

March 2026 Quarterly Report

Unico Silver (**USL** or the **Company**) presents its quarterly report for the three months ended 31 March 2026.

The March quarter represents a step-change in project scale, highlighted by the delivery of a maiden JORC (2012) Mineral Resource Estimate (MRE) at Joaquin, continued drilling success across multiple prospects, and the advancement of key Pre-Feasibility Study (PFS) workstreams.

These outcomes position Unico Silver as a leading pure-play silver developer with a globally significant resource base and a clear pathway to development in Santa Cruz, Argentina.

March Quarter Highlights

JORC MINERAL RESOURCE ESTIMATED DELIVERED AT JOAQUIN

- **45.3Mt at 115gpt Silver Equivalent (AgEq) for 167Moz AgEq**, up 143% increase since acquisition
- Combined Joaquin and Cerro Leon MRE stands at **330Moz AgEq**

CONTINUED STRONG DRILL RESULTS ACROSS JOAQUIN

- **Assays from 56 holes (7,823) reported during the March quarter**
- High-grade intercepts from **Breccia Puntudo** confirm new mineralised corridor
 - **28m at 284gpt AgEq** (2.5gpt Au, 38gpt Ag) from 61m
 - **6m at 992gpt AgEq** (9.6gpt Au, 58gpt Ag) from 56m
- Mineralisation at La Negra SE and La Morocha SE remain open at depth and along strike

CORPORATE AND STRATEGIC DEVELOPMENTS

- **Board strengthened** to support development phase
 - **Peter Holmes** appointed Executive Director and Chair of Technical Committee
 - **Peter Canterbury** transitioned to Executive Director
- **Implementation of a Long-Term Incentive (LTI) framework aligned with key value drivers**
- OTCQB listing commenced under ticker USLRF expands North American investor access and liquidity
- The Company is well funded with **\$62.7 million of cash and cash equivalent** at the end of the March 2026 quarter.

Managing Director Todd Williams commented:

“The March quarter represents a defining milestone for Unico Silver, with the delivery of a 167Moz AgEq JORC

Managing Director Todd Williams commented:

Mineral Resource at Joaquin firmly establishing the project as a cornerstone asset. Importantly, we have now defined both scale and development optionality — with over 330Moz AgEq at the district level and more than 200Moz of near-surface, free-milling oxide mineralisation underpinning our Phase 1 development strategy.

At the same time, continued drilling success at Breccia Puntudo and across La Negra SE and La Morocha demonstrates that the system remains open, reinforcing our confidence in further material resource growth.”

Operations Summary

Unico Silver holds a significant portfolio of exploration properties in Santa Cruz province, Argentina, a region well-known for its multi-million-ounce gold and silver epithermal vein deposits (Figure 1). The **Joaquin and Cerro Leon projects are located near** AngloGold Ashanti's Cerro Vanguardia mine connected by public Route 12.

Work during the March 2026 quarter was focused on ongoing exploration at the Joaquin project, including a maiden JORC-compliant MRE, as well as ongoing feasibility work at Joaquin and Cerro Leon.

Key outcomes for the quarter included:

1. First drilling confirms shallow oxide mineralisation at Breccia Puntudo while deeper drilling at La Negra SE extends mineralisation beyond the current MRE.

- Initial drilling confirmed at Breccia Puntudo prospect confirmed shallow oxide mineralisation highlighted by a standout drill hole of **18m at 284gpt AgEq (2.5gpt Au, 38gpt Ag)** from 67 metres.
 - Breccia Puntudo represents a gold-rich mineralised structure that was drilled by Extorre Gold Mines during the early 2000s and was included in the March 2026 MRE as a 100% inferred resource.
 - Focus during the March quarter remained on infill drilling to convert shallow high-grade oxide mineral resources from inferred to indicated (updated MRE)
- Hole JDD161-26 returning **27m at 162gpt AgEq (1.3gpt Au, 35gpt Ag)** from 215m is the deepest hole drilled to date at La Negra SE and confirms mineralisation extends beyond the limits of the MRE.

2. Major resource growth establishes Joaquin as a cornerstone silver asset potential and underpins the Company's upcoming Pre-Feasibility Study

- Updated MRE reported for the Joaquin project, located in the Santa Cruz province of Argentina. The Joaquin MRE incorporates 27,723 metres of additional drilling and growth from 5 prospects, including La Negra, La Morocha and Breccia Puntudo.
 - **45.3Mt at 115gpt AgEq for 167Moz AgEq1** (Table 2), representing a 143% increase in contained AgEq since acquisition of the Joaquin project in October 2024.
 - Mineral Resource **includes 123Moz Ag and 521koz Au**, confirming Joaquin as a unique silver dominant system.
 - **78% in high-confidence Indicated category**, providing a strong foundation for the upcoming Pre-Feasibility Study (PFS).
 - The updated MRE is underpinned by 27,723 metres of drilling completed since April 2025 with an all-in discovery cost of USD 11c per AgEq ounce.

3. Ongoing PFS workstreams

- Baseline environmental studies
 - Phase 2 environmental baseline studies due to commence late April to support an Environmental Impact Assessment (EIA) for mining approvals.
- Engineering trade-off studies focused on throughput optimisation
- Updated Joaquin MRE is planned Q2 2026 to incorporate recent infill drilling
- Ore hardness (comminution) test work on Joaquin and Cerro Leon composites nearing completion
- Tailings Storage Facility location and preliminary design
- Final reporting of geotechnical test work to support input design parameters for open-pit designs

The preceding statements of Mineral Resources conforms to the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code) 2012 Edition. The information in this announcement that relates to the current Mineral Resources for Cerro Leon has been extracted from the ASX release by Unico Silver entitled “Cerro Leon MRE increases to 162 Moz AgEq” dated 23 September 2025, available at www.unicosilver.com.au and www.asx.com.au (“Unico Silver Announcement”). Unico Silver confirms that it is not aware of any new information or data that materially affects the information included in the Unico Silver Announcement in relation to estimates of Mineral Resources and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. Unico Silver confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the announcement. Due to rounding to appropriate significant figures minor discrepancies may occur. Cerro Leon’s reported silver equivalent (AgEq) is consistent with previous reports and is based on the following assumptions: $AgEq = Ag (g/t) + 96.76 \times Au (g/t) + 20.99 \times Pb (\%) + 32.48 \times Zn (\%)$, where: silver price is \$30/oz and recovery is 90%, gold price is \$2750/oz and recovery is 95%, lead price is \$0.95/lb and recovery is 87% and zinc price is \$1.39/lb and recovery is 92%. In the Company’s opinion, the silver, gold, zinc, lead included in the metal equivalent calculations have a reasonable potential to be recovered and sold.

The preceding statements of Mineral Resources conforms to the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code) 2012 Edition. The information in this announcement that relates to the current Mineral Resources for Joaquin has been extracted from the ASX release by Unico Silver entitled “Joaquin MRE increases to 167Moz AgEq” dated 17 March 2026, available at www.unicosilver.com.au and www.asx.com.au (“Unico Silver Announcement”). Unico Silver confirms that it is not aware of any new information or data that materially affects the information included in the Unico Silver Announcement in relation to estimates of Mineral Resources and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. Unico Silver confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the announcement. Due to rounding to appropriate significant figures minor discrepancies may occur. Joaquin’s reported silver equivalent (AgEq) is consistent with previous reports and is based on the following assumptions: $AgEq = Ag (g/t) + 84.9 \times Au (g/t)$ where: silver price is \$40/oz and recovery is 82%, gold price is \$3200/oz and recovery is 87%. In the Company’s opinion, the silver, gold, zinc, lead included in the metal equivalent calculations have a reasonable potential to be recovered and sold.
