It does not contain the same level of disclosure as an initial public offering prospectus and is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

Forward-looking statements

This Prospectus contains forward-looking statements which are identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the Company's management.

The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this Prospectus will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements.

These forward-looking statements are subject to various risk factors that could cause the Company's actual results to differ materially from the results expressed or anticipated in these statements. These risk factors are set out in Section 5.

Overseas shareholders

These Offers do not, and are not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Shares these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offers are not being extended and Securities will not be issued to Shareholders with a registered address which is outside Australia and New Zealand.

For further information on overseas Shareholders please refer to Section 2.9.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Securities.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they

arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 6.2 for further details.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Securities issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future

reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

1.8 Details of Substantial Holders

Based on publicly available information as at the date of this Prospectus or as otherwise advised to the Company, those persons which (together with their associates) have a relevant interest in 5% or more of the Shares on issue are set out below:

SHAREHOLDER	SHARES	%
Mr Jason Peterson	123,840,109	10.23%
Mr Rodney Illingworth	111,412,626	9.20%
Mr Steven Formica	83,715,052	6.91%

In the event all Entitlements are accepted there will be no change to the substantial holders as a result of the completion of the Entitlement Offer.

1.9 Effect on control

Based on current shareholding and Entitlements of Shareholders (including substantial Shareholders) as at the date of this Prospectus, regardless of the amount raised under the Entitlement Offer, no Shareholder will increase their holding, to an amount in excess of 19.9% through applying for their Entitlements.

Further as set out in Section 2.6, on the basis of the allocation policy, no person will acquire, through participation in the Shortfall Offer a holding of Shares of, or increase their holding to, an amount in excess of 19.9% of all the Shares on issue on completion of the Entitlement Offer.

1.10 Potential dilution on non-participating Shareholders

In addition to potential control impacts set out in Section 1.9, Shareholders should note that if they do not participate in the Entitlement Offer, their holdings are likely to be diluted by approximately 28.57% (as compared to their holdings and number of Shares

on issue as at the date of this Prospectus). Each Shareholder will also incur further dilution as a result of the Slipstream Offer and the issue of the Consultancy Shares.

For illustrative purposes, the table below shows how the dilution may impact the holdings of Shareholders:

HOLDER	HOLDING AS AT RECORD DATE	% AT RECORD DATE ¹	ENTITLEMENT UNDER THE ENTITLEMENT OFFER	HOLDINGS IF ENTITLEMENT OFFER NOT TAKEN UP	% POST ENTITLEMENT OFFER (MINIMUM SUBSCRIPTION) AND SLIPSTREAM OFFER) ²	% POST ENTITLEMENT OFFER (FULL SUBSCRIPTION) AND SLIPSTREAM OFFER) ²
Shareholder 1	100,000,000	8.26%	40,000,000	100,000,000	5.49%	5.26%
Shareholder 2	50,000,000	4.13%	20,000,000	50,000,000	2.75%	2.63%
Shareholder 3	15,000,000	1.24%	6,000,000	15,000,000	0.82%	0.79%
Shareholder 4	4,000,000	0.33%	1,600,000	4,000,000	0.22%	0.21%
Shareholder 5	500,000	0.04%	200,000	500,000	0.03%	0.03%

Notes:

1. This is based on a share capital of 1,210,902,915 Shares as at the date of the Prospectus and assumes no Shares are issued prior to the Record Date (including on conversion of Performance Rights).
2. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Shortfall Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall was not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.
3. The above table accounts for the Shares to be issued under the Entitlement Offer and the Additional Shares.
4. The above table is presented on a pre-consolidation basis. The Company intends to seek Shareholder approval to consolidate the issued capital of the Company on a 15:1 basis. Please refer to Section 1.4 for further information on the Consolidation.

2. DETAILS OF THE OFFERS

2.1 The Entitlement Offer

The Entitlement Offer is being made as a pro-rata non-renounceable entitlement issue of two (2) Shares for every five (5) Shares held by Eligible Shareholders registered at the Record Date at an issue price of \$0.002 per Share. Fractional entitlements will be rounded up to the nearest whole number.

Based on the capital structure of the Company as at the date of this Prospectus, (and assuming no Shares are issued prior to the Record Date including on exercise or conversion of securities on issue) approximately 484,361,166 Shares may be issued under the Entitlement Offer to raise up to \$968,722 (before costs).

All of the Shares offered under this Prospectus will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 4.1 for further information regarding the rights and liabilities attaching to the Shares.

The purpose of the Entitlement Offer and the intended use of funds raised are set out in Section 3.

The Company intends to withdraw the Entitlement Offer if the issue of the Slipstream Performance Rights are not approved at the General Meeting. Further information in relation to the Acquisition Agreement is set out in Section 1.5.

2.3 Payment by BPAY or Electronic Funds Transfer

Please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY or EFT if you are the holder of an account that supports BPAY or EFT transactions to an Australian bank account. Please note that should you choose to pay by BPAY or EFT:

- (a) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (b) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your application monies; and

- (c) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

2.4 Implications of an acceptance

Paying any application monies by BPAY or EFT will be taken to constitute a representation by you that:

- (a) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety; and
- (b) you acknowledge that once a BPAY or EFT payment instruction is given in relation to any application monies, the application may not be varied or withdrawn except as required by law.

2.5 Minimum subscription

The minimum subscription in respect of the Entitlement Offer and Shortfall Offer combined is \$810,000.

No Securities will be issued until the minimum subscription has been received. If the minimum subscription is not achieved within 4 months after the date of issue of this Prospectus, the Company will either repay the Application monies to the Applicants or issue a supplementary prospectus or replacement prospectus and allow Applicants one month to withdraw their Application and be repaid their Application monies.

2.6 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer (**Shortfall Securities**). The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.002 being the price at which Shares have been offered under the Offer.

If you do not wish to take up any part of your Entitlement you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated to other Eligible Shareholders or other third parties as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Shareholders and the number of Shares proposed to be issued under the Offer.

Eligible Shareholders who wish to subscribe for Securities above their Entitlement are invited to apply for Shortfall Securities under the Shortfall Offer by completing the appropriate section on their Entitlement and Acceptance Form or by making payment for such Shortfall Securities in accordance with Sections 2.3.

The Board presently intends to allocate Shortfall Securities as follows:

- (a) to Eligible Shareholders who apply for an excess of their full Entitlement, so long as the issue of Shortfall Securities to that Eligible Shareholder would not take their voting power to in excess of 19.99%; and then
- (b) to other parties identified by the Directors, which may include parties who are not currently Shareholders.

No Shares will be issued to a party under the Shortfall Offer if the effect would be to increase that party's voting power in the Company to an amount greater than 19.99%.

The Company reserves the right to issue an Eligible Shareholder a lesser number of Shortfall Securities than applied for or no Shortfall Securities at all. However, the Directors do not intend to refuse an application for Shortfall Securities from Eligible Shareholders other than in circumstances of oversubscription or where acceptance may result in a breach of the Corporations Act. If the number of Shortfall Securities applied for by Eligible Shareholders exceeds the total Shortfall, the Shortfall Securities will be allocated among applying Eligible Shareholders proportionate to their existing holdings.

All decisions regarding the allocation of Shortfall Securities

will be made by the Directors and will be final and binding on all applicants under the Shortfall Offer, as such there is no guarantee that any Shortfall Securities applied for will be issued to Eligible Shareholders.

The Company will have no liability to any Applicant who receives less than the number of Shortfall Securities they applied for under the Shortfall Offer. If the Company scales back any applications for Shortfall Securities under the Shortfall Offer any Application monies will be returned (without interest) as soon as practicable.

2.7 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made within seven days after the date of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

2.8 Issue of Securities

Securities issued pursuant to the Offers will be issued in accordance with the ASX Listing Rules and timetable set out at Section 1.1.

Securities issued pursuant to the Shortfall Offer will be issued on a progressive basis. Where the number of Securities issued is less than the number applied for, or where no issue is made surplus application monies will be refunded without any interest to the applicant as soon as practicable after the closing date of the Shortfall Offer.

Pending the issue of the Securities or payment of refunds pursuant to this Prospectus, all application monies will be held by the Company in trust for the applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each applicant waives the right to claim interest.

Holding statements for Securities issued under the Offers will be mailed as soon as practicable after the issue of Securities and for Shortfall Securities issued under the Shortfall Offer as soon as practicable after their issue.

2.9 Overseas Shareholders

The Entitlement Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Securities these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Shares will not be issued to Shareholders with a registered address which is outside Australia or New Zealand.

New Zealand

The Securities are not being offered to the public within New Zealand other than to existing shareholders of the Company with registered addresses in New Zealand to whom the offer of these securities is being made in reliance on the transitional provisions of the Financial Markets Conduct Act 2013 (New Zealand) and the Financial Markets Conduct (Incidental Offers) Exemption Notice 2021 (New Zealand).

This Prospectus has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority. This document is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information

Nominees and custodians

Nominees and custodians may not submit an Entitlement and Acceptance Form on behalf of any Shareholder resident outside Australia and New Zealand without the prior consent of the Company, taking into account relevant securities law restrictions. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

2.10 Slipstream Offer

The Slipstream Offer is an offer of 150,000,000 Consideration Shares and 400,000,000 Performance Rights to be issued to the Sellers (or their nominees) pursuant to the Acquisition Agreement. The Slipstream Offer is made only to the Sellers and is not open to the public or to existing Shareholders generally.

Accordingly, an application form in relation to the Consideration Shares and Slipstream Performance Rights will only be provided by the Company to the Sellers (or their nominee(s)).

The issue of the Slipstream Performance Rights is conditional upon Shareholders approving the issue of the Slipstream Performance Rights at the General Meeting. No Slipstream Performance Rights will be issued under the Slipstream Offer unless this condition is satisfied.

The Consideration Shares and Slipstream Performance Rights are being issued in accordance with the terms of Acquisition Agreement, a summary of the material terms of which are set out in Section 1.5.

The terms and conditions of the Consideration Shares and Slipstream Performance Rights are set out in Sections 4.1 and 4.2, respectively.

No funds will be raised pursuant to the Slipstream Offer as the Consideration Shares and Slipstream Performance Rights are being issued for nil cash consideration in accordance with the Acquisition Agreement.

The secondary purpose of the Slipstream Offer is to remove any trading restrictions that may have attached to Shares issued by the Company without disclosure under Chapter 6D of the Corporations Act prior to the Closing Date (including Shares issued prior to the date of this Prospectus and subject to Shareholder approval at the General Meeting, the Consultancy Shares).

Relevantly, section 708A(11) of the Corporations Act provides that a sale offer does not need disclosure to investors if:

- (a) the relevant securities are in a class of securities that are quoted securities of the body; and
- (b) either:
 - (i) a prospectus is lodged with the ASIC on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or
 - (ii) a prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and
- (c) the prospectus is for an offer of securities issued by the body that are in the same class of securities as the relevant securities.

3. PURPOSE AND EFFECT OF THE OFFERS

3.1 Purpose of the Offers

Entitlement Offer

The purpose of the Entitlement Offer is to raise up to \$968,722 before costs and enable the Company to satisfy certain Reinstatement Conditions.

The funds raised from the Entitlement Offer are intended to be applied in accordance with the table set out below:

PROCEEDS OF THE ENTITLEMENT OFFER	MINIMUM SUBSCRIPTION (\$810,000)		FULL SUBSCRIPTION (\$968,722)	
	(\$)	(%)	(\$)	(%)
Exploration on Existing Projects ¹	\$150,000	18.52%	\$150,000	15.48%
Exploration on the Endeavour Project ²	\$500,000	61.73%	\$500,000	51.61%
Working capital and administration costs ³	\$110,000	13.58%	\$268,722	27.74%
Expenses of the Offers ⁴	\$50,000	6.17%	\$50,000	5.16%
Total	\$810,000	100%	\$968,722	100%

Notes:

1. Exploration expenditure on existing projects in Western Australia and the Northern Territory, including geophysics related to the processing of recent government generated regional gravity data, geological review (comprising target review/update and program planning), surface geochemical sampling and reconnaissance surface geochemical sampling programs.
2. Exploration expenditure on the Endeavour Project (to be acquired pursuant to the Acquisition Agreement) including geological review (including target prioritization and program planning), soil sampling (including regional based surface geochemical sampling) and RC drilling.
3. Includes management salaries, directors' fees, rent and other associated costs.
4. Refer to Section 6.7 for further details relating to the estimated expenses of the Offers.

If only the Minimum Subscription is raised under the Offer, then the expenses of the Offer and the amount allocated to exploration on Existing Projects and exploration on the Endeavour Project are not expected to change. However, the Company will reduce the amount of funds allocated to the working capital and administration costs by the amount of the difference between the amount raised and the Minimum Subscription.

On completion of the Entitlement Offer, the Board believes the Company will have sufficient working capital to achieve its stated objectives. In the event the Entitlement Offer is not fully subscribed, operational objectives are likely to be modified, which may result in delay or substantial changes to the Company's future plans. In this event (and after accounting for associated costs of the Offers) it is likely that the Company will appropriately scale back funds available for working capital and administration costs.

In addition, it should be noted that the Company's budgets and forecasts will be subject to modification on an ongoing basis depending on the results achieved from its business activities and operations.

The above table is a statement of current intentions as of the date of this Prospectus and excludes existing funds. As with any budget, intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way funds are applied on this basis.

Slipstream Offer

The purpose of the Slipstream Offer is to remove any trading restrictions that may have attached to Shares issued by the Company without disclosure under Chapter 6D of the Corporations Act.

Additionally, the Slipstream Offer is being made such that the relief provided under ASIC Corporations (Sale Offers That Do Not Need Disclosure) Instrument 2016/94 with respect to the on-sale provisions of section 707 of the Corporations Act is available.

Specifically, if the Performance Rights are issued with disclosure under this Prospectus, then the Shares issued upon the conversion of any of the Performance Rights can be on-sold within 12 months of their issue, without a disclosure document for the on-sale offer.

3.2 Effect of the Offers

The principal effect of the Entitlement Offer (assuming all Entitlements are accepted and no Shares are issued including on exercise or conversion of other Securities on issue prior to the Record Date) and the Slipstream Offer, will be to:

- (a) increase the cash reserves by \$918,722 (after deducting the estimated expenses of the Entitlement Offer) immediately after completion of the Offers; and
- (b) increase the number of Shares on issue by 634,361,166 Shares, which together with the issue of the Consultancy Shares, will result in the number of Shares increasing from 1,210,902,915 as at the date of this Prospectus to 1,900,264,081 Shares; and
- (c) increase the number of Performance Rights on issue from 115,000,000 as at the date of this Prospectus to 515,000,000 Performance Rights.

3.	Dividend rights	<p>Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.</p> <p>The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.</p> <p>Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the</p>

		Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.
4.	Winding-up	<p>If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.</p> <p>The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.</p>
5.	Shareholder Liability	As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.
6.	Transfer of Shares	Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.
7.	Future Increases in Capital	The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.
8.	Variation of Rights	<p>Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.</p> <p>If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.</p>
9.	Alteration of Constitution	In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

5. RISK FACTORS

5.1 Introduction

The Securities offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors consider the risk factors set out in this Section 5, together with all other information contained in this Prospectus.

The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 5, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares. This Section 5 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

Before determining whether to invest in the Company you should ensure that you have a sufficient understanding of the risks described in this Section 5 and all of the other information set out in this Prospectus and consider whether an investment in the Company is suitable for you, taking into account your objectives, financial situation and needs.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

5.2 Company specific

RISK CATEGORY	RISK
Suspension from quotation	<p>On 2 January 2026, the Company's Shares were suspended from quotation by ASX in accordance with Listing Rule 17.3. The Company's securities will remain suspended until such time that ASX is satisfied with the Company's compliance with the ASX Listing Rules, including ASX Listing Rule 12.2 and that it is otherwise appropriate for the Company's securities to be reinstated to quotation, including that any the Reinstatement Conditions imposed by ASX are satisfied.</p> <p>In the event the Entitlement Offer does not complete, the Company's securities will remain suspended until such time as the Company has remedied ASX's concerns. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application monies for the Shares within the time prescribed under the Corporations Act, without interest.</p>
Potential for dilution	<p>In addition to potential control impacts set out in Section 1.9, Shareholders should note that if they do not participate in the Entitlement Offer, their holdings are likely to be diluted by approximately 28.57% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus). Each Shareholder will also incur further dilution as a result of the Slipstream Offer and the issue of the Consultancy Shares.</p> <p>It is not possible to predict what the value of a Share will be following the completion of the Offers being implemented and the Directors do not make any representation as to such matters.</p> <p>The last trading price of Shares on ASX prior to the Prospectus</p>

RISK CATEGORY	RISK
	<p>being lodged of \$0.003 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offers.</p>
<p>Going Concern</p>	<p>The Company's Annual Report for 30 June 2025 and the Half Yearly Report for the half year ended 31 December 2025 (Half Yearly Report) included notes on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern.</p> <p>The Half Yearly Report noted that the Group incurred a net loss after income tax of \$9,079 and had net cash outflows from operating activities of \$1,300,973 for the half-year ended 31 December 2025. As at 31 December 2025, the Group had positive working capital of \$1,266,467 (30 June 2025: \$266,123) and cash and cash equivalents of \$78,689 (30 June 2025: \$16,020).</p> <p>At the time of preparation of the Half Yearly Report, the Directors believed that it was appropriate to adopt the going concern basis in the preparation of the financial report. The ability of the Group to continue as a going concern and meet its planned exploration, administration and other commitments is dependent on the Group raising additional funding as and when required. The Group is also working towards capital raising initiatives and the Directors are confident that it will receive sufficient additional funding from major shareholders or other parties.</p> <p>In February 2026, the Company sold its remaining 2,551,720 shares in Golden Horse Minerals Ltd for net proceeds of \$1,640,373, which has materially strengthened the Company's cash position.</p> <p>The Directors believe that upon the successful completion of the Entitlement Offer, the Company will have sufficient funds to adequately meet its current commitments and planned mineral project evaluation activities for the next 12 months. It is likely that further funding will be required to meet the medium to long term working capital requirements of the Company.</p> <p>If the Entitlement Offer is not successfully completed there is significant uncertainty as to whether the Company can continue as a going concern which is likely to have a material adverse effect on the Company's activities.</p>
<p>Additional requirements for capital</p>	<p>The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.</p>
<p>Acquisition Agreement</p>	<p>The Company is reliant on the Sellers completing settlement of the Acquisition Agreement.</p> <p>If any party defaults in the performance of their respective</p>

RISK CATEGORY	RISK
	<p>obligations under the Acquisition Agreement, it may be necessary for the Company to approach a court to seek a legal remedy, which can be costly.</p> <p>The Board has no reason to believe that any of the Sellers would fail to comply with their respective obligations under the Acquisition Agreement, including to complete settlement under the Acquisition Agreement.</p>
Regulatory risk	<p>The Company's operations require approvals from regulatory authorities which may not be forthcoming, either at all or in a timely manner, or which may not be able to be obtained on terms acceptable to the Company. The Company cannot guarantee that any or all requisite approvals will be obtained. A failure to obtain any approval would mean that the Company may be restricted, either in part or absolutely, from exploration, development and mining activities.</p>
Exploration success	<p>The future operations of the Company and the value of its securities are directly related to the results of exploration. The exploration tenements held by the Company are at various stages of exploration and potential investors should understand that minerals exploration and development are high-risk undertakings. There can be no assurance that exploration of these tenements, or any other tenements that may be acquired in the future, will result in discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can ultimately be economically exploited. The Company's future exploration activities may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title processes and laws relating to Aboriginal heritage, changing government regulations and many other factors beyond the Company's control.</p> <p>The Company's success will also depend upon the Company having access to sufficient development capital, being able to maintain, renew or replace title to its tenements and obtaining all required approvals for its activities. In the event that exploration programs prove to be unsuccessful, this could lead to diminution in the value of the Company's tenements, a reduction in the cash reserves of the Company and possible relinquishment of tenements. The Company's anticipated exploration costs are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may be materially different to these estimates and assumptions. Accordingly, no assurance can be given that any cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.</p>
Mineral Commodity price volatility	<p>Even if the Company's exploration is successful, any resultant development or mining operations will be subject to a range of risk factors, including fluctuations in the market price for relevant mineral commodities. If the Company achieves exploration success leading to mineral production, the Company's financial performance will be sensitive to the price for that mineral. The price for minerals is affected by numerous factors and events that are beyond the Company's control.</p>

RISK CATEGORY	RISK
	These factors and events include general economic activity, world demand, forward selling activity, cost of production by the producers of such minerals and other matters such as inflationary expectations, interest rates, currency exchange rates as well as general global economic conditions and political trends.
Contract risks	The Company may operate through a series of contractual relationships with operators, sub-contractors and other third parties. All contracts carry risks associated with the performance by the parties thereto of their obligations as to time and quality of work performed. Any disruption to services or supply may have an adverse effect on the financial performance of the Company's operations.
Equipment risks	The exploration activities of the Company could be adversely affected if essential drilling equipment fails, is delayed or is unavailable when required by the Company.

5.3 Industry risks

RISK CATEGORY	RISK
Resource estimates	Any resource estimates released by the Company in the future will be expressions of judgement based on knowledge, experience and industry practice. Estimates which are valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretation, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.
Operating and development risks	<p>Even if the Company's exploration is successful, the Company's ability to achieve any production, development, operating cost and capital expenditure estimates in a timely basis cannot be assured. The business of minerals development and mining involves many risks and may be impacted by factors including ore tonnes, yield, input prices (some of which are unpredictable and beyond the Company's control), overall availability of free cash to fund continuing development activities, labour force disruptions, cost overruns, change in the regulatory environment and other unforeseen contingencies.</p> <p>The ongoing conflict between the United States and Iran and the associated disruption to the Strait of Hormuz has contributed to a global fuel supply crisis, resulting in increased fuel costs and potential fuel shortages. This may further impact the availability and operability of drilling and exploration equipment, and increase the overall cost of the Company's exploration activities.</p> <p>Other risks also exist such as environmental hazards (including discharge of pollutants or hazardous chemicals), industrial accidents and occupational and health hazards. Such occurrences could result in damage to, or destruction of, production facilities, personal injury or death, environmental damage, delays in mining, increased production costs and other monetary losses and possible legal liability to the owner or operator of a mine.</p>

RISK CATEGORY	RISK
	<p>The Company may become subject to liability for pollution or other hazards against which it has not insured or cannot insure, including those in respect of past mining activities in an area for which it was not responsible.</p> <p>The risks outlined above also mean that there can be no assurances as to the future development of a mining operation in relation to any of the Company's projects or which the Company may acquire in the future.</p>
Environmental	<p>The Company's current and proposed activities are subject to state and federal laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws. Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations. The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Company's operations more expensive. Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programs or mining activities.</p>
Tenure risks and native title	<p>Interest in tenements in Australia is governed by the respective state and territory mining legislation. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments. If exploration is successful, the Company will not be able to exploit any mineral deposit unless the Company has or acquires a mining lease. The grant of a mining lease is subject to ministerial discretion. Additionally, in areas where native title exists or may exist, the ability of the Company to acquire a valid mining lease may also be subject to compliance with the 'right to negotiate' process under the <i>Native Title Act 1993 (Cth)</i>. Compliance with this process can cause delays in obtaining the grant of a mining lease and does not ultimately guarantee that a mining lease will be granted. Attaining a negotiated agreement with native title claimants or holders to facilitate the grant of a valid mining can add significantly to the costs of any development or mining operation. The ability of the Company to conduct activities on exploration or mining tenements is subject to compliance with</p>

RISK CATEGORY	RISK
	<p>laws protecting Aboriginal heritage. Conduct of site surveys to ensure compliance can be expensive and subject to delays. If any Aboriginal sites are located within areas of proposed exploration, mining or other activities, the ability of the Company to conduct those activities may be dependent on the Company obtaining further regulatory consents or approvals.</p>
<p>Safety legislation</p>	<p>Current and future mines are subject to a range of safety legislation which may change in a manner that may include requirements in addition to those now in effect, and a heightened degree of responsibility for companies and their directors and employees.</p>
<p>Competition risk</p>	<p>The industry in which the Company is involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operation and financial performance of the Company's projects and business.</p>
<p>Industrial action</p>	<p>The Company is subject to the risk of industrial action and work stoppages by employees and contractors who provide services which are necessary for the continued operation of the Company's businesses.</p>
<p>Community relations and landowners</p>	<p>The Company's ability to undertake exploration and production on tenements will depend in part on its ability to maintain good relations with relevant local communities. Any failure to adequately manage community and social expectations with respect to compensation for land access, employment opportunities, impact on local business and other expectations may lead to local dissatisfaction with the Company, which in turn may lead to disruptions in the exploration and production (if relevant at the time) programs for the tenements and potentially losses.</p>
<p>Disputes</p>	<p>The activities of the Company may result in disputes with third parties, including, without limitation, the Company's investors, competitors, regulators, partners, distributors, customers, directors, officers and employees, and service providers. The Company may incur substantial costs in connection with such disputes. Further, a change in strategy may involve material and as yet unanticipated risks, as well as a high degree of risk, including a higher degree of risk than the Company's strategy in place as of the date of this Prospectus.</p>
<p>Litigation</p>	<p>The Company is exposed to possible litigation risks including, but not limited to, intellectual property ownership disputes, contractual claims, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position.</p> <p>Refer to Section 6.1 for details of litigation that the Company and its Subsidiaries are currently engaged in.</p>

5.4

General risks

RISK CATEGORY	RISK
Market conditions	<p>Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. <p>The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and mining in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p>
Taxation	<p>The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation viewpoint and generally.</p> <p>To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.</p>
Reliance on key personnel	<p>The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. Governmental responses (including sanctions, tariffs, travel restrictions, shipping limitations and changes to import/export arrangements) may adversely impact the Company's operations and are likely to be beyond its control.</p> <p>While the Directors consider the current direct impact of the Geopolitical Events on the Company's business to be limited, the situation remains dynamic and the consequences for financial markets, commodity prices, logistics, cost structures, the regulatory environment in key operating jurisdictions and investor sentiment are inherently uncertain.</p>

6. ADDITIONAL INFORMATION

6.1 Litigation

In August 2022, the Department of Regional NSW advised the Company of a potential legacy liability relating to rehabilitation obligations of the McKinnon's gold mine located near Cobar, New South Wales, operated by a predecessor entity that ceased operations in 2002.

On 12 December 2023, the Department of Regional NSW issued a new section 240 Notice to the Company. In December 2024, the Company submitted, without admission of liability, a draft Risk Assessment and Rehabilitation Management Plan to the NSW Resources Regulator (**NSWRR**) as part of its section 240 Notice obligations.

The NSWRR subsequently, in October 2025, requested further information regarding certain assessments contained in the submitted reports. The Company has sought further clarification and comment from the NSWRR and has also requested a further extension of time from the NSWRR. The NSWRR has agreed to a joint site visit to the mine site prior to any further response being required from the Company, though no dates for that visit have been confirmed. The obligation for the rehabilitation work outlined in the section 240 Notice is still in dispute and no resolution has been reached.

The Company is of the opinion that it is not required to carry out any rehabilitation work at this time and has not recognised any cost associated with the rehabilitation as discussions continue with the NSWRR. The Directors are of the opinion that the Company is in a position to adequately address any potential legacy rehabilitation issue as it arises.

As at the date of this Prospectus, the Company and its Subsidiaries are not involved in any other legal proceedings and the Directors are not aware of any other legal proceedings pending or threatened against the Company or any of its Subsidiaries.
