

29 April 2026

March 2026**Summary****Cash and Investments - \$86 million (as at 31 March 2026)**

- Cash Term Deposits: \$4 million (maturity greater than three months)
- Cash at hand: \$32.9 million
- ASX listed Investment: Tungsten Mining NL (ASX: TGN)
 - 177.5 million ordinary shares held
 - Market value of \$48.8 million, based on a closing price of \$0.275 per share as at 31 March 2026

Tungsten - Strategic Critical Mineral Investment

- Tungsten Mining NL commenced an Economic Evaluation of its Watershed Project to assess accelerated development pathways on the tungsten price strength.

Magnesite - Prospect Ridge Project

- An extension of term of Exploration Licence has been granted.

Projects Opportunities

- GWR continues to monitor and review potential new project opportunities.

Royalty Interests - Iron and Gold

GWR holds royalty in:

- Iron ore at Gold Valley's Wiluna West Iron Ore Project.
- Gold at Western Gold Resources' Gold Duke Project.
- GWR remains the registered holder of the Wiluna tenements pending transfer to Gold Valley, with engagement ongoing to complete the transfer, including the State royalty payment.

GWR Chairman, Mr Gary Lyons commented

"GWR ended the quarter with a robust cash and investment position.

An extension of term was granted for the Prospect Ridge Exploration Licence, with work focused on updating the project work plan.

GWR holds a royalty interest at the Wiluna West Iron Ore Project and still remains the registered holder of the relevant tenements. GWR continued to engage with Gold Valley and the Western Australian Government, including relevant government departments, to progress the transfer of the tenements to Gold Valley."

About GWR Group

GWR Group Limited ("GWR") is an independent, Australian resource house, focused on creating shareholder wealth through the development of high-quality mineral exploration and development projects.

GWR Group has a portfolio of mineral commodity projects that includes projects held in its own right, in joint ventures and indirectly through investment in other listed entities. We aim to create value through operational excellence and innovation in exploration and project development. We will collaborate with our stakeholders to build a sustainable mining business and the respect of our peers.

Corporate Summary

Overview of Assets

GWR has a portfolio of resources projects that includes projects held directly, in its own right, or indirectly through investment in other listed entities. These include:

- **Magnesite** - Prospect Ridge Project with 25 million tonne inferred Mineral Resource Estimate at 42.4% MgO;
- **Tungsten** – Investment in Tungsten Mining NL (ASX:TGN);
- Cornerstone **Investment** - EMetals Ltd (ASX:EMT); and
- A **Royalty** interest in the Wiluna West Iron Ore assets.
- A **Royalty** interest in the Wiluna West Gold assets – Gold Duke Project.
- Significant **Cash reserves**

Prospect Ridge Magnesite Project

GWR holds a 70% interest in the advanced Prospect Ridge Magnesite project located in northwest Tasmania with Dynamic Metals Limited (ASX: DYM) holding 30%. The Project is an advanced asset where a substantial amount of work has previously been undertaken, including diamond drilling, metallurgical test work, hydrological test work, resource modelling and feasibility studies.

The Prospect Ridge Magnesite project area is located in northwest Tasmania, 40 km southwest of the Port of Burnie. It sits upon a granted Exploration Licence (EL5/2016), it is 11 km long and 51 km² in area and contains two magnesite deposits, the Arthur River and Lyons River deposits containing the third largest Magnesite inventory in Australia.

The Arthur River prospect is a large high grade magnesium deposit where previous exploration has identified an Inferred Mineral Resource estimate of 25.1Mt @ 42.4% MgO (Table 1) (refer to ASX announcement dated 27th January 2022).

The Prospect Ridge Magnesite Project, with GWR as an industry partner, forms part of a Federal Government-funded Regional Research Collaboration (RRC) Grant. The research is being undertaken by the University of Tasmania's Centre for Ore Deposit and Earth Sciences (CODES).

Table 1
Arthur River Inferred Mineral Resource Estimate

Cut-Off (MgO (%))	Tonnes	MgO (%)	SiO ₂ (%)	Fe ₂ O ₃ (%)	CaO (%)
36	36,820,000	41.1	5.9	1.7	2.9
38	32,090,000	41.7	5.4	1.6	2.8
40	25,120,000	42.4	4.8	1.4	2.6
42	15,280,000	43.3	4.2	1.3	2.2
44	3,040,000	44.5	3.0	1.0	1.9

(Refer ASX Announcement 27th January 2022).

GWR completed a diamond drilling program at the Arthur River deposit consisting of six HQ diamond drill holes for 741.9 m (refer to ASX announcement dated 21st June 2024).

On 1 April 2026, an Extension of Term was approved for EL 5/2016 by the Tasmanian Government, that approval includes the following exploration study program:

- Metallurgical testwork
- Update of the Arthur River Mineral Resource estimate
- Commence a scoping study for Arthur River and Lyons River
- Undertake surveys at Lyons River

Activities during the quarter focused on planning and preparatory work for the execution of the exploration study program, in anticipation of the granting of an extension of term. This included a review of historical data and preliminary planning to support the development of a more detailed work program.

More detailed work programs are planned to be implemented in the next quarter, subject to completion of planning and receipt of relevant approvals.

About Magnesium and Its Market

Magnesite is the principal ore for Magnesium which is the lightest structural metal known to man being two thirds lighter than aluminium. The Australian government has classified Magnesium as a critical mineral as are lithium and nickel.

The principal uses for Magnesium are as follows:

- Magnesium metal and its alloys are used extensively in automotive and aerospace industries in light weight bodies, engines, and other parts indispensable in modern vehicles (including EV's).
- Magnesium oxides are used in production of refractory linings necessary for production of steel, cement, and glass.
- Magnesium-ion batteries have the potential to improve on lithium-ion batteries in every phase of the lifecycle. In addition to increased energy capacities, magnesium-ion batteries have numerous other advantages. Magnesium does not tend to form dendrites, resolving the safety issues associated with lithium-ion batteries. As such, a magnesium-ion battery can last substantially longer than a lithium-ion battery. Additionally, magnesium-ion batteries can be charged faster since lithium-ion batteries charge times are constrained to avoid dendrite formation. Magnesium is also reported to be the eighth most abundant element on earth's crust alleviating depletion risk and potentially providing a cheaper product.

In September 2021, the Australian Federal Government announced that it will establish a \$2 billion fund to finance critical minerals production in Australia, it was stated that "Critical minerals include resources that are used in technologies such as mobile phones, computer monitors, electric cars and solar panels, such as lithium, magnesium and nickel.

Wiluna West Iron Ore Project Royalty

GWR held a \$2.00 per dry metric tonne royalty (Royalty) in respect of all iron ore won from the Wiluna West Iron Ore Project (excluding M53/1018) and exported or otherwise sold. This royalty was pursuant to binding sale agreement with Gold Valley West Wiluna Pty Ltd (Gold Valley). Refer to ASX announcement 21st December 2023 titled “*Sale of Wiluna West Iron Ore Project*”.

Project royalty terms amended

In recognition of the lower prices in the market for iron ore since the Sale Agreement was executed, on 31st March 2025 GWR and Gold Valley agreed to amend the Sales Agreement (Variation). The key terms of the Variation are as follows:

With effect from 1st April 2025 and ending on 31st March 2027 (Revised Royalty Period), a revised royalty will be payable by Gold Valley at a rate of (Revised Royalty):

- if the IODEX (Iron Ore Platts 62%) is at or below USD99.99, no amount is payable;
- if the IODEX (Iron Ore Platts 62%) is between USD100 and USD109.99, A\$1.00 per dry metric tonne;
- if the IODEX (Iron Ore Platts 62%) is between USD110 and USD114.99, A\$1.50 per dry metric tonne; and
- if the IODEX (Iron Ore Platts 62%) is above USD115, A\$2.00 per dry metric tonne,

The Revised Royalty will be payable until the end of the Revised Royalty Period, subject to Gold Valley's continued compliance with certain key terms of the Transaction Agreement, including Gold Valley paying the Revised Royalty in accordance with applicable payment terms. At the end of the Revised Royalty Period the royalty payable will revert back to the original Royalty.

Status of the Project tenements

The registration of the transfer of the Project tenements from GWR to Gold Valley has yet to be processed by the Department of Energy, Mines, Industry Regulation and Safety. Gold Valley has advised GWR that registration has yet to occur due to RevenueWA having requested Gold Valley provide a valuation in relation to the Transaction Agreement to assist RevenueWA making their assessment of the dutiable value of the transaction.

During the quarter, GWR continued to engage with Gold Valley and the Western Australian Government, including relevant government departments, to progress the transfer of the tenements to Gold Valley.

Whilst GWR remains the registered holder of the tenements, as a matter of law GWR retains liability to the State of Western Australia for the payment of State royalties and any rehabilitation obligations that may crystallise in respect of those tenements. However, Gold Valley under the Sale Agreement, has contractually assumed responsibility for the payment of those State royalties and the assumption of those obligations.

Refer to ASX announcements dated 1st April 2025 “*Wiluna Royalty Terms Amended*” and the Half Year Report for December 2025 released to the ASX dated 9th March 2026 “*Half Yearly Report and Accounts*”

Further details, including relevant financial matters, are set out in the corporate section of this report.

Wiluna West Gold Project Royalty

GWR holds a royalty on gold recovered from M53/1016-1, M 53/1017-1 and M53/1018-1 on the Gold Duke Project owned by Western Gold Resources Ltd (ASX:WGR). The gold royalty held is \$10 per troy ounce of gold until a total of 50,000 troy ounces of gold have been recovered; and thereafter \$5 per troy ounce of gold.

Refer to ASX announcement 7th March 2024 “*GWR Completes Settlement – Sale of Wiluna West to GV*”.

WGR announced it had decided to mine the Gold Duke Project unlocking potential royalty revenue stream for the Company. Refer to WGR announcement 24th December 2025 “*Decision to Mine - Gold Duke Project*”.

Project Due Diligence

GWR has undertaken a rigorous review of numerous potential transactions. The Board, in collaboration with its corporate advisors, has cast a wide net, assessing projects of significance that could be transformational for the company.

GWR has evaluated opportunities across multiple global jurisdictions, including Australia, North America and Africa, and the focus remains on advanced-stage projects with existing resources and reserves, strong cash flow potential, and significant exploration upside. Commodities of interest include gold, copper, silver, antimony, rare earth elements (REE), iron ore, bauxite, niobium, coal, lithium, and tantalum.

As part of this strategy, GWR continues to undertake due diligence on projects that align with the company’s broader objective of securing projects with strong fundamentals, existing infrastructure, and near-term cash flow potential.

Due Diligence Activities

During the quarter, the Company continued to undertake due diligence activities on potential project opportunities as part of its ongoing strategy to identify and assess value.

In the prior quarters, the Company paid a deposit of \$420,000, which is currently held in trust in relation to a potential acquisition that GWR subsequently withdrew from. Under the terms of the agreement, these funds may be repayable to GWR under certain circumstances, and management is confident that the deposit will be recovered. As at 31 March 2026, the funds remained held in trust.

GWR elected to withdraw from the process after determining that the opportunity did not meet its investment criteria.

As GWR continues to progress its Prospect Ridge Magnesite Project, the company remains steadfast in identifying and executing strategic transactions that can deliver transformational value to shareholders.

- The Company will keep the market informed on the progress of its due diligence.
- Ongoing efforts to secure advanced-stage projects across key commodities will remain a core priority.
- Financial strength and capital discipline remain fundamental pillars of GWR’s corporate strategy.
- Committed to executing disciplined transactions.

Refer to ASX announcement 17th February 2025 titled “*GWR Corporate Update*”.

ASX Listed Investments – Critical Minerals

As at 31 March 2026, GWR held the following ASX listed securities:

Investment in Tungsten Mining NL

The Company holds a strategic investment in Tungsten Mining NL (ASX: TGN), comprising 177.5 million ordinary shares, representing 12.71% of TGN's issued capital. Based on the closing price of \$0.275 per share on 31 March 2026, this investment had a market value of approximately \$48.8 million.

On 9 February 2026, the Company's substantial holding for Tungsten Mining NL decreased from 15.89% to 12.71% following the issue of new shares by Tungsten Mining NL as the Company did not participate in a capital raising. Refer to ASX announcement 9th February 2026 titled "*Change in substantial holding for TGN*".

The valuation is based on the quoted market price at the reporting date. The Company notes that this investment represents a strategic holding and is subject to market price fluctuations.

Investment in EMetals Limited

The Company holds 30.8 million ordinary shares in EMetals Limited (ASX: EMT). Based on the closing price of \$0.011 per share on 31 March 2026, the investment had a market value of approximately \$0.3 million.

The valuation is based on the quoted market price at the reporting date. This investment represents a minor holding and is subject to market price fluctuations.

Tungsten Market View and Strategic Holdings in Tungsten Mining (ASX:TGN)

GWR reiterates its strong conviction in the tungsten market..

- China accounts for the majority of global tungsten supply, and recent restrictions are expected to tighten the market, leading to potential upward price pressure. Constrained supply and increasing demand for Tungsten has resulted in significant price gains.
- GWR remains confident in the long-term strategic value of its TGN holding, particularly given the tightening supply-demand balance.
- In prior quarters, TGN announced the results of its Mt Mulgine Scoping Study, reporting a Pre-Tax NPV of approximately A\$1.0 – A\$1.4 billion.
- TGN also reported that tungsten prices continue to strengthen and a new exploration target at Mt Mulgine of 165 to 200 Mt at a grade of 0.10–0.12 % WO₃ and 180–220 ppm Mo, for 165–240 Kt of WO₃ and 30–36 Kt of Mo.
- Tungsten Mining NL announced that it has commenced an Economic Evaluation of its Watershed Project on the Tungsten price strength to assess development pathways.

This information is sourced from TGN's ASX announcements dated 6th November 2025 "Mt Mulgine Study Reveals Strategic Critical Minerals Project" and 19th November 2025 "Mt Mulgine Supplementary Scoping Study Presentation" and 1st December 2025 "New Exploration Target Identified at Mt Mulgine" and 5th February 2026 "Watershed - Assessing Accelerated Development Pathways".

The Company notes that the Mt Mulgine Scoping Study results and commodity price outlook are based on assumptions and estimates by TGN and are subject to risks and uncertainties.

Corporate

Cash Position

At the end of the quarter Cash and Terms deposits totalled \$36.9 million, consisting of:

- Cash Term Deposits: \$4 million (maturity greater than three months)
- Cash: \$32.9 million

Term Deposits with Original Maturity Exceeding Three Months

These \$4 million cash term deposits are classified as investing activities under AASB 107 and excluded from cash as they have a maturity greater than three months.

Other Corporate Matters

In accordance with the reporting requirements of ASX Listing Rule 5.3, the Company advises that approximately \$80,000 were paid on exploration and evaluation activities during the quarter. This expenditure primarily related to work undertaken on the Prospect Ridge Magnesite Project. Further details provided in the Prospect Ridge Magnesite Project section of this report.

Staff costs for the quarter decreased to approximately \$35,000, reflecting the recharge of some wage costs to other parties.

There were no mining development or production activities conducted during the quarter.

Securities

During the quarter, the Company issued 1,877,500 fully paid ordinary shares to holders (or their nominees) of unlisted Performance Rights. These Performance Rights had previously vested following satisfaction of the applicable performance criteria and vesting conditions.

The Performance Rights were issued under the Company's Employee Incentive Plan dated 29 November 2023, which was approved by Shareholders at the 2023 Annual General Meeting.

This included the issue of shares to the following directors, Wai Ho Law (500,00 shares), Gary Lyons (600,000 shares) and Teck Wong (500,000 shares).

As at quarter end, the Company had 325,484,155 ordinary listed ordinary shares on issue, together with 5,632,500 unlisted performance rights. There were nil securities held in escrow.

Refer to ASX announcement 10th March 2026 titled "*Application for quotation of securities - GWR*".

Related Party Transactions

During the quarter GWR made payments to related parties of approximately \$125,000 and this comprised of \$96,000 Director's remuneration (including consulting fees) and \$29,000 to Tungsten Mining NL for property lease and administration expenses.

Wiluna West Iron Ore Project

Gold Valley Iron Royalties

During the quarter, GWR invoiced Gold Valley in respect of royalties pursuant to the Wiluna West Iron Ore Project Royalty, as amended, due quarterly production activity by Gold Valley and for certain past project costs.

As reported in the December 2025 Half Year Financial Report, Gold Valley released \$800,000 in funds previously held in trust to GWR, reducing the outstanding receivable balance and releasing GWR from the associated obligation. As at 31 March 2026, these royalties and other receivables (excluding state government royalties) due from Gold Valley to GWR totalled \$1,851,145 (31 December 2025: \$2,380,122).

Gold Valley State Royalties

As at the end of the quarter, and as at the date of this report, Gold Valley had not remitted \$6,996,557 to the State of Western Australia in respect of the December 2025 quarterly State royalties. This amount does not include the March 2026 quarter, which is due at the end of April 2026.

Gold Valley has advised GWR that it is in discussions with the State Government and relevant government departments regarding this royalty payment, and GWR understands that those payment discussions are ongoing.

Whilst GWR remains the registered holder of the tenements, as a matter of law GWR retains liability to the State of Western Australia for the payment of State royalties and any rehabilitation obligations that may crystallise in respect of those tenements. However, Gold Valley under the Sale Agreement, has contractually assumed responsibility for the payment of those State royalties and the assumption of those obligations.

Tenement Interests

A schedule of the Company's interest in mining tenements as at 31 March 2026 is appended at Appendix 1.

ENDS

Previously Reported Results

GWR Group Limited any confirms that it is not aware of any new information or data that materially affects the information included in the ASX announcements and that all material assumptions and technical parameters underpinning the estimates, of Mineral Resources and Ore Reserves, in original ASX announcements continue to apply and have not materially changed. GWR Group Limited confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original ASX announcements.

Cautionary Statement

This announcement contains forecasts and forward-looking information which are provided for information purposes only. Such forecasts, projections and forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other factors, many of which are beyond the control of GWR Group Limited. Actual results, performance or developments may differ materially from those expressed or implied.

To the maximum extent permitted by law, GWR Group Limited, its directors, officers, employees, advisers and agents disclaim any obligation or undertaking to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, and accept no responsibility or liability for any loss or damage arising from reliance on this announcement or any information contained in it.

There are a number of risks, both specific to GWR Group Limited and of a general nature, which may affect the future operating and financial performance of GWR Group Limited and the value of an investment in GWR Group Limited. These risks include, but are not limited to, tenement title and renewal risks (including risks specific to the Wiluna tenements), economic conditions, stock market fluctuations, commodity demand and price movements, timing of access to infrastructure, timing of environmental and other regulatory approvals, regulatory risks, operational risks, reliance on key personnel, reserve and resource estimation risks, native title risks, cultural heritage risks, foreign currency fluctuations, and mining development, construction and commissioning risks.

The Company notes that the Mt Mulgine Scoping Study results and commodity price outlook are based on assumptions and estimates by Tungsten Mining NL and are subject to risks and uncertainties including these mentioned above.

Appendix 1 - Schedule of interests in mining tenements

(a) Tenements held at 31 December 2025

Location	Tenement	Percentage held	Notes
Western Australia			
Wiluna			
Refer ASX Release dated 21 Dec 2023, 22 Dec 2023, 11 January 2024 and 7 March 2024.			
Tasmania			
Prospect Ridge			
Prospect Ridge	EL5/2016	70%	

Excludes tenement applications and Wiluna tenements previously disposed of to Gold Valley; however, the Company remains the registered holder of those tenements..

(b) Tenements acquired and disposed of during the quarter

The Company did not dispose or acquire any tenements during the quarter.

(c) The beneficial percentage interests held in farm-in or farm-out agreements as the end of the quarter

The Company also holds a 70% interest in the Prospect Ridge project, containing a granted exploration licence (EL5/2016) in Tasmania.

(d) The beneficial percentage interests in farm-in or farm-out agreements acquired or disposed of during the quarter

The Company did not dispose or acquire any tenements during the quarter.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
6. AASB 107 classifies term deposits with original maturity > 3 months as investing activities, not cash equivalents.
