

ASX:CTP

Activities Report and ASX Appendix 5B

REVIEW OF OPERATIONS FOR THE QUARTER ENDED
31 MARCH 2026

Highlights

- **Sales revenue** of \$11.3m for the March quarter was 8.7% higher than the December quarter due to:
 - **Higher gas sale volumes:** Gas sales of 1.1 PJ were 3% higher than the previous quarter which was impacted by oil offtake constraints; and
 - **Higher realised gas prices:** New higher-priced contracts and indexing of existing contracts resulted in a 5% increase in average gas prices to \$10.06 / GJ.
- **Cash balance** at the end of the quarter was \$19.5m, down from \$29.4m at 31 December. Key cash flows included:
 - Costs of \$10.9m associated with the acquisition of interests in exploration permits in the Otway and Cooper Basins;
 - Net operating inflows of \$3.8m before net interest and exploration costs;
 - Exploration and appraisal related expenditure of \$1.9m, including site preparation and purchase of long lead equipment for the new Palm Valley wells to be drilled in 1H FY2027; and
 - Sustaining CAPEX of \$0.9m.
- **Net debt** was \$5.2 million at 31 March, including \$2.5 million of funds held as security for the loan facility. The March quarter interest payment was capitalised into the loan balance.
- **Share buy-back:** 1,385,630 shares were acquired on-market in January 2026 at an average price of 6.3cps under the share buy-back program.

Subsequent to the end of the quarter

- **New multi-year Gas Sales Agreement (GSA):** In April, a new multi-year GSA was secured with the Northern Territory Government:
 - Up to 21 PJ of gas (10.5 PJ Central share) to be supplied through to the end of 2034;
 - Two new wells to be drilled at Palm Valley with drilling anticipated to commence in mid-2026; and
 - The new wells are expected to initially increase Central's gas production capacity by circa 40%.
- **Increased loan facility:** The existing loan facility was increased in April to provide up to \$15m in working capital to support the acceleration of drilling at Palm Valley.

Production Activities

SALES VOLUMES

Central supplied 1.1 PJe (Central share) of gas and oil from its fields in the Northern Territory (NT) in the March quarter, 3% higher than the December quarter which was impacted by oil offtake constraints.

SALES REVENUE

Sales revenue for the March quarter was \$11.3m, 8.7% higher than the previous quarter due to higher gas sale volumes and higher realised average gas prices, reflecting new higher-priced contracts and indexing of existing contracts.

Sales Revenue (unaudited)		Qtr v Qtr		YTD	
Product	Unit	Q2 FY26	Q3 FY26	FY25	FY26
Gas	\$'000	10,200	11,141	27,138	31,776
Average unit price	\$/GJ	9.59	10.06	8.12	9.83
Crude and Condensate	\$'000	235	197	2,594	1,240
Total Sales Revenue	\$'000	10,435	11,338	29,732	33,016

MEREENIE OIL AND GAS FIELD (OL4 AND OL5) – NORTHERN TERRITORY

CTP - 25% interest (and Operator), Echelon Mereenie Pty Ltd - 42.5%, Horizon Australia Energy Pty Ltd - 25%, Cue Mereenie Pty Ltd - 7.5%

Average gross gas sales from the Mereenie field increased 9% to 27.5 TJ/d (100% JV) in the March quarter, following the resolution of oil offtake-related constraints in mid-December.

The gas sales capacity of the Mereenie field was approximately 27.9 TJ/d (100% JV) at the end of the quarter.

Oil sales averaged 297 bbls/d (100% JV) during the quarter and remain constrained by revised oil specification requirements following curtailed liquids production from the Cooper Basin. Central has been actively managing this constraint to maintain full gas production capacity. Central continues to seek improved alternative commercial arrangements for the sale of Mereenie's produced oil. In the interim, oil sales and revenues are expected to remain lower than historic averages.

PALM VALLEY (OL3) – NORTHERN TERRITORY

CTP - 50% interest (and Operator), Echelon Palm Valley Pty Ltd - 35%, Cue Palm Valley Pty Ltd - 15%

Production from the Palm Valley field averaged 6.2 TJ/d over the quarter (Central share: 3.1 TJ/d), consistent with the previous quarter.

Sales capacity was approximately 6.2 TJ/d (100% JV) at the end of the quarter.

Joint Venture FID for two new wells was approved in April, with the two wells expected to significantly boost production at Palm Valley from late 2026. Site preparation is almost complete, a drilling rig contracted and procurement of necessary equipment underway. Drilling is planned to commence mid-

year and the new wells can be quickly connected to existing production infrastructure. The new wells are expected to increase Palm Valley's production up to the existing 15 TJ/d plant capacity.

DINGO GAS FIELD (L7) – NORTHERN TERRITORY

CTP - 50% interest (and Operator), Echelon Dingo Pty Ltd - 35%, Cue Dingo Pty Ltd - 15%

The Dingo gas field supplies gas directly to the Owen Springs Power Station in Alice Springs. Higher seasonal demand was reflected in sales volumes, which were close to contract maximums - up 6.6% quarter-on-quarter to 4.65 TJ/d (Central share: 2.3 TJ/d).

Exploration Activities

AMADEUS SUB-SALT EXPLORATION

Dukas (EP112) and Jacko Bore (Mt Kitty) (EP125), operated by Santos.

CTP – 45% interest (EP112); 30% interest (EP125)

Exploration permits EP112 and EP125 were renewed for five years from February 2026.

Central has entered into a conditional agreement to sell its interests in EP112 and EP125 to UK-listed Georgina Energy Plc (Georgina) (LSE: GEX) in exchange for a 25% equity interest in the company. If the transaction completes, drilling of a sub-salt exploration well in EP125 is expected in mid-2027, targeting helium and hydrocarbons.

Commercial

NEW MULTI-YEAR GAS SUPPLY AGREEMENT

In April, Central announced a new Gas Supply Agreement (GSA) to supply up to 10.5 PJ (Central share) of gas to the Northern Territory Government through to the end of 2034.

The GSA supports the Palm Valley Joint Venture in drilling two new wells to supply gas on a firm basis from 2H 2026, through to the end of 2034. The GSA has a fixed market price with CPI escalation and take-or-pay provisions.

Palm Valley's potential to quickly supply a material volume of new gas to the market makes it particularly attractive. If the wells deliver at their target production rate, they will initially increase Central's gas production capacity by circa 40%.

Health, Safety and Environment

Central recorded no reportable safety incidents in the March quarter and the Company's TRIFR (Total Recordable Injury Frequency Rate) at the end of the quarter was nil.

Corporate

CASH POSITION

Cash balances were \$19.5m at the end of the quarter, lower than the \$29.4m at the end of December, as a result of the \$10.9m investment in the acquisition of interests in exploration permits in the Otway and Cooper Basins, and related costs.

Operationally, there were positive net operating cash inflows for the quarter of \$2.0 million after exploration costs and net interest costs. Key components of operating cash flow included:

- Cash receipts of \$11.8m from customers, consistent with the prior quarter;
- Cash production, transportation and corporate costs of \$7.9 million including costs associated with advancing the conditional sale of two Amadeus Basin exploration permits;
- Exploration and appraisal related expenditures of \$1.9m include \$1.1m site preparation and procurement costs for the new Palm Valley wells; and
- Net interest receipts of \$0.16m. The scheduled \$0.7m quarterly loan interest payment was capitalised into the loan balance.

There was \$0.9m of sustaining capital expenditure during the quarter and \$0.1m was incurred acquiring shares at an average price of 6.3 cps under the share buy-back scheme.

Net debt at 31 March was \$5.2m.

Fees, salaries and superannuation contributions paid to directors, including the CEO and Managing Director, during the quarter amount to \$0.21 million as disclosed at item 6.1 of the Appendix 5B.

The statement of cash flows for the quarter and financial year to date are attached to this report as Appendix 5B.

INCREASED LOAN FACILITY

In April, Central secured an increase to its existing loan facility to provide access of up to \$15 million, available for drawdown through to 31 December 2026. Any funds drawn under the increased facility will be repayable in equal quarterly instalments from March 2027 to December 2029. Interest charges and other terms are as per Central's existing loan facility, and the loan drawdowns can be repaid early without penalty.

SHARE BUY-BACK

Central acquired 1,385,630 shares in January 2026, with a total of 2,185,130 shares purchased to date under the share buy-back (0.3% of the total starting issued capital) at an average price of 6.3 cps. Central can buy-back up to 10% of its issued capital over a 12 month period. The ability to purchase shares on market is subject to factors such as prevailing share price, liquidity and other trading and regulatory constraints.

ISSUED CAPITAL

At the end of the quarter there were 750,578,825 ordinary shares on issue after the cancellation of 1,385,630 shares acquired pursuant to the on-market share buy-back program.

Notes:

¹ As announced on 19 December 2025, Central provided notice of its withdrawal from the EP82 Joint Venture with Santos.

² As announced on 27 January 2026, Central completed the acquisition of interests in exploration permits in the onshore Otway Basin (PEP 169) from ADZ Energy (Victoria) Pty Ltd and Cooper Basin (PRLs 50 - 59, 61, 63, 65 - 72, 74, 75, 124, 248, and PEL 677) from Cordillo Energy Pty Ltd (both subsidiaries of ADZ Energy Pty Ltd). Central is progressing the approval and registration process to have legal interests in these permits transferred.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
