

3Q-FY26 Trading update

For the three months ended 31 March 2026

22 April 2026

Quarterly highlights

- Ngā Tamariki geothermal station OEC5 successfully opened and reliability run completed. The new unit is on time and on budget and expected to increase the site generation by 390GWh per annum and net output by 46MW.
- Committed to the next phase of the hydro refurbishment programme. Contract signed with international technology group ANDRITZ, supporting the long-term resilience and performance of the existing asset base.
- Datagrid New Zealand and Mercury signed a 140MW power purchase option agreement enabling new demand and AI infrastructure growth in New Zealand.
- First generation from 11 turbines installed at Kaiwera Downs Stage 2 wind farm started ahead of schedule in April, reflecting continued focus on delivering generation development uplift.

Mercury delivers strong Q3 performance

Mercury delivered a strong third quarter, with higher renewable generation and disciplined portfolio management supporting trading margin of \$325m, up 27% on PCP. This is reflected in our upgraded FY2026 EBITDAF guidance to \$1.05b, announced today.

The quarter also reflects continued delivery across our renewable development and asset renewal programmes, with important milestones achieved at Ngā Tamariki, Kaiwera Downs and in hydro refurbishment.

Overall, this performance highlights strong operational momentum and disciplined execution against our strategic priorities. We look forward to discussing the strength of our geothermal platform and future opportunity in more detail at our Geothermal Investor Day on 14 May.

- Mercury Chief Executive Stew Hamilton

Trading Margin

\$325m

↑ 27% on PCP

↑ \$69m on PCP

YTD Trading Margin up \$172m to \$1,031m

Generation Volume

1,997GWh

↑ 286GWh on PCP

YTD Generation volume up 824GWh to 6,726GWh

Hydrological Inflows

76th percentile

↑ from record low PCP

YTD Inflows were at 86th percentile compared to 3rd percentile PCP

Performance summary

Data used in this table is available in downloadable excel format on our website

1) VWAP is volume weighted average energy-only price sold to customers after lines, metering and fees

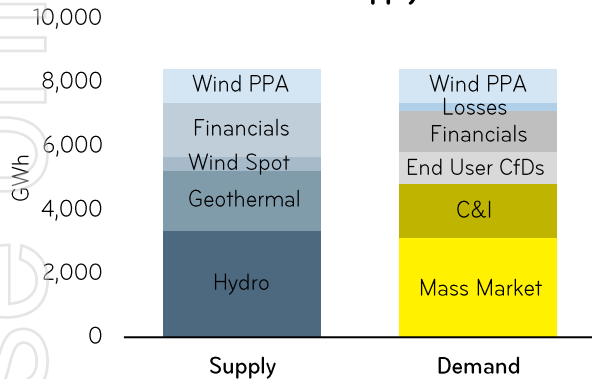

2) Geothermal (Consolidation) includes Mercury's 65% share of Ngā Awa Pūrua generation

3) Mass market includes residential segments and non time-of-use commercial customers

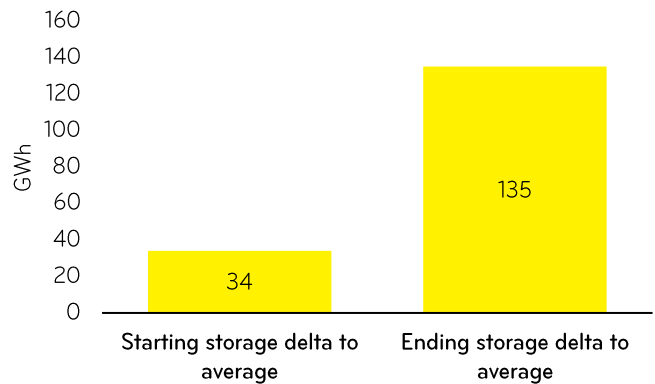

4) Other Costs of Sales includes levies, incentives, connection charges and ancillaries

ABOUT MERCURY NZ LIMITED

Mercury's generation assets produce electricity from 100% renewable sources: hydro, geothermal and wind. We're also a retailer of electricity, gas, broadband and mobile services. We're listed on the New Zealand Stock Exchange and the Australian Stock Exchange with the ticker symbol 'MCY', with foreign exempt listed status. The New Zealand Government holds a legislated minimum 51% shareholding of Mercury.
