ABOUT ASKARI METALS

Askari Metals is a focused Southern African exploration company. The Company is actively exploring and developing its Uis Lithium Project in Namibia located along the Cape-Cross – Uis Pegmatite Belt of Central Western Namibia. The Uis project is located within 2.5 km from the operating Uis Tin-Tantalum Lithium Mine which is currently operated by Andradia Mining Ltd and is favourably located with the deep-water port of Walvis Bay being less than 230 km away from the Uis project, serviced by all-weather sealed roads. In March 2023, the Company welcomed Lithium industry giant Huayou Cobalt onto the register who remains supportive of the Company's ongoing exploration initiatives.

The Company is also exploring and developing the advanced-stage brownfields Nejo Gold and Copper Project located in Central Western Ethiopia along the prolific Arabian-Nubian Shield, known to host a number of significant multi-million ounce gold deposits and mines, as well as significant copper and VMS discoveries and deposits. The Arabian-Nubian Shield is one of the last mineral rich frontier belts that has not been systematically explored. The Nejo project hosts both high-grade gold and high-grade copper mineralisation and has an extensive exploration history of drilling, trenching, sampling and geophysics. The Nejo project offers a district-scale opportunity covering an area of 1,174km².
