

ASX: OCN

Transformative Acquisition - Serra Negra Project, Brazil

Carbonatite-Hosted REE Project Strategically Located In Tier 1 District

April 2026

ersonal use only

IMPORTANT INFORMATION AND DISCLAIMERS

The following notice and disclaimers applies to this investor presentation ("Presentation") and investors are advised to read this carefully before reading or making any other use of this Presentation. This Presentation is dated 28 April 2026 and has been prepared by Oceana Metals Limited (ACN 654 593 290) (ASX:OCN) ("Oceana" or the "Company") and authorised for release by the Board of Directors of the Company in connection with the Company's proposed:

- acquisition of 100% of the shares in Songeo Mineração S.A. which holds a 100% interest in the Serra Negra Project in Minas Gerais, Brazil ("Acquisition"; and
- equity raising of approximately \$20 million (with the ability to accept oversubscriptions at the Company's discretion) through the offer of new fully paid ordinary shares in the Company ("New Shares") to certain institutional, sophisticated and professional investors under a two-tranche, non-underwritten placement pursuant to section 708 of the *Corporations Act 2001* (Cth) ("Corporations Act"), with the second tranche of the placement being subject to shareholder approval ("Placement"). The Lead Manager and Bookrunner to the Placement is Canaccord Genuity (Australia) Limited ABN 19 075 071 466 (AFSL 234666), with Euroz Hartleys Limited acting as Co-Manager to the Placement.

This Presentation has been prepared by Oceana based on information from its own and third party sources and is not a disclosure document. No party other than the Company has authorised or caused the issue, lodgement, submission, dispatch or provision of this presentation, or takes any responsibility for, or makes or purports to make any statements, representations or undertakings in this presentation. Except for any liability that cannot be excluded by law, the Company and its related bodies corporate, directors, employees, servants, advisers and agents disclaim and accept no responsibility or liability for any expenses, losses, damages or costs incurred by you relating in any way to this presentation including, without limitation, the information contained in or provided in connection with it, any errors or omissions from it however caused, lack of accuracy, completeness, currency or reliability or you or any other person placing any reliance on this presentation, its accuracy, completeness, currency or reliability. This presentation is not a prospectus, disclosure document or other offering document under Australian law or under any other law. It is provided for information purposes and is not an invitation nor offer of shares or recommendation for subscription, purchase or sale in any jurisdiction. This presentation does not purport to contain all the information that a prospective investor may require in connection with any potential investment in the Company. Each recipient must make its own independent assessment of the Company before acquiring any shares in the Company.

This presentation may not be released to US wire services or distributed in the United States. The distribution of this presentation in the United States and elsewhere outside Australia may be restricted by law. Persons who come into possession of this presentation should observe any such restrictions as any non-compliance could contravene applicable securities laws.

This document contains forward looking statements concerning the Company. Forward-looking statements are not statements of historical fact, and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. Forward looking statements in this document are based on the Company's beliefs, opinions and estimates of the Company as of the dates the forward-looking statements are made, and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments. Although management believes that the assumptions made by the Company and the expectations represented by such information are reasonable, there can be no assurance that the forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any anticipated future results, performance or achievements expressed or implied by such forward-looking information. Such factors include, among others, the actual market price of commodities, the actual results of future exploration, changes in project parameters as plans continue to be evaluated, as well as those factors disclosed in the Company's publicly filed documents. Readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws. No representation, warranty or undertaking, express or implied, is given or made by the Company that the occurrence of the events expressed or implied in any forward-looking statements in this presentation will actually occur.

The information in this Presentation that relates to Exploration Results at the Serra Negra Project to be acquired pursuant to the Acquisition is extracted from the Company's announcement dated 28 April 2026 and titled "Oceana acquires global-scale rare earths project in Brazil", a copy of which is available on the Company's website. The Company confirms that it is not aware of any new information or data that materially affects the information contained in the original market announcement referred to in this Presentation. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

SERRA NEGRA INVESTMENT HIGHLIGHTS

GRADE

SIGNIFICANT RARE EARTH ELEMENT (REE) MINERALISATION IDENTIFIED, WITH DEMONSTRATED POTENTIAL FOR GRADE AND WIDTHS

SCALE

DISTRICT-SCALE CARBONATITE COMPLEX (10KM DIAMETER)

ADDRESS

LOCATED IN TIER 1 MINING JURISDICTION IN THE HEART OF BRAZIL'S MINAS GERAIS STATE

TEAM

HIGHLY SUCCESSFUL AND CREDENTIALLED BOARD AND MANAGEMENT TEAM, RESPONSIBLE FOR ESTABLISHING BELLEVUE GOLD (ASX 200), FIREFLY METALS (ASX 300) AND ANDEAN SILVER

TEAM WITH A PROVEN TRACK RECORD

Our Backers

Board of Directors

Maddison Cramer
Joint Company Secretary

Alexandra Hughes
Joint Company Secretary

Steve Parsons

Corporate Consultant & Major Shareholder

- Founder and Managing Director of ASX300 **FireFly Metals** (ASX | TSX: FFM)
- Founder and former Managing Director of ASX200 **Bellevue Gold** (ASX:BGL) & **Gryphon Minerals** (ASX200)
- Founding consultant of **Andean Silver** (ASX:ASL) and **Alicanto Minerals** (ASX:AQI)

Michael Naylor

Corporate Consultant & Major Shareholder

- Founder and Executive Director of ASX300 **FireFly Metals** (ASX | TSX: FFM)
- Founder and former Executive Director of ASX200 **Bellevue Gold** (ASX:BGL)
- Founding consultant of **Andean Silver** (ASX:ASL) and **Alicanto Minerals** (ASX:AQI)

Mick Wilson

Managing Director (Geologist – Economist)

- Listed and managed several ASX listed companies
- 28-year career in roles including Technical, Executive and Managing Director
- NSW Explorer of the Year 2016 –Team Lead
- Mr Wilson is a NED at **Midas Minerals Ltd** (ASX:MM1) and **Bellavista Resources Ltd** (ASX:BVR)

Russell Curtin

Non-Executive Chair (Finance – Accountant)

- Former Partner at Ernst & Young
- Over 30 years of experience in the resources sector
- His extensive experience spans various multinational public and private companies
- Mr Curtin is a NED of **Alicanto Minerals** (ASX:AQI)

Hamish Halliday

Non-Executive Director (Corporate – Geologist)

- Founder and Chair of Advisory Committee for **Critica Limited** (ASX:CRI), developing Australia's largest clay-hosted rare earth deposit
- Mr Halliday has been involved in the discovery and funding of multiple large-scale mineral projects for over 25 years

Rodrigo Roso

Non-Executive Director Elect (Lawyer)

- Brazilian lawyer with over 20 years legal experience
- Specialises in project development, M&A, and corporate finance
- Played a pivotal role in the execution of projects exceeding \$35 billion in CAPEX, contributing to the growth and success of major mining enterprises

Technical Advisor

SERRA NEGRA PROJECT HIGHLIGHTS

Carbonatite-hosted REE + Niobium systems are scalable, and historically underpin world-class mines

BRAZIL

MINAS GERAIS

SERRA NEGRA PROJECT

PATROCÍNIO

ARAXÁ

BELO HORIZONTE

Tier-1 Carbonatite Complex

10km diameter intrusive complex, largest known carbonatite in the district

Comparable geology to proven Brazilian analogues

Same district as the World-class Araxa, Catalao Carbonatite Complexes (ASX:SGQ, CBMM, Mosaic, CMOC)

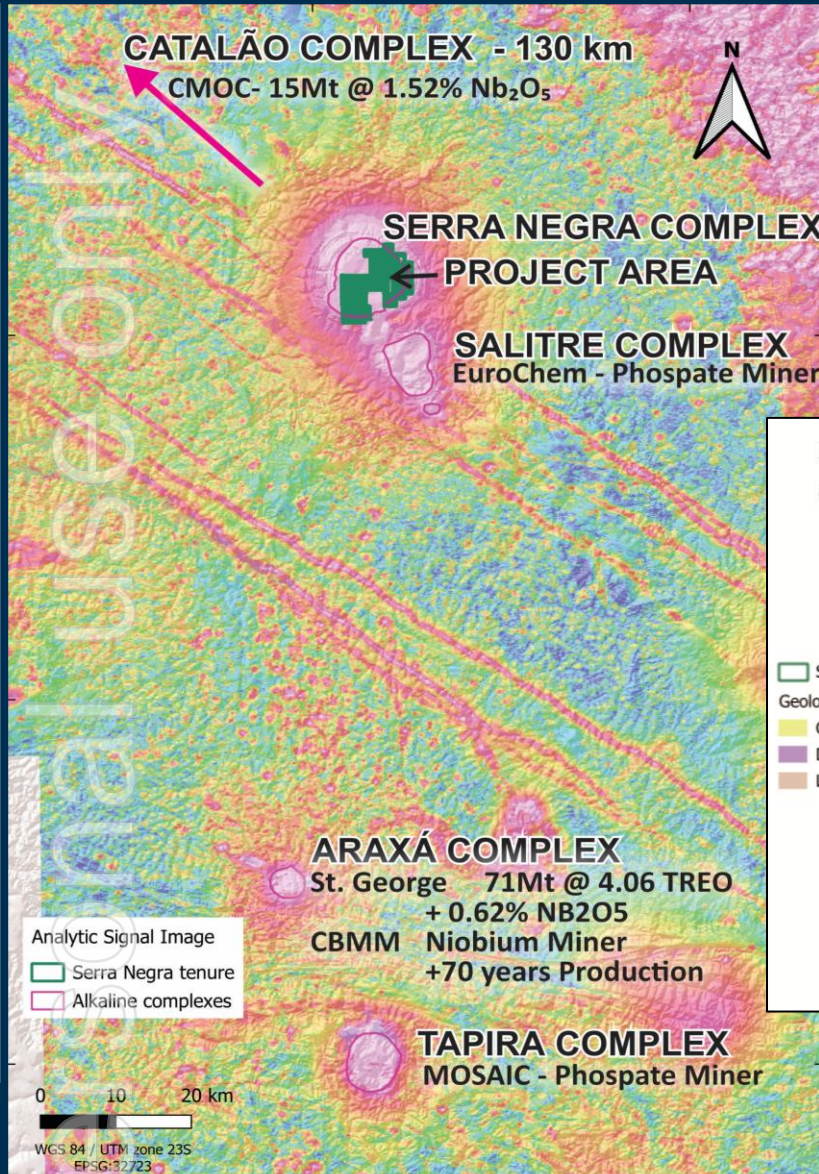

Strategically located to align with Western supply chains

Patrocínio within 20km – rail, road access, power, water, workforce and services

Brazil emerging as a global hub for the REE Industry

Minas Gerais State actively supporting new entrants and established critical mineral businesses

SERRA NEGRA One of Brazil's Largest Carbonatite Systems

Alto Paranaíba Igneous Province (APIP)

- One of the world's most concentrated clusters of carbonatite complexes
- The **Serra Negra Complex is the largest and least-studied** alkaline-carbonatite complex in the APIP
- ~10 km in diameter; **held in private hands for over 10 years**

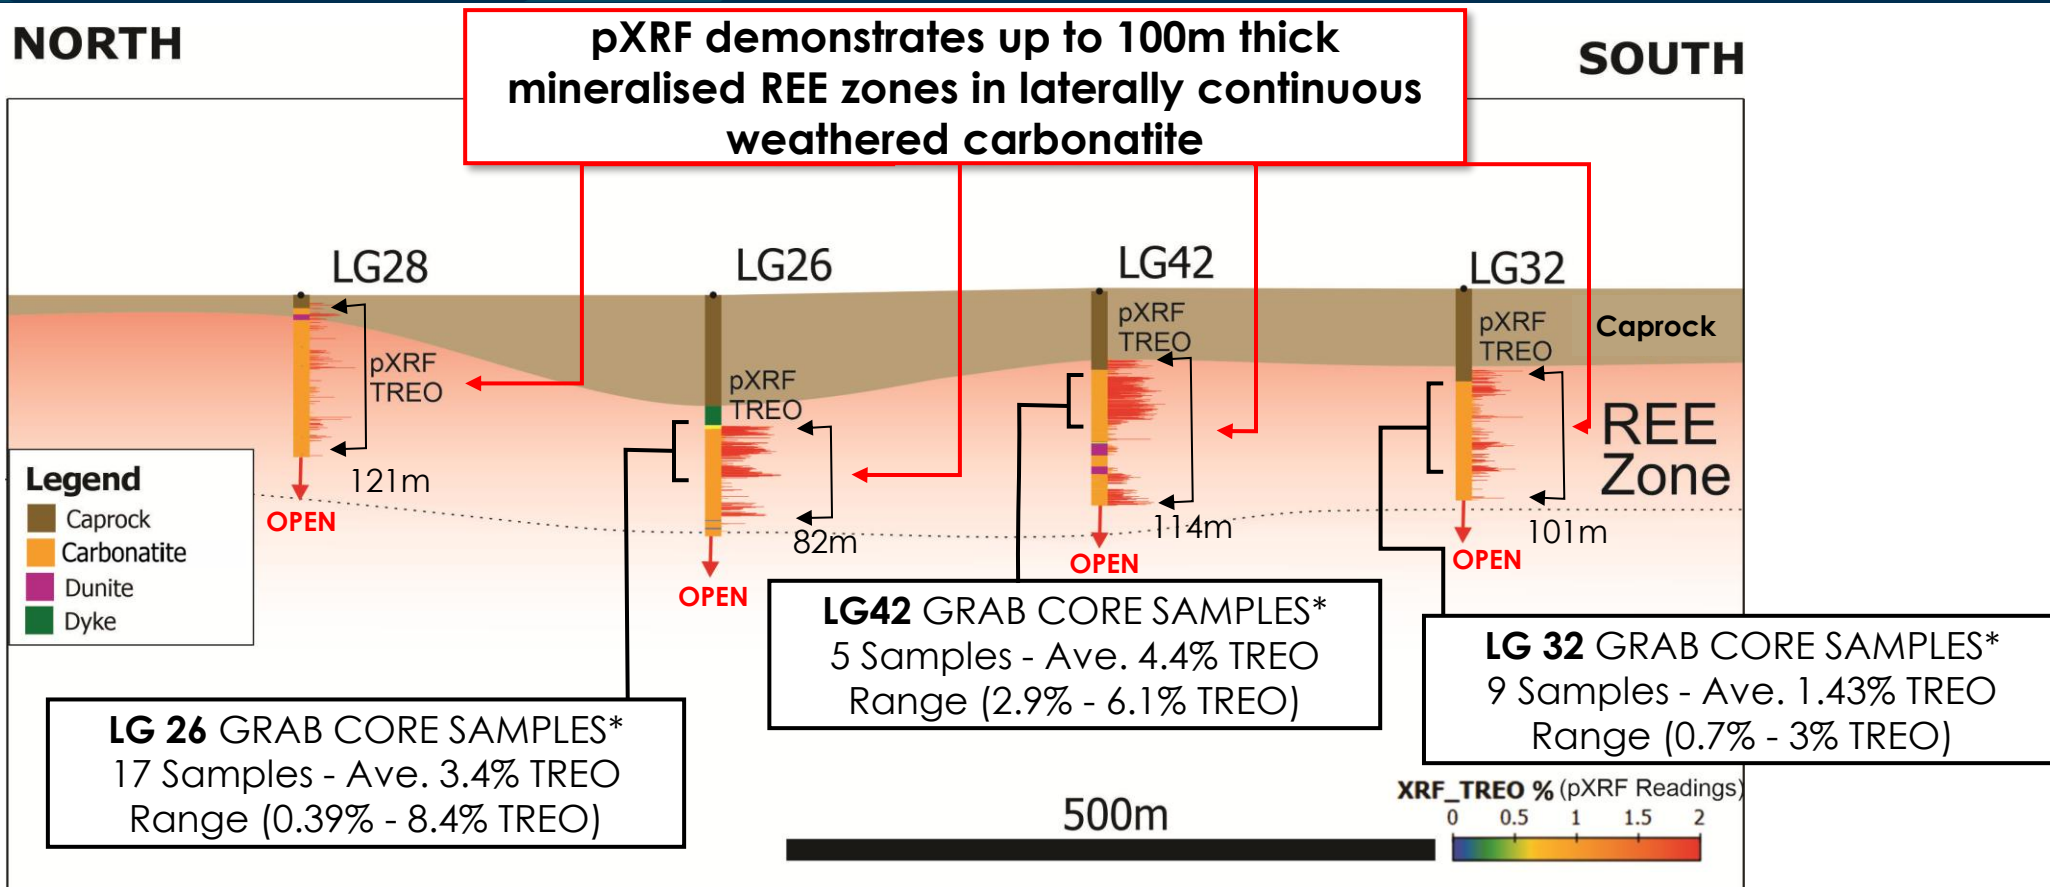

Significantly larger project area than neighbouring carbonatite systems, incl Araxá (CBMM / SGQ): ~4-5 km diameter

Regional view showing the location of the Serra Negra Project relative to other alkaline-carbonatite complexes within the Alto Paranaíba Igneous Province (APIP). An inset regional comparison illustrates the relative physical scale of the Serra Negra carbonatite complex compared to the Araxá complex. Refer to slide 21 for sources.

SERRA NEGRA Confirmed High-Grade REE Mineralisation

Independent sampling of historic drill core

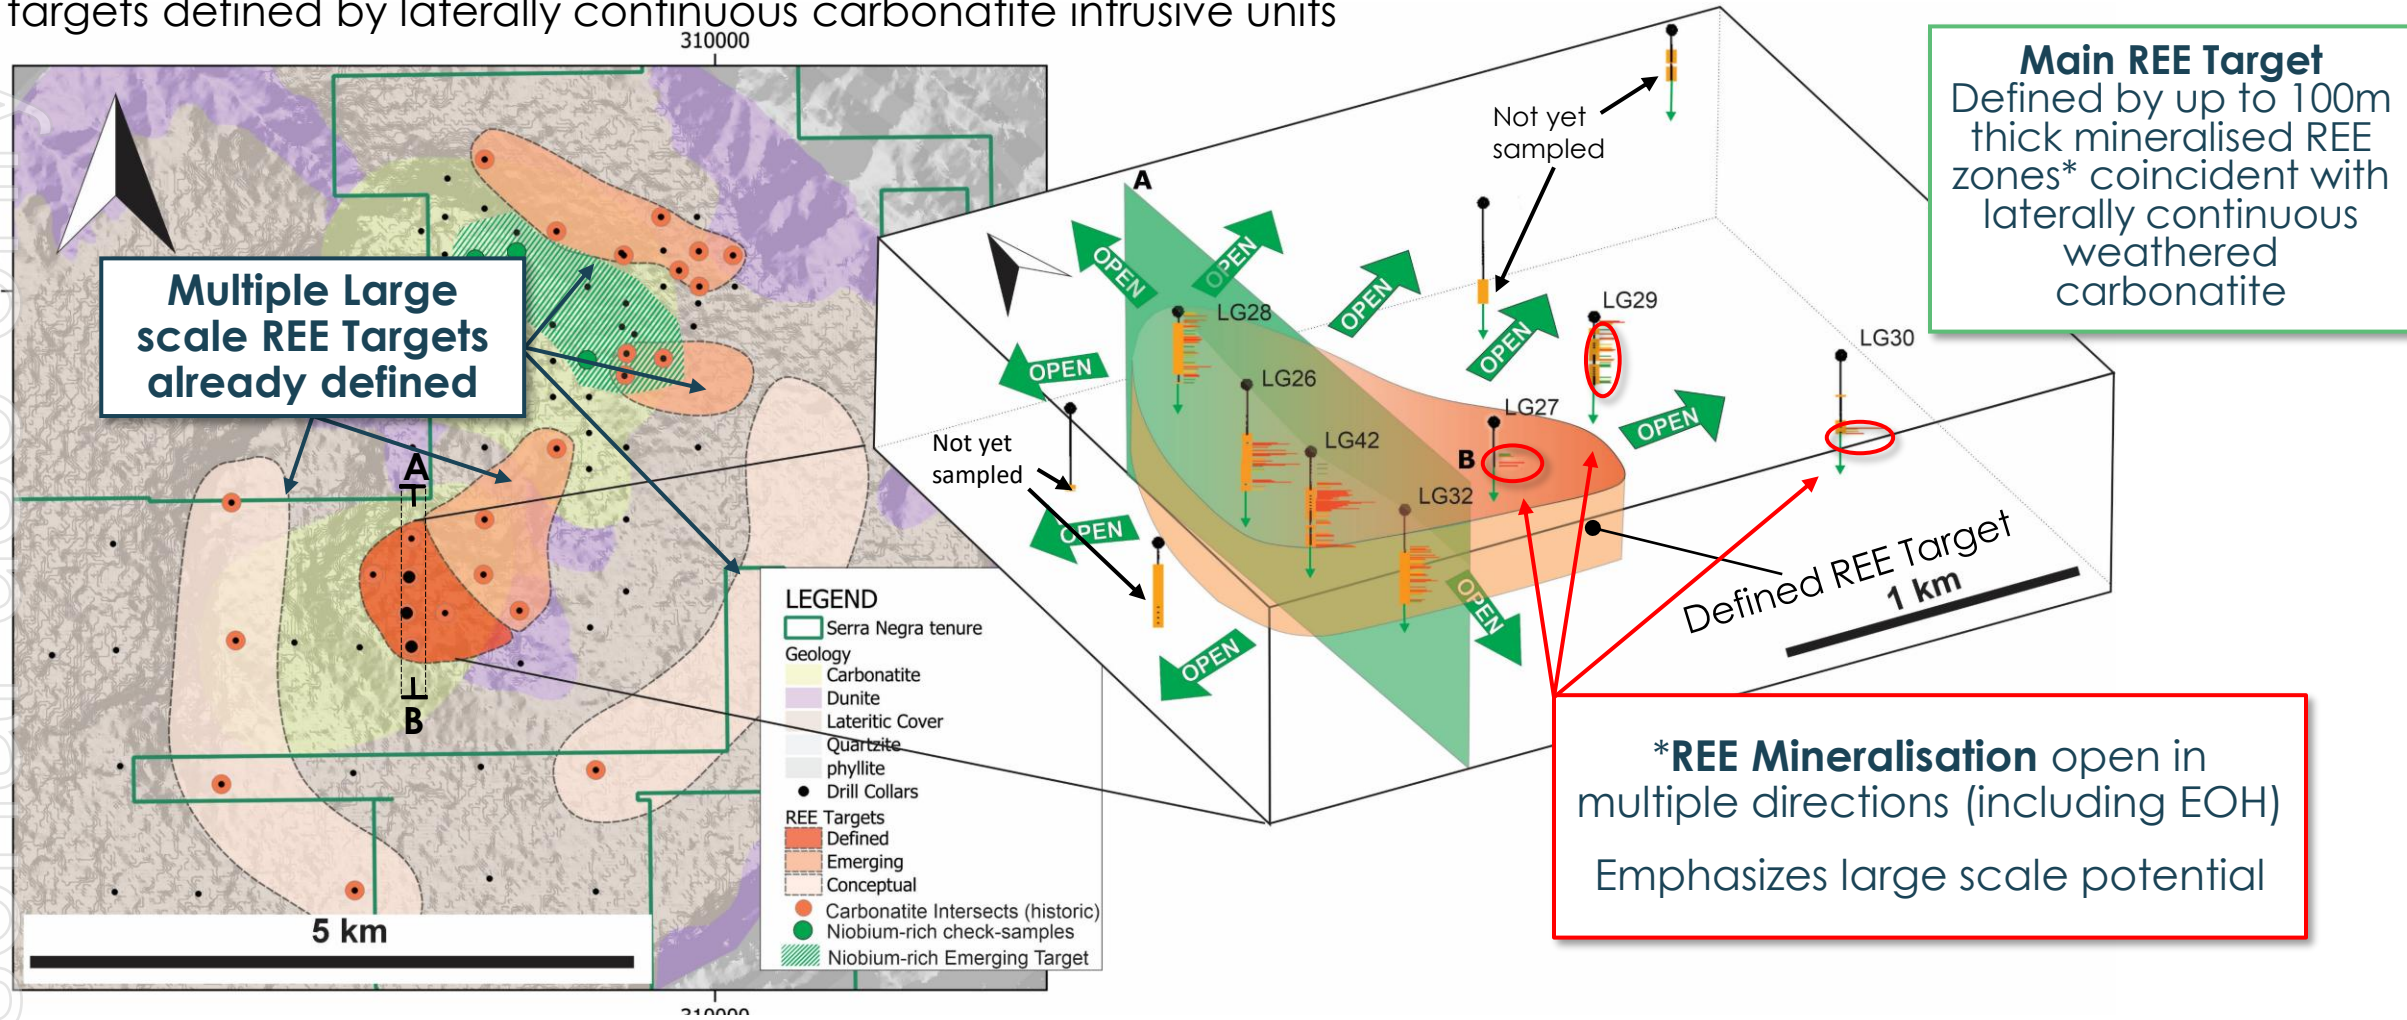

**Independent laboratory assays by ALS utilised four-acid digestion ICP-AES, with REE over-limit samples analysed by ICP-MS.*

N-S cross-section showing selected historical drill holes sampled as part of acquisition due diligence. Histograms represent downhole portable XRF (pXRF) responses for combined REE oxides ($CeO_2 + La_2O_3 + Nd_2O_3 + Pr_6O_{11}$), displayed on a logarithmic scale. Also shown are the locations and laboratory assay results of downhole grab samples collected from historical drill core during due diligence.

SERRA NEGRA District-Scale REE Target Footprint

REE targets defined by laterally continuous carbonatite intrusive units

District-scale REE target footprint showing main and conceptual REE targets. The 3D call-out provides a view of the Main Defined REE Target in relation to historical drill hole distribution. Histograms indicate downhole pXRF readings ($CeO_2 + La_2O_3 + Nd_2O_3 + Pr_6O_{11}$), displayed on a logarithmic scale, for historical drill holes analysed during due diligence; holes without downhole bars are yet to be sampled. Black dots represent historical drill holes. Carbonatite intervals are interpreted from historical lithological logs. The defined target is based on carbonatite intersections analysed for REE, whereas emerging and conceptual target areas have not yet been analysed for REE and therefore carry a lower level of confidence.

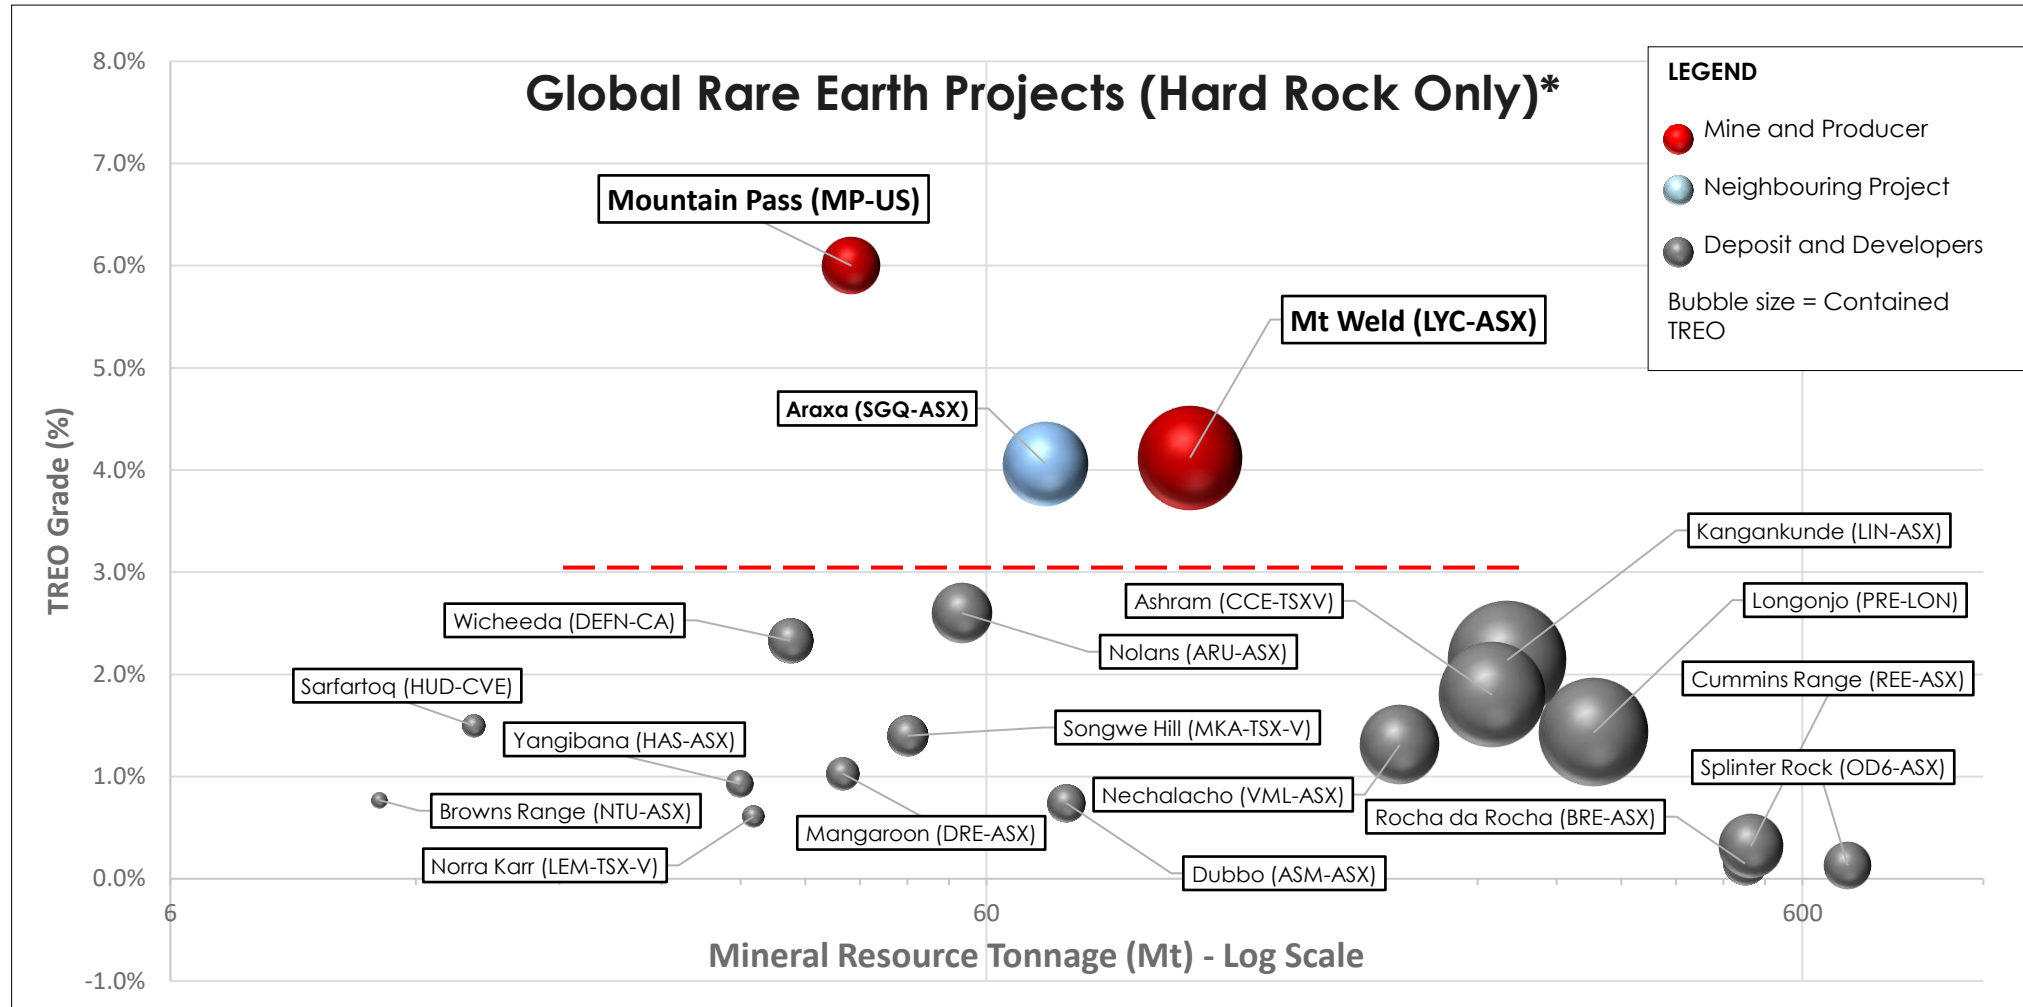

SERRA NEGRA Targeting REE Grade and Scale

State of Play

- Limited western aligned hard-rock REE production
- Processing and separation remain a bottleneck
- Geopolitics is accelerating, but not yet solving, the gap

Serra Negra Project

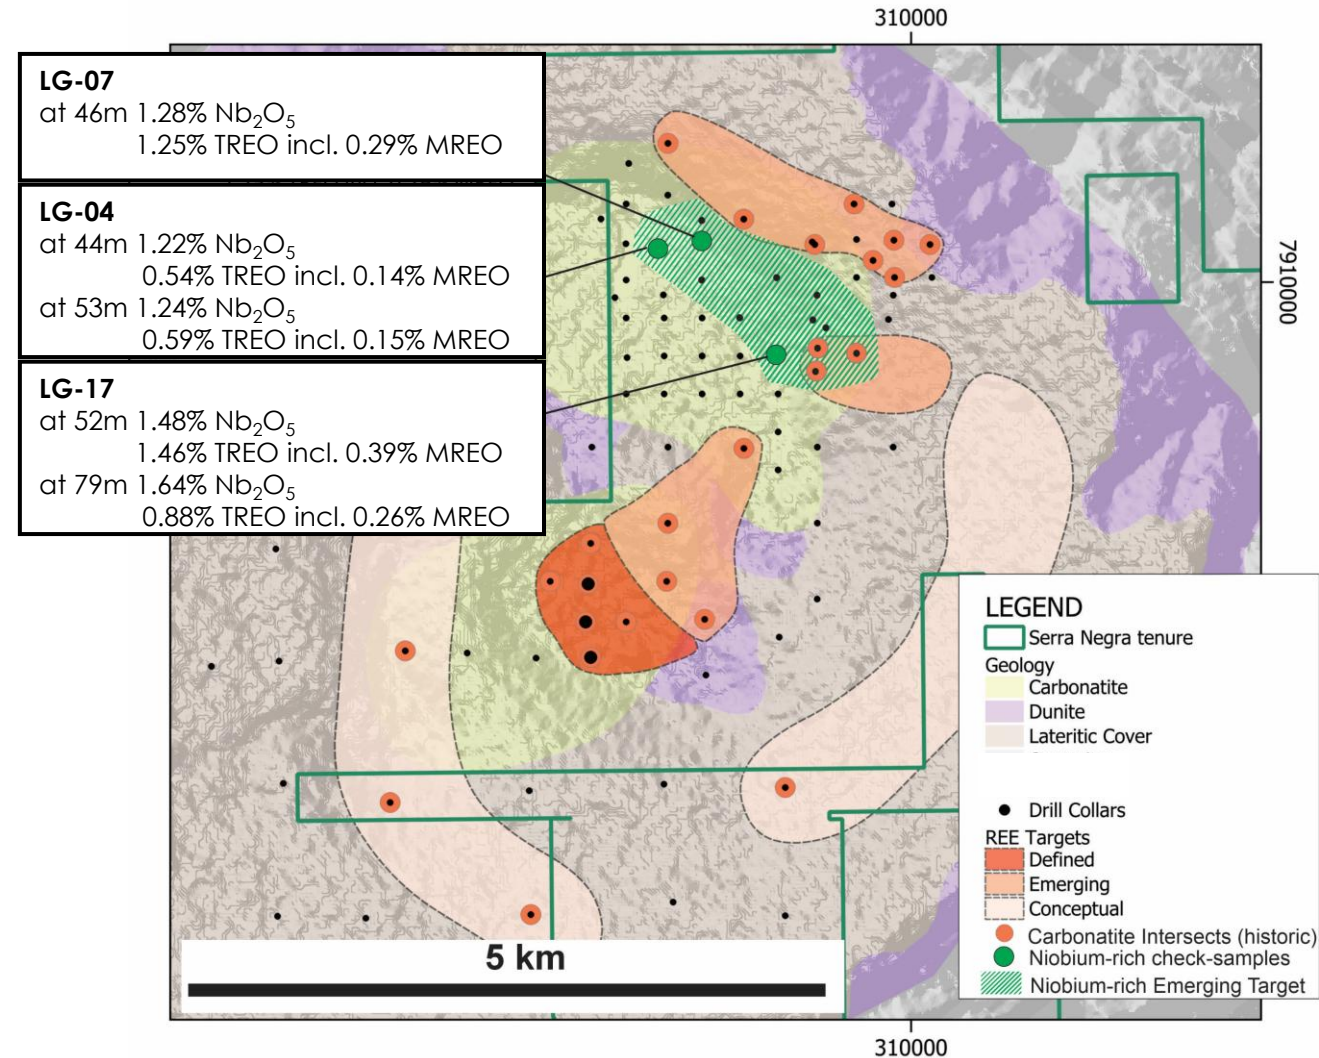

- ✓ Evidence of high grade REE in sampling
- ✓ Evidence for global-scale: 10km diameter Carbonatite
- ✓ Tier 1 address: Minas Gerais - Brazil

Note: A mineral resource has not been reported for the Serra Negra Project. The major global deposits referred to in this slide are for general information purposes and there is no guarantee that the Company will successfully report a mineral resource for the Serra Negra Project

SERRA NEGRA REE Project with Emerging Niobium Target

- An emerging niobium (Nb_2O_5) target has been identified
 - based on due diligence sampling, with independent laboratory assays
- Niobium mineralisation occurs in carbonatite units adjacent to the main REE zones
- Comparable to Brazil's world-class niobium districts in the Alto Paranaíba Igneous Province (APIP)
- Potential for large-scale, bulk-tonnage niobium upside, with limited historical focus

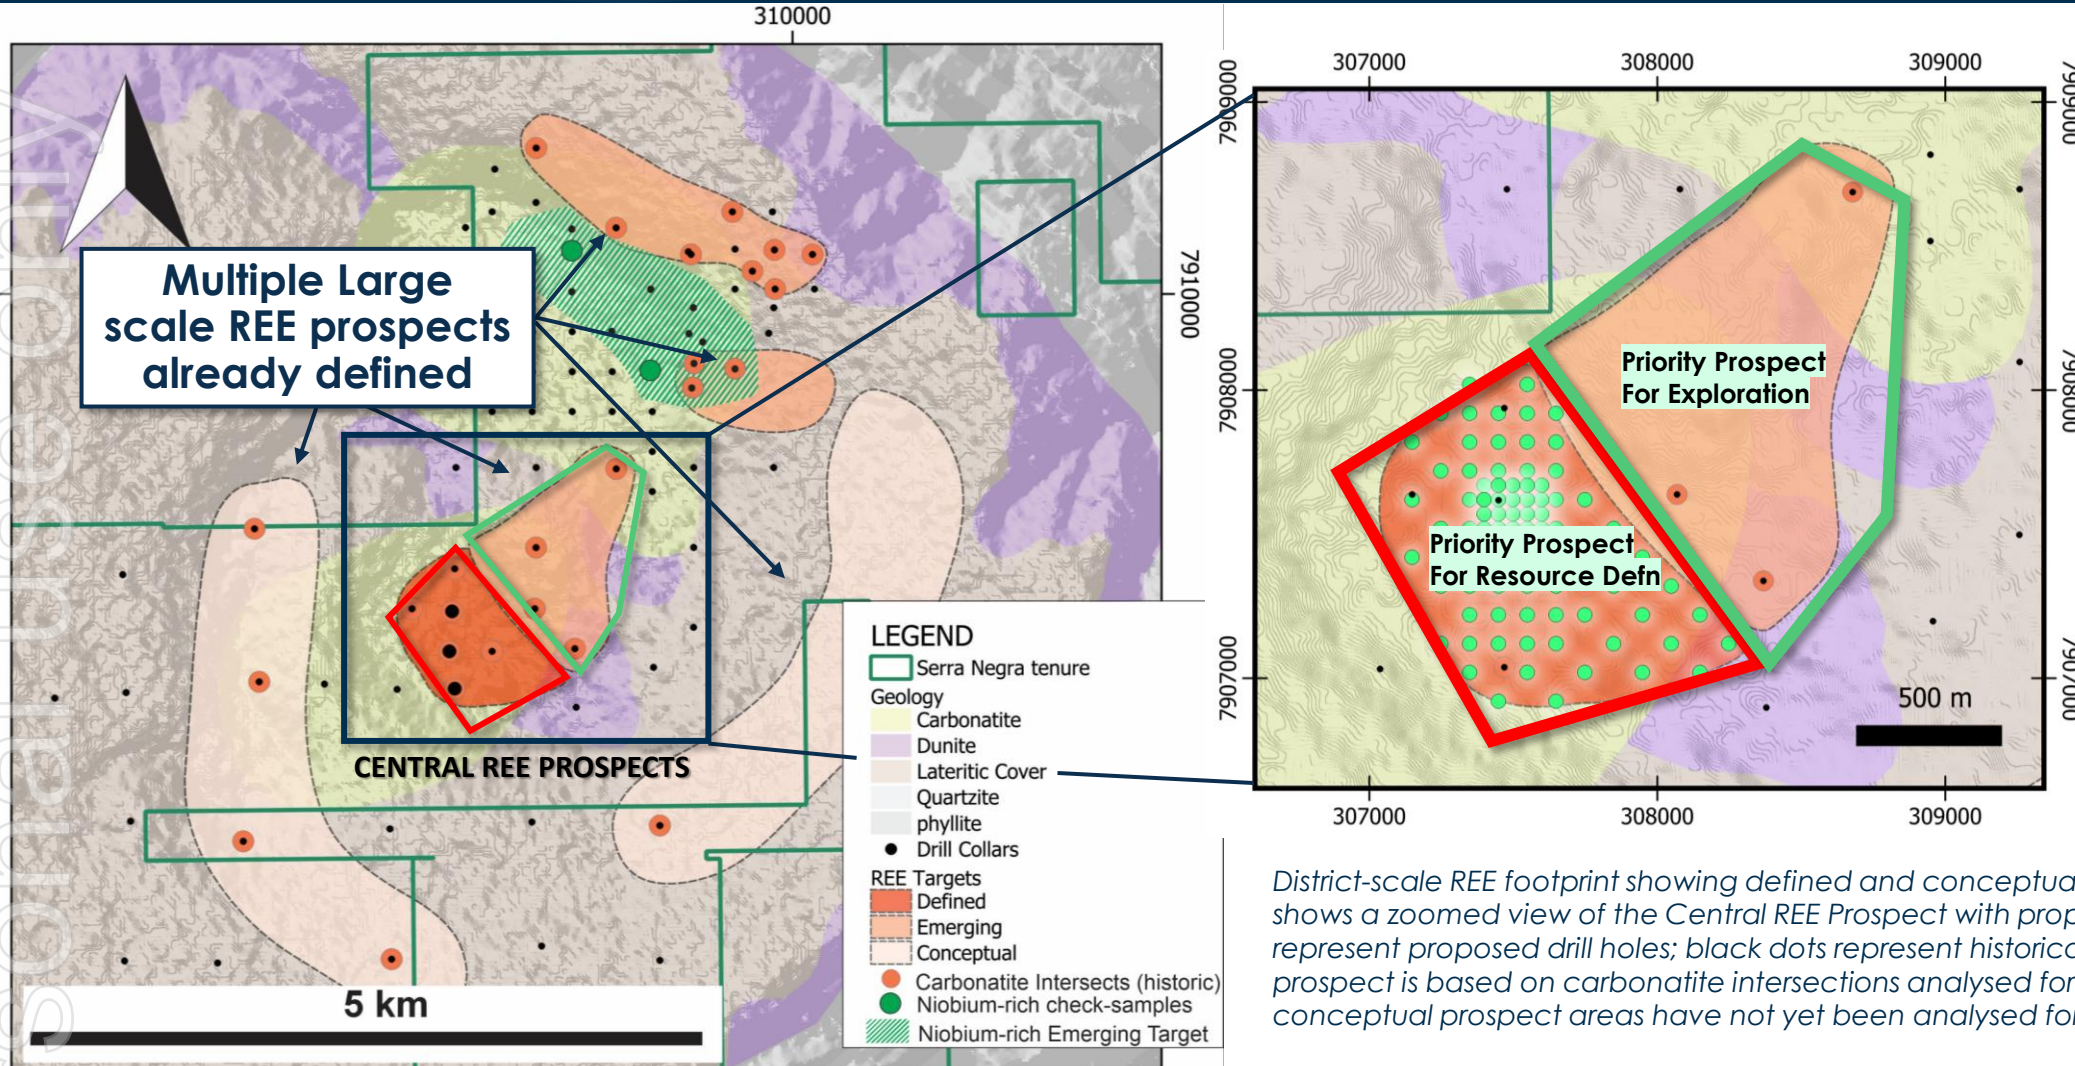

Serra Negra Acquisition Terms

- Oceana to acquire 100% of the Brazilian entity which holds 100% of the Serra Negra Project
- The Company has agreed to pay US\$2.95m cash plus 20m OCN Shares at a deemed issue price of A\$0.36 per share, upon completion
- A milestone payment of US\$750,000 Cash upon announcing an initial JORC resource at Serra Negra
- A milestone payment of US\$1.5m Cash upon delineation and announcement of a JORC Resource of a minimum 100Mt @ 4% TREO or equivalent (equivalent for these purposes means a mineral resource with 4Mt contained TREO and/or additional co-products or by-products that are economically extractable with the REE)
- The vendors will be granted a 2.5% net smelter royalty on all payable commodities extracted from the permits, with Oceana retaining a right of first refusal on all or part of any future sale of the Royalty to third parties

The Serra Negra acquisition is subject to a number of Conditions Precedent (refer to the Company's announcement dated 28 April 2026 and titled 'Oceana acquires global-scale rare earths project in Brazil' for further details of the conditions precedent).

SERRA NEGRA PROJECT Initial Exploration Plan

District-scale REE footprint showing defined and conceptual REE prospects. The call-out shows a zoomed view of the Central REE Prospect with proposed drilling. Green dots represent proposed drill holes; black dots represent historical drill holes. The defined prospect is based on carbonatite intersections analysed for REE, whereas emerging and conceptual prospect areas have not yet been analysed for REE.

Accelerated drilling to establish Initial REE resource, rapid growth and additional REE and Nb discoveries

	Q2			Q3			Q4			Q1	Q2

Confirmation Sampling	█	█	█								
Drilling		█	█	█	█	█	█	█	█	█	█
Resource Updates								█	█		█
Geophysics			█			█			█		
Metallurgy Sampling				█	█	█	█	█	█		
Metallurgy Studies									█	█	

Confirmation sampling

Re-logging, sampling and assaying historic core to validate results and establish high-confidence geological and geochemical controls (~8,000m)

Drilling

Targeted drilling to define the scale and continuity of the central REE target and test extensions and priority exploration targets (up to ~20,000m drilling)

Geophysics

District-scale surveys to refine intrusive architecture, identify controls on mineralisation and generate new REE targets.

Metallurgy

Early-stage metallurgical test work to assess processing pathways and progressively de-risk development.

Resource Estimations and Upgrades

Integrate datasets to support an initial mineral resource estimate; future resource upgrades and higher resource categorisation*

**subject to exploration success and data density*

Near-term re-assaying → drilling-led growth → district-scale expansion

Concluding Remarks

- **Extensive News Flow** – Assaying historic core, initial drill program, extensive geophysics aimed at unlocking district scale carbonatite
- Focused on **delivering a Tier 1 resource base** – aggressive drill programs, detailed metallurgy, new discoveries
- Serra Negra – Located in the **heart of a district fast becoming the new hub** for future western REE supply
 - Ability to leverage off Brazil's stable regulatory and investment environment
 - New government initiatives and funding for new and existing players to the REE space
- **Strong backing from industry leaders** in the junior resources space

Near-term re-assaying → drilling-led growth → district-scale expansion

ACN 654 593 290

Stable Regulatory Framework

- The Mining Code (1967) and recent reforms (creation of ANM in 2018) provide a stable and predictable environment with modernised oversight.
- Brazil officially launched a long-term mining policy overhaul in January 2026, including a public consultation for the updated National Mining Plan 2050, expanding the focus on rare earths and other critical minerals.
- ESG principles and clear permitting provide legal certainty and equal treatment for foreign and local investors.

Strong Government Support & Funding

- Finep–BNDES Strategic Minerals Call: 124 proposals, US\$1.5B investment potential.
- Nearly US\$1B in planned federal funding for REE mining, refining & magnet materials.
- Incentives include financial guarantees, tax-exempt debentures, and local value-add requirements.

Investment Climate

- Brazil attracted US\$71 billion in FDI in 2024, ranking Top 5 globally.
- As of November 2025, Brazil recorded US\$9.8B net FDI inflows, with 12-month inflows reaching US\$84.3B (~3.76% of GDP), showing continued investment momentum.
- Mining accounts for ~4% of GDP and 40% of Brazil's trade surplus.

Infrastructure & Energy

- Brazil boasts an 88% clean energy matrix, extensive rail and port networks, and improved logistics, which reduce operational costs for mining companies.

Minas Gerais – A Tier-One Mining Jurisdiction

- Minas Gerais generated 40% of national mining revenue in Q1 2025 (R\$29.8B).
- Leading destination for mining investment, with US\$16.5B planned through to 2029.

Appendix 1 – Equity Raising Overview

Equity Raising Overview

Offer Size and Structure

- Two-tranche institutional placement to raise A\$20 million (before costs) ("Placement" or "Offer")
- The Placement will comprise the issue of up to 55,555,556 new fully paid ordinary shares ("New Shares"):
 - Tranche 1 to raise approximately A\$7.4 million utilising the Company's existing placement capacity under ASX Listing Rules 7.1 and 7.1A ("Tranche 1")
 - Tranche 2 to raise approximately A\$12.6 million subject to shareholder approval at an Extraordinary General Meeting ("EGM") expected to be held in or around July 2026 ("Tranche 2")

Offer Price

- Fixed Offer Price of A\$0.36 per New Share, representing a discount of 17.2% to the last closing price of A\$0.435 per Share on 12 February 2026 (the Company's shares have remained in a voluntary suspension since 12 February 2026 following receipt of a price and volume query from the ASX)

Director Participation

- Directors have committed to participate in the Offer for A\$550,000 of the Placement, subject to shareholder approval

Ranking

- New Shares issued under the Placement will rank pari passu with existing fully paid ordinary shares on issue

Broker Syndicate

- Canaccord Genuity (Australia) Limited is acting a Lead Manager and Bookrunner to the Placement. Euroz Hartleys is acting as Co-Manager to the Placement.

Enterprise Value ^{2,3,4}	A\$M	70.5	70.7

1. As at 27 April 2026.

2. A\$20 million raised (not including costs) under the Placement at an issue price of A\$0.36 per New Share.

3. Includes US\$2.95 million in upfront cash consideration to be paid to the vendors upon completion.

4. Assumes 20 million in upfront consideration shares at a deemed issue price of A\$0.36 are issued to the vendors and 1,944,444 broker shares are issued to Canaccord in lieu of fees.

Indicative Equity Raising Timetable

Item	Date
Announcement of acquisition and capital raising	28 April 2026
Settlement of Tranche 1 Placement	4 May 2026
Issue of and application for Quotation for New Shares issued under Tranche 1	5 May 2026
Despatch notice of general meeting	Late May 2026
Extraordinary general meeting to approve transaction	Early July 2026
Settlement of Tranche 2 Placement	Early July 2026

The dates in this announcement are indicative only and the Company reserves the right to vary the timetable at any time before the issue of the relevant securities without notice, subject to the ASX Listing Rules and the Corporations Act and other applicable laws. The commencement of trading and quotation of New Shares is subject to ASX confirmation. The Company gives no assurance that such quotation will be granted. Nothing contained in this announcement constitutes investment, legal, tax or other advice. Investors should seek appropriate professional advice before making any investment decision. All amounts are in Australian dollars unless otherwise indicated.
