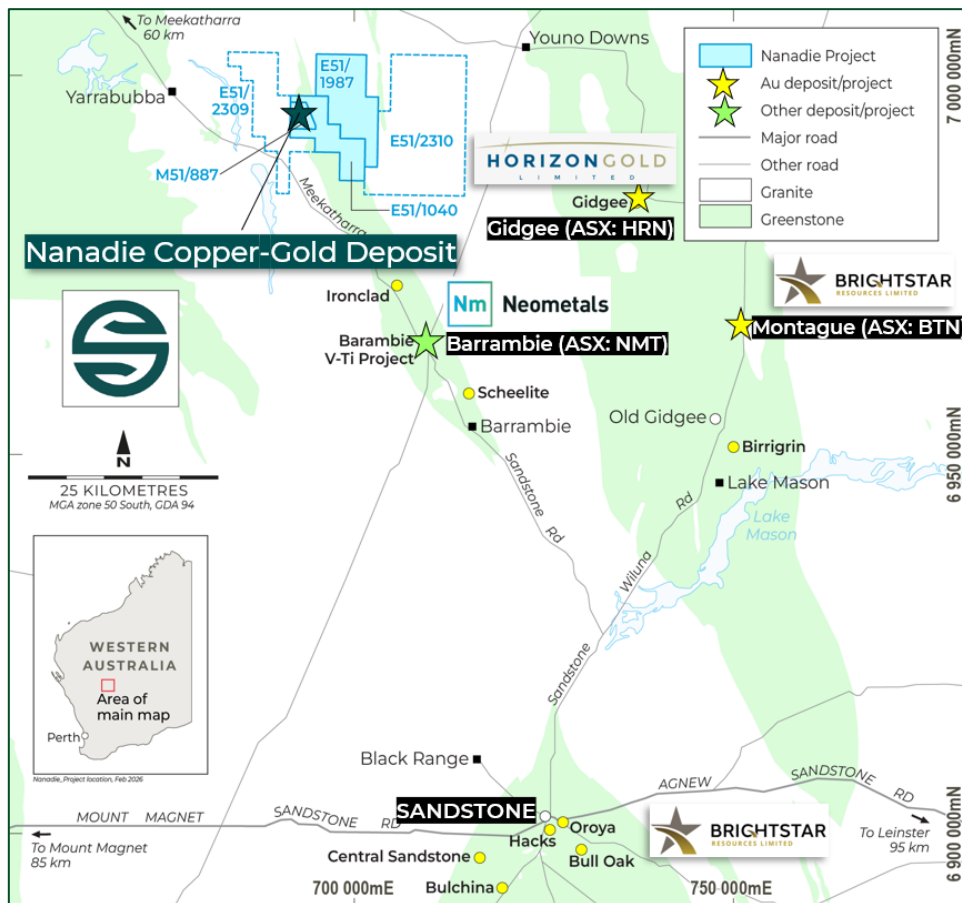

Figure 7: Location of the Nanadie Copper-Gold Project tenements NW of Sandstone WA.

For personal use only

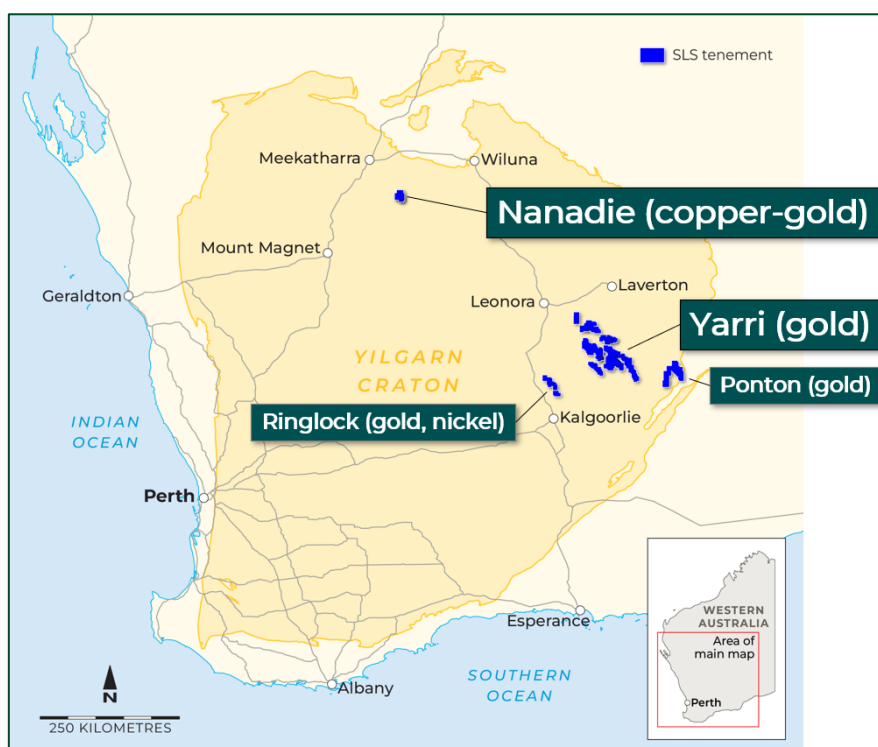

Previous drilling at the deposit had rarely extended beyond the host mafic intrusive package, with much of the drilling starting and ending within mineralised host rocks. Geological logging of Solstice's Phase 1 drilling has built a geological picture consistent with that outlined by historical drilling, comprising a widely mineralised steeply dipping host mafic intrusive (gabbro and dolerite) package flanked by amphibolite (that is also mineralised in places) and chloritic schists to the east, and younger granitoid rocks to the west.

The geology observed is strongly supportive of continued exploration and MRE expansion drilling of the broader Nanadie system, which remains open to strike, laterally and down-dip, as well as drilling to test compelling step-out geological and IP targets.

### Yarri Gold Project – Eastern Goldfields, WA

Solstice continued to refine a large **Yarri Project** landholding centred on a gold endowed and infrastructure-rich area of WA's Eastern Goldfields, 150km NE of Kalgoorlie (**Figure 8**). Yarri has strong opportunities to create shareholder value through considered exploration drilling.

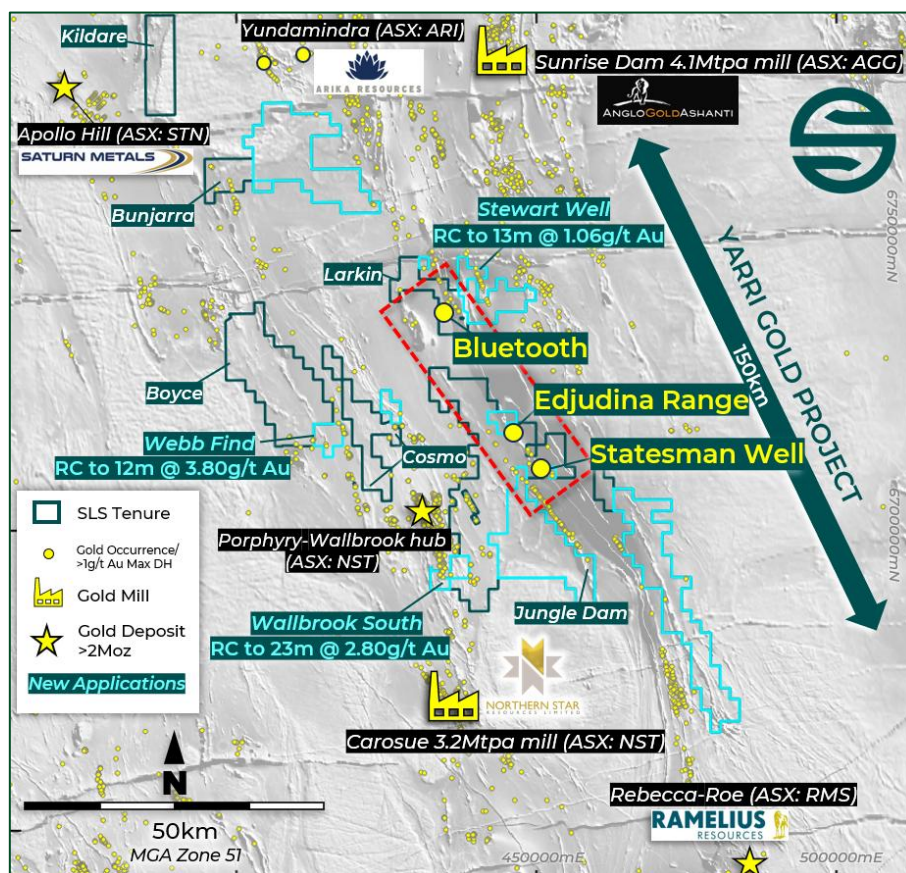

**Figure 8: Location of Solstice's West Australian Projects**

The Project currently covers an area of >1,500km<sup>2</sup> and extends over 150km strike along two craton-scale structural corridors that control gold mineralisation and the potential of the district to deliver company-scale gold systems is demonstrated by Northern Star Resources' (ASX: NST) **Carosue Dam** Operations (Mineral Resources totalling 4.2Moz gold at 2.1g/t Au<sup>4</sup>), AngloGold Ashanti's (ASX: AGG) **Sunrise Dam** gold deposit, Ramelius Resources' (ASX: RMS) **Rebecca-Roe** Gold Project, and Saturn Mineral's (ASX: STN) **Apollo Hill** Gold Project (**Figure 9**).

The Company intends to build on its 2025 exploration successes at advanced prospects such as **Bluetooth**, **Edjudina Range** and **Statesman Well**, and work-up new greenfield gold targets for first aircore drill-testing.

**Figure 9: Solstice's >1,500km<sup>2</sup> Yarri Project tenement group including new Exploration Licence applications (light blue) and historical intercepts<sup>5</sup> on greyscale aeromagnetic image showing the location of key gold targets, and regional gold developments. Yellow dots are documented gold prospects and all drillholes with >1g/t Au gold intercepts.**

### Bluetooth Gold Prospect

Bluetooth emerged as a new gold discovery over 2025, with the Company's shallow RC drilling outlining thick, shallowly dipping panels of near-surface oxide gold mineralisation. RC results include **18m @ 3.06g/t Au** (within a combined **30m @ 2.06g/t Au**), **29m @ 1.58g/t Au**, **20m @ 1.98g/t Au**, **23m @ 1.38g/t Au**, **15m @ 1.90g/t Au** and **12m @ 2.86g/t Au**<sup>6</sup>.

Gold intercepts extend over a 900m long strike of mineralised chert and quartz veining (**Figure 10**) and are interpreted to be close to true width (**Figure 11** and **Figure 12**).

The **overall geometry of Bluetooth is favourable for open pit extraction**, and the strong intercepts to date demonstrate the potential for this discovery to provide valuable near-surface gold ounces in an active mining district.

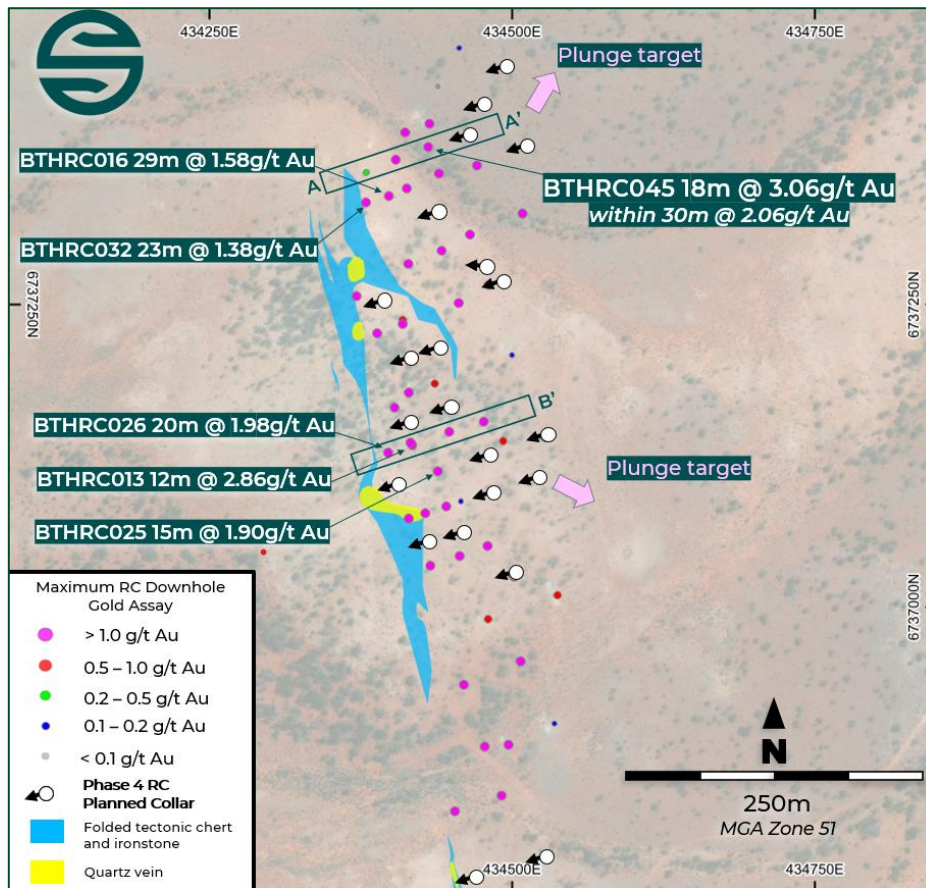

Figure 10: Bluetooth Gold Prospect showing all RC drill collars coloured for peak down-hole gold value, planned Phase 4 RC drillholes, selected gold intercepts<sup>6</sup>, and the outcrop of the mineralised chert and ironstone horizon.

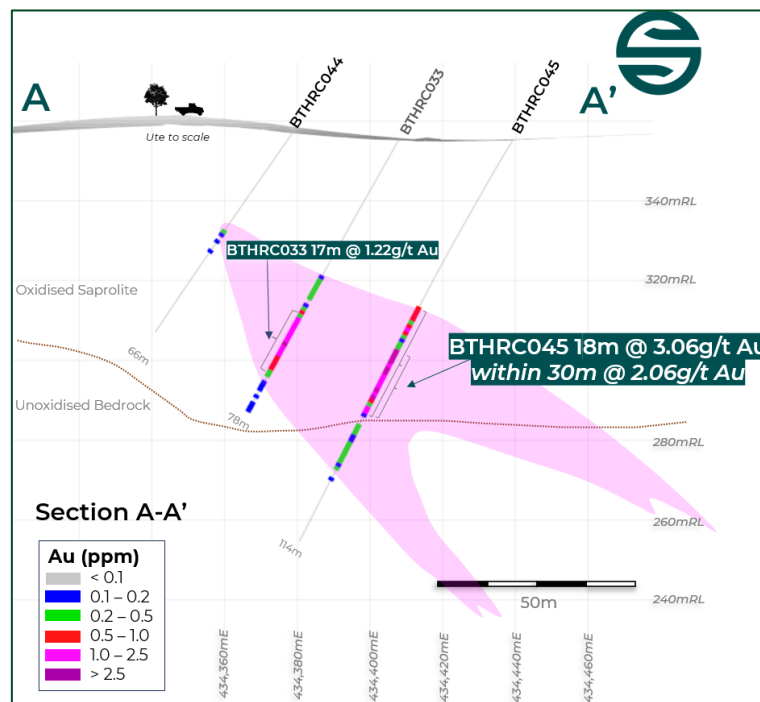

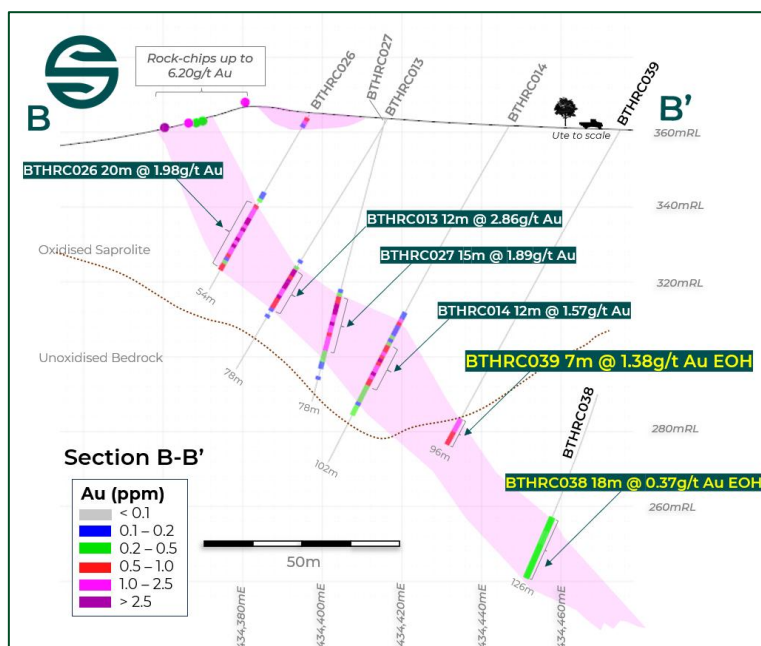

Figure 11: Bluetooth Gold Prospect cross-section A-A' (see Figure 5) showing Solstice's RC gold intercepts (white text)<sup>6</sup>.

**Figure 12: Bluetooth Gold Prospect cross-section B-B' (see Figure 5) showing Solstice's oxide gold intercepts (white text) and fresh rock intercepts (yellow text)<sup>6</sup>.**

## Pipeline Projects

The Company continues to refine its portfolio of gold-focused Exploration Licence applications at both Yarri and at the **Ringlock Project** near Kalgoorlie (Figure 8), which will unlock an array of gold exploration targets upon grant, including high-priority untested strike targets at **Edjudina Range** and **Statesman Well**.

Advanced gold targets under exploration licence application at Yarri include **Webb Find** (historical shallow RC results including **12m @ 3.80g/t Au**, **8m @ 2.74g/t Au** and **6m @ 3.85g/t Au**), **Wallbrook West** (RC results to **23m @ 2.80g/t Au**), and **Stewart Well** (wide anomalous gold zones in historical RC drilling to **10m @ 1.06g/t Au**)<sup>5</sup> (Figure 9). Each of these targets is primed for additional step-out and/or follow-up RC drilling once permitting is in place.

Solstice also holds tenure at the **Ponton Project**, (Figure 8) a large greenfield gold project in the eastern Yilgarn Block that also covers paleochannels with known uranium prospectivity. Activity on this tenure is subject to the completion of exploration-appropriate heritage and access documentation.

## 2. CORPORATE AND CASH POSITION

Solstice held approximately \$16.5m in cash and no debt at 31 March 2026. Following completion of the Placement announced 13 April 2026, Solstice holds approximately **\$48.4m** in cash (after costs) as at 15 April 2026.

## 3. ADDITIONAL ASX LISTING RULE DISCLOSURES

In accordance with ASX Listing Rule 5.3.1, payments for exploration activities during the Quarter totalled \$1,132,000 (item 1.2(a) of the Appendix 5B). Details of exploration activities undertaken during the Quarter are provided above.

In accordance with ASX Listing Rule 5.3.2, the Company confirms that there were no mining production and development activities undertaken during the Quarter.

In accordance with ASX Listing Rule 5.3.3, details of tenements are provided in Section 4 below.

In accordance with ASX Listing Rule 5.3.5, the payment of \$154,000 reported in Item 6.1 of the Appendix 5B to related parties of the entity and their associates consisted of Directors' fees and salaries (including superannuation) paid to the Directors.

## FORWARD-LOOKING STATEMENTS

This Report may contain certain forward-looking statements, guidance, forecasts, estimates, prospects or projections in relation to future matters that may involve risks or uncertainties and may involve significant items of subjective judgement and assumptions of future events that may or may not eventuate (**Forward-Looking Statements**). Forward-Looking Statements can generally be identified by the use of forward-looking words such as "anticipate", "estimates", "will", "should", "could", "may", "expects", "plans", "forecast", "target" or similar expressions and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production and expected costs. Indications of, and guidance on future earnings, cash flows, costs, financial position and performance are also Forward-Looking Statements.

Persons reading this Report are cautioned that such statements are only predictions, and that actual future results or performance may be materially different. Forward-Looking Statements, opinions and estimates included in this Report are based on assumptions and contingencies which are subject to change, without notice, as are statements about market and industry trends, which are based on interpretation of current market conditions. Forward-Looking Statements are provided as a general guide only and should not be relied on as a guarantee of future performance.

No representation or warranty, express or implied, is made by Solstice that any Forward-Looking Statement will be achieved or proved to be correct. Further, Solstice disclaims any intent or obligation to update or revise any Forward-Looking Statement whether as a result of new information, estimates or options, future events or results or otherwise, unless required to do so by law.

## COMPLIANCE STATEMENT

The information in this Report that relates to Exploration Results and Estimates of Mineral Resources has been extracted from the ASX announcements as noted in the References and referenced in the text (**Original Announcements**). In relation to the Company's previously released Exploration Results and Estimates of Mineral Resources, the Company confirms that it is not aware of any new information or data that materially affects the relevant information included in the Original Announcements and, in the case of Estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the Original Announcements continue to apply and have not materially changed. Solstice confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the Original Announcements.

<b>3.10</b>	<b>Net cash from / (used in) financing activities</b>	<b>4,493</b>	<b>4,647</b>
<b>4.</b>	<b>Net increase / (decrease) in cash and cash equivalents for the period</b>		
4.1	Cash and cash equivalents at beginning of period	13,348	14,967
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(1,327)	(3,098)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(2)	(5)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	4,493	4,647

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (9 months) \$A'000
4.5	Effect of movement in exchange rates on cash held	-	-
<b>4.6</b>	<b>Cash and cash equivalents at end of period</b>	<b>16,512</b>	<b>16,512</b>

5. Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts		Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	29	35
5.2	Call deposits	4,983	1,313
5.3	Bank overdrafts	-	-
5.4	Other – Term deposits	11,500	12,000
<b>5.5</b>	<b>Cash and cash equivalents at end of quarter (should equal item 4.6 above)</b>	<b>16,512</b>	<b>13,348</b>

6. Payments to related parties of the entity and their associates		Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	154
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

*Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.*

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. <b>Financing facilities</b> <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	<b>Total facility amount at quarter end \$A'000</b>	<b>Amount drawn at quarter end \$A'000</b>
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 <b>Total financing facilities</b>	-	-
7.5 <b>Unused financing facilities available at quarter end</b>		-
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. <b>Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1 Net cash from / (used in) operating activities (item 1.9)	(1,327)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(1,327)
8.4 Cash and cash equivalents at quarter end (item 4.6)	16,512
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	16,512
8.7 <b>Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	12
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer:	
N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer:	
N/A	

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

### Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 16 April 2026

Authorised by: By the Solstice Minerals Limited Board of Directors  
(Name of body or officer authorising release – see note 4)

### Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
