

GENUSPLUS AWARDED KOOLUNGA BATTERY ENERGY STORAGE SYSTEM PROJECT

HIGHLIGHTS:

- GenusPlus has been awarded Koolunga Battery Energy Storage System (KLG) Project
- The Contract for KLG engineering, procurement, construction, and commissioning for BoP scope and BESS installation works is valued at approximately \$110 million
- The KLG Project will be a 200MW/800MWh Battery Energy Storage System (BESS)

National essential power and communications infrastructure provider GenusPlus Group Ltd (ASX: GNP) (Genus or the Company) has been awarded the contract for the engineering, procurement, construction, and commissioning for the Balance of Plant scope and BESS installation for a 200MW/800MWh battery energy storage project in South Australia on a lump sum and turn-key basis.

KLG is a significant energy storage project located approximately 6km south-east of Koolunga and 7km north-east of Brinkworth, South Australia. The BESS will be connected to South Australia's electricity grid via approximately 1.2km of HV cable that connects to the 275kV Brinkworth Substation.

The KLG project is owned by Equis Development Pte. Ltd ("Equis"), Asia-Pacific's leading infrastructure investor, owner and operator. KLG has completed all required planning and environmental approvals and community impact assessments.

Genus will perform the turn-key contract for the engineering, procurement, construction, and commissioning for BOP scope and BESS installation of the KLG Project. The combined contract values are approximately \$110 million with works to commence shortly and estimated to be completed by September 2027.

Genus Managing Director David Riches welcomes the opportunity to play an important role in delivering this Project of State Significance, helping to lead the transition to Australia's clean future.

"We are delighted to have secured this contract. This is a milestone project for Genus. This contract gives us great confidence that the market sees our capability and capacity to deliver a project of this size and complexity. We look forward to working closely with Equis to deliver the project safely, successfully and on time."

The Board of the Company has authorised the release of this announcement to the market.

ABOUT GENUSPLUS

GenusPlus Group Ltd is a specialist power and communications infrastructure and services provider operating across Australia. With years of practical experience across Australia, we design, build and maintain electrical transmission and distribution networks, substations and battery systems.

We enable customers to integrate new generation technology into traditional networks and support emerging networking solutions, meeting the demands of a carbon neutral economy.

Capitalising on our expertise in power networks and using the world's best knowledge and technology, we also specialise in delivering integrated, efficient and scalable communication network solutions, including network design, and fixed and wireless infrastructure supported by real time network management expertise and capability.
