Klevo

ASX Announcement

27 April 2026

Review of Operations – Quarter Ended 31 March 2026

Klevo Rewards Limited ("Klevo" or "the Company") is pleased to provide shareholders with an overview of its operational and corporate activities for the quarter ended 31 March 2026.

The quarter ended 31 March 2026 represents a significant period of strategic and operational advancement for Company, as it continued to execute on its transition into an integrated rewards, payments, and digital asset ecosystem, underpinned by its wholly owned subsidiary, Fly Wallet Pty Ltd.

Klevo x Bybit Partnership

A key highlight of the quarter was the advancement of Klevo's digital asset strategy through its partnership with Bybit to develop and launch Klevo stable coin, an Australian dollar-backed stablecoin. This initiative establishes a unified ecosystem enabling users to earn, hold and spend value seamlessly across rewards, payments, and loyalty programs. The integration of Klevo stable coin with card-linked payment infrastructure is

expected to allow global usability wherever Mastercard is accepted, while simultaneously driving engagement through cashback, merchant-funded incentives, and loyalty-based rewards. This development positions Klevo at the forefront of embedded finance, combining traditional payment rails with blockchain-enabled value transfer to create a scalable and differentiated revenue model.

During the quarter, Klevo materially strengthened its global payments infrastructure through Fly Wallet's admission to the SWIFT network as a supervised financial institution. This milestone enhances the Company's ability to facilitate secure cross-border transactions and financial messaging, aligning Klevo with global banking standards and significantly expanding its capability to support enterprise clients operating across multiple jurisdictions. The integration with SWIFT provides a critical foundation for the future rollout of KLV Pay, KLV Coins and Klevo Stable Coin, bridging traditional fiat systems with digital asset infrastructure.

Further reinforcing its international growth strategy, Fly Wallet achieved certification for payment card issuance across multiple global jurisdictions, enabling Klevo to deploy Mastercard-powered card programs beyond Australia and into key international markets. This capability materially expands the Company's addressable market and supports the export of its white-labelled rewards and payments platform to multinational enterprise clients, positioning Klevo to capture increasing demand for cross-border loyalty and engagement solutions.

Klevo also continued to enhance the commercial performance of its platform through deeper integration with Mastercard. Fly Wallet now operates a fully regulated rewards card and digital wallet platform supporting real-time transaction processing, card-linked rewards, and instant cashback functionality. During the quarter, the Company benefited from cash incentives and service credits linked to Mastercard program performance, reflecting increasing transaction activity and improving platform economics. These developments support Klevo's transition

toward a higher-margin, transaction-driven revenue model as scale increases.

In parallel, the Company progressed the legal and regulatory structuring of Klevo stable coin through engagement with Hamilton Locke, supporting the establishment of a compliant framework for an Australian dollar-backed digital asset. This work is a critical step in enabling institutional adoption and ensuring that Klevo's digital asset strategy is aligned with evolving regulatory expectations in Australia and internationally.

Klevo's operating model continues to evolve in line with its updated positioning as an integrated platform combining AI-driven engagement, blockchain-based rewards, and global payments infrastructure. As reflected on Klevo, the platform enables enterprises to digitise loyalty programs into transferable digital assets, deliver instant and flexible reward redemption, and deploy globally scalable engagement solutions. This integrated ecosystem provides both enterprise clients and end users with seamless access to rewards, payments and digital value, supporting increased retention, engagement, and monetisation.

From a capital management perspective, the Company maintained funding flexibility through the extension of its facility with LDA Capital, ensuring continued access to capital to support growth initiatives, platform development, and international expansion. The extension preserves Klevo's ability to execute on its strategic roadmap while scaling its operations.

Overall, the March 2026 quarter represents a pivotal stage in Klevo's evolution, with the Company successfully advancing key components of its ecosystem, including global payments connectivity, international card issuance capability, and the development of Klevo Stable Coin. These milestones collectively position Klevo to transition from platform build-out to accelerated commercialisation, leveraging its integrated rewards, payments, and digital asset infrastructure to drive future growth.

Financial Overview

The Company's quarterly cash flow report (Appendix 4C) reflects the strengthened cash position following completion of the capital raising and reinstatement process. Klevo enters calendar year 2026 with an improved liquidity position and reduced balance sheet risk, providing a stable foundation for operational execution.
