

## March 2026 Quarterly Activities Report

Ardea Resources (ASX: ARL, **Ardea** or the **Company**) is pleased to report on the key activities and progress made during the March 2026 Quarter, including updates in relation to the Kalgoorlie Nickel Project (**KNP**) – Goongarrie Hub (the **Project**) Definitive Feasibility Study (**DFS**).

### Ardea Corporate Activities:

- **Export Finance Australia (EFA) and the Export-Import Bank of the United States (EXIM) provided Kalgoorlie Nickel Pty Ltd (KNPL) with coordinated, conditional and non-binding support for the development of the Goongarrie Hub Project<sup>1</sup>, with a combined total of approximately A\$1 Billion (equivalent).**
- **The KNP-Goongarrie Hub was documented in the Joint Fact Sheet for Japan-U.S. Critical Minerals Project Cooperation, released in March 2026 by Japan's Ministry of Economy, Trade and Industry (METI) and the Ministry of Foreign Affairs of Japan (MOFA)<sup>2</sup>.**
- **Via their joint venture company GH Nickel Pty Ltd, Sumitomo Metal Mining Co., Ltd (SMM) and Mitsubishi Corporation (MC) have been issued the second tranche of interest in the incorporated joint venture vehicle for the Project. This second tranche interest earned the Consortium an aggregate 35% holding in KNPL<sup>3</sup>.**
- **Ardea completed a successful A\$5 million (before costs) placement to sophisticated and professional investors (Placement) in March 2026<sup>4</sup>.**
- **As of 31 March 2026, Ardea remains in a strong financial position with \$19.75M cash on hand and no debt. The current DFS is being solely funded by the Japanese Consortium (JC) to A\$98.5M<sup>5</sup>.**
- **Ardea attended several Investor Relations events and activities throughout the Quarter. Managing Director and CEO Andrew Penkethman joined a delegation to Canada and USA of Australian mining and exploration companies, including Minister for Mines and Petroleum of Western Australia, the Hon David Michael, Events attended were the Prospectors and Developers Association of Canada (PDAC) Convention held in Toronto in early March, followed by investor and government meetings in New York and Washington DC.**

### Feasibility Work Programs for the Kalgoorlie Nickel Project – Goongarrie Hub:

- **Zero lost time injuries in the period, with the health and safety of the Ardea and Project teams the top priority.**
- **KNPL's Lead Agency Status application for the Project lodged with the WA Department of Energy and Economic Diversification (DEED) in late 2025 remains pending.**
- **Progress continued on finalisation of the Mineral Resource Estimate (MRE) in support of the updated mining schedule optimisation and Ore Reserve.**
- **Hydrogeological water bore and test pumping continued, with suitable aquifers being quantified.**

<sup>1</sup> See Ardea ASX Announcement 5 February 2026

<sup>2</sup> See Ardea ASX Announcement 23 March 2026

<sup>3</sup> See Ardea ASX Announcement 31 March 2026

<sup>4</sup> See Ardea ASX Announcement 3 March 2026

<sup>5</sup> See Ardea ASX Announcement 8 December 2025

- **Additional draft baseline environmental survey reports continue to be reviewed and finalised with some additional Spring 2026 surveys required to be completed to refine environmental protection planning.**
- **Drilling for geotechnical site studies has been completed at proposed infrastructure locations with no material issues identified to date. The results are being used to inform ground improvement or foundation pad designs. Further assessment is still required across remaining infrastructure sites to confirm ground conditions and assess their suitability for final infrastructure placement.**
- **DFS metallurgical test work program results and interpretation are being finalised.**
- **Drafting and initial review of the DFS report chapters progressed.**

The DFS continued to advance through the Quarter, with several key plant design improvements. The Company is still targeting completion of the draft DFS report in the first half of CY2026, with the schedule subject to ongoing value engineering inputs and finalisation of remaining technical workstreams.

**Managing Director and CEO Andrew Penkethman commented:**

*“We maintained momentum across the Goongarrie Hub through the March Quarter, as the Project moves through the later stages of its Definitive Feasibility Study.*

*“The combination of substantial technical workstream progress, ongoing DFS report drafting and value engineering refinement, is intended to ensure that the DFS, when completed, supports the most robust development decisions for Ardea, the Consortium and KNPL.*

*“The inclusion of the Goongarrie Hub within the Japan–U.S. Critical Minerals Project Cooperation framework, alongside coordinated support from EFA and EXIM, highlights the Project’s strategic importance in building secure and resilient Critical Minerals supply chains.*

*“Through ongoing, and strong collaboration, across Ardea, KNPL and the Japanese Consortium, the Company will be well-placed to unlock long-term value from one of the world’s largest nickel-cobalt development assets.”*

Figure 1: Managing Director & CEO Andrew Penkethman (third from the right) attended the Prospectors and Developers Association of Canada (PDAC) 2026 in Toronto, along with Hon David Michael MLA, Minister for Mines and Petroleum; Goldfields-Esperance.

## 1. KALGOORLIE NICKEL PROJECT – GOONGARRIE HUB

KNPL is the incorporated joint venture company completing the DFS. KNPL is owned by Ardea and GH Nickel Pty Ltd (GHN), a joint venture between Sumitomo Metal Mining Co., Ltd and Mitsubishi Development Pty Ltd, a wholly owned Australian subsidiary of Mitsubishi Corporation – together the Japanese **Consortium**<sup>6</sup> (JC).

The Goongarrie Hub, 70km northwest of the City of Kalgoorlie-Boulder, hosts the premium ore feed within the broader KNP (Figure 2). Resources from the Goongarrie South and Big Four deposits are the initial 10-year development focus, later supplemented with the Goongarrie Hill, Highway and Siberia North nickel-cobalt laterite deposits. These deposits are planned to be the base load feed for a High-Pressure Acid Leach (**HPAL**) hydrometallurgical processing facility located at Goongarrie South.

The mineral resources at the Goongarrie Hub are predominantly the premium goethite style and extend continuously over 25 km of strike at Scotia Dam-Big Four-Goongarrie South-Goongarrie Hill, with a further strike length of 10 km (Figure 2) at Highway, located 30 km to the north. All key Goongarrie Hub mineral resources are located on granted mining leases and are managed by KNPL. The Consortium has now earned an initial 35% interest in KNPL and will receive a further 15% interest in KNPL on a positive Final Investment Decision (**FID**).

The KNP - Goongarrie Hub has ready access to high-quality infrastructure, with the Goldfields Highway, rail line, fibre optic cable, and power infrastructure passing through the Project area (Figures 2 and 3). The Goldfields Gas Transmission pipeline is located ~30km to the east and the Project has ready access to the ports of both Fremantle or Esperance by road or rail.

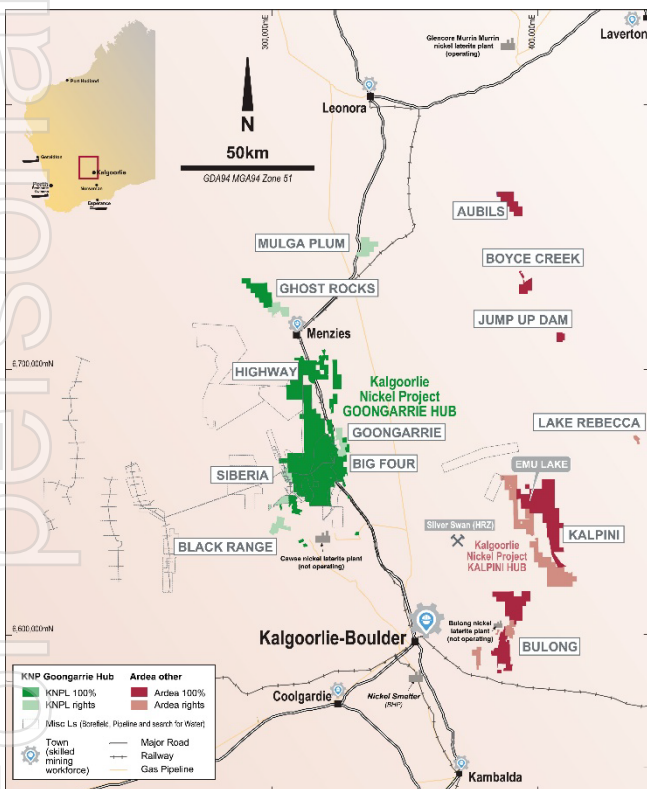

Figure 2: (Left) KNP location plan. Projection GDA94 Zone 51.

Figure 3: (Right) Aerial image at Ardea's Goongarrie Hub at Goongarrie South, looking south towards Kalgoorlie-Boulder, showing road and rail infrastructure within the granted mining leases upon which the resources are located.

Ardea is actively engaged with Federal and State agencies and relevant statutory authorities who aim to unlock Australia's vast potential as a major supplier of the Critical Minerals needed to decarbonise the global economy. The KNP meets the objectives of the Federal Government's Critical Minerals Strategy.

The Project will create a resilient and sustainable Critical Minerals supply chain, benefiting Australia, Japan, other key allies and the regions and communities in which the Company operates. The Project aligns with the Future Made in

<sup>6</sup> Ardea ASX Announcement 30 August 2024

Australia Community Benefit Principles required for the Company's participation in the Critical Mineral Production Tax Incentive (**CMPTI**) scheme.

Ardea's key focus remains on developing the KNP – Goongarrie Hub. Key activities undertaken during the March 2026 Quarter are outlined below.

## Occupational Health and Safety

Health and Safety highlights for the March 2026 Quarter include:

- Safety Performance: Zero Lost Time Injuries, Medical Treatment Injuries and Total Recordable Injuries were recorded in the Quarter.
- Nominated KNPL personnel completed the required Statutory assessments for Exploration Manager and Statutory Supervisor.
- Field inspections continued for consistent oversight and proactive risk management.
- Geofences were established across all KNPL and Ardea tenements, enabling automatic vehicle check-ins at key locations.
- Water drilling contractors and consultants, along with the water-flow testing contractor de-mobilised without incident in February 2026.

## Environment and Approvals

The majority of baseline environmental surveys have been completed with draft consultants' reports continuing to be reviewed and finalised. However, additional fieldwork will be required in Spring 2026 to, for example, cover previously unsurveyed 3<sup>rd</sup> party tenure that encroach upon proposed water supply pipelines and borefields. Targeted surveys will also be required in Spring 2026 to meet EPA technical guidance and support regulatory approvals.

The Approvals team continues to work closely with KNPL's relevant managers to refine the Project Footprint and Development Envelope as design information for mining, infrastructure layout and recent environmental survey findings progresses.

KNPL is planning to meet with the relevant Traditional Owners during the June 2026 quarter to present Project updates and meet with new prescribed body corporate Board Members. While all DFS heritage surveys have been completed, more remote ground disturbing works have required heritage monitors to accompany works as per the relevant heritage agreement, in order to drive mobilisation and personnel efficiencies.

KNPL continues to liaise with the Department of Energy and Economic Diversification (**DEED**) to progress its Lead Agency application. Ongoing discussions with DEED include planning for a multi-agency site visit to the Goongarrie Hub during H2 2026.

## Geology

Work carried out during the March 2026 Quarter focused on finalisation of the Mineral Resource models and estimates.

The Resource models for the Big Four/Scotia Dam, Goongarrie South, Goongarrie Hill, Highway and Siberia North deposits were completed, and used by KNPL's mining consultants to create updated mine plans, mining schedules and Ore Reserves.

## Ore Reserve

The 2023 Preliminary Feasibility Study (**PFS**)<sup>7</sup> defined an Ore Reserve of **194.1Mt at 0.70% Ni and 0.05% Co** for 1.36Mt contained nickel and 99kt contained cobalt (Appendix 1 - Table 2). Other Goongarrie Hub deposits (Ghost Rocks, Siberia South and Black Range) have not been included in the current Ore Reserve or DFS base case but provide potential to significantly extend the mine life.

<sup>7</sup> ASX Announcement 5 July 2023

Mining studies informing the Ore Reserve are currently being finalised.

### Hydrogeology & Geotechnical

Drilling on the Scorpion East hydrogeology program was completed and the rigs demobilised without incident. Three of six production bores were completed in December 2025 with the remainder completed early in the March 2026 Quarter.

Modelling work continued on the mine hydrogeological data. This data has informed mining studies also being advanced during the period.

A small number of geotechnical diamond drillholes were completed in the Quarter to obtain additional shallow near-surface information around locations of proposed infrastructure, and to further characterise geotechnical and hydrogeological conditions in areas that had not been previously drilled. Data from this program is being reviewed.

### Metallurgy

- The DFS planned testwork to confirm offered equipment solutions was finalised during the Quarter.
- Additional vendor testwork was scoped and quotations were received.
- Draft testwork reports have been reviewed, with the majority finalised during the Quarter.
- Testwork reports are being referenced and appended to the related draft DFS report chapters, with progress continuing.

### Process Plant

Process plant design and engineering work during the Quarter included:

- The Process Design Criteria (**PDC**) was completed and finalised for DFS purposes.
- DFS report writing progressed.
- Consulting engineers' DFS work was nearing completion in the Quarter.

### Non-Process Infrastructure (NPI)

Progress during the March 2026 Quarter included:

- Detailed review of the NPI capital cost estimate was completed, with value engineering opportunities identified.
- Reviews of the village construction strategy to support construction ramp-up and peak construction workforce requirements were undertaken and continue.
- Borefield drilling and test pumping, hydrogeological modelling and borefields engineering progressed.
- Gas supply and renewable energy integration engineering solution study is underway.

### Processing Research and Development (R&D)

The FY2026 R&D study is building on previous research programs focused on multi-element geo-metallurgical research to optimise plant feed to a multi-option plant and importantly to capture the significant change to the process flowsheet from a mixed hydroxide flowsheet in the 2023 PFS to a mixed sulphide flowsheet using hypersaline water in the current DFS.

There were key process areas tested and reviewed during the quarter, including factors affecting solubility constants, process kinetics, selective impurity removal of deleterious elements and value metal recovery which have been conducted throughout the Quarter.

R&D testwork and engineering studies progressed during the year in support of the DFS. Testwork outcomes were used to demonstrate the technology, optimise plant feed, plant performance, product quality and recovery, maximise revenue

streams from the KNP and the Goongarrie Hub. This is fundamental to delivering the KNP as a world-competitive Critical Minerals project.

#### Global Patent Application – Mineralised Neutraliser

- Ardea lodged patent applications in Australia (AU2022903389) on 11 November 2022 and with the World Intellectual Property Office (**WIPO**) on 13 June 2023: PCT/AU2023/050520 relates to the use of Mineralised Neutraliser (**MN**) in the unique Ardea process. Ardea filed Australian patent application 2023377792 in 2025, and this application is pending at IP Australia. Research on this workstream continues.
- Current R&D using litho-geochemistry identified a significant MN contribution from high in the regolith profile in what is now termed Relic Saprock (usually within 20m of surface). The results to date from several deposits are encouraging.
- Following the MN research concept, a comparable study is underway for comminution enhancement using ferruginous, and during the Quarter, siliceous ores as grinding media in semi-autonomous grinding (**SAG**).
- Patent applications will continue to be progressed for KNPL to secure the intellectual property rights to the technology developed.

#### CSIRO Collaboration

- A paper on the geology of Goongarrie was published by Australia's national science agency CSIRO, *Geochemical behaviour of gold and critical metals in the Goongarrie Ni-laterites, Western Australia* and can be accessed here: <https://www.sciencedirect.com/science/article/pii/S016913682500410X>.
- Ardea continues to participate in several research initiatives, including Advancement of Indicator Minerals for Mafic-Ultramafic Ore Systems research.

#### Australian Research Council

- Ardea continues to support the Australian Research Council's (**ARC**) Industrial Transformation Training Centre in Critical Minerals.

## 2. KALGOORLIE NICKEL PROJECT – KALPINI HUB

Ardea retains 100% of all non-Goongarrie Hub KNP tenements, collectively termed the Kalpini Hub.

Ardea is undertaking Nickel Laterite scoping level feasibility reviews and Nickel Sulphide target generation for the Kalpini Hub (Kalpini and Bulong Nickel Projects, Emu Lake nickel sulphide) and Yerilla projects (Aubils, Boyce Creek and Jump Up Dam Nickel Projects) as shown in Figure 4.

Results confirmed that the nickel laterite includes Rare Earth Elements (REE)<sup>8</sup>. This is an ongoing Ardea Research and Development (**R&D**) focus, to examine the potential of alternative processing technologies to develop these laterites, with a focus on REE being progressed.

### Kalpini Nickel Project

Ardea's Kalpini Nickel Project is centred 70km northeast of the City of Kalgoorlie-Boulder and covers 121km<sup>2</sup> of contiguous unencumbered granted tenure 100%-owned by Ardea (Figure 4). Regionally, there are two distinct Kalpini ultramafic units, each with a 20-25km strike within Ardea tenure (Figures 5 & 6):

- The Kalpini Eastern Komatiite Belt hosts the Wellington East and Acra North nickel laterite deposits containing 75Mt at 0.73% nickel and 0.04% cobalt, for 549.7kt nickel and 32.6kt cobalt (Appendix 1 - Table 1) (ASX release 30 June 2023). The ultramafics are typical of the Walter Williams Formation style, consisting of a thick 200-600m sheet with olivine orthocumulate upper and lower contacts and core olivine meso-accumulate (Dunitic Sheet Flows-Layered Lava Lakes). The flow core weathers to nickel laterite. Based on current Ardea research, the lower orthocumulate basal contact is considered prospective for nickel sulphide.
- The Kalpini Western Komatiite Belt hosts the Emu Lake, Binti Binti nickel sulphide mineralisation. There are at least two fertile nickel sulphide ultramafic flows at Emu Lake. The volcanics are characterised by a bi-modal comagmatic suite, with each cycle having a footwall dacite volcanic overlain by ultramafic volcanic flows. The ultramafics are orthocumulate flows typically 10-40m thick, with massive, matrix, blebby and disseminated nickel sulphides identified in the Western Ultramafic (**WU**) and Central Ultramafic (**CU**).

### Nickel Laterite Studies

Ardea's and previous drilling confirm that the Kalpini Nickel Project includes Nickel Laterite mineralisation associated with significant Rare Earth Element (**REE**) and Scandium mineralisation (Figure 5).

At the Wellington East Prospect, re-sampling of historic drill pulps by Ardea during 2020 to 2022 identified significant REE and Rare Metal (**RM**) grades within the historic nickel-cobalt laterite mineralisation (ASX Release 14 March 2022), including:

- WERC0371: 12m at 1.70% nickel, 0.151% cobalt, 28g/t scandium from 20m with;
  - **0.24%** Total Rare Earth Oxide (**TREO**) includes neodymium (Nd), praseodymium (Pr), lanthanum (La), cerium (Ce)
  - **1.32%** Total Rare Metal Oxide (**TRMO**) includes titanium (Ti), yttrium (Y), zircon (Zr), niobium (Nb), hafnium (Hf), tantalum (Ta) and tungsten (W)
- VKPRC0112: 4m at 1.66% nickel, 0.102% cobalt, 40g/t scandium from 29m with;
  - **0.13% TREO**
  - **0.72% TRMO**

The Kalpini REE mineralisation occurs within the Regolith Cycle 1 Enrichment Zone of the main Nickel Laterite. In contrast, scandium is more enriched within younger, overlying Regolith Cycle 2 Laterite Duricrust overlying the Nickel Laterite.

Ardea scandium intercepts (ASX Release 22 June 2017) include:

<sup>8</sup> See Ardea ASX Announcement, 14 March 2022

- AKR0015, 20m at 102ppm scandium from 38m
- AKR0017, 6m at 463ppm scandium from 28m.

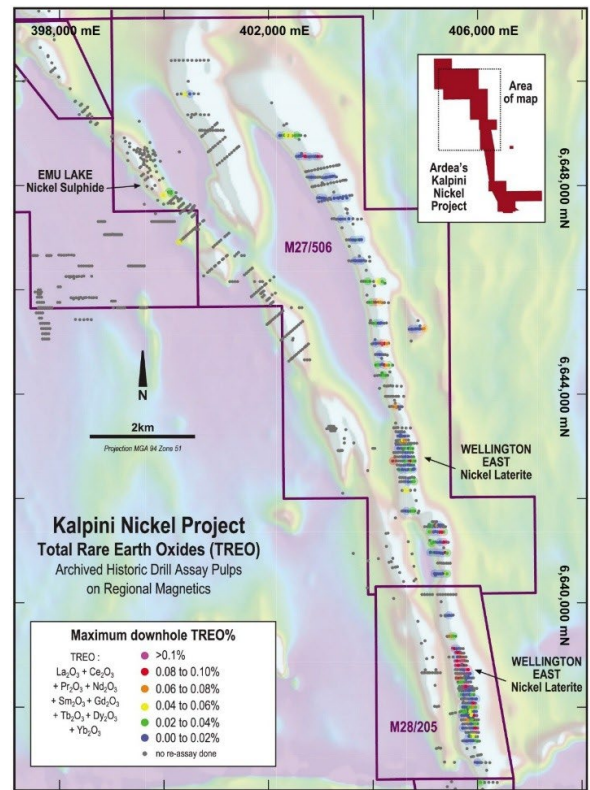

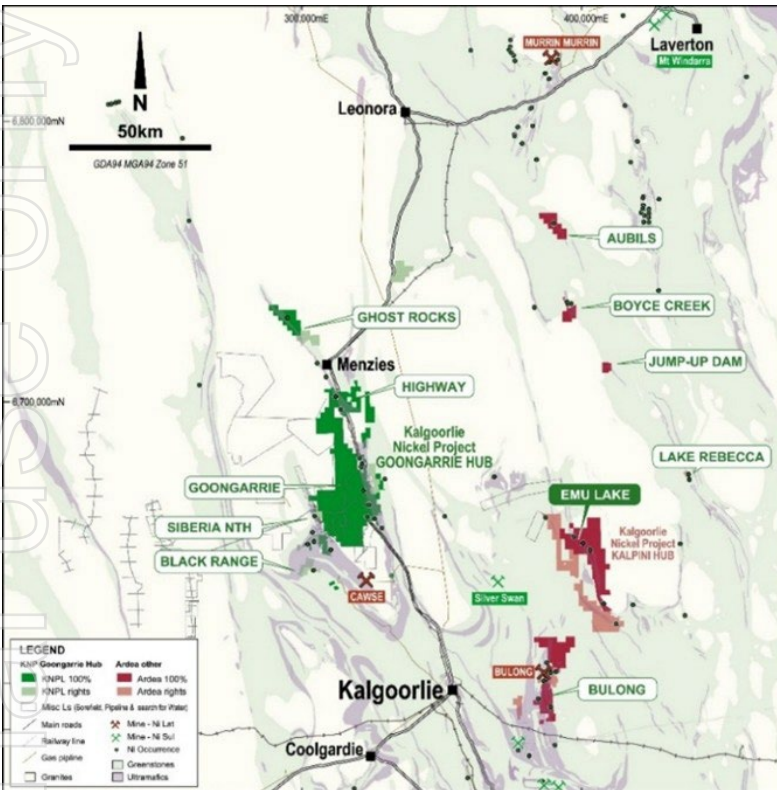

Figure 4:(Left) Ardea tenement plan highlighting the location of the Kalpini Hub, Emu Lake Nickel Sulphide Camp and nickel mines and deposits in the region. Projection MGA 94 Zone 51

Figure 5 (Right): Northern Kalpini Nickel Project, aeromagnetic image showing historic drillholes as black dots, and if available, % Total Rare Earth Oxide (TREO) assays, colour coded as per the map legend.

### Geo-metallurgy

A systematic R&D review of historic geo-metallurgical data is ongoing, aimed at progressing the Kalpini Hub Material Types and plant feed destinations to be compatible with the models now used in the Goongarric Hub DFS. The Kalpini research confirms the Goongarric three regolith cycle model, from pedogenic surface to bedrock:

- Regolith Cycle 3, quartz sand with carbonate cement, <0.1% Ni.
- Regolith Cycle 2, haematite-dominant laterite duricrust and lateritic mottled clay, <0.3% Ni.
- Regolith Cycle 1, goethite-dominant mineralised host, >0.5% Ni, the upper contact with Cycle 2 includes a Relic leached horizon with Void-fill clay (termed “RV” in geomet) that significantly includes Relic Saprock MN carbonate that is invariably recovered in pit designs.

Research on gallium within the Regolith Cycle 2 haematitic duricrust and associations with scandium are ongoing.

Research continues into low-cost processing technologies that may present a viable, alternative route for bringing the Kalpini Hub deposits into operation.

### Nickel Sulphide Exploration

Ardea holds over 20km of strike of the prospective Emu Lake Western Ultramafic sequence, which is largely unexplored and highly prospective for primary magmatic nickel sulphide mineralisation (Figure 6).

Nickel sulphide also has potential value for a nickel laterite operation, as it can be added to any goethite autoclave feed for exothermic heating (optimising steam use), reducing Eh to thus control hexavalent chromium, and adding nickel and sulphur units to the autoclave reaction vessel, thereby typically improving overall nickel recoveries.

An additional benefit is that metal concentrations considered deleterious to conventional nickel sulphide floatation concentrator processing do not affect the HPAL process, opening the possibility of mineral extraction from nickel sulphide deposits that may otherwise be overlooked.

R&D included gravity recovery of a potentially saleable chromite product.

The massive nickel-copper-PGE sulphides discovered by Ardea at the Binti Prospect in the Kalpini Project (notably AELD0003: **2.72m at 5.42% Ni and 0.85% Cu from 391.04m<sup>9</sup>**) occur in the Kurnalpi Terrane.

The plan for the Kalpini Hub is to postpone proposed nickel sulphide drill exploration activities until after the KNPL high priority DFS workstreams have been finalised. Low cost/low impact work such as geo-metallurgical interpretation continued during the March 2026 Quarter.

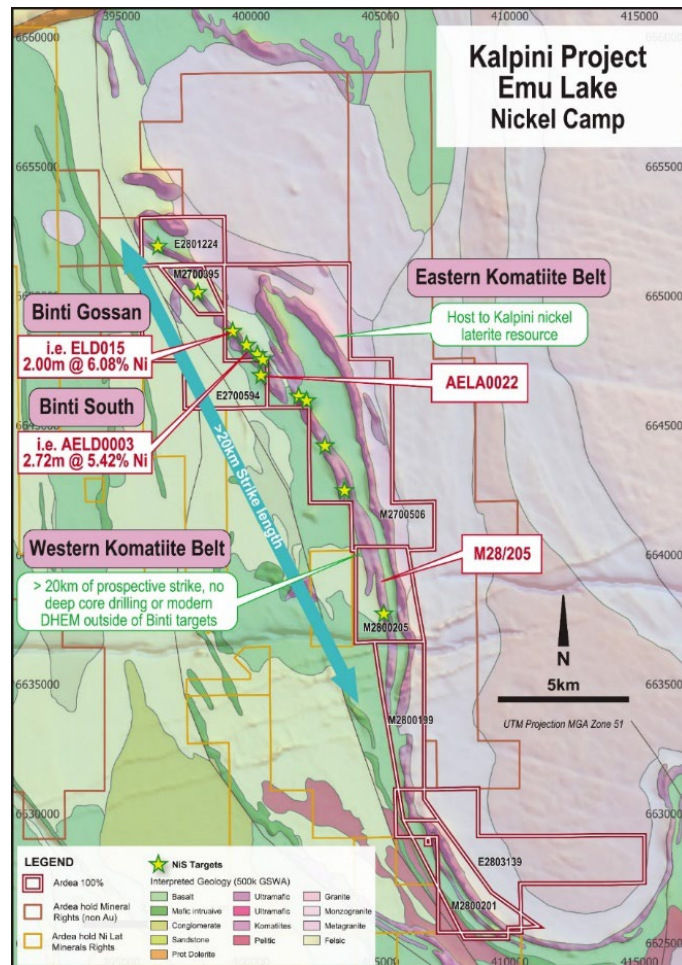

Figure 6: The Kalpini Project showing interpreted geology and Komatiite Belts. The historic nickel laterite resources are located on the Eastern Komatiite Belt, with the Western Belt highly prospective for nickel sulphide (NiS) mineralisation (Ardea ASX release 14 January 2022). Tenements are shown, with documented NiS targets (stars) (Ardea ASX release 2 May 2023). Projection MGA 94 Zone 51.

### Gold and other Metals Targeting

It has long been recognised that Ardea’s project geology is prospective for metals other than nickel. With the Goongarrie Hub DFS nearing completion and Ardea looking ahead to broaden its Critical Minerals commodity coverage, technical reviews were continued in the March 2026 Quarter. These included gold exploration work conducted historically by others and more recently by Ardea. Several previously explored gold targets are being reviewed, along with several new robust targets which have been generated that meet complementary targeting criteria.

Existing prospectivity has also been identified for several Critical Minerals including REEs, PGEs and copper.

<sup>9</sup> ASX Announcement 14 January 2022

### 3. NICKEL AND COBALT SECTOR COMMENTARY

- The London Metal Exchange (**LME**) three-month nickel price was variable due to several international events and announcements. The official price moved from ~US\$16,280 to a spike of US\$18,750 during the Quarter<sup>10</sup>. After the Quarter-end, 3 month prices have continued to appreciate and during April 2026 have been approximately US\$18,750/t. LME Nickel stock levels continued to rise<sup>11</sup>, up ~26,000t to end the Quarter at ~281,000t.
- LME cobalt metal prices rose steadily from ~US\$52,000/t to ~US\$56,000/t, with events after Quarter-end have seen 3 month prices remain over approximately US\$56,000/t<sup>10</sup>.
- Benchmark forecasts demand will continue to grow, driven by an expanding Electric Vehicle (**EV**) and battery energy storage systems (**ESS**) market (Figure 7), with global EV sales up 20% year on year to the end of December 2025 (Rho Motion). Continuing EV subsidy support in many European markets has maintained solid growth in sales. Benchmark (August 2025) and AME (December 2025) analyses shows reducing nickel surpluses, with a predicted supply gap emerging from 2029 (Figure 8). This expected future growth in demand ties in well with expected future supply from the Goongarrie Hub.
- The market awaits developments in Indonesia where miners face reduced mining quotas, some production has been halted due to environmental accidents and where HPAL production might be affected by potential shortage of sulphur supply due to on-going Middle East conflict. Measures the Indonesian government have taken in recent months suggest they are keen to see supply and demand more balanced so they can benefit from higher royalty payments<sup>12</sup>.
- In early March 2026, media outlets reported that Australian Bank, Macquarie Group, believes that nickel prices could climb further this year as a global supply shortage caused by top producer Indonesia's decision to limit its production starts to affect supply, potentially sending the market into a deficit this year. In December 2025, the Indonesian government announced significantly tighter and more regulated nickel supply quotas to combat a global supply glut and boost depressed prices this year<sup>13</sup>. Since then, prices of nickel metal as well as nickel pig iron (NPI), nickel sulphate and nickel ore have all increased. Macquarie analysts see a floor forming around US\$17,000–18,000 per tonne for LME-traded nickel, which is currently trading at near the midpoint of this range.
- Indonesia tightening environmental standards along with declining limonite and saprolite ore grades are likely to have downward pressure on production from the country. Nickel prices spiked mid-December 2025 on news of production quotas aimed to achieve a better royalty return to the country from a higher nickel price. Significant weather events have halted production from several Indonesian projects through the year, and intrinsic vulnerabilities remain in this regard.
- Trade tensions between global blocks and regional political instability are increasing expectations of higher nickel demand for steel products. The shifting geopolitical landscape highlights the need for Governments to collaborate with industry in meaningful ways to reduce supply bottlenecks and ensure resilience.
- On 13 March 2026, the U.S. Department of Energy's (**DOE**) Office of Critical Minerals and Energy Innovation (CMEI) announced a Notice of Funding Opportunity (**NOFO**)<sup>14</sup> for up to \$500 million to expand U.S. critical mineral and materials processing and derivative battery manufacturing and recycling. This is the third round of funding issued through DOE's Battery Materials Processing<sup>15</sup> and Battery Manufacturing and Recycling<sup>16</sup> programs especially in domestic critical minerals processing from raw feedstocks which would increase U.S. processing capacity for critical minerals and materials for use in advanced batteries. These critical

<sup>10</sup> <https://www.lme.com/en/metals/non-ferrous/lme-nickel/#Price+graphs>; <https://www.lme.com/metals/ev/lme-cobalt#Overview>

<sup>11</sup> Source: westmetall.com

<sup>12</sup> <https://www.transamine.com/price-and-review.html>

<sup>13</sup> <https://www.mining.com/nickel-price-jumps-as-indonesias-top-mine-cuts-output/>

<sup>14</sup> <https://infrastructure-exchange.energy.gov/Default.aspx#Foaldde62ae78-ed5c-476c-bd42-d126d61175b9>

<sup>15</sup> <https://www.energy.gov/cmei/manufacturing/battery-materials-processing-grants>

<sup>16</sup> <https://www.energy.gov/cmei/manufacturing/battery-manufacturing-and-recycling-grants>

materials may include traditional battery minerals such as lithium, graphite, nickel, copper, aluminium, as well as other minerals that are contained within commercially available batteries.

- Impacts of DRC's cobalt export quotas have created a supply shortage this year and into 2027 and this may lead to Chinese consumers stockpiling metal which in turn could either keep prices elevated or track higher<sup>14</sup>. Cobalt prices have yet to reflect the risk that Indonesian cobalt production from HPAL facilities could be impacted by potential shortages of sulphuric acid, since Indonesia relies on sulphur imports from the Middle Eastern oil industry.
- Ardea considers the CY2025 downturn in the Australian nickel sector as an opportune time to be completing the DFS and ultimately developing the Goongarrrie Hub, as the Company is experiencing increased access to appropriately skilled and experienced personnel and service providers, allowing KNPL to assemble an elite Owners Team. In this environment, there is increased opportunity to contain costs and maximise Project Value Engineering.

Global Nickel Demand by Market Segment (Base Case)

## 4. CORPORATE

### Finance

The Company's cash position was \$19.75M at Quarter end with no debt. During the period, the company announced a \$5M Placement (before costs) to professional and sophisticated investor clients of Petra Capital Pty Limited. Funds raised will be applied to working capital as the Company finalises the \$98.5M KNPL DFS, and assessment of the Kalpini Hub<sup>17</sup>.

The Consortium is fully funding the DFS costs up to the agreed budget of \$98.5M<sup>18</sup>. As of 31 March 2026, the remaining balance for Consortium DFS funding commitment is \$15.9M.

Issued capital at 31 March 2026 was 219.1M Shares, with 4.5M Performance Rights and 3.0M Options.

### Summary of Expenditures for the Quarter

During the Quarter, the Company incurred a total net expenditure from operating activities of \$5M. This expenditure included \$7.8M expended on exploration and evaluation activities, including \$7.3M for feasibility studies, \$910k on staff costs and \$169k for administrative and corporate expenses.

Included in these costs were payments made to the Directors of the entity and their associates. These payments were Directors' salaries, Executive Directors' salaries, and superannuation payments.

During the Quarter, the Company received \$85k in interest income, \$57k in other revenue, \$3.7M in cash receipts relating to prior period government incentive claims, \$5.0M from the Placement (before costs), and \$8.4M from the Consortium for budgeted DFS funding.

Further details on Quarterly expenditures are included in the Appendix 5B – Quarterly Cashflow Report attached to this Quarterly Report.

### Strategic Partners

- Ardea's majority (65%) owned subsidiary, KNPL, is managing the DFS.
- During the March 2026 Quarter, the Consortium subscribed to a 35% ownership in KNPL and retain the right to increase its ownership in KNPL to 50% upon a positive Final Investment Decision by the Consortium.
- During the March 2026 Quarter, Ardea Managing Director and CEO, Andrew Penkethman, KNPL Project Director, Matthew Read, and their teams continued to welcome the Consortium to their West Perth offices for DFS meetings and to further the collaboration between Ardea, KNPL, and the Consortium.
- Ardea, supported by its strategic advisor, ICA Partners, and the Consortium, continue to discuss the optimum funding strategy after completing the DFS. This is a priority workstream.

### Investor Relations and Stakeholder Engagement

During the March 2026 Quarter, management continued engagement with multiple Federal and State stakeholders. Ardea management and staff also attended several industry events (Figures 9 and 10), including:

- Andrew Penkethman attended Canberra Minerals Week in March 2026, which included strategic meetings and networking with government and industry stakeholders.
- Andrew Penkethman attended the Prospectors and Developers Association of Canada (PDAC) 2026 Convention in Toronto, as an invited delegate of the Western Australia Government, with the delegation also attending investor and stakeholder meetings in New York City and Washington, USA.
- Ardea and KNPL hosted several site visits for key stakeholders.

<sup>17</sup> ASX Announcement 3 March 2026

<sup>18</sup> ASX Announcement 30 August 2024 "KNP – Goongarrie Hub JV Transaction Complete"

- Ardea and KNPL representatives attended the RIU Conference in Fremantle, which included a corporate presentation by Managing Director Andrew Penkethman.

## 5. LOOKING FORWARD

### Kalgoorlie Nickel Project – Goongarrie Hub DFS

Ardea will continue to work with all stakeholders, including the Consortium, industry groups, and Federal, State and Local Governments to ensure Project development is predicated on the highest industry standards, notably in ESG.

- Mineral Resource Estimate and Ore Reserve updates:
  - KNPL and external consultants continue to refine and review the DFS MRE, with the KNPL Team completing the corresponding draft DFS Report Chapters.
  - Work to finalise the mining study (optimisation, pit designs and scheduling) outcomes underpinning the Ore Reserve is continuing.
- Geotechnical reporting to guide infrastructure design and placement is expected to be completed in the coming Quarter.
- Environmental, Heritage, Native Title and Approvals workstreams are continuing.

### Strategic Partner Relationship

- Continue working collaboratively with the Consortium toward completing the DFS and Project development Funding Strategy.

### Stakeholder Engagement

- Community consultation continued with our First Nations groups, the City of Kalgoorlie-Boulder, Shire of Menzies, Southern Ports Esperance and all other stakeholders.
- Continue engagement with groups such as the Australian Federal Government, Austrade, Department of Foreign Affairs and Trade, Department of Industry, Science and Resources, Critical Minerals Office, Export Finance Australia and other global Export Credit Agencies, Major Projects Facilitation Agency, Investor Front Door, WA State Government agencies, and for R&D, the Australian Research Council and CSIRO.

### Investor Relations

Regular engagement with Shareholders and investors will continue in person and through Ardea's website, LinkedIn, and Twitter (X) accounts.

Stakeholders are welcome to subscribe for Ardea updates: [click here](#)

### About Ardea Resources

Ardea (ASX:ARL) is an ASX-listed nickel development company in joint venture with Sumitomo Metal Mining and Mitsubishi Corporation to build, commission and operate a plus 30,000tpa multi-decade nickel operation)<sup>19</sup>:

- Development of the Kalgoorlie Nickel Project (**KNP**) and its sub-set the Goongarrie Hub, a globally significant series of nickel-cobalt and Critical Mineral deposits which host the largest nickel-cobalt resource in Australia and one of the largest in the developed World at **854Mt at 0.71% nickel and 0.045% cobalt for 6.1Mt of contained nickel and 386kt of contained cobalt**. Within the KNP, the Goongarrie Hub has 584Mt for 4.0Mt of contained nickel (Consortium right to earn 50%) and Kalpini Hub has 270Mt for 2.1Mt of contained nickel (Ardea 100% unencumbered interest)<sup>20</sup>, located in a jurisdiction with exemplary Environmental Social and Governance (**ESG**) credentials.
- Advanced-stage exploration at compelling nickel sulphide targets, such as Kalpini, and Critical Minerals targets including scandium and Rare Earth Elements throughout the KNP Eastern Goldfields world-class nickel-gold province, with all exploration targets complementing the KNP nickel development strategy.

<sup>19</sup> Ardea Pre-feasibility Study ASX announcement 5 July 2023

<sup>20</sup> Ardea ASX release 30 June 2023

## COMPLIANCE STATEMENT (JORC CODE (2012))

A competent person's statement for the purposes of Listing Rule 5.22 has previously been announced by the Company for:

1. Kalpini drill results highlight cobalt-nickel mineralisation, and scandium discovery, 22 June 2017.
2. Emu Lake Nickel Sulphide Discovery confirmed with 2.72m at 5.42% Ni, 14 January 2022.
3. High-grade Nickel-Cobalt Confirmed at Kalpini with Scandium and Rare Earth Elements, 14 March 2022.
4. Kalgoorlie Nickel Project Recognition on All Tiers of Australian Government, 21 March 2022.
5. Nickel sulphide anomalism from aircore drilling at Kalpini Project, 2 May 2023.
6. Mineralised Neutraliser Global Patent Lodged, 15 June 2023.
7. Kalgoorlie Nickel Project Mineral Resource Estimate Exceeds 6 Million Tonnes Contained Nickel, 30 June 2023.
8. KNP - Goongarrie Hub Ore Reserve and Feasibility Study Defines +40 Year Operation with Strong Financial Metrics, 5 July 2023.
9. Nickel Sulphide Prospectivity Confirmed and Lithium-Caesium-Rubidium bearing intrusives in Highway EIS drillhole, 15 December 2023.
10. Kalgoorlie Nickel Project - Goongarrie Hub DFS Drilling Underway, 4 July 2024.
11. Kalgoorlie Nickel Project – Goongarrie Hub DFS Underway, 8 July 2024.
12. Goongarrie Hub Project DFS Reaches Major Milestone, 4 July 2025.
13. Heritage Agreement signed with Marlinyu Ghoorlie Claim Group, 3 September 2025.
14. Kalgoorlie Nickel Project – Goongarrie Hub DFS Update, 8 September 2025.
15. Goongarrie South RC Infill Drilling Program Complete, 22 September 2025.
16. Annual Report 2025, 24 September 2025
17. KNP's Major Project Status renewed by Federal Government, 20 October 2025.
18. Results of 2025 Annual General Meeting, 21 November 2025.
19. Kalgoorlie Nickel Project – Goongarrie Hub DFS Update, 8 December 2025.
20. ARL - EFA and US EXIM Letters of Funding Support, 5 February 2026.
21. Half Year Accounts - December 2025, 24 February 2026.
22. Successful \$5M Placement and launch of Share Purchase Plan, 3 March 2026
23. KNP in Japan US Critical Minerals Joint Fact Sheet, 23 March 2026.
24. Kalgoorlie Nickel Project Goongarrie Hub DFS Update, 31 March 2026.

### Competent Persons Statement

#### Resource Estimation, Exploration Results, and Industry Benchmarking

The Resource Estimation, Exploration Results and Industry Benchmarking summaries are based on information reviewed or compiled by Mr Andrew Penkethman, a Competent Person who is a Fellow of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Mr Penkethman is a full-time employee of Ardea Resource Limited and has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Penkethman has reviewed this press release and consents to the inclusion in this report of the information in the form and context in which it appears. Mr Penkethman owns Ardea shares. The Company confirms that it is not aware of any new information or data that materially affects information included in previous announcements, and all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. Ardea wishes to clarify that its current Kalgoorlie Nickel Project (KNP) Mineral Resource Estimate (MRE) following JORC Code (2012) guidelines is: following JORC Code (2012) guidelines is:

KNP Hub	Resource Category	Size (Mt)	Ni (%)	Co (%)	Cont. Ni (kt)	Cont. Co (kt)

1. The Goongarrie Hub is part of KNPL Incorporated Joint Venture. See 30 August 2024 ASX release, KNP Goongarrie Hub Joint Venture Transaction Completion with Japanese Consortium. The Goongarrie Hub Resources are reported on a 100% basis, with Ardea holding a 65% interest.
2. The KNP Kalpini and Yerilla Hubs are known collectively as the Kalpini Hub and remain a 100% owned Ardea asset.

Note: 0.5% nickel cutoff grade used to report resources. Minor discrepancies may occur due to rounding of appropriate significant figures.

The Mineral Resource Estimate information shown in this ASX release has been previously released on the ASX platform by Ardea in ASX release 30 June 2023, in accordance with Listing Rule 5.8. The Mineral Resource Estimate in the above table is inclusive of the Ore Reserve shown in table two of this release.

The Ore Reserve information shown in this ASX release has been previously released on the ASX platform by Ardea in ASX release 5 July 2023, in accordance with Listing Rule 5.9. The Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements noted above and that all material assumptions and technical parameters underpinning the Mineral Resource Estimate and Ore Reserve in the previous market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcements.

#### **ASX CHAPTER 5 COMPLIANCE AND PFS CAUTIONARY STATEMENT**

The Company has concluded that it has a reasonable basis for providing the forward-looking statements and forecast financial information included in this announcement. The detailed reasons for that conclusion are outlined throughout this announcement and all material assumptions, including the JORC modifying factors, upon which the forecast financial information is based are disclosed in this announcement. This announcement has been prepared in accordance with the JORC Code (2012) and the ASX Listing Rules.

The actual results could differ materially from a conclusion, forecast, or projection in the forward-looking information. Certain material factors were applied in drawing a conclusion or making a forecast or projection as reflected in the forward-looking information.

The KNP - Goongarrie Hub Project is at the PFS phase and although reasonable care has been taken to make sure that the facts are accurate and/or that the opinions expressed are fair and reasonable, no reliance can be placed for any purpose whatsoever on the information contained in this document or on its completeness. Actual results and developments of projects and the scandium market development may differ materially from those expressed or implied by these forward-looking statements depending on a variety of factors.

A key conclusion of the PFS, which is based on forward-looking statements, is that the Goongarrie Hub is considered to have positive economic potential.

The Mineral Resource used for the PFS was classified under JORC Code (2012) Guidelines and announced by the Company on 30 June 2023. The cut-off grades adapted for the PFS and reported in Table 2 are the basis of the production target assumed for the PFS.

The Company believes it has a reasonable basis to expect to be able to fund and further develop the KNP - Goongarrie Hub. However, there is no certainty that the Company can raise funding when required.

#### **CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION**

This news release contains forward-looking statements and forward-looking information within the meaning of applicable Australian securities laws, which are based on expectations, estimates and projections as of the date of this release.

This forward-looking information includes, or may be based upon, without limitation, estimates, forecasts and statements as to management's expectations with respect to, among other things, the timing and amount of funding required to execute the Company's programs, development and business plans, capital and exploration expenditures, the effect on the Company of any changes to existing legislation or policy, government regulation of mining operations, the length of time required to obtain permits, certifications and approvals, the success of exploration, development and mining activities, the geology of the Company's properties, environmental risks, the availability of labour, the focus of the Company in the future, demand and market outlook for precious metals and the prices thereof, progress in development of mineral properties, the Company's ability to raise funding privately or on a public market in the future, the Company's future growth, results of operations, performance, and business prospects and opportunities. Wherever possible, words such as "anticipate", "believe", "expect", "intend", "may" and similar expressions have been used to identify such forward-looking information. Forward-looking information is based on the opinions and estimates of management at the date the information is given, and on information available to management at such time. Forward-looking information involves significant risks, uncertainties, assumptions, and other factors that could cause actual results, performance or achievements to differ materially from the results discussed or implied in the forward-looking information. These factors, including, but not limited to, fluctuations in currency markets, fluctuations in commodity prices, the ability of the Company to access sufficient capital on favourable terms or at all, changes in national and local government legislation, taxation, controls, regulations, political or economic developments in Australia or other countries in which the Company does business or may carry on business in the future, operational or technical difficulties in connection with exploration or development activities, employee relations, the speculative nature of mineral exploration and development, obtaining necessary licenses and permits, diminishing quantities and grades of mineral reserves, contests over title to properties, especially title to undeveloped properties, the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other geological data, environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding, limitations of insurance coverage and the possibility of project cost overruns or unanticipated costs and expenses, and should be considered carefully. Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company. Prospective investors should not place undue reliance on any forward-looking information.

Although the forward-looking information contained in this news release is based upon what management believes, or believed at the time, to be reasonable assumptions, the Company cannot assure prospective purchasers that actual results will be consistent with such forward-looking information, as there may be other factors that cause results not to be as anticipated, estimated or intended, and neither the Company nor any other person assumes responsibility for the accuracy and completeness of any such forward-looking information. The Company does not undertake, and assumes no obligation, to update or revise any such forward-looking statements or forward-looking information contained herein to reflect new events or circumstances, except as may be required by law.

**No stock exchange, regulation services provider, securities commission or other regulatory authority has approved or disapproved the information contained in this release.**

Notes:

1. The Ore Reserve is reported in accordance with JORC Code (2012). The Ore Reserve information shown in this ASX release has been previously released on the ASX platform by Ardea in ASX release 5 July 2023, in accordance with Listing Rule 5.9.
2. Ore reserves are reported at a cut-off of 0.5% Ni for primary feed stock to the processing facility, plus mineralised neutraliser as ore at a cut-off of 0.25% Ni and Loss on Ignition (LOI) above 25%.
3. The Ore Reserve was evaluated using a base price of US\$22,000/t for Ni and US\$51,000/t for Co at 85% payable for a Mixed Hydroxide Precipitate (MHP) product, and an exchange rate 0.69 USD/AUD.
4. Ore Reserves account for mining dilution and mining ore loss.
5. Ore Reserves are reported on a Dry Tonnage Basis.
6. Proven Ore Reserves are based on Measured Mineral Resources only and Probable Ore Reserves are based on Indicated Mineral Resources only.
7. The sum of individual amounts may not equal due to rounding.
8. This Ore Reserve estimate is for a subset of the KNP Goongarrie Hub deposits Mineral Resources, being Goongarrie South, Big Four / Scotia Dam, Goongarrie Hill, Highway and Siberia North. Those Mineral Resources are inclusive of the Ore Reserves shown in this table.
9. The Goongarrie Hub Ore Reserve is reported here on a 100% basis, with Ardea holding an 65% interest.
10. The Ore Reserve Summary was detailed in ARL ASX PFS Announcement, 5 July 2023.

4.3	Net cash from / (used in) investing activities (item 2.6 above)	(5)	(16)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	13,131	37,795

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (9 months) \$A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	<b>Cash and cash equivalents at end of period</b>	<b>19,750</b>	<b>19,750</b>

5. Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts		Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	14,051	5,989
5.2	Call deposits	-	-
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	5,699	5,647
5.5	<b>Cash and cash equivalents at end of quarter (should equal item 4.6 above)</b>	<b>19,750</b>	<b>11,636</b>

6. Payments to related parties of the entity and their associates		Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	280
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

*Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.*

*Salaries, Directors fees and Consulting fees paid to Directors - \$252k*  
*Payments for Kalgoorlie Office to a KMP related entity for the quarter - \$28k*

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7.	<b>Financing facilities</b>	<b>Total facility amount at quarter end \$A'000</b>	<b>Amount drawn at quarter end \$A'000</b>
	<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (funding support arrangement)	98,500	82,807
7.4	<b>Total financing facilities</b>	98,500	82,807
7.5	<b>Unused financing facilities available at quarter end</b>		15,693
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
	<p>Ardea has entered into a Cooperation Agreement and Shareholders's Agreement with a Japanese consortium to form a joint venture to develop the Kalgoorlie Nickel Project - Goongarrie Hub (Ardea ASX announcements: 26 April 2024 and 2 September 2024).</p> <p>The Consortium will fund 100% of the DFS costs up to the agreed budget of approximately A\$98.5 million. At the conclusion of the DFS spend, the Consortium will have subscribed to a 35% ownership in KNPL and retain the right to increase its ownership in KNPL to 50% upon a positive Final Investment Decision (FID) decision by the Consortium to build, commission and operate a plus 30,000tpa multi-decade nickel operation.</p> <p>On 26 April 2024, Ardea, Ardea's subsidiary Kalgoorlie Nickel Pty Ltd (KNPL) and Sumitomo Metal Mining Co. Ltd (SMM) agreed funding support arrangements to facilitate the progression of the early DFS works while the conditions precedent to the Cooperation Agreement are being satisfied. Under the funding support arrangements, the parties have agreed a contribution plan under which SMM will advance up to A\$12,000,000 in funding to KNPL, as and when funds are required to facilitate agreed early DFS works. This funding support agreement has ceased upon the signing of the Shareholders's Agreement – with the Consortium funding 100% of the DFS costs up to the agreed budget of approximately A\$98.5 million.</p>		

8.	<b>Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1	Net cash from / (used in) operating activities (item 1.9)	(5,012)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(5,012)
8.4	Cash and cash equivalents at quarter end (item 4.6)	19,750
8.5	Unused finance facilities available at quarter end (item 7.5)	15,693
8.6	Total available funding (item 8.4 + item 8.5)	35,443
8.7	<b>Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	7
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: N/A	

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

*Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.*

### Compliance Statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 29 April 2026

Authorised by: Ardea Board of Directors

### Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.

**Notes:**

1. Britannia Gold Ltd retains precious metal rights.
2. Impress Ventures Ltd has a 10% equity free-carried interest to a decision to mine.
3. Norton Gold Fields Limited retains certain Au claw-back rights and royalty receivable.
4. Ora Banda Mining Ltd holds Au-Ag rights while Ardea retains all non Au-Ag rights.
5. Acra – Held by Essential Metals Limited, wholly owned subsidiary of Develop Global. Ardea retains rights to Ni laterite ore.
6. Black Mountain Gold Limited all rights with exception of Ardea retaining Ni rights.
7. Ramelius Resources Limited assignee (Maximus Resources Ltd) all rights, Ardea pre-emptive right to Ni-Co laterite.
8. Paddington Gold Pty Ltd all mineral rights (except nickel sulphide) while Ardea retains rights to nickel laterite ore.
9. By Sale Agreement between Northern Star (Carosue Dam) Pty Ltd and Kalnorth Gold Mines Ltd, Northern Star (Carosue Dam) Pty Ltd now owns Au rights while Ardea retains non-Au rights.
10. Northern Star (Kanowna) Limited holds Au rights. Ardea retains non-Au rights.
11. The Option to purchase the tenements was transferred to Arika Resources Limited (renamed from Metalicity Limited) on 21 November 2020. Ardea retains non Au rights. By a Deed of Covenant, Assignment & Assumption dated 30 July 2025, Ardea has assigned and Kalgoorlie Nickel Pty Ltd has assumed Ardea's rights under the Option agreement.
12. The Mt Zephyr/Darlot East tenements were farmed out to Red 5 Limited on 18 November 2020 whereby Red 5 Limited earned 80% equity interest. Red 5 Limited merged with Silver Lake Resources Limited in late 2024 and the combined entity is known as Vault Minerals Limited. Ardea is free carried to Decision to Mine.
13. Purchase of tenements by Binding Terms Sheet and Alluvial Rights Agreements dated 4 June 2021 between the Seller Steven Lionel Kean and Ardea Resources Limited. Ardea retains non Au rights.
14. By way of the Demerger Implementation Deed executed between Ardea Resources Limited, Kalgoorlie Gold Mining Limited, Yerilla Nickel Pty Ltd, Kalgoorlie Nickel Pty Ltd and Ardea Exploration Pty Ltd dated 9 September 2021, certain tenements have been transferred to Kalgoorlie Gold Mining Limited. For certain other tenements, Ardea Resources Limited or its subsidiaries will continue to hold and retain non-gold rights while Kalgoorlie Gold Mining Limited retains gold rights only.
15. Tenement Swap Agreement between Brightstar Resources Limited subsidiaries, Goongarrie Operational and Mining Pty Ltd and Menzies Operational and Mining Pty Ltd, and Ardea Resources Limited subsidiary, Kalgoorlie Nickel Pty Ltd dated 15 July 2023. E29/1062 Infrastructure Rights only. E29/981, Brightstar has lithium and gold rights.
16. The Japanese Consortium may acquire 50% equity of Kalgoorlie Nickel Pty Ltd, being the tenement holder, by completing the Goongarrie Hub DFS and making a positive FID, refer to ASX announcements 26 April 2024 and 30 August 2024. During the current Quarter, the Japanese Consortium has earned a combined holding of 35% in Kalgoorlie Nickel Pty Ltd (ASX Announcement 31 March 2026) under the terms of the Cooperation Agreement.

**Interests in Mining Tenements and Petroleum Tenements Acquired or Increased during the March Quarter 2026**
